

Contents of this volume

I FUNDAMENTALS OF ANAESTHETIC ACTION	1
1 Functions and structure of cell components in relation to action of anaesthetics	3
<i>A. C. Allison</i>	
2 Cellular metabolism in relation to anaesthesia	23
<i>I. C. Geddes</i>	
3 Physicochemical properties of inhalational anaesthetics	45
<i>M. J. Halsey</i>	
4 Inhalational anaesthesia: pharmacokinetics	67
<i>Edmond I. Eger, II</i>	
5 Axon and synapse in relation to anaesthesia	99
<i>Joan J. Kendig</i>	
6 Effect of anaesthetics on nervous pathways	117
<i>A. Angel</i>	
7 Biotransformation of anaesthetics in relation to toxicity	141
<i>M. J. Halsey</i>	
8 Cardiovascular, respiratory and hepatic effects of inhalational anaesthetics	159
<i>Gerald W. Black</i>	
9 Chronic exposure to trace concentrations of anaesthetics	189
<i>Alastair A. Spence</i>	
10 Cytotoxic effects of inhalational anaesthetics	203
<i>Jean Sturrock</i>	
11 Non-inhalational anaesthetics	217
<i>John W. Dundee and R. S. J. Clarke</i>	
12 Opiate analgesics	257
<i>R. S. J. Clarke</i>	
13 Sedatives, tranquillizers and hypnotics	273
<i>John W. Dundee</i>	

14	Antiemetic drugs	289
	<i>John W. Dundee</i>	
15	Neuromuscular transmission and neuromuscular block	301
	<i>D. V. Roberts and T. C. Gray</i>	
16	Muscle relaxant drugs and their antagonists	319
	<i>T. N. Calvey and H. Wilson</i>	
II PRINCIPLES OF CONDUCTION ANALGESIA		337
17	Pharmacology and toxicity of local anaesthetics	339
	<i>I. C. Geddes</i>	
18	Spinal and extradural analgesia	365
	<i>R. Bryce-Smith</i>	
19	Clinical use of nerve blocks in relation to surgery	381
	<i>Clive Jolly</i>	
III THE RESPIRATORY SYSTEM		395
20	Structural basis of lung function	397
	<i>Norman C. Staub</i>	
21	Hypoxia and oxygen transport	417
	<i>John F. Nunn</i>	
22	Hypercapnia	435
	<i>Cedric Prys-Roberts</i>	
23	Hypocapnia	461
	<i>J. E. Utting</i>	
24	Pulmonary circulation in relation to anaesthesia and pulmonary oedema	477
	<i>Norman A. Bergman</i>	
25	The effects of anaesthesia on respiration	493
	<i>John F. Nunn</i>	
26	Anaesthesia and the patient with respiratory disease	511
	<i>James S. Milledge and John F. Nunn</i>	
27	Methods of oxygen therapy	531
	<i>Julian M. Leigh</i>	
28	Oxygen toxicity	551
	<i>Graham Smith</i>	
29	Artificial ventilation	573
	<i>A. M. Hewlett</i>	
30	Postoperative pulmonary complications	591
	<i>Alastair A. Spence</i>	

IV THE CIRCULATORY SYSTEM

- 31 Cardiac physiology 611
R. J. Linden
- 32 Cardiac arrhythmias 637
E. B. Raftery
- 33 Cerebral blood flow 657
D. G. McDowall
- 34 Preoperative assessment of the cardiovascular system 685
E. B. Raftery
- 35 Anaesthesia for patients with cardiac disease and hypertension 693
G. W. Burton and H. G. R. Balmer
- 36 Cardiopulmonary bypass 713
J. C. Richardson
- 37 Cardiac drugs of importance in general anaesthesia 723
Clive P. Aber and B. C. Hovell
- 38 Autonomic drugs 743
Norton E. Williams

V RENAL, HEPATIC, ENDOCRINE AND OTHER SYSTEMS 761

- 39 Anaesthesia and the kidney 763
J. E. Utting
- 40 Anaesthesia for patients with diminished hepatic function 779
Leo Strunin
- 41 Diabetes in relation to anaesthesia 797
R. S. Ahearn and B. A. Walker
- 42 Pituitary and adrenal glands in relation to anaesthesia 807
R. A. Millar
- 43 Thyroid, parathyroid and other endocrine glands in relation to anaesthesia 825
R. A. Millar
- 44 Acid–base balance in relation to anaesthesia 841
D. R. Bevan
- 45 Neurological and muscular disorders 867
J. A. Thornton
- 46 Metabolic and other disorders 883
J. A. Thornton and R. W. E. Watts

