

Contents

PART I	<i>Principles</i>	1
	Chapter 1 Introduction	3
	I. Basic Concepts 6	
	A. What a test is 6	
	B. Types of tests 7	
	C. Psychological testing and individual differences 10	
	II. Plan for the Book 10	
	A. Principles of psychological testing 10	
	B. Applications of psychological testing 11	
	C. Issues of psychological testing 11	
	III. Historical Perspective 12	
	A. Early antecedents 12	
	B. Charles Darwin and individual differences 13	
	C. Experimental psychology and psychophysical measurement 14	
	D. The evolution of intelligence and standardized achievement tests 16	
	E. Personality tests: 1920–1940	
	F. The emergence of new approaches to personality testing 22	
	G. The period of rapid changes in the status of testing 23	
	H. The current environment 25	
	Summary 26	
	Chapter 2 Norms and Basic Statistics for Testing	28
	I. Why We Need Statistics 29	
	II. Scales of Measurement 30	
	A. Properties of scales 30	
	B. Types of scales 32	

- III. Frequency Distributions 34
- IV. Percentile Ranks 36
- V. Percentiles 40
- VI. Describing Distributions 41
 - A. Mean 41
 - B. Standard deviation 42
 - C. Z score 45
 - D. Standard normal distribution 48
 - E. McCall's *T* 53
 - F. Quartiles and deciles 54
- VII. Norms 56
 - A. Age-related norms 57
 - B. Tracking 57
 - C. Criterion-referenced tests 61
- Summary 62

Chapter 3 Correlation and Regression **63**

- I. The Scatter Diagram 64
- II. Correlation 66
- III. Regression 67
 - A. The regression line 67
 - B. The best-fitting line 69
 - C. Testing the statistical significance of a correlation coefficient 78
 - D. How to interpret a regression plot 80
- IV. Other Correlation Coefficients 84
- V. Terms and Issues in the Use of Correlation 86
- VI. Multivariate Analysis (Optional) 90
 - A. General approach 90
 - B. An example using multiple regression 91
 - C. Discriminate analysis 92
 - D. Factor analysis 93
- Summary 96

Chapter 4 Reliability 98

- I. History and Theory of Reliability 99
 - A. Conceptualization of error 99
 - B. Spearman's early studies 100
 - C. Basics of test score theory 100
- II. Models of Reliability 103
 - A. Sources of error 104
 - B. Time sampling: Test-retest method 104
 - C. Error associated with the use of particular items 106
 - D. The domain sampling model 107
 - E. Reliability of a difference score 116
 - F. Reliability of criterion-referenced tests 120
- III. Reliability in Behavioral Observation Studies 120
- IV. Connecting Sources of Error with Reliability Assessment Method 121
- V. Using Reliability Information 124
 - A. Standard errors of measurement and the rubber yardstick 124
 - B. How reliable is reliable? 126
 - C. What to do about low reliability 126
- Summary 130

Chapter 5 Validity 132

- I. Learning to Ask About the Validity Evidence 133
 - A. The definition of validity 133
 - B. Nature of evidence 134
- II. Types of Validity 134
 - A. Face Validity 135
 - B. Content-related validity 135
 - C. Criterion-related validity 137

- D. Construct-related validity 147
- E. Relationship between reliability and validity 152

Summary 153

Chapter 6 Building a Test **155**

- I. Item Writing 156
 - A. Item formats 156
 - B. Other possibilities 163
- II. Item Analysis 164
 - A. Item difficulty 164
 - B. Discriminability 165
 - C. Pictures of item characteristics 168
 - D. Items for criterion-referenced tests 173
 - E. Limitations of item analysis 175

Summary 175

Chapter 7 Selection and Decision Analysis **177**

- I. The Test Manual 178
- II. Base Rates and Hit Rates 180
 - A. Taylor-Russell tables 184
 - B. Utility theory and decision analysis 189
 - C. Incremental validity 190
- III. Locating Information about Published Tests 192
 - A. Tests in Print III 193
 - B. The Mental Measurements Yearbook 194
 - C. Test: A Comprehensive Reference for Assessment in Psychology, Education, and Business 194
 - D. Test Critiques 194
 - E. Measures of Personality and Social Psychological Attitudes 195
 - F. Unpublished Experimental Mental Measures 195
 - G. Handbook of Psychiatric Rating Scales 196

