

Table of Contents

Preface	xiii
SI Units of Measurement in the Biologic Range	xiv
1. The Microbial World	1
Protists 2	Prokaryotes 3
2. Cell Structure	6
Optical Methods 6	Staining 25
Eukaryotic Cell Structure 7	Morphologic Changes During Growth 27
Prokaryotic Cell Structure 9	
3. The Major Groups of Bacteria	29
Principles of Classification 29	Descriptions of the Principal Groups of Bacteria 30
4. Microbial Genetics	36
The Physical Basis of Heredity 36	Transduction by Bacteriophage 46
The Prokaryotic Chromosome 36	Plasmid-Mediated Conjugation 48
The Eukaryotic Chromosome 40	Recombination in Eukaryotic Microorganisms 54
Mutation 40	Genes of Structure & Genes of Regulation 55
Intercellular Transfer & Genetic Recombination in Bacteria 45	Transposable Elements 56
Transformation 46	Molecular Cloning of DNA 59
5. Microbial Metabolism	63
The Role of Metabolism in Biosynthesis & Growth 63	The Regulation of Metabolic Pathways 77
Metabolic Pathways Unique to Micro- organisms 67	The Regulation of RNA Synthesis 79
Patterns of Microbial Energy-Yielding Metabolism 71	The Regulation of DNA Synthesis & Cell Division 79
6. Cultivation of Microorganisms	81
Nutrition 81	Cultivation Methods 83
Environmental Factors Affecting Growth 82	
7. The Growth & Death of Microorganisms	87
Definition & Measurement of Growth 87	Synchronous Growth 89
Exponential Growth 87	Growth Parameters 89
The Growth Curve 88	Definition & Measurement of Death 90
The Maintenance of Cells in Exponential Phase 89	Antimicrobial Agents 91
8. The Microbiology of Special Environments	97
Water 97	Air 102
Milk 99	Soil 104
Foods 100	

9. Bacteriophage 108

Life Cycles of Phage & Host 108	Replication of RNA Phages 111
Methods of Study 109	Phage Genetics 111
Properties of Phage 109	Lysogeny 112
Phage Reproduction 110	

10. Antimicrobial Chemotherapy 117

Mechanisms of Action of Clinically Used Antimicrobial Drugs 117	Clinical Use of Antibiotics 125
Resistance to Antimicrobial Drugs 120	Antimicrobial Drugs Used in Combination 126
Origin of Drug Resistance 121	Antimicrobial Chemoprophylaxis 127
Drug Dependence 122	Disinfectants 129
Antimicrobial Activity in Vitro 122	Antimicrobial Drugs for Systemic Administration 129
Antimicrobial Activity in Vivo 123	Urinary Antiseptics 143
Drug-Parasite Relationships 124	Antiviral Drugs 143
- Host-Parasite Relationships 124	

11. Host-Parasite Relationships 146

Infection 146	Some Mechanisms of Nonspecific Host Resistance 149
Attributes of Microorganisms That Enable Them to Cause Disease 146	Resistance & Immunity 152
Attributes of the Host That Determine Resistance to Microorganisms 148	Natural Immunity 152
	Acquired Immunity 153
	Genetic Influences 154

12. Immunology: I. Antigens & Antibodies 155

Definitions & Cellular Basis of Immune Responses 155	Immunofluorescence (Fluorescent Antibody Tests, FA) 168
Definitions 155	Electrophoresis Methods 169
The Cellular Basis of Immune Responses 155	Radioimmunoassay (RIA) 169
Antibodies: Structure & Formation 158	Enzyme-Linked Immunoassay 169
Structure of Immunoglobulins 159	Other Types of Serologic Reactions 169
Antigen-Antibody Reactions 164	The Complement System 170
Serologic Reactions 165	Complement-Mediated Reactions 171
Precipitation Reactions 166	The Complement Fixation Test 171
Gel Diffusion Tests 166	Recommended Active Immunization 172
Agglutination Reactions 166	Recommended Schedule for Routine Active Immunization of Children 172
The Antiglobulin (Coombs) Test 167	Recommended Immunization of Adults for Travel 172
Toxin-Antitoxin Reactions 167	
Absorption Reactions 168	
Inhibition Reactions 168	

