CONTRIBUTORS TO VOLUME XVII.....	v
EDITORS' PREFACE.....	vii

Metabolism of Folic Acid and Other Pterin-Pteridine Vitamins

S. H. HUTNER, HELENE A. NATHAN AND HERMAN BAKER

I. Introduction.....	2
II. Enzymes Interconverting PGA Derivatives.....	5
III. Folic Coenzymes in Catabolism.....	9
IV. Some Folic-mediated Syntheses.....	13
V. Folic-Vitamin B ₁₂ Interrelationships.....	18
VI. Biosynthesis of Folic Acid.....	23
VII. Cleavage and Dissimilation of Folic Vitamins.....	26
VIII. Pterins.....	28
IX. Evidence for Other Pterinoid-mediated Reactions.....	36
X. Critique of Microbiological Assay Methods.....	38
XI. Some Clinical Sidelights.....	39
XII. Prospects and Conclusions.....	41
References.....	45

Chemistry and Biochemistry of the K Vitamins

OTTO ISLER AND OSWALD WISS

I. Introduction and Nomenclature.....	54
II. Isolation.....	55
III. Physicochemical Properties.....	59
IV. Syntheses.....	65
V. Biological Evaluation.....	75
VI. Biosynthesis.....	81
VII. Metabolic Function.....	82
VIII. Concluding Remarks.....	86
References.....	87

The Role of Hepatic Glucose-6-phosphatase in the Regulation of Carbohydrate Metabolism

JAMES ASHMORE AND GEORGE WEBER

I. Introduction.....	92
II. Biochemistry of Glucose-6-phosphatase.....	93

III. Cytochemistry of Glucose 6 phosphatase Activity	98
IV. Physiology of Glucose-6-phosphatase	104
V. Regulation of Glucose-6-phosphatase Activity	108
VI. Pathology of Glucose 6 phosphatase	120
VII. Miscellaneous	127
VIII. Summary and Conclusions	129
References	130

Biochemistry of Serotonin and Other Indoleamines

SIDNEY UDENFRIEND

I. Introduction	133
II. Biogenesis of Serotonin	134
III. Formation of 5 Hydroxytryptophan	136
IV. Conversion of 5 Hydroxytryptophan to Serotonin	137
V. Properties of 5-Hydroxytryptophan Decarboxylase	138
VI. <i>In Viro</i> Findings Related to 5 Hydroxytryptophan Decarboxylase	139
VII. Metabolism of Serotonin	140
VIII. Turnover of Serotonin in Tissues	145
IX. Localization of Serotonin in Animal Tissues	146
X. Clinical Chemistry	149
References	152

Ergothioneine

DONALD B. MELVILLE

I. Introduction	156
II. Historical	156
III. Isolation	158
IV. Chemistry	160
V. Methods of Determination	168
VI. Animal Ergothioneine	172
VII. Plant Ergothioneine	181
VIII. Microbial Ergothioneine	183
IX. Biosynthesis	187
X. Biological Activity	195
References	201

Mechanisms of Action of Estrogens

LEWIS L. ENGEL

I. Introduction	205
II. Structure and Biological Activity	206
III. Mechanisms	210
IV. Criteria for Experimental Systems	211
V. <i>In Vivo</i> Systems	212
VI. Tissue Culture Studies	212
VII. <i>In Vitro</i> Systems Derived from Estrogen-treated Animals	213
VIII. <i>In Vitro</i> Systems	215
IX. Summary	220
References	220

**Atherosclerosis and Toxemia of Pregnancy in Relation to
Nutrition and Other Physiological Factors**

LOUISE M. DALDERUP

I. Introduction.....	224
II. Dietary Factors That Play a Role in Human Beings.....	225
III. Dietary Measures Affecting the Diseases in Animals.....	248
IV. Deviations from the Normal Blood Plasma Levels and Reactions Occur- ring in the Blood or Blood Vessel Walls.....	251
V. Deviations from the Normal Amounts of Substances Excreted by the Kidney.....	272
VI. Some Therapeutic Measures.....	273
VII. Habits of Life.....	278
VIII. Similarities in Clinical Symptoms.....	280
IX. Discussion and Conclusion.....	289
References.....	293

Progestational Agents and the Control of Fertility

GREGORY PINCUS

I. Introduction.....	307
II. Progesterone in Human Subjects.....	308
III. Newer Progestational Agents.....	310
IV. Newer Progestational Agents in the Normal Menstrual Cycle.....	311
V. Contraceptive Trials.....	317
VI. Concluding Remarks.....	320
References.....	322
AUTHOR INDEX.....	325
SUBJECT INDEX.....	347