Summary 196

Chapter 8	Test Administration	197
	I. The Examiner and the Subject 198	
	A. The race of the tester 198	
	B. The examiner–test taker relationship 199	
	C. Expectancy effects 200	
	D. Effects of reinforcing responses 202	
	E. Computer-assisted test administration 204	
	F. Subject variables 206	
	II. Behavioral Assessment Methodology 207	
	A. Reactivity 207	
	B. Drift 208	
	C. Expectancies 208	
	D. Problems in rating accuracy 209	
	E. Statistical control of rating errors 210	
	Summary 211	
PART II	<i>Applications</i>	213
	Introduction to Part II: Applications	215
	I. The Issue of Test Use 216	
	II. Concepts and Distinctions 218	
	A. A test battery 218	
	B. Testing versus assessment 219	
	III. Criteria for Selection of Tests 219	
	A. Ability tests 220	
	B. Approach to personality tests 221	
	Summary 221	
Chapter 9	Interview Techniques	223
	I. The Interview as a Test 226	
	II. Reciprocal Nature of Interviewing 228	
	III. Principles of Effective Interviewing 228	

- A. The proper attitudes 229**
 - B. Responses to avoid 229**
 - C. Effective responses 231**
 - D. Responses to keep the interaction flowing 232**
 - E. Measuring understanding 236**
- IV. Types of Interviews 239**
 - A. Evaluation or assessment interview 239**
 - B. Structured clinical interviews 240**
 - C. Case history interview 244**
 - D. Mental status examination 246**
 - E. Employment interview 247**
- V. Developing Interviewing Skills 249**
- VI. Sources of Error in the Interview 249**
 - A. Interview validity 250**
 - B. Interview reliability 252**
- VII. Research Approaches to the Study of Interviewing 253**
 - A. Nonverbal communication 253**
 - B. Quantitative aspects of interview behavior 254**
- Summary 254**

Chapter 10 Tests of Mental Ability: The Binet Scale 256

- I. Binet's Principles of Test Construction 259**
 - A. Principle 1: Age differentiation 260**
 - B. Principle 2: The concept of general mental ability 260**
- II. The Early Binet Scales 262**
 - A. Nature of the 1905 Binet-Simon Scale 262**
 - B. The 1908 scale 263**
- III. Terman's Stanford-Binet Intelligence Scale 266**
 - A. The 1916 Stanford-Binet Intelligence Scale 266**
 - B. The intelligence quotient (IQ) concept 266**
 - C. The 1937 scale 268**

- D. Psychometric properties of the 1937 scale 268
- E. The 1960 Stanford-Binet revision 270
- IV. The Modern Binet Scale 272
 - A. Model of the modern (1986) Binet Scale 274
 - B. Characteristics of the 1986 revision 274
 - C. Psychometric properties of the modern Binet 277
 - D. Research on the modern Binet 280
 - E. Evaluation of the modern Binet 281
- Summary 282

Chapter 11 The Wechsler Intelligence Scales 283

- I. The Wechsler Intelligence Scales 284
 - A. Advances in intelligence testing: Point and performance scale concepts 285
 - B. From the Wechsler-Bellevue Intelligence Scale to the WAIS-R 288
- II. Scales and Subtests of the WAIS-R 288
 - A. The verbal subtests 289
 - B. Raw scores, scaled scores, and the verbal IQ 293
 - C. The performance subtests 295
 - D. Performance IQs 297
 - E. Full-scale IQs 297
- III. Interpretive Features of the WAIS-R 298
 - A. Verbal-performance IQ comparisons 299
 - B. Pattern analysis 299
 - C. Hypothetical case studies 300
- IV. Psychometric Properties of the WAIS-R 302
 - A. Reliability 303
 - B. Validity 304
- V. Evaluation of the WAIS-R 305
- VI. Downward Extensions of the WAIS-R: The WISC-III and WPPSI-R 306
 - A. The WISC-III 306

- B. Evaluation of the WISC-III 311
- C. The Wechsler Preschool and Primary Scale of Intelligence (WPPSI-R) 312

Summary 313

Chapter 12 Other Individual Tests of Ability 315

- I. General Features of Alternative Individual Ability Tests 316
 - A. Alternative individual ability tests compared with the Binet and Wechsler Scales 316
 - B. Alternatives compared with each other 318
- II. Specific Alternative Individual Ability Tests 319
 - A. Infant scales 320
 - B. Major tests for young children 328
 - C. General individual ability tests for handicapped and special populations 336
 - D. Broad-range individual ability tests: Child through adult 341
- III. Individual Tests of Ability for Specific Purposes 342
 - A. Learning disabilities 342
 - B. Visiographic tests 345
 - C. Creativity: Torrance Tests of Creative Thinking (TTCT) 348
 - D. Individual achievement tests: Wide Range Achievement Test, Revised (WRAT-R) 348

