<i>Preface</i>		ix	
<i>The contributors to this volume</i>		xi	
<i>Dedication</i>		xiii	
<b>Chapter 1</b>	<b>ABSORPTION OF DRUGS</b>	<i>A. C. Moffatt</i>	<b>1</b>
1.1	Introduction		1
1.2	Comparison of different routes of administration		1
1.3	Structure of membranes		10
1.4	Mechanisms of absorption of drugs from the gastro-intestinal tract		12
1.5	Factors affecting absorption		20
1.6	Conclusion		23
<b>Chapter 2</b>	<b>BIOAVAILABILITY OF DRUGS</b>	<i>A. H. Beckett</i>	<b>25</b>
2.1	Introduction		25
2.2	Formulation factors influencing bioavailability		27
2.3	Therapeutic significance of bioavailability problems		28
2.4	Examples of bioavailability problems		29
2.5	Methods of testing for bioavailability		35
2.6	Design of a sustained release formulation of phendimetrazine		41
2.7	Developments on bioavailability in the USA		52
2.8	Conclusion		59
<b>Chapter 3</b>	<b>PHASE I METABOLIC REACTIONS IN MAN</b>	<i>D. V. Parke</i>	<b>61</b>
3.1	General pathways of metabolism		61
3.2	Drug oxidations		61
3.3	Reductions		68
3.4	Hydrolyses		69
3.5	Metabolism of pesticides and other chemicals		70
3.6	Metabolism of steroids and sterols		73
3.7	Enzyme induction		74
3.8	Enzyme stimulation		77

<i>Chapter 4</i>	PHASE II METABOLIC REACTIONS IN MAN <i>G. J. Dutton</i>	81
4.1	Introduction	81
4.2	Types of conjugation	84
4.3	Factors affecting conjugation	92
4.4	Relationship of Phase I and Phase II reactions	95
4.5	Summary	95
 <i>Chapter 5</i>	 EXTRAPOLATION OF ANIMAL RESULTS TO MAN <i>R. L. Smith</i>	 97
5.1	Introduction	97
5.2	Animal species available	97
5.3	Origin of interspecies variations in response to toxic chemicals	98
5.4	Species differences in metabolism	100
5.5	Conclusion	106
 <i>Chapter 6</i>	 INFLUENCE OF DRUGS AND ENVIRONMENTAL CHEMICALS ON DRUG METABOLISM IN MAN <i>H. S. Fraser and C. T. Dollery</i>	 107
6.1	Introduction	107
6.2	Problems of sampling	107
6.3	Population samples	108
6.4	Social drugs	110
6.5	Environmental chemicals	111
6.6	Nutrition	112
6.7	Drugs	112
6.8	Enzyme induction	113
6.9	Enzyme inhibition	115
6.10	Conclusion	116
 <i>Chapter 7</i>	 INFLUENCE OF AGE ON DRUG METABOLISM IN MAN <i>P. Turner</i>	 119
7.1	Introduction	119
7.2	Foetus, infants, neonates and children	120
7.3	Geriatric subjects	122

<i>Chapter 8</i>	<b>INFLUENCE OF DISEASE ON DRUG METABOLISM IN MAN</b> <i>A. Breckenridge</i>	127
8.1	Problems encountered in studies of drug metabolism in disease	127
8.2	Factors influencing drug metabolism in disease	129
8.3	Conclusion	132
<i>Chapter 9</i>	<b>DRUG METABOLISM AND HUMAN GENETICS</b> <i>D. A. Price Evans</i>	135
9.1	Introduction	135
9.2	Genetic polymorphism	135
9.3	Rare genetic phenotypes of drug metabolism	141
9.4	Other rare genetic variants	145
9.5	Difference between genetic polymorphism and polygenic control	145
9.6	How many genes are 'polygenic'?	147
9.7	The study of selected families for evidence of monogenic control of drug metabolism	147
9.8	Rarity of pharmacogenetic polymorphisms	148
9.9	Search for common patterns of metabolism in the endoplasmic reticulum	149
9.10	Metabolism of drugs <i>in vitro</i> by human white blood cells	149
9.11	Inter-ethnic variability of allele frequencies	153
<i>Chapter 10</i>	<b>EXTRA-HEPATIC METABOLISM OF DRUGS</b> <i>J. W. Gorrod</i>	157
10.1	Introduction	157
10.2	Drug metabolism during absorption	158
10.3	Drug metabolism during transport	164
10.4	Drug metabolism in tissues	167
10.5	Conclusion	172
<i>Chapter 11</i>	<b>CHROMATOGRAPHIC METHODS</b> <i>M. Mitchard</i>	175
11.1	Introduction	175
11.2	Preliminary extraction procedures	176
11.3	Chromatographic techniques	179
11.4	Chromatography and drug identification	189
11.5	Conclusion	190

<i>Chapter 12</i>	<b>MASS SPECTROMETRY</b> <i>G. H. Draffan, J. D. Gilbert and M. T. Gilbert</i>	193
12.1	Introduction	193
12.2	Structural interpretation	194
12.3	Selected ion monitoring	204
12.4	Stable isotope applications	207
<i>Chapter 13</i>	<b>NUCLEAR MAGNETIC RESONANCE</b> <i>D. E. Case</i>	213
13.1	Introduction	213
13.2	Theory	214
13.3	Examples of use of n.m.r.	215
<i>Chapter 14</i>	<b>ISOTOPE METHODS</b> <i>S. H. Curry</i>	223
14.1	Introduction	223
14.2	Radioactive isotopes	223
14.3	Non-radioactive isotopes	233
14.4	General considerations	234
<i>Chapter 15</i>	<b>PITFALLS IN DRUG-METABOLISM METHODOLOGY</b> <i>A. H. Beckett and D. A. Cowan</i>	237
15.1	Introduction	237
15.2	Preparation of drug formulation for metabolic study	237
15.3	Preparation of the biological system	240
15.4	Sample collection	242
15.5	Extraction of metabolic products	243
15.6	Identification procedure	248
15.7	Quantification	252
<i>Index</i>		259
