

CONTENTS

PREFACE. v

PART I

GENERAL ANIMAL BIOLOGY

1. INTRODUCTION 3
Science. Zoology. Living vs. nonliving matter. Animals vs. plants. Numbers and kinds of animals. The environments of life. Distribution. Interrelations. Relations of animals to man. References.

2. THE FROG AS A REPRESENTATIVE ANIMAL 15
General habits and external relations. Organ systems and physiological processes. External features. Mouth cavity. Internal structure. Integument. Skeletal system. Muscular system. Digestive system. Circulatory system. Respiratory system. Excretory system. Nervous system. Sense organs. Endocrine glands. Reproductive system. Natural history and life cycle. References.

3. PROTOPLASM, CELLS, AND TISSUES. 43
PROTOPLASM. Chemical composition. Physical characteristics. Biological activities. Enzymes. Diffusion and osmosis. CELLS. History. The cell. CELL DIVISION. Mitosis. Significance of mitosis. Amitosis. TISSUES. Epithelial tissues. Connective and supportive tissues. Vascular or circulatory tissues. Muscular or contractile tissues. Nervous tissues. References.

4. ORGANS AND ORGAN SYSTEMS. 62
Body parts. BODY COVERING. Invertebrates. Vertebrates. SKELETAL SYSTEMS. Invertebrate skeletons. Vertebrate skeletons. MUSCULAR SYSTEMS. Invertebrates. Vertebrates. Cilia and flagella. DIGESTIVE SYSTEMS. Invertebrates. Vertebrates. Food and digestion. Enzymes. Digestive enzymes. Absorption. Utilization. Other digestive processes. Water, minerals, and vitamins. CIRCULATORY SYSTEMS. Invertebrates. Vertebrate blood. Erythrocytes. Leucocytes. Clotting. Antibodies. Human blood groups. The Rh factor. Lymph. Heart. Blood vessels. Aortic arches. RESPIRATORY SYSTEMS. Aquatic respiration. Aerial respiration. Respiratory pigments. EXCRETORY SYSTEMS. Invertebrates. Vertebrates. Kidney function. Other excretory organs. NERVOUS SYSTEMS. Invertebrates. Vertebrates. Brain. Spinal cord and nerves. Autonomic nervous system. Stimulus and response. SENSE ORGANS. Touch. Taste and smell. Hearing and equilibration. Light and sight. ENDOCRINE GLANDS. Thyroid. Parathyroids. Gastric and intestinal mucosa. Islets of Langerhans. Adrenals. Pituitary. Gonads or sex glands. References.

5. REPRODUCTION AND DEVELOPMENT	121
<p>REPRODUCTION. Asexual reproduction. Regeneration. Sexual reproduction. Reproductive systems. Origin of sex cells. Maturation and meiosis. Spermatogenesis. Oögenesis. Gametes. Fertilization. Artificial insemination. Cryptorchidism. Special types of sexual reproduction. Polyembryony. Reproduction in general. Sex ratio. DEVELOPMENT. Development. Cleavage. Blastula. Gastrula. Body symmetry and axes. The embryo. Development of the chick. Development of the mammal. Embryonic membranes. Placenta and umbilical cord. Processes in development. Organization. References.</p>	
6. HEREDITY AND GENETICS.	148
<p>Mendel. Monohybrid cross. Mechanism of heredity. Explanation of the Mendelian ratio. Incomplete dominance. Backcross. Dihybrid cross. Multihybrids. Special types of inheritance. Supplementary factors. Cumulative factors. Lethal factors. Multiple alleles. Sex and heredity. Sex determination. Sex-linked inheritance. Linkage. Crossing over. Giant chromosomes. Theory of the gene. Mutations. Inbreeding and outbreeding. Artificial selection. Twins. Erroneous ideas about heredity. HUMAN INHERITANCE. Eye color. Color blindness. Blood groups. Mental characteristics. Eugenics. References.</p>	
7. ANIMAL ECOLOGY	177
<p>Chemical cycles in nature. Climatic factors. Temperature. Water relations. Food. Cover, shelter, and breeding places. Competition. Enemies. Disease. Symbiosis. Colonies and societies. Populations. Ecology and conservation. Adaptations. References.</p>	
8. DISTRIBUTION OF ANIMALS	194
<p>Factors regulating distribution. Methods of distribution. GEOGRAPHICAL DISTRIBUTION. Major faunas. Insular faunas. ECOLOGICAL DISTRIBUTION. Salt waters. Fresh waters. Land. Plant-animal associations. Distributional changes due to mankind. GEOLOGICAL DISTRIBUTION. Fossils. Geological time. References.</p>	
9. ORGANIC EVOLUTION.	210
<p>Environments for life. How life originated. Viruses. Where life originated. When life originated. Evolution. EVIDENCE OF EVOLUTION. Comparative morphology. Comparative physiology. Comparative embryology. Vestigial organs. Paleontology. Invertebrates. Vertebrates. Horses. Elephants. Human evolution. THEORIES OF EVOLUTION. Lamarck and the inheritance of acquired characteristics. Darwin and the theory of natural selection. Variation. Geometric ratio of increase. Struggle for existence. Natural selection. Origin of heritable variations. Mutations and chromosome rearrangements. Kinds of mutations. Adaptive characters. Genic change and natural selection. Population size and isolation. Other factors in evolution. References.</p>	

