

CONTENTS

VOLUME I: GENERAL CONSIDERATIONS

	PAGE
FOREWORD, by <i>Edwards A. Park, M.D.</i>	vii
PREFACE	xi
ACKNOWLEDGEMENTS	xiii
THE PLAN OF THE BOOK	xxi
I. EMBRYOLOGY, ETIOLOGY, BASIC PRINCIPLES OF ANALYSIS, AND FETAL CIRCULATION	3
II. METHODS OF DIAGNOSIS	28
Physical Examination	28
Fluoroscopic and X-ray Examinations	34
Electrocardiography	72
Evaluation of the Physical Examination, Fluoroscopy, and Electrocardiography	74
Summary	75
III. SPECIAL DIAGNOSTIC PROCEDURES	80
<i>Angiocardiography, Aortography, and Cardiac Catheterization</i>	
Angiocardiography	80
Aortography	107
Cardiac Catheterization	109
Choice of Special Procedures	122
Summary	123
IV. CYANOSIS	129
Anatomical Causes	129
Normal Physiological Considerations	131
Basic Physiological Factors in the Production of Cyanosis	133
Methods for the Determination of the Cause of Cyanosis	140
Clinical Manifestations	145
Factors which Affect Cyanosis	150
Summary	155
V. MEDICAL CARE	160
INDEX TO VOLUME I	199

VOLUME II: SPECIFIC MALFORMATIONS

PART ONE

MALFORMATIONS WITH A VENOUS-ARTERIAL SHUNT

	PAGE
VI. THE TETRALOGY OF FALLOT	3
<i>Pulmonary Stenosis or Atresia Combined with Dextroposition of the Aorta</i>	
VII. ORIGIN OF BOTH GREAT VESSELS FROM THE RIGHT VENTRICLE	62
VIII. TRICUSPID ATRESIA AND DEFECTIVE DEVELOPMENT OF THE RIGHT VENTRICLE	76
A. Tricuspid Atresia Combined with Defective Development of the Right Ventricle and with Normally Placed Great Vessels	76
B. Tricuspid Atresia Combined with Complete Transposition of the Great Vessels	104
IX. DEFECTIVE DEVELOPMENT OF THE RIGHT VENTRICLE	119
A. Defective Development of the Right Ventricle with an Intact Ventricular Septum	119
B. Defect in the Musculature of the Right Ventricle: Parchment Right Ventricle	138
X. COMPLETE TRANSPOSITION OF THE GREAT VESSELS	146
A. Complete Transposition of the Great Vessels with Both Great Vessels of Approximately Normal Size	146
B. Complete Transposition of the Great Vessels Combined with Enormous Dilatation of the Pulmonary Artery	182
C. Complete Transposition of the Great Vessels Combined with Pulmonary Stenosis or Atresia	196
D. Complete Transposition of the Great Vessels Combined with Complete Interruption of the Aortic Arch	216
XI. THE TAUSSIG-BING MALFORMATION	226
XII. ABSENCE OF THE AORTIC ARCH	246
<i>Complete Interruption of the Isthmus of the Aorta</i>	
XIII. DEFECTIVE DEVELOPMENT OF THE LEFT SIDE OF THE HEART	254
A. Aortic Atresia or Marked Hypoplasia of the Aortic Orifice Combined with Hypoplasia of the Ascending Aorta	254
B. Diverticulum of the Left Ventricle	270
XIV. TRUNCUS ARTERIOSUS AND HEMI-TRUNCUS ARTERIOSUS	275
A. Truncus Arteriosus	275
B. Hemi-Truncus Arteriosus	316

CONTENTS

xvii

	PAGE
XV. A SINGLE VENTRICLE AND A RUDIMENTARY OUTLET CHAMBER	325
XVI. ARTERIOVENOUS ANEURYSMS	364
A. Systemic Arteriovenous Aneurysms	364
B. Pulmonary Arteriovenous Aneurysms	365

PART TWO

MALFORMATIONS OF THE RIGHT SIDE OF THE HEART
(WITH OR WITHOUT A VENOUS-ARTERIAL SHUNT)

