

# Contents

---

<b>1. The Psychology of Chronic Pain . . . . .</b>	<b>1</b>
Persistence of Pain . . . . .	2
The Patient's Assessment of the Pain . . . . .	7
Relaxation, Biofeedback, Meditation and Hypnosis . . . . .	9
Loss of a Body Part . . . . .	10
Addiction . . . . .	16
<b>2. Anatomy and Physiology of Pain: Peripheral Nerves and Spinal Cord . . . . .</b>	<b>21</b>
General Concept . . . . .	21
Basic Terms . . . . .	22
The Peripheral Sensory System . . . . .	23
Dorsal Roots and Ganglia . . . . .	27
Peripheral Nerve Response to Injury . . . . .	29
Denervation Anesthesia, or Anesthesia Dolorosa . . . . .	30
Sensory Elements in the Autonomic Nervous System . . . . .	31
The Sensory System in the Spinal Cord . . . . .	33
The Gate Theory . . . . .	36
Ascending Spinal Pain Pathways . . . . .	39
<b>3. Methods of Diagnosis and Treatment of Chronic Pain . . . . .</b>	<b>43</b>
Local Anesthetics . . . . .	44
The Anesthetic Agent as a Determinant for Neurectomy	46
Neurolytic Agents . . . . .	48
Thermal Neurolysis . . . . .	50
Electrical Stimulation of the Nervous System . . . . .	54

<b>4. The Peripheral Nervous System and Pain Control:</b>	
<b>Low Back Pain and Sciatica</b>	63
Chronic Pain from Benign Causes	63
Low Back Pain and Sciatica	64
Epidural or Subarachnoid Spinal Blockade	65
Radiographic Control	71
Lysis of Epidural Adhesions	73
Reflex Sympathetic Dystrophy in Low Back Syndromes	75
Peripheral Nerve Stimulators	77
Rhizotomy and Ganglionectomy	80
Considerations Regarding Sciatica before the First Surgery	86
The Syndrome of the Zygapophyseal or Facet Joint	87
Chemonucleolysis	92
Spinal Stenosis	94
<b>5. The Peripheral Nervous System and Pain Control:</b>	
<b>Other Benign Syndromes and Some Cancer Pain</b>	97
Cervical Spondylosis with Arm Pain	97
Postsurgical Arm Pain	98
Entrapment Neuropathy	100
Intercostal Neuralgia	103
Pain Associated with Paraplegia	105
Chronic Pain from Malignancy	107
<b>6. The Spinal Cord and Pain Control</b>	117
Cordotomy	117
Commissural Myelotomy	130
Stimulation of the Cord	132
<b>7. Head and Face Pain</b>	141
A Special Case of Anatomy	141
The Trigeminal Net	142
The Cervical Sensory Net	144
The Autonomic System	149

CONTENTS	xv
Trigeminal Neuralgia . . . . .	150
Glossopharyngeal Neuralgia . . . . .	163
Atypical Facial Pain . . . . .	164
Multiple Sclerosis . . . . .	166
Facial Pain and Malignancy . . . . .	167
Cervical Headaches . . . . .	168
<b>8. The Brain and Chronic Pain . . . . .</b>	<b>177</b>
Anatomy of Pain Pathways in the Brain . . . . .	178
Techniques of Stereotactic Surgery . . . . .	180
Stimulation of the Deep Brain Centers . . . . .	187
Hypophysectomy . . . . .	188
Endorphins and Enkephalins . . . . .	193
<b>Index . . . . .</b>	<b>197</b>
