

VOLUME 1: Contents

SECTION 1 THE HEAD AND NECK

The Skull	3
Normal	3
Anatomy	3
Growth and Development	10
Roentgenographic Appearance of Normal Juvenile Skull	23
Congenital Dysplasias of the Skull	38
Cranioschisis or Cranium Bifidum	38
Lacunar Skull of the Newborn (Lückenschädel, Craniolacuniae)	38
Symmetric Parietal Foramina	38
Congenital Occipital Dysplasia	41
Premature Craniosynostosis	41
Miscellaneous Cephaloskeletal Syndromes	53
Congenital Dermal Sinus	53
Trigonocephaly	54
Ocular Hypertelorism	54
The Skull in the Congenital Skeletal Dysplasias	56
Cleidocranial Dysostosis	56
Osteogenesis Imperfecta	58
Achondroplasia	59
Dysostosis Multiplex (Gargoylism, Hurler's Syndrome)	60
Osteopetrosis (Marble Bones, Albers-Schönberg Disease)	60
Traumatic Lesions	60
Neonatal Period	60
Fractures in Infants and Children	73
Infections of the Skull	83
Infancy and Childhood	83
Tuberculosis	85
Sarcoidosis	85
Syphilis	85
Mycotic Osteomyelitis	85
Visceral Larva Migrans	85
Rheumatoid State	85
Hypovitaminoses	87
Rickets	87
Scurvy	87
Vitamin K	87
Diseases of Endocrine Glands	87
Thyroid	87
Gonads and Adrenals	87
Parathyroids	87
Polyostotic Fibrous Dystrophy	90
Fibrous Dysplasia	90
Diseases of the Blood	90
Hemolytic Anemias	90
Iron-Deficiency Anemia	97
Leukemias	97

Polycythemia	97
Reticuloses	98
Eosinophilic Granuloma of Bone	100
Neoplasms	100
Miscellaneous Observations	103
Individual Cranial Structures	105
Nose	105
Normal Nose	105
Diseases of the External Nose	105
Diseases of the Internal Nose	107
Paranasal Sinuses	111
Maxillary Sinuses	111
Frontal Sinuses	117
Ethmoid Sinuses	118
Sphenoid Sinuses	118
Temporal Bone	118
Normal Anatomy	118
Pneumatization	118
Diseases of the Temporal Bone	121
Petrous Pyramids	124
Sphenoid Bone	126
Mandible	126
Normal Anatomy	126
Diseases of the Mandible	133
Upper Maxilla	139
Intracranial Structures	140
Physiologic Calcification	140
Pathologic Calcification	142
Increased Intracranial Pressure	150
Relative Growth of Brain and Cranium	155
Microcrania	155
Macrocrania	157
Neoplasms	161
The Brain and Spinal Cord	163
Cranial Computerized Tomography	163
Pneumography	165
Normal Anatomy	165
Ventricular System	166
Subarachnoid Spaces, Sulci and Cisterns	175
Subdural Air	175
Complications	177
Contrast Ventriculography	179
Cerebral Angiography	180
Radioisotope Scanning	183
Echoencephalography	187
Hydrocephalus	188
Normal Cerebrospinal Fluid Production	188
Hypotensive Hydrocephalus	188
Hypertensive Hydrocephalus	188
Obstructive Hydrocephalus	190
Communicating Hydrocephalus	197
Intracranial Tumors	203
Congenital Arachnoid Cysts	215
Intracranial Infection and Abscess	215
Degenerative Diseases	218
Hematoma	219
Congenital Cerebral Malformations	226

SECTION 2
THE THORAX

Generalized Cerebral Hypoplasia and Atrophy	226
Hydranencephaly	228
Unilateral Cerebral Hypoplasia	229
Cerebellar Hypoplasia	229
Lissencephaly (Agyria)	230
Holoprosencephaly (Arrhinencephaly)	230
Agenesis of the Corpus Callosum	231
Encephaloceles	235
Congenital and Acquired Vascular Abnormalities	237
Arteriovenous Malformations	237
Carotidocavernous Sinus Fistula	239
Sturge-Weber Syndrome	239
Intracranial Aneurysms	240
Vein of Galen Aneurysm	241
Mycotic Aneurysms	243
Menke's Syndrome	243
Looping of the Carotid Artery	243
Acute Hemiplegia	243
The Spinal Cord	247
Extracranial Structures	258
The Neck	261
Anatomy	261
Physiologic Calcifications	264
Pathology	265
Pharynx and Cervical Esophagus	265
Congenital Malformations	265
Inflammations	266
Foreign Bodies	269
Neoplasms	269
Larynx and Trachea	270
Cervical Spine	273
Congenital Malformations	276
Traumatic Lesions	279
Infections	280
Neoplasms	280
External Contour	287
The Thoracic Walls	298
Soft Tissues	298
Bones	309
Sternum	309
Clavicles	313
Scapula	320
Ribs	326
Diaphragm—Floor of the Thorax	333
Hypertrophic Individual Muscular Bundles	335
Displacements	336
Congenital Hernia	339
The Respiratory Tract	346
Fetal Respiration	346
Normal Trachea and Bronchi	346
Hilar Shadows	346
Pulmonary Vessels	347
Peribronchial Lymph Nodes	347
Lungs	347
Pleura	351

