

CONTENTS

<i>Contributors</i>	vii	7 Molecular Basis of Genetics	136
<i>Preface</i>	xiii	<i>Richard O. Burns</i>	
<i>Preface to the First Edition</i>	xv	8 Genetic Variation and Gene Transfer	170
<i>Color Plates</i>	xvii	<i>Richard O. Burns</i>	
1 The Historical Development of Medical Microbiology	2	9 Regulatory Mechanisms	208
<i>Wolfgang K. Joklik, David T. Smith, Robert W. Wheat, and Hilda P. Willett</i>		<i>Richard O. Burns</i>	
Section One BACTERIAL PHYSIOLOGY		10 The Action of Chemotherapeutic Agents	234
2 The Classification and Identification of Bacteria	10	<i>Hilda P. Willett</i>	
<i>Robert W. Wheat</i>		11 Sterilization and Disinfection	278
3 Bacterial Morphology and Ultrastructure	26	<i>Hilda P. Willett</i>	
<i>Robert W. Wheat</i>		Section Two IMMUNOLOGY	
4 Energy Metabolism	46	12 Introduction to Immunology	302
<i>Hilda P. Willett</i>		<i>D. Bernard Amos</i>	
5 Physiology of Bacterial Growth	76	13 Immunogens (Antigens) and Anti- bodies and Their Determination	306
<i>Hilda P. Willett</i>		<i>Jeffrey R. Dawson and Peter Cresswell</i>	
6 Composition, Structure, and Bio- synthesis of the Bacterial Cell Envelope and Energy Storage Polymers	106	14 The Complement System	342
<i>Robert W. Wheat</i>		<i>Ralph Snyderman</i>	
		15 Cellular Basis of the Immune System and Immunoregulation	354
		<i>David W. Scott</i>	
		16 Normal and Abnormal Develop- ment of the Immune System	378
		<i>Rebecca H. Buckley</i>	

17	Inflammation and Autodestructive Reactions Initiated by Antibody	406	30	Haemophilus	604
	<i>Ralph Snyderman</i>			<i>John K. Whisnant</i>	
18	Immunohematology	414	31	Bordetella	614
	<i>Wendell F. Rosse</i>			<i>Catherine M. Wilfert</i>	
19	Immunogenetics	430	32	Listeria and Erysipelothrix	626
	<i>D. Bernard Amos</i>			<i>Hilda P. Willett</i>	
20	Immunological Responses to Infectious Disease	448	33	Corynebacterium	634
	<i>Nelson L. Levy</i>			<i>Hilda P. Willett</i>	
21	Allergy	464	34	Mycobacterium tuberculosis	650
	<i>C. Edward Buckley, III and D. Bernard Amos</i>			<i>David T. Smith and Hilda P. Willett</i>	
22	Tumor Biology, Immunology, and Immunotherapy	486	35	Other Mycobacterium Species	674
	<i>Nelson L. Levy</i>			<i>David T. Smith and Hilda P. Willett</i>	
23	Immunoparasitology	502	36	Actinomycetes	700
	<i>William J. Hubbard and James W. Larrick</i>			<i>Thomas G. Mitchell</i>	
Section Three MEDICAL BACTERIOLOGY			37	Enterobacteriaceae: General Characteristics	714
24	Host-Parasite Relationships	514		<i>Peter Zwadyk</i>	
	<i>Suydam Osterhout</i>		38	Opportunistic Enterobacteriaceae	726
25	Microbial Ecology and Normal Flora of the Human Body	522		<i>Peter Zwadyk</i>	
	<i>Harry A. Gallis</i>		39	Enterobacteriaceae: Salmonella and Shigella, Intestinal Pathogens	738
26	Staphylococcus	532		<i>Peter Zwadyk</i>	
	<i>Hilda P. Willett</i>		40	Vibrionaceae	748
27	Streptococcus	554		<i>Peter Zwadyk</i>	
	<i>Harry A. Gallis</i>		41	Pseudomonas	760
28	Streptococcus pneumoniae	572		<i>Peter Zwadyk</i>	
	<i>Hilda P. Willett</i>		42	Yersinia	768
29	Neisseria	588		<i>Laura T. Gutman</i>	
	<i>Catherine M. Wilfert and Laura T. Gutman</i>		43	Francisella	782
				<i>Laura T. Gutman</i>	
			44	Pasteurella, Actinobacillus, Streptobacillus, Calymmatobacterium	790
				<i>Laura T. Gutman</i>	
			45	Brucella	796
				<i>Catherine M. Wilfert</i>	

