

Contents

1

The vertebrate body, 1

- General body plan, 1
- Vertebrate characteristics: the big four, 5
 - Notochord, 5
 - Pharynx, 7
 - Dorsal, hollow central nervous system, 11
 - Vertebrae, 11
- Satellite characteristics, 12
 - Skin, 12
 - Metamerism, 12
 - Respiratory mechanisms, 12
 - Coelom, 12
 - Digestive organs, 13
 - Urinogenital organs, 13
 - Circulatory system, 14
 - Sense organs, 14
- Larval lamprey, 14

2

Protochordates, 18

- Urochordates, 18
 - Sea squirts, 19
- Cephalochordates, 21
 - Amphioxus, 21
 - Amphioxus and the vertebrates, 28
- Enteropneusta: incertae sedis, 28
- Chordate relationships, 30

3

Parade of the vertebrates, 31

- Vertebrate taxa, 31
- Pisces, 33
 - Agnatha: ostracoderms and cyclostomes, 33
 - Placodermi, 35
 - Chondrichthyes, 35
 - Osteichthyes, 38

- Tetrapoda, 41
 - Amphibia, 41
 - Reptilia, 47
 - Aves, 52
 - Mammalia, 53
- Variation, geographical isolation, and organic evolution, 66
- Words that trigger ideas, 69

4

Early vertebrate morphogenesis, 73

- The vertebrate egg and viviparity, 73
- Fertilization, 75
- Cleavage and the blastula, 77
- Gastrulation, 81
- Formation of neural tube and notochord, 81
- Mesoderm formation, 82
 - Fate of the dorsal mesoderm, 84
 - Fate of the lateral mesoderm, 85
 - Fate of the intermediate mesoderm, 85
 - Mesenchyme of the head, pharynx, and tail, 85
- Fate of the ectoderm, 85
- Fate of the endoderm, 86
- Extraembryonic membranes, 86

5

Skin, 93

- Functions, 93
- Skin of the eft, 94
- Skin of gnathostome fishes, 95
 - The epidermis of fishes, 95
 - Dermal scales of fishes, 97
 - Evolutionary trends in fish scales, 100
 - Dermal fin rays, 100
 - Integumentary pigments of vertebrates, 101
- Skin of cyclostomes, 102
- Skin of amphibians, 103

viii Contents

- Skin of reptiles, 105
 - Dermal scales of reptiles, 105
 - Epidermal scales of reptiles, 107
 - Other modifications of the stratum corneum of reptiles, 109
 - Reptilian skin glands, 110
- Skin of birds, 110
 - Epidermal scales, horny sheaths, and claws, 110
 - Feathers, 110
 - Integumentary glands of birds, 113
- Skin of mammals, 113
 - Glands, 113
 - Hair, 117
 - Epidermal scales of mammals, 119
 - Horns, 119
 - Claws, nails, and hoofs, 120
 - Miscellaneous modifications of the stratum corneum, 121
 - Integumentary pigments in mammals, 121

6

Introduction to the skeleton and heterotopic bones, 124

- Bone, 124
- Cartilage, 126
- Heterotopic bones, 127

7

Vertebrae, ribs, and sternum, 129

- Vertebral column, 129
 - Basic structure of vertebrae, 129
 - Morphogenesis of vertebrae, 132
 - Vertebral column of fishes, 133
 - Vertebral column of tetrapods, 135
 - Evolution of vertebrae, 141
- Ribs, 142
 - Fishes, 143
 - Tetrapods, 143
- Sternum, 146

8

The vertebrate skull, 149

- Neurocranium, 149
 - Morphogenesis of cartilaginous stage, 149
 - Adult cartilaginous neurocrania, 152
 - Ossification centers in the neurocranium, 152
- Visceral skeleton, 155
 - Visceral skeleton of dogfish, 155
 - Visceral skeleton of bony fishes, 156
 - Visceral skeleton of agnathans, 158
 - Visceral skeleton of tetrapods, 158
- Dermatocranium, 162
 - Roofing bones, 164
 - Dermal bones investing the pterygoquadrate cartilages, 165
 - Membrane bones of the palates, 167
 - Dermal bones investing Meckel's cartilages, 168