Summary 350

Chapter 13 Group Ability Tests: Intelligence, Achievement, and Aptitude 351

- I. Comparison of Group and Individual Ability Tests 353
 - A. Advantages of individual tests 354
 - B. Advantages of group tests 355

- II. General Features of Group Tests 356**
 - A. Characteristics of group tests 356**
 - B. Selecting group tests 356**
 - C. Using group tests 357**

- III. Group Tests in the Schools: Kindergarten Through 12th Grade 358**
 - A. Achievement tests versus aptitude tests 358**
 - B. Group achievement tests 359**
 - C. Group tests of mental abilities (intelligence) 362**
 - D. Summary of group tests in the schools 365**

- IV. College Entrance Tests 366**
 - A. College Board Scholastic Aptitude Test (SAT) 366**
 - B. Cooperative School and College Ability Tests (SCAT) 369**
 - C. The American College Test (ACT) 370**

- V. Graduate School Entrance Tests 371**
 - A. Graduate Record Examination Aptitude Test (GRE) 371**
 - B. Miller Analogies Test (MAT) 376**

- VI. Nonverbal Group Ability Tests 377**
 - A. Raven Progressive Matrices (RPM) 377**
 - B. Goodenough-Harris Drawing Test (G-HDT) 379**
 - C. IPAT Culture Fair Intelligence Test 380**

- VII. Group Tests for Specific Purposes 381**
 - A. Tests for use in industry: Wonderlic Personnel Test (WPT) 381**
 - B. Tests for assessing occupational aptitude 382**
 - C. Armed Services Vocational Aptitude Battery (ASVAB) 382**

- Summary 383**

Chapter 14 Tests for Choosing Careers 385

- I. Measuring Interests 386
 - A. The Strong Vocational Interest Blank 387
 - B. The Strong-Campbell Interest Inventory 388
 - C. The 1985 SCII revision 394
 - D. The Kuder Occupational Interest Survey 395
 - E. The Minnesota Vocational Interest Inventory 398
 - F. The Career Assessment Inventory 398
 - G. The Self-Directed Search 399
 - H. Eliminating sex bias in interest measurement 400
 - I. Aptitudes and interests 400
 - II. Measuring Personal Characteristics for Job Placement 401
 - A. Trait factor approach: Osipow's vocational dimensions 401
 - B. The Career Maturity Inventory: Super's development theory 402
 - C. The California Occupational Preference Survey: Roe's career-choice theory 483
 - D. Are there stable personality traits? 404
 - III. Measuring Characteristics of the Work Setting 405
 - A. The social-ecology approach 405
 - B. Classifying environments 407
 - C. Job analysis 410
 - IV. Measuring the Person-Situation Interaction 411
- Summary 414

Chapter 15 Structured Personality Tests 416

- I. Strategies of Structured Personality Test Construction 418
 - A. Overview of the strategies 418
 - B. Deductive strategies 419
 - C. Empirical strategies 420

- II. Criteria Used in Selecting Tests for Discussion 422
- III. The Logical-Content Strategy 422
 - A. Woodworth Personal Data Sheet 423
 - B. Early multidimensional logical-content scales 423
 - C. Mooney Problem Checklist 424
 - D. Criticisms of the logical-content approach 424
- IV. The Criterion-Group Strategy 425
 - A. Minnesota Multiphasic Personality Inventory 425
 - B. California Psychological Inventory 436
- V. The Factor Analytic Strategy 437
 - A. Guilford's pioneer efforts 438
 - B. Cattell's contribution 439
 - C. Problems with the factor analytic strategy 441
- VI. The Theoretical Strategy 442
 - A. Edwards Personal Preference Schedule 442
 - B. Personality Research Form and Jackson Personality Inventory 445
 - C. Temperament: The Myers-Briggs Type Indicator 448
 - D. Self-concept 449
- VII. Combination Strategies 449
 - A. The Millon Clinical Multiaxial Inventory 450
 - B. The NEO Personality Inventory 450
- Summary 453

Chapter 16 Projective Personality Tests 455

- I. The Projective Hypothesis 456
- II. The Rorschach Inkblot Test 458
 - A. Historical antecedents 458
 - B. Stimuli, administration, and interpretation 459
 - C. Psychometric properties 468