10. HISTORY OF ZOOLOGY 241
 Early zoology. Manuscripts and printing. Human anatomy. Natural history. Blood circulation. The microscope. Early microscopists. Classification and nomenclature. Embryology. Physiology. Comparative anatomy. Paleontology. Histology and the cell theory. Evolution. Heredity and genetics. Biological education. Modern biology. References.

11. CLASSIFICATION AND NOMENCLATURE. 255
 Numbers of animals. CLASSIFICATION. Methods of classification. Species. Higher groups. History of classification. Difficulties in classification. NOMENCLATURE. Common or vernacular names. Latin names. Binomial nomenclature. Rules of scientific nomenclature. CLASSIFICATION OF THE ANIMAL KINGDOM.

PART II

THE ANIMAL KINGDOM

12. PHYLUM PROTOZOA. ONE-CELLED ANIMALS. 275
 Characteristics. Size. Class SARCODINA. Amoeba. Structure. Locomotion. Feeding. Respiration and excretion. Behavior. Reproduction. Other Sarcodina. Class MASTIGOPHORA. Euglena. Structure. Movements. Nutrition. Reproduction. Other Mastigophora. Class SPOROZOA. Order GREGARINIDA. Order COCCIDIA. Order HAEMOSPORIDIA. Class CILIATA. Paramecium. Structure. Locomotion. Feeding and digestion. Respiration and excretion. Behavior. Reproduction. Conjugation. Mating types. Autogamy. Endomixis. Variation and heredity. Other Ciliata. Class SUCTORIA. Classification. References.
13. PHYLUM PORIFERA. SPONGES. 312
 Characteristics. Structure of a simple sponge. Other sponges. Canal systems. Skeleton. Histology. Individuality in sponges. Reproduction. Fresh-water sponges. Relations with other animals. The sponge industry. Classification. References.
14. PHYLUM COELENTERATA. COELENTERATES. 321
 Characteristics. Size. Class HYDROZOA. Hydra. General features. Cellular structure and function. Epitheliomuscular cells. Gland cells. Interstitial cells. Nematocysts. Sensory and nerve cells. Locomotion. Feeding and digestion. Respiration and excretion. Behavior. Budding. Regeneration and grafting. Sexual reproduction. Colonial hydroids. Polymorphism. Class SCYPHOZOA. Jellyfish. Structure. Natural history. Class ANTHOZOA. Sea anemone. Structure. Natural history. Corals. Fossil coelenterates. Classification. References.
15. PHYLUM CTENOPHORA. CTENOPHORES. 342
 Characteristics. Structure. Natural history. Classification. References.
16. PHYLUM PLATYHELMINTHES. FLATWORMS 345
 Characteristics. Size. Class TURBELLARIA. Planaria. Structure. Natural history. Reproduction. Other Turbellaria. Class TREMATODA.