XVII. PULMONARY STENOSIS	380
A. Pure Pulmonary Stenosis	380
B. Stenosis in Either or Both Branches of the Pulmonary Artery	419
XVIII. PULMONARY HYPERTENSION	427
A. Primary Pulmonary Hypertension with and without Patency of the Foramen Ovale	431
B. Pulmonary Hypertension with Persistent Patency of the Ductus Arteriosus	448
XIX. EBSTEIN'S ANOMALY	466
<i>Congenital Downward Displacement of the Tricuspid Valve</i>	

PART THREE

MALFORMATIONS IN WHICH THE PRIMARY SHUNT
IS FROM LEFT TO RIGHT

XX. PERSISTENT PATENCY OF THE DUCTUS ARTERIOSUS	490
XXI. AORTIC SEPTAL DEFECT	524
XXII. ANOMALIES OF THE PULMONARY VENOUS RETURN	536
A. Anomalies of the Pulmonary Venous Return to the Right Auricle	536
B. Anomalous Drainage of the Pulmonary Veins into the Inferior Vena Cava by Way of the Hepatic Vein	580
C. The Scimitar Syndrome	588
XXIII. AURICULAR SEPTAL DEFECTS	605
A. A Single Auricle	612
B. Auricular Septal Defects of the Ostium Secundum Type and Lutembacher's Syndrome	620
C. Persistent Ostium Primum	652
D. Persistent Ostium Atrioventriculare Commune	661

	PAGE
XXIV. VENTRICULAR SEPTAL DEFECTS	672
A. Maladie de Roger	673
B. Large Ventricular Septal Defects and the Eisenmenger Complex	683
C. Defects between the Left Ventricle and the Right Auricle	718
XXV. ANEURYSM IN THE SINUS OF VALSALVA WITH RUPTURE INTO THE LESSER CIRCULATION	729

PART FOUR

MALFORMATIONS OF THE LEFT SIDE OF THE HEART

XXVI. ANOMALIES OF THE AORTIC ARCH	748
A. Right Aortic Arch	749
B. Vascular Rings	759
C. Other Anomalies of the Aortic Arch	780
XXVII. COARCTATION OF THE AORTA	784
XXVIII. ANOMALIES OF THE AORTIC VALVE AND OF THE ASCENDING AORTA	835
A. Bicuspid Aortic Valves	835
B. Aortic Stenosis	835
C. Aneurysmal Dilatation of the Ascending Aorta	858
XXIX. ANOMALIES OF THE CORONARY ARTERIES AND OTHER CONDITIONS WHICH AFFECT THE MYOCARDIUM OF THE LEFT VENTRICLE	866
A. Anomalous Origin of the Left Coronary Artery from the Pulmonary Artery	866
B. Coronary Arteriovenous Fistulae	881
C. Endocardial Fibro-elastosis	892
D. Glycogen Storage Disease	898
XXX. MALFORMATIONS OF THE LEFT AURICLE	908
A. Anomalies of the Mitral Valve	908
B. Triauricular Heart	925
C. Aneurysmal Dilatation of the Left Auricle	930
XXXI. CORRECTED TRANSPOSITION	933
<i>Transposition of the Ventricles Combined with Transposition of the Great Vessels</i>	
XXXII. ANOMALIES OF THE SYSTEMIC VENOUS RETURN	948
A. Anomalies of the Superior Vena Cava and the Inferior Vena Cava	951
B. Absence of the Inferior Vena Cava	957

CONTENTS

xix

	PAGE
XXXIII. DEXTROCARDIA AND DEXTROROTATION	963
A. Dextrocardia with Situs Inversus	963
B. Dextrorotation of the Heart	971
XXXIV. SITUS INVERSUS WITH LEVOCARDIA	984
<i>Transposition of the Auricles</i>	
XXXV. COMPLETE HEART BLOCK AND OTHER CARDIAC ARRHYTHMIAS	996
A. Congenital Complete Heart Block	996
B. Other Cardiac Arrhythmias	1002
VISUAL INDEX	1009
INDEX TO VOLUME II	1019
