

CONTENTS

Chapter 1	
THE NATURE AND AIMS OF BIOCHEMISTRY	1
Chapter 2	
CHEMISTRY OF CARBOHYDRATES	4
Introduction	4
Classification and Configuration	5
Simple Monosaccharides of Biological Importance	11
Acetal Derivatives of the Simple Monosaccharides	13
Sugar Acids, Amino Sugars, and Their Polymers	18
Polymers of the Sugar Acids and the Amino Sugars	22
Sugar Alcohols and Cyclitols	25
Phosphoric Esters of the Sugars	26
Qualitative and Quantitative Tests for Carbohydrates	26
Bibliography	31
Chapter 3	
CHEMISTRY OF LIPIDS	32
Introduction	32
Classification	33
Fats, Waxes, and Their Components	33
Phospholipids (Phosphatides)	37
Glycolipids	40
Steroids, Sterols, and Bile Acids	42
Other Substances Associated with Lipids in Nature	44
Lipoproteins	45
Qualitative and Quantitative Tests for Lipids	46
Bibliography	48

Chapter 4

CHEMISTRY OF PROTEINS	50
Introduction	50
Classification of Proteins	51
Levels of Structural Organization of Proteins	55
Primary Level of Organization: The Amino Acids	56
Primary Level of Organization: Amino Acid Content of Proteins	58
Primary Level of Organization: The Peptide Chain	58
Primary Level of Organization: Ionic Properties of Amino Acids and Proteins	64
Secondary Level of Organization	75
Tertiary and Quaternary Levels of Organization: Shape and Size	78
The Size of Protein Molecules: Colloidal Properties	83
Disruption of the Higher Levels of Organization: Denaturation	87
Qualitative and Quantitative Tests for Amino Acids and Proteins	90
Reactions of Constituent Groups	90
Separation and Determination of Amino Acids (with Some Applications to Proteins)	95
Detection and Determination of Protein	99
Bibliography	100

Chapter 5

CHEMISTRY OF NUCLEOPROTEINS, NUCLEIC ACIDS, AND NUCLEOTIDES	102
Introduction	102
Nucleoproteins	103
Nucleic Acids	105
Free Nucleotides of Biological Importance	115
Chemical Tests on Nucleic Acids and Their Components	117
Bibliography	118

Chapter 6

CHEMISTRY OF HEMOGLOBIN, PORPHYRINS, AND RELATED COMPOUNDS	120
Introduction	120
Chemistry of Porphyrins	121
Chemistry of Hemes	123
Chemistry of Hemoglobin	124
Other Hemoproteins	134
Chemistry of Bile Pigments	136
Chemical Tests on Bile Pigments, Porphyrins, and Related Compounds ..	138
Bibliography	141

Chapter 7

VITAMINS	142
Vitamins A	143
Vitamin C (Ascorbic Acid)	152

Vitamins D	159
Vitamins E (Tocopherols)	166
Vitamins K	169
Vitamins B (Vitamin B Complex)	174
Thiamine	174
Riboflavin	178
Niacin (Nicotinic Acid)	182
Pyridoxine (Vitamin B ₆)	187
Pantothenic Acid	190
Biotin	193
Folic Acid and Vitamin B ₁₂	196
Inositol	204
α -Lipoic Acid	205
Choline	206
Bibliography	206
 Chapter 8	
ENZYMES	209
Introduction	209
General Mechanisms of Enzyme Action	210
Physical Factors Influencing the Rate of Enzymatic Reactions	217
Inhibition of Enzyme Reactions	222
The Intracellular Localization of Enzymes	225
Regulation of Enzyme Action	226
Classification and Nomenclature of Enzymes	228
Transferases	230
Hydrolases	238
Lyases	250
Isomerases	254
Ligases	255
Bibliography	256
 Chapter 9	
CHANGES IN FOODSTUFFS IN THE ALIMENTARY TRACT	257
Digestion	257
Saliva	258
Gastric Juice	260
Pancreatic Juice	261
Intestinal Juice (Succus Entericus)	264
Bile	265
Summary of Digestion	269
Absorption	270
Action of Bacteria	270
Formation and Composition of Feces	274
Bibliography	275

