

Contents

1 THE NATURE AND MEASUREMENT OF LEARNING	1
DEFINITIONS OF LEARNING	1
PROCESSES TO BE DISTINGUISHED FROM LEARNING	2
Maturation	3
Sensory adaptation	3
Fatigue	4
Activation	4
THE MEASUREMENT OF LEARNING	4
Practice	4
Performance	5
Learning curves	6
SUMMARY	10
2 TYPES OF LEARNING SITUATION	11
TRIAL AND ERROR LEARNING	11
Insightful learning	12
Restricted trial and error learning	12
INSTRUMENTAL LEARNING	13
Reinforcement schedules	14
CLASSICAL CONDITIONING	15
Classical conditioning phenomena	17
Forward and backward conditioning	17
Delay and trace conditioning	18
Experimental extinction	19
External inhibition	20
Stimulus generalization	21
Differential conditioning	22
Higher-order conditioning	22
Classical conditioning versus instrumental learning	22
SUMMARY	25
3 BASIC FEATURES OF LEARNING	27
THE CONTIGUITY-REINFORCEMENT ANALYSIS	27

CONTIGUITY	29
REINFORCEMENT	30
Secondary reinforcement	30
Amount of reinforcement	31
Delay of reinforcement	34
Partial reinforcement	35
Hypotheses about reinforcement	36
Drive reduction	36
Confirmation of expectations	36
Protection	37
Incentive motivation	37
THE ALL-OR-NONE HYPOTHESIS	38
PROGRAMMED LEARNING	38
SUMMARY	39
4 ACTIVATION	41
ACTIVATORS	42
Deprivation	42
Noxious stimulation	45
Frustration	45
Conflict	46
Verbal instructions	47
Doubtful activators	48
ACTIVATIONAL PHENOMENA	49
Correlates of activation	49
Primary and secondary activators	49
Relative strength of primary activators	49
The directing properties of activators	50
The generality of activation	52
SUMMARY	52
5 ACTIVATION AND LEARNING	53
SOURCES OF LEARNED ACTIVATION	53
Experimental evidence	53
Noxious stimulation	53
Food deprivation	56
Frustration	57
Conflict	57
Theoretical analysis of learned activation	58
Practical applications	61
The need for money	61
Neurotic behaviour and psychotherapy	62
ACTIVATION AND REINFORCEMENT	63

Classical defence conditioning	63
Classical escape conditioning	64
Classical avoidance conditioning	64
Instrumental escape and avoidance learning	65
LEARNING AS A FUNCTION OF LEVEL OF ACTIVATION	66
THE JOINT OPERATION OF LEARNING AND ACTIVATION	69
SUMMARY	72
6 COMPLEX LEARNING PHENOMENA	74
DISCRIMINATION LEARNING	74
Spatial versus non-spatial discrimination learning	75
Simultaneous versus successive discrimination learning	76
PERCEPTUAL LEARNING	76
Place and response learning	77
Learning without responding	78
TRANSFER OF TRAINING	79
Conditions of positive transfer	80
Conditions of negative transfer	81
VERBAL LEARNING	82
Verbal learning methods	82
Paired-associate learning	82
Serial anticipation learning	83
Reproduction or free recall	84
Verbal learning materials	84
Order and position effects in verbal learning	85
Backward association	85
Remote association	86
Serial-position effects	87
The roles of intention and awareness in verbal learning	88
Incidental learning	88
Learning without awareness	89
CONCEPT LEARNING	89
Methods of studying concept learning	90
Selected concept learning data	90
Strategies of human learners	90
The relative effects of positive and negative instances	91
Reversal and non-reversal shifts	92
Mediation	93
SUMMARY	97
7 RETENTION AND FORGETTING	98
RETENTION	98
Methods of measuring retention	98

xii • CONTENTS

Recall	98
Recognition	99
Relearning	100
Retention curves	100
The effects of acquisition conditions on retention	100
Over-learning	102
Meaningfulness of material	102
Speed of acquisition	103
Hypothetical changes after acquisition	103
Dissipation of inhibition	103
Consolidation and implicit rehearsal	105
Changing memory trace	106
FORGETTING	108
Proactive inhibition in retention	108
Retroactive inhibition	108
Altered stimulus conditions	112
SHORT-TERM MEMORY	113
SUMMARY	115