Pathologic Intrathoracic Changes	355
Trachea and Bronchi	355
Congenital Malformations	355
Bronchiolitis	358
Bronchial Asthma	360
Bronchiectasis	361
Neoplasms	365
Lungs	365
Congenital Malformations	365
Circulatory Disturbances	372
Disturbances in Aeration	377
Traumatic Lesions	393
Inflammations of the Lungs—Pneumonia	394
Systemic Diseases	417
Pulmonary Neoplasms	434
Rare Types of Pulmonary Disease	441
Pleura	447
Inflammations of the Pleura	449
Hemothorax	460
Chylothorax	460
Pneumothorax	461
Pyopneumothorax	465
Pleural Neoplasms	465
Primary Pulmonary Tuberculosis	466
The Portal of Entry	466
Anatomical Changes	466
Roentgen Appearance of the Primary Complex	470
Diagnostic Value of the Roentgen Examination	480
Local Complications of the Primary Complex	480
Hematogenous Spread from the Primary Focus	481
Extrapulmonary Primary Foci	482
Sarcoidosis	482
Pulmonary Mycoses	484
Primary Pulmonary Coccidioidomycosis	485
Primary Pulmonary Histoplasmosis	487
Pulmonary Nocardiosis	487
Pulmonary Paragonimiasis	489
The Mediastinum	490
Normal Anatomy	490
Roentgen Appearance	490
Diseases of the Mediastinum	497
Congenital Malformations	497
Pneumomediastinum	497
Mediastinal Inflammations	498
Mediastinal Tumors	499
Esophagus	509
Vertebral Column	509
Acute Mediastinal Widening	509
Thymus	510
SECTION 3	
THE HEART	
The Heart	531
Normal Anatomy	532
Growth and Development	533
Types of Examination	533
Radiographic Appearance	538
Pathologic Hearts	545
Generalized Enlargement	545
Generalized Decrease in Cardiac Shadow	548

SECTION 4
THE ABDOMEN
AND GASTRO-
INTESTINAL
TRACT

Congenital Malformations of the Heart	549
Intrinsic Congenital Malformations of the Heart and Great Vessels	555
Acquired Heart Disease	596
Postoperative Changes in the Heart	607
The Abdomen	613
Diseases of the Abdominal Walls	616
Umbilical Lesions	616
Thickenings of the Abdominal Wall	618
Calcifications	618
Peritoneum	618
Acute Generalized Peritonitis (Pyoperitoneum)	621
Chyloperitoneum	621
Pneumoperitoneum	623
Pyopneumoperitoneum	626
Fetal Meconium Peritonitis	626
Barium Peritonitis	628
Blood Vessels	630
The Liver	631
The Biliary Tract	638
Diseases of the Biliary Apparatus	638
The Spleen	647
The Pancreas	650
Mesentery and Omentum	655
Abdominal Lymph Nodes	657
The Digestive Tract	659
Fetal Function	659
Fetal Death	661
Esophagus	661
Normal Anatomy	661
Methods of Examination	663
Diseases of the Esophagus	666
Stomach	695
Normal Anatomy	695
Diseases of the Stomach	699
Small Intestine	717
Normal Roentgen Appearance	718
Functional Disturbances	723
Congenital Malformations	727
Acquired Intestinal Obstructions	756
Inflammations	768
Intestinal Parasites	776
Foreign Bodies	778
Polyposis	779
Reticuloendotheliosis	780
Tumors	780
Large Intestine	780
Normal Anatomy	780
Growth and Development	781
Normal Roentgen Appearance	781
Congenital Malformations	786

	Megacolon	795
	Microcolon	808
	Functional Obstructions	809
	Diverticula of the Colon	811
	Inflammations	812
	Geophagia	825
	Polyposis	826
	Neoplasms	830
SECTION 5	The Pelvis	837
THE PELVIS	Normal	837
	Roentgen Appearance	838
	Normal Variations	839
	Congenital Malformations	850
	Diseases of the Pelvis	861
	Intrinsic Generalized Skeletal Dystrophies	861
	Fractures of the Pelvis	864
	Ischiopubic Osteochondrosis Juvenilis	868
	Osteitis of the Pelvic Bones	868
	Hypovitaminosis	870
	Coxa Vara and Coxa Valga	870
SECTION 6	The Urinary Tract	877
THE URINARY	Introduction	877
TRACT AND	Normal Anatomy	877
ADRENAL	Normal Roentgen Appearance	882
GLANDS	Excretory Urography	882
	Cystography	891
	Retrograde Urography	892
	Special Examinations	893
	Congenital Malformations	897
	Anomalies of the Kidneys	897
	Anomalies of the Renal Pelvis and Ureter	906
	Anomalies of the Bladder	910
	Anomalies of the Urethra	912
	Urinary Obstruction	914
	Roentgen Appearance at Different Levels	917
	Other Conditions Associated with Genitourinary Anomalies	922
	Urinary Calculi	924
	Trauma	927
	Urinary Infections	929
	Acute Infections	929
	Chronic and Recurrent Infections	930
	Neoplasms	934
	The Adrenal Glands	943
	Neoplasms	946
	Adrenal Insufficiency	948
SECTION 7	The Genital Tract	951
THE GENITAL	Methods of Examination	951
TRACT	Intersex	953
	Vaginitis	963
	Genital Tract Obstruction and Tumors	963
	Gynecologic Aspects of Imperforate Anus (Ectopic Anus)	967
	Bladder Exstrophy	972
	Index	xxvii

VOLUME 2 (Partial Contents)

SECTION 8: THE EXTREMITIES

The Soft Tissues

The Bones

The Joints

SECTION 9: THE VERTEBRAL COLUMN

Normal Vertebral Column

Congenital Disturbances

Traumatic Lesions

Calcification of Intervertebral Disks

Diseases Involving Vertebrae

SECTION 10: THE NEONATE AND YOUNG INFANT

The Chest

The Gastrointestinal Tract

The Genitourinary Tract

**SECTION 11: ARTIFACTS AND NATURAL MISLEADING
IMAGES**