- Order MONOGENEA. Order DIGENEA. Sheep liver fluke. Other Trematoda. Class CESTOIDEA. Subclass CESTODARIA. Subclass CESTODA. Pork tapeworm. Other cestodes. Classification. References.
17. CLASS NEMATODA. ROUND WORMS 363
 Characteristics. Structure of *Ascaris*. Natural history. Reproduction. Other nematodes. Relations to man. Root nematodes. Hookworm. *Trichina* worm. Filarial worms. Guinea worm. Classification. References.
18. MISCELLANEOUS PHYLA AND GROUPS. 376
 Difficulties in classification. The trochophore larva. Phylum MESOZOA. Phylum NEMERTINEA. Phylum ENTOPROCTA. Phylum ASCHELMINTHES. Class ROTIFERA. Class GASTROTRICHA. Class KINORHYNCHA. Class NEMATOMORPHA. Phylum ACANTHOCEPHALA. Phylum BRYOZOA. Phylum BRACHIOPODA. Phylum PHORONIDEA. Phylum CHAETOGNATHA. Phylum SIPUNCULOIDEA. Phylum PRIAPULOIDEA. Phylum ECHIUROIDEA.
19. PHYLUM ECHINODERMATA. ECHINODERMS 401
 Characteristics. Relationships. External appearance. Size. Class ASTERIOIDEA. Starfish. Structure. Natural history. Reproduction. Class OPHIUROIDEA. Structure. Natural history. Class ECHINOIDEA. Structure. Natural history. Class HOLOTHURIOIDEA. Structure. Natural history. Class CRINOIDEA. Structure and natural history. Classification. References.
20. PHYLUM MOLLUSCA. MOLLUSKS 416
 Characteristics. Relationships. General appearance. Size. Class AMPHINEURA. Structure. Natural history. Class SCAPHOPODA. Structure and natural history. Class GASTROPODA. Garden snail. Structure. Natural history. Other Gastropoda. Class PELECYPODA. Fresh-water clam. Structure. Natural history. Reproduction. Other Peleceypoda. Relations to man. Class CEPHALOPODA. Squid. Structure and natural history. Other Cephalopoda. Classification. References.
21. PHYLUM ANNELIDA. SEGMENTED WORMS. 438
 Characteristics. Size. Class OLIGOCHAETA. Earthworm. External features. Body wall. Internal structure. Digestive system. Circulatory system. Respiration. Excretory system. Nervous system. Reproductive system. Natural history. Reproduction. Relations to man. Other Oligochaeta. Class POLYCHAETA. Clamworm. Structure and natural history. Other Polychaeta. Class HIRUDINEA. Leech. Structure. Natural history. Class ARCHIANNELIDA. Classification. References.
22. PHYLUM ARTHROPODA. JOINT-FOOTED ANIMALS. 461
 Characteristics. Chitin. Size. Class CRUSTACEA. Characteristics. Crayfish. External features. Paired appendages. Muscles. Digestive system. Circulatory system. Respiratory system. Excretory system. Nervous system. Sense organs. Endocrine glands. Reproductive system. Natural history. Molt. Regeneration. Autotomy. Reproduction. Other Crustacea. Crustacean larvae. Barnacles. Commensal and parasitic

crustaceans. Relations to man. Class TRILOBITA. Structure. Classification. References.

23. CLASS INSECTA. INSECTS 485

Characteristics. Size. GRASSHOPPER. External features. Muscles. Digestive system. Circulatory system. Respiratory system. Excretory system. Nervous system. Sense organs. Reproductive system. Natural history. Reproduction. HONEYBEE. A social insect. Structure and function. Honey. Reproduction. The hive. Other insects. Form and function. Distribution. Seasonal occurrence. Sensory perceptions and behavior. Flight. Water conservation. Food. Enemies. Reproduction. Parasitism and hyperparasitism. Gall insects. Number of offspring. Growth and metamorphosis. Social insects. Relations to man. Fossil insects. Classification. References.

24. MISCELLANEOUS ARTHROPODA. 537

Class ARACHNOIDEA. Characteristics. Size. Order ARANEA, the spiders. External features. Internal structure. Natural history. Reproduction. Other Arachnoidea. Relations to man. King crabs and Eurypterids. Class CHILOPODA. Structure and habits. Class DIPLOPODA. Structure and habits. Class ONYCHOPHORA. Classification. References.