- Opercular elements, 169
 - Reduction in number of membrane bones during phylogeny, 169
- Bony skulls of the various classes, 171
 - Fishes, 171
 - Amphibians, 172
 - Reptiles, 173
 - Birds, 180
 - Mammals, 180

9

The appendicular skeleton, 187

- Pectoral girdles, 187
 - Pectoral girdles of the different classes, 187
- Pelvic girdles, 190
- Fins, 192
- Tetrapod limbs, 196
 - Skeleton of the anterior limbs, 197
 - Skeleton of the posterior limbs, 208
 - Origin of tetrapod limbs, 210

10

Muscles, 213

- Somatic (myotomal) muscles, 214
 - Body wall muscles of fishes, 216
 - Body wall muscles of tetrapods, 217
 - Hypobranchial and tongue muscles, 220
 - Extrinsic eyeball muscles, 221
 - Appendicular muscles, 222
- Branchiomic muscles, 227
- Integumentary muscles, 231
- Electric organs, 232

11

Digestive system, 235

- Mouth, 235
- Oral cavity, 237
 - Teeth, 237
 - Tongue, 241
 - Oral glands, 242
- Pharynx, 243
- Esophagus, 244
- Stomach, 245
- Intestine, 247
- Liver, 248
- Gallbladder, 250
- Pancreas, 250
- Cloaca, 250

12

Respiratory system, 252

- Adult gills, 252
- Larval gills, 256
- Phylogeny of gills, 257

- Swim bladders and the origin of lungs, 258
- Lungs and their ducts, 260
 - Amphibians, 261
 - Reptiles, 262
 - Birds, 264
 - Mammals, 267
- Nares and nasal canals, 270
- Accessory respiratory organs, 272

13

Circulatory system, 275

- Blood vascular system, 275
 - Heart, 276
 - Arterial channels, 281
 - Venous channels, 292
 - Circulation in the fetus and changes at birth, 300
 - Circulation in the different classes: an overview, 301
- Lymphatic system, 306

14

Urinogenital system, 311

- Vertebrate kidneys and their ducts, 311
 - Kidney structure and the archinephros, 313
 - Pronephros, 314
 - Mesonephros, 316
 - Metanephros, 319
 - Extrarenal salt excretion in vertebrates, 322
- Urinary bladders, 324
- Gonads, 325
- Male ducts, 329
- Intraintestinal organs, 332
- Female gonoducts, 333
- The cloaca, 339

15

Nervous system, 344

- The neuron, 345
- Growth and differentiation of the nervous system, 347
- Spinal cord, 349
- Spinal nerves, 350
- Brain, 353
 - Metencephalon and myelencephalon, 354
 - Mesencephalon, 355
 - Diencephalon, 356
 - Telencephalon, 359
- Cranial nerves, 364
 - Predominantly sensory cranial nerves, 364
 - Eye muscle nerves, 365

- Branchiomeric nerves, 365
- Accessory and hypoglossal nerves, 368
- Autonomic nervous system, 371

16

Sense organs, 376

- Somatic receptors, 376
 - General cutaneous receptors, 376
 - Neuromast organs, 377
 - Pit receptors in reptiles, 380
 - Membranous labyrinth, 381
 - Sacculus vasculosus, 385
 - Light receptors, 385
 - Proprioceptors, 387
- Visceral receptors, 388
 - General visceral receptors, 388
 - Cervical vascular monitors, 388
 - Olfactory organs, 389
 - Organs of taste, 390

17

Endocrine organs, 393

- Neuroendocrine interrelationships, 393
- Endocrine organs derived from ectoderm, 396
 - Pituitary gland, 396
 - Urohypophysis, 400
 - Pineal body, 400
 - Adrenal medulla and chromaffin tissue, 401
- Endocrine organs derived from mesoderm, 403
 - Interrenal bodies and the adrenal cortex, 403
 - Corpuscles of Stannius, 404
 - Gonads as endocrine organs, 404
- Endocrine organs derived from endoderm, 405
 - Pancreatic islets, 405
 - Thyroid gland, 406
 - Parathyroid glands, 408
 - Other pharyngeal epithelioid bodies, 409
 - Thymus, 409
 - Ultimobranchial bodies, 410

Appendix. Abridged classification of the vertebrates, 413

Literature cited and selected readings, 417