Appendix: Drug name equivalents, UK and USA A1

Index I1

Contents of volume 2

VI CLINICAL PRACTICE IN ANAESTHESIA	907
47 Psychological preparation and premedication	909
<i>Aileen K. Adams</i>	
48 Influence of pre-existing drug therapy	923
<i>John W. Dundee and W. McCaughey</i>	
49 Gas and vapour supply	943
<i>M. J. Halsey and D. C. White</i>	
50 Anaesthetic apparatus	967
<i>D. C. White and M. J. Halsey</i>	
51 Monitoring during general anaesthesia	993
<i>P. G. Lawler</i>	
52 Metabolic response to anaesthesia, surgery and trauma	1017
<i>D. R. Bevan</i>	
53 Blood loss, colloid infusion and blood transfusion	1037
<i>J. A. Thornton</i>	
54 Postoperative recovery	1061
<i>R. S. Cormack</i>	
55 Minor complications of anaesthesia	1079
<i>R. S. Ahearn</i>	
56 Cardiopulmonary resuscitation	1091
<i>Jennifer M. Hunter and J. E. Utting</i>	
57 The medicolegal aspects of general anaesthesia	1109
<i>Peter Baylis</i>	
58 Treatment of intractable pain	1125
<i>S. Lipton</i>	

59	Postoperative pain	1139
	<i>J. E. Utting</i>	
60	Hypotensive anaesthesia	1149
	<i>G. E. Hale Enderby</i>	
VII	ANAESTHESIA FOR SPECIAL PURPOSES	1169
61	Anaesthesia for orthopaedic surgery	1171
	<i>A. R. de C. Deacock</i>	
62	Anaesthesia for ENT surgery	1189
	<i>P. M. E. Drury</i>	
63	Anaesthesia for ophthalmic surgery	1205
	<i>J. E. Utting</i>	
64	Anaesthesia for neurosurgery	1219
	<i>A. R. Hunter</i>	
65	Anaesthesia for dental surgery	1245
	<i>Gough Hughes</i>	
66	Anaesthesia for plastic and faciomaxillary surgery	1267
	<i>T. N. P. Wilton and D. F. Cochrane</i>	
67	Anaesthesia for trauma and major accidents	1289
	<i>R. S. J. Clarke and Ian W. Carson</i>	
68	Anaesthesia for major vascular surgery	1307
	<i>Anne McKenzie Florence</i>	
69	Anaesthesia for pulmonary surgery	1325
	<i>Frank L. Robertshaw</i>	
70	Anaesthesia for cardiac surgery	1351
	<i>M. D. Hargreaves and V. A. Grimshaw</i>	
71	Anaesthesia for obstetrics	1367
	<i>M. E. Tunstall</i>	
72	Obstetric analgesia	1391
	<i>J. Selwyn Crawford</i>	
73	Anaesthesia and the day care patient	1403
	<i>H. T. Davenport</i>	
74	Anaesthesia for x-ray investigations	1417
	<i>Steven Lewis Snowdon</i>	
75	Anaesthesia for abdominal surgery	1431
	<i>Leon Kaufman</i>	
76	Anaesthesia and the geriatric patient	1453
	<i>James D. Robertson</i>	

VIII ANAESTHESIA FOR INFANTS AND CHILDREN 1475

- 77 Neonatal physiology 1477
G. Jackson Rees
- 78 Resuscitation of the newborn 1487
H. T. Davenport and H. B. Valman
- 79 Neonatal anaesthesia 1501
Gordon H. Bush
- 80 Anaesthesia for the older child 1519
Leon Kaufman and Edward Sumner

IX THE INTENSIVE THERAPY UNIT 1541

- 81 Intensive therapy 1543
J. C. Stoddart
- 82 Monitoring and diagnostic procedures in the intensive therapy unit 1557
A. A. Gilbertson and Malcolm Brown
- 83 General care of patients in the intensive therapy unit 1573
G. H. Hulands
- 84 Fluid balance and parenteral feeding 1591
H. A. Lee
- 85 Control of infection in the intensive therapy unit 1611
P. J. Sanderson
- 86 Antibiotics in the intensive therapy unit 1627
P. J. Sanderson
- 87 Respiratory failure 1645
John F. Nunn
- 88 Cardiovascular failure in the general intensive therapy unit 1661
I. McA. Ledingham and C. D. Hanning
- 89 Renal failure in the general intensive therapy unit 1687
A. A. Gilbertson and H. J. Goldsmith
- 90 Liver failure 1697
A. Cuschieri
- 91 Postoperative care after cardiac surgery 1711
V. A. Grimshaw and M. D. Hargreaves
- 92 Poisoning 1725
D. Campbell
- 93 Intensive care of the burned patient 1749
A. W. Diamond

94 Head injuries 1765
Bryan Jennett

Appendix: Drug name equivalents, UK and USA A1