25. PHYLUM CHORDATA. THE LOWER CHORDATES 556

Characteristics. Origin of chordates. Subphylum HEMICHORDATA. Class ENTEROPNEUSTA. Tongue worm. Class PTEROBRANCHIA. Subphylum TUNICATA. The larval ascidian. Metamorphosis. The adult ascidian. Class LARVACEA. Class ASCIDIACEA. Class THALIACEA. Subphylum CEPHALOCHORDATA. Amphioxus. The CRANIATA or Vertebrates. Characteristics. References.

26. CLASS CYCLOSTOMATA. CYCLOSTOMES. 573

Characteristics. Lamprey. Skeleton. Muscular system. Digestive system. Circulatory system. Respiratory system. Excretory system. Nervous system. Sense organs. Endocrine glands. Reproductive system. Hagfishes and slime eels. Natural history. Reproduction. Relations to man. Classification. References.

27. CLASS CHONDRICHTHYES. CARTILAGINOUS FISHES. 581

Characteristics. Size. Shark. External features. Integument. Skeleton. Muscular system. Digestive system. Coelom. Circulatory system. Respiratory system. Excretory system. Nervous system. Sense organs. Reproductive system. Other cartilaginous fishes. Natural history. Reproduction. Relations to man. Fossil forms. Classification. References.

28. CLASS OSTEICHTHYES. BONY FISHES. 591

Characteristics. Size. Yellow perch. External features. Integument. Skeleton. Muscular system. Digestive system. Circulatory system. Respiratory system. Excretory system. Nervous system. Sense organs.

Reproductive system. OTHER BONY FISHES. Scales. Coloration. Structure. NATURAL HISTORY. Distribution. Migration. Habits. Locomotion. Food. Enemies. Reproduction. Relations to man. Fossil fishes. Classification. References.	
29. CLASS AMPHIBIA. AMPHIBIANS	621
Characteristics. Size. General appearance. STRUCTURE OF AMPHIBIANS. External features. Skeleton and muscles. Respiration. NATURAL HISTORY. Distribution. Seasonal activity. Food. Enemies. Reproduction. Relations to man. Fossil amphibians. Classification. References.	
30. CLASS REPTILIA. REPTILES	641
Characteristics. General appearance. Size. Alligator. External features. Integument. Skeleton. Muscular system. Digestive system. Circulatory system. Respiratory system. Excretory system. Nervous system. Sense organs. Reproductive system. OTHER REPTILES. Integument. Turtles. Sphenodon. Lizards. Snakes. NATURAL HISTORY. Distribution. Activity. Food. Enemies. Life span. Reproduction. Relations to man. Poisonous reptiles. Fossil reptiles. Classification. References.	
31. CLASS AVES. BIRDS	673
Characteristics. Size. Domestic fowl. External features. Integument. Feathers. Skeleton. Muscular system. Digestive system. Circulatory system. Respiratory system. Excretory system. Nervous system. Sense organs. Endocrine glands. Reproductive system. OTHER BIRDS. Adaptive features. NATURAL HISTORY. Distribution. Activity. Voice. Migration. Food. Enemies. Reproduction. Relations to man. Domestic birds. Fossil birds. Classification. References.	
32. CLASS MAMMALIA. MAMMALS	711
Characteristics. Size. Domestic cat. External features. Integument. Skeleton. Muscular system. Teeth. Digestive system. Circulatory system. Respiratory system. Excretory system. Nervous system. Sense organs. Endocrine glands. Reproductive system. OTHER MAMMALS. External features. Body covering. Glands. Dentition. Digestive tract. NATURAL HISTORY. Distribution. Populations. Nests and shelters. Voice. Food. Enemies. Reproduction. Relations to man. Domesticated mammals. Fossil mammals. Classification. References.	
33. MANKIND	753
Man's place in nature. Size. Structure and function. Integument. Hair. Skeleton. Muscular system. Internal organs. Nervous system. NATURAL HISTORY. Distribution. Numbers. Factors regulating human populations. Reproduction. Sex ratio. Growth. Length of life. HISTORY OF MANKIND. The fossil record. Modern man. Man in the Western Hemisphere. Shelter. Food. Implements. Energy supplies. The future of civilized man. Classification. References.	
GLOSSARY	775