III.	An Alternative Inkblot Test: The Holtzman	470
IV.	The Thematic Apperception Test	471
A.	Stimuli, administration, and interpretation	472
B.	Psychometric properties	476
V.	Alternative Apperception Procedures	477
VI.	Nonpictorial Projective Procedures	477
A.	Word association test	478
B.	Sentence completion tests	479
C.	Figure drawing tests	480
	Summary	480
Chapter 17	Alternatives to Traditional Psychological Tests	482
I.	The Status of Traditional Psychological Tests and an Overview of the Alternatives	484
II.	Behavioral Assessment Procedures	485
A.	Procedures based on operant conditioning	487
B.	Self-report techniques	489
C.	Kanfer and Saslow's functional approach	494
D.	Cognitive-behavioral assessment procedures	495
E.	Psychophysiological assessment procedures	499
III.	Computers and Psychological Testing	501
A.	Psychophysical and signal detection procedures	501
B.	The computerization of traditional tests	505
C.	Computerization of behavioral assessment	505
	Summary	506
Chapter 18	Measures of Anxiety and Stress	508
i.	Stress and Anxiety	509
ii.	General Measures of Anxiety	510
A.	The State-Trait Anxiety Inventory	510
B.	The Taylor Manifest Anxiety Scale	512

- III. Measures of Test Anxiety 513
 - A. The Test Anxiety Questionnaire 514
 - B. The Test Anxiety Scale 515
 - C. Other measures of test anxiety 517
- IV. Treatments for Test Anxiety 518
- V. Measures of Life Stress 519
 - A. Life experiences survey 522
 - B. Measures of coping 523
 - C. Measures of social support 524
- Summary 526

Chapter 19 Testing in Health Care Settings 528

- I. Neuropsychological Assessment 529
 - A. Clinical neuropsychology 529
 - B. Developmental neuropsychology 530
 - C. Adult neuropsychology 532
 - D. California Verbal Learning Test (CVLT) 537
- II. Quality of Life Assessment 540
 - A. What is health-related quality of life? 540
 - B. Common methods for the measurement of quality of life 542
- Summary 551

PART III *Issues* 553

Chapter 20 Test Bias 555

- I. Why Is the Issue Controversial? 556
- II. Test Fairness and the Law 556
- III. The Traditional Defense of Testing 558
 - A. Content validity 558
 - B. Criterion validity 562

- IV. Other Approaches to Testing Minority-Group Members 567
 - A. Ignorance versus stupidity 567
 - B. The Chitling Test 568
 - C. The Black Intelligence Test of Cultural Homogeneity 569
 - D. The System of Multicultural Pluralistic Assessment 571
- V. Suggestions for Solutions 574
 - A. Ethical concerns and the definition of test bias 574
 - B. Improving the use of selection devices 578
 - C. Developing different criteria 579
 - D. Changing the social environment 581
- Summary 583

Chapter 21 Testing and the Law

585

- I. Laws Governing the Use of Tests 587
 - A. Federal authorities 587
 - B. Specific laws 595
- II. Some Major Lawsuits 598
 - A. Early desegregation cases 598
 - B. *Stell v. Savannah-Chatham County Board of Education* 599
 - C. *Hobson v. Hansen* 600
 - D. *Diana v. State Board of Education* 601
 - E. *Larry P. v. Wilson Riles* 602
 - F. *Parents in Action on Special Education v. Hannon* 604
 - G. *Crawford et al. v. Honig et al.* 605
 - H. *Marshall v. Georgia* 609
 - I. *Debra P. v. Turlington* 610
 - J. *Regents of the University of California v. Bakke* 612
 - K. *Golden Rule Insurance Company et al. v. Washburn et al.* 613
 - L. Personnel cases 615

M. A critical look at lawsuits 621

Summary 621

Chapter 22 The Future of Psychological Testing 623

I. Pressures Shaping the Field of Testing 623

A. Professional issues 624

B. Moral issues 629

C. Ethical issues 631

D. Social issues 633

II. Current Trends 636

A. Proliferation of new tests 636

B. Higher standards, improved technology, and increasing objectivity 637

C. Greater public awareness and influence 638

D. The computerization of tests 639

III. Future Trends 640

A. Prediction 1: Future prospects for testing are promising 640

B. Prediction 2: The proliferation of new and improved tests will continue unabated 641

C. Revolutionary changes: "Perestroika" in school testing 642

D. Prediction 3: Controversy, disagreement, and change will continue 644

Summary 644

Appendix 1 Areas of a Standard Normal Distribution 645

Appendix 2 Publishers of Major Tests 648

Appendix 3 Critical Values of r for $\alpha = .05$ and $\alpha = .01$ (Two-Tailed Test) 651

Appendix 4 Critical Values of t 652

Appendix 5 Code of Fair Testing Practices in Education 654

Glossary 659