Chapter 10

DETOXICATION MECHANISMS	276
Oxidation	276
Reduction	277
Hydrolysis	277
Conjugation	278
Bibliography	281

Chapter 11

RESPIRATION	282
Chemical Control of Respiration	283
Transport of Oxygen	285
Transport of Carbon Dioxide	287
Bibliography	292

Chapter 12

WATER BALANCE	293
Water Intake	293
Water Output	293
Volume of Body Fluid Compartments	295
Composition of Body Fluid Compartments	298
Extracellular Fluid	300
Intracellular Fluid	302
Exchanges Between Fluid Compartments	303
Regulatory Mechanisms	309
Bibliography	311

Chapter 13

NEUTRALITY REGULATION ("ACID-BASE" BALANCE)	312
Physiological Buffer Systems	314
Intracellular-Extracellular pH Interrelations	319
Abnormalities of "Acid-Base" Balance	320
Acidosis	321
Alkalosis	324
Bibliography	325

Chapter 14

ENERGY METABOLISM	326
Respiratory Quotient	327
Calorimetry	330
Basal Metabolism	331
Specific Dynamic Action (SDA) of Foods	333*

Total Metabolism (Caloric Requirement)	333
Bibliography	335
Chapter 15	
METHODS OF INVESTIGATING INTERMEDIARY METABOLISM	336
General Methods	336
Isotope Methods	340
Bibliography	344
Chapter 16	
BIOLOGICAL OXIDATIONS	345
Introduction	345
Oxidation Potential	347
Oxidation-Reduction Chains in Nature	350
Miscellaneous Oxidation-Reduction Systems	365
Bibliography	367
Chapter 17	
BIOENERGETICS	369
Introduction	369
Bioenergetic Systems	372
Bibliography	389
Chapter 18	
METABOLISM OF CARBOHYDRATE	390
Introduction	390
Sources of Glucose to the Organism	390
Utilization of Glucose	393
The Intermediary Metabolism of Carbohydrate: Introduction	394
Anaerobic Metabolism of Glucose (Glycolysis, Fermentation)	395
Aerobic Metabolism of Carbohydrate	408
Alternate Pathways: Pentose Metabolism	416
Metabolism of Substituted and Derived Carbohydrates	419
Comparison of Carbohydrate Metabolism in Various Tissues	421
Muscle Contraction	425
Postabsorptive Blood Sugar Concentration	431
Regulation of Blood Glucose Concentration	433
Endocrine Influences in Carbohydrate Metabolism	436
Blood Sugar After Glucose Administration	438
Excretion of Sugar in Urine (Melituria)	441
Experimental Diabetes Mellitus	442
Non-Diabetic Glycosuria	446
Interrelation of Carbohydrate, Protein, and Fatty Acid Metabolism	447
Bibliography	448

Chapter 19	
METABOLISM OF LIPIDS	450
Digestion and Absorption	451
Qualitative Distribution of Lipids	454
General Survey of Lipid Metabolism	456
Metabolism of Fatty Acids	458
General Aspects of Acetyl and Acyl Metabolism	472
Metabolism of Sterols and Bile Acids	474
Metabolism of Fats and Waxes	481
Metabolism of Phospholipids	483
Metabolism of Glycolipids	488
Transport of Lipids	489
Deposition and Storage of Lipids	497
Endocrine Influences in Lipid Metabolism	506
Metabolic Interrelations of Lipids, Carbohydrates, and Proteins	507
Bibliography	509
Chapter 20	
METABOLISM OF NUCLEIC ACIDS AND RELATED SUBSTANCES	511
Digestion and Absorption	512
Intracellular Localization of Nucleic Acids and Polynucleotidases	513
Survey of Nucleic Acid Metabolism	513
Metabolism of Pentoses	515
Metabolism of Purines	515
Metabolism of Pyrimidines	520
Metabolism of the "Free" Nucleotides (Coenzymes)	523
Metabolism of the Nucleic Acids	527
Biological Significance of Nucleic Acids	531
Interrelations of Metabolism of Nucleic Acids with Other Foodstuffs	536
Bibliography	537
Chapter 21	
METABOLISM OF PROTEINS	539
Digestion and Absorption	540
Uptake by Tissues	541
Metabolic Dynamics and Pools	541
General Pathways of Protein Metabolism	543
Overall Metabolism of Protein	544
Anabolism and Catabolism of Proteins	551
The Plasma Proteins	558
Endocrine Influences in Protein Metabolism	563
Interrelation of Dietary Factors, Hormones, and Translocation of Nitrogen	565
General Metabolic Reactions of Amino Acids	566
Energetics of Amino Acid Oxidation	574
Metabolism of Individual Amino Acids	575