46	Bacillus <i>Suydam Osterhout and Hilda P. Willett</i>	804	60	Mycoplasma <i>Suydam Osterhout</i>	956
47	Introduction to the Anaerobic Bacteria: Non-Sporeforming Anaerobes <i>Gale B. Hill</i>	812	Section Four BASIC VIROLOGY		
48	<i>Clostridium perfringens</i> and Other Clostridia of Wound Infections <i>Gale B. Hill</i>	832	61	The Nature, Isolation, and Measurement of Animal Viruses <i>Wolfgang K. Joklik</i>	966
49	<i>Clostridium tetani</i> <i>Suydam Osterhout and Hilda P. Willett</i>	846	62	The Structure, Components, and Classification of Viruses <i>Wolfgang K. Joklik</i>	980
50	<i>Clostridium botulinum</i> <i>Suydam Osterhout and Hilda P. Willett</i>	854	63	The Inactivation of Viruses <i>Wolfgang K. Joklik</i>	1026
51	<i>Treponema Pallidum</i> <i>Laura T. Gutman</i>	864	64	Viruses and Viral Proteins as Antigens <i>Wolfgang K. Joklik</i>	1030
52	<i>Borrelia</i> <i>Laura T. Gutman</i>	878	65	The Virus Multiplication Cycle <i>Wolfgang K. Joklik</i>	1040
53	<i>Leptospira</i> <i>Laura T. Gutman</i>	884	66	The Effects of Virus Infection on the Host Cell <i>Wolfgang K. Joklik</i>	1086
54	<i>Spirillum</i> and <i>Campylobacter</i> <i>Laura T. Gutman</i>	890	67	The Genetics of Animal Viruses <i>Wolfgang K. Joklik</i>	1096
55	Oral Microbiology <i>James T. Crawford and Hilda P. Willett</i>	896	68	Antiviral Chemotherapy, Interferon, and Vaccines <i>Wolfgang K. Joklik</i>	1112
56	<i>Legionella pneumophila</i> <i>Peter Zwadyk and Hilda P. Willett</i>	912	69	Tumor Viruses <i>Wolfgang K. Joklik</i>	1124
57	Rickettsiae <i>Daniel J. Sexton</i>	918	70	The Bacteriophages <i>Wolfgang K. Joklik</i>	1160
58	<i>Bartonella</i> <i>Thomas E. Frothingham</i>	938	Section Five CLINICAL VIROLOGY		
59	Chlamydia <i>Laura T. Gutman</i>	944	71	Diagnostic Virology <i>Catherine M. Wilfert</i>	1186
			72	Poxviruses <i>Samuel L. Katz</i>	1192

73	Herpesviruses <i>David J. Lang</i>	1200	84	Miscellaneous Virus Infections RHINOVIRUSES <i>Catherine M. Wilfert</i>	1310
74	Adenoviruses and Adenovirus- associated Viruses <i>David J. Lang</i>	1216		CORONAVIRUSES <i>Catherine M. Wilfert</i>	
75	Human Papovaviruses <i>David J. Lang</i>	1222		REOVIRUSES <i>David J. Lang</i>	
76	Enteroviruses <i>Samuel L. Katz and Catherine M. Wilfert</i>	1228	85	Slow Virus Infections <i>David J. Lang</i>	1316
77	Orthomyxoviruses and Paramyxoviruses INFLUENZA VIRUSES <i>David W. Barry</i> PARAINFLUENZA VIRUSES <i>Catherine M. Wilfert</i> MUMPS <i>Catherine M. Wilfert</i>	1238	Section Six MEDICAL MYCOLOGY		
78	Pseudomyxoviruses MEASLES (RUBEOLA) <i>Samuel L. Katz</i> RESPIRATORY SYNCYTIAL VIRUS <i>Catherine M. Wilfert</i>	1254	86	General Characteristics of Fungi <i>Thomas G. Mitchell</i>	1326
79	Rubella (German Measles) <i>Samuel L. Katz</i>	1264	87	Principles of Fungous Diseases <i>Thomas G. Mitchell</i>	1338
80	Arboviruses <i>Thomas E. Frothingham</i>	1270	88	Systemic Mycoses <i>Thomas G. Mitchell</i>	1350
81	Rhabdoviruses <i>Thomas E. Frothingham</i>	1284	89	Subcutaneous Mycoses <i>Thomas G. Mitchell</i>	1382
82	Arenaviruses <i>Thomas E. Frothingham</i>	1292	90	Dermatophytosis and Other Cutaneous Mycoses <i>Thomas G. Mitchell</i>	1396
83	Hepatitis <i>David J. Lang</i>	1300	91	Opportunistic Mycoses <i>Thomas G. Mitchell</i>	1408
			Section Seven PARASITOLOGY		
			92	Protozoa and Protozoan Infections <i>John E. Larsh, Jr.</i>	1430
			93	Helminths and Helminthic Infections <i>John E. Larsh, Jr.</i>	1452
				<i>Index</i>	1483
