

TABLE OF CONTENTS

| | |
|---|-----|
| PREFACE | xi |
| I. IMMUNOLOGICAL INJURY IN VIRUS DISEASE | |
| Autoreactivity and Leukemogenesis <i>M.R. Proffitt, M.S. Hirsch, and P.H. Black</i> | 3 |
| Tissue Injury and Diseases Associated with Chronic Viral Infections: Role of the Immune Response <i>Michael B.A. Oldstone</i> | 19 |
| An Approach to the Mechanism of Viral Interaction with Lymphoid Cells <i>Barry R. Bloom, Maja Nowakowski, and Shogo Kano</i> | 25 |
| II. INFLUENCE OF HOST GENETIC FACTORS ON VIRUS DISEASES | |
| Murine Leukemia Virus and Spontaneous Leukemia in AKR Mice <i>Frank Lilly, Maria L. Duran-Reynals, and Wallace P. Rowe</i> | 41 |
| Cellular Regulation of Biologically Distinguishable Endogenous Mouse Type C <i>Stuart A. Aaronson and John R. Stephenson</i> | 49 |
| Host Restriction of Friend Leukemia Virus <i>Ruy Soeiro, Michael M. Sveda, Theodore G. Krontiris, and Bernard N. Fields</i> | 69 |
| III. DEFECTIVE VIRUSES: THEIR FORMATION AND INFLUENCE ON THE COURSE OF INFECTION | |
| Vesicular Stomatitis Virus: Defectiveness and Disease <i>Alice S. Huang and Eduardo L. Palma</i> | 87 |
| Temperature Sensitive Mutants of Vesicular Stomatitis Virus and Interference <i>M.E. Reichmann and R.N. Leamson</i> | 101 |

CONTENTS

Poliovirus Defective Interfering Particles 117
*David Baltimore, Charles N. Cole, Lydia Villa-Komaroff, and
Deborah Spector*

Defective Interfering Particles as Mediators of Slower, and Persistent
Noncytotoxic VSV Infections *in vivo* and *in vitro* 131
John J. Holland, Louis Perez Villarreal, and James R. Etchison

Increased Production of Interfering Virus Particles in Cell Cultures
from Mice Resistant to Group B Arbovirus Infection 147
Margo Brinton Darnell and Hillary Koprowski

**IV. VIRUSES IN CHRONIC CENTRAL NERVOUS
SYSTEM DISEASE**

Altered Neurologic Disease Induced by Reovirus Mutants 161
Bernard N. Fields and Cedric S. Raine

Rabies and Parainfluenza Viruses 169
Hillary Koprowski

The Relationship of SV40-Related Viruses to Progressive
Multifocal Leukoencephalopathy 187
Richard T. Johnson, Opendra Narayan, and Leslie P. Weiner

Measles Virus Latency and Neurovirulence 199
Fred Rapp, Martin V. Haspel, Ronald Duff, and Paul Knight

V. WHERE IS THE VIRUS OF HUMAN HEPATITIS?

Structure of Hepatitis B Antigen (HB AG) 215
John L. Gerin

A Human Hepatitis B Virus Candidate 225
William S. Robinson

Patterns of Hepatitis B Virus Genome Expression *in vivo* 243
Thomas Edgington

**VI. MECHANISMS OF CELL TRANSFORMATION
BY DNA TUMOR VIRUSES**

Gene Functions of Polyoma Virus and Simian Virus 40 255
Walter Eckhart

The Different Stable Patterns of Growth Control Induced by
SV40 Infection of Normal Cells 261
Robert Pollack and Rex Risser

CONTENTS

**VII. CELL TRANSFORMATION BY
RNA TUMOR VIRUSES**

- Control of Reversion in MSV Transformed Cells After Single
and Multiple Transforming Cycles 273
Shigeo Nomura and Peter J. Fischinger
- Recombinants of Avian Tumor Viruses: An Analysis of Their RNA . . . 287
Peter Duesberg, Karen Beemon, Michael Lai, and Peter K. Vogt
- Characteristics of Cells Transformed by Bryan Rous Sarcoma Virus . . . 303
John P. Bader and Artrice V. Bader
- Proteases Associated with Malignant Transformation 315
*D.B. Rifkin, N.B. Gilula, J.P. Quigley, D. Loskutoff, L. Ossowski,
J.C. Unkeless, K. Danø, and A. Piperno*
- Reversal of the Transformed Phenotype by Dibutyryl Cyclic AMP
and a Protease Inhibitor 327
Michael J. Weber
- Plasminogen Activators of Normal and Rous Sarcoma Virus-
Transformed Cells 347
Allan R. Goldberg and Sondra G. Lazarowitz

VIII. CONTROL MECHANISMS FOR PHAGE

- Regulation of Lysogeny and the Evolution of Temperate Bacterial
Viruses 363
David Botstein and Miriam M. Susskind
- Reciprocal Transactivation in a Two Chromosome Phage System . . . 385
*Kathleen Barrett, Stephen Barclay, Richard Calendar, Bjorn
Lindqvist, and Erich Six*
- In vitro* Construction of Bacterial Plasmid Replicons Containing
Prokaryotic and Eukaryotic Genes 403
*Stanley N. Cohen, Annie C.Y. Chang, John F. Morrow,
Herbert W. Boyer, Howard M. Goodman, Robert B. Helling,
Louis Chow, and Leslie Hsu*
- Chromosomal Mutations Affecting the Ability of *Saccharomyces
cerevisiae* to Harbor or Express the "Killer" Extrachromosomal
Genome 421
Reed B. Wickner

CONTENTS

IX. ONCOGENIC HERPES VIRUS

Aspects of the Pathogenesis of Lymphoma in Cotton-Top Marmosets
Following Inoculation of EB Virus 429
George Miller, Thomas Shope, and Donald Coope

The Regulation of Herpes Simplex Virus Protein Synthesis 455
Robert W. Honess and Bernard Roizman

The Lucke Tumor Virus System 493
Allan Granoff and Robert F. Naegele

Latent Genomes of Epstein-Barr Virus 505
Meihan Nonoyama and Akiko Tanaka

The Oncogenic Potential of Human Herpesvirus 515
Ronald Duff and Fred Rapp