Interrelations of the Metabolism of Proteins and Other Foodstuffs	602
Bibliography	604

Chapter 22

METABOLISM OF PORPHYRINS AND RELATED SUBSTANCES	606
Overall Survey of Porphyrin Metabolism	607
Synthesis	608
Catabolism of Hemoproteins and Porphyrins	614
Excretion of Products of Porphyrin Metabolism	619
Relation of Porphyrin Metabolism To That of Other Metabolites	621
Bibliography	622

Chapter 23

INORGANIC METABOLISM	623
Sodium, Potassium, and Chloride Metabolism	623
Sulfur Metabolism	627
Iodine Metabolism	628
Magnesium Metabolism	630
Calcium and Phosphorus Metabolism	631
Iron Metabolism	640
Trace Elements	643
Copper	643
Zinc	644
Cobalt	645
Manganese	645
Molybdenum	646
Fluorine	646
Selenium	646
Bibliography	647

Chapter 24

GENERAL BIOCHEMICAL ASPECTS OF DIET	649
Caloric Content of Diet	651
Dietary Carbohydrate	652
Dietary Lipid	652
Dietary Protein	653
Bibliography	658

Chapter 25

METABOLIC ANTAGONISM	659
General Theory of Antagonism	660
Applications of Metabolic Antagonism	663
Comment	676
Bibliography	676

Chapter 26

HORMONES	677
Mechanisms of Regulation of Hormone Secretion	679
Transport, Metabolism, and Excretion of Hormones	680
Nomenclature of Steroids	681
Androgens	684
Estrogens	689
Progesterone	696
Adrenal Hormones	698
Adrenal Medullary Hormones	698
Hormones of the Adrenal Cortex	701
Thyroid Hormone	713
Agents Interfering with Synthesis of Thyroid Hormone	720
Pancreatic Hormones	722
Insulin	723
Glucagon	728
Parathyroid Hormone	729
Hypophyseal (Pituitary) Hormones	736
Anterior Lobe (Adenohypophyseal) Hormones	736
Posterior Lobe (Neurohypophyseal) Hormones	746
Melatonin	749
Relaxin	750
Placental Hormones	750
Neurohormones	751
Erythropoietin	751
Gastrointestinal Hormones	752
Bibliography	753

Chapter 27

METABOLIC REGULATORY MECHANISMS	758
Regulation at the Level of the Species	758
Regulation at the Level of the Organism: Intercellular Mechanisms	759
Intracellular Mechanisms	760
Summary	770
Bibliography	772

Chapter 28

CHEMICAL COMPOSITION OF TISSUES	773
Intracellular Distribution of Chemical Components (Cytochemistry)	773
Connective Tissue	776
Cartilage	778
Bone	778
Teeth	778
Skin and Appendages	779
Nervous Tissue	781
Muscle	788
Bibliography	791

Chapter 29

MILK	793
-------------------	-----

Chapter 30

BLOOD AND OTHER BODY FLUIDS	797
Blood	797
Chemistry of Blood Coagulation	799
Chemical Composition of Formed Elements	803
Chemical Composition of Blood Plasma	805
Other Body Fluids	815
Bibliography	818

Chapter 31

URINE FORMATION—RENAL FUNCTION	819
Glomerular Filtration	822
Tubular Function	823
Clearance Tests	830
Renin	837
Erythropoietin	837
Urine Composition	838
Bibliography	849
INDEX	851