13. Immunology: II. Antibody-Mediated & Cell-Mediated (Hypersensitivity & Immunity) Reactions 175

Antibody-Mediated Hypersensitivity 175	Cell-Mediated Hypersensitivity Employed in Diagnosis of Infection 181
Anaphylaxis 175	Relationship of Cell-Mediated Reactions & Immunity & Resistance to Infection 181
Arthus Reaction 177	Contact Allergy To Drugs & Simple Chemicals 182
Serum Sickness 177	Role of Lipids, Waxes, & Adjuvants in the Development of Cell-Mediated Reactions 182
Immune Complex Disease 177	Extrinsic Allergic Alveolitis (Chronic Recurrent Lung Disease) 182
Drug Hypersensitivity 178	Interference With Cell-Mediated or Antibody-Mediated Hypersensitivity or Immunity 182
Cell-Mediated Hypersensitivity & Immunity 178	Tolerance 183
Tuberculin Hypersensitivity 179	Autoimmune Diseases 184
Passive Transfer of Cell-Mediated Hypersensitivity 179	Transplantation Immunity 185
Induction of Cell-Mediated Hypersensitivity 179	Tumor Immunity 187
Tests to Evaluate Cell-Mediated Hypersensitivity or Immunity 180	

14. Pyogenic Cocci 189

- The Staphylococci 189
The Streptococci 193
The Pneumococci 199
The Neisseriae 202
- Neisseria meningitidis* (Meningococcus) 202
Neisseria gonorrhoeae (Gonococcus) 204
Other Neisseriae 205

15. Gram-Positive Bacilli 207

- Aerobic Sporeforming Bacilli 207
Anthrax 207
- Anaerobic Sporeforming Bacilli 209
The Clostridia 209
Clostridium botulinum 209
- Clostridium tetani* 210
Clostridia That Produce Invasive Infections 212
Clostridial Pseudomembranous Colitis 213

16. Corynebacteria 214**17. Mycobacteria** 219

- Mycobacterium tuberculosis* 219
Other Mycobacteria 223
- M leprae* 224

18. Enteric Gram-Negative Microorganisms 226

- Endotoxins of Gram-Negative Bacteria 226
Exotoxins Produced by Aerobic Gram-Negative Bacteria 229
- Enterobacteriaceae 230
The Coliform Bacteria 231
- The *Proteus-Providencia* Group 233
The *Pseudomonas* Group 234
The *Salmonellae* 234
The *Shigellae* 237
The *Vibrios* 239

19. Small Gram-Negative Rods 242

- The Brucellae 242
The Pasteurellae 244
The Hemophilic Bacteria 247
- Haemophilus influenzae* 247
Bordetella pertussis 249
Other Organisms of the *Haemophilus* group 250

20. Spirochetes & Other Spiral Microorganisms 253

- Treponema pallidum* 253
Diseases Related to Syphilis 256
Other Spirochetal Organisms 256
- Borrelia recurrentis* 256
Leptospirae 257
- Spirillum minor* (*Spirillum morsus muris*) 259
Spirochetes of the Normal Mouth & Mucous Membranes 259
Fusospirochetal Disease 259

21. Rickettsial Diseases 261**22. Chlamydiae** 266

- Psittacosis (Ornithosis) 268
Ocular, Genital, & Respiratory Infections due to *Chlamydia trachomatis* 270
- Trachoma 270
Genital Chlamydial Infections & Inclusion Conjunctivitis 271
- Respiratory Tract Involvement With *C trachomatis* 271
Lymphogranuloma Venereum (LVG) 272
Other Agents of the Group 273

23. Miscellaneous Pathogenic Microorganisms 274

- Mycoplasmas (PPLO) & Wall-Defective Microbial Variants 274
- Legionella pneumophila* 276
- Streptobacillus moniliformis* 277
- Listeria monocytogenes* 277
- Erysipelothrix insidiosa* (*Erysipelothrix rhusiopathiae*) 277
- Acinetobacter* (*Mima, Herellea*) 278
- Bartonella bacilliformis* 278
- Bacteroides* 278
- Veillonellae* 279
- Pseudomonas* (*Actinobacillus*) *mallei* & *Pseudomonas pseudomallei* 279
- Aeromonas hydrophilia* 279

24. Normal Microbial Flora of the Human Body	281
Role of the Resident Flora 281	
Normal Flora of the Skin 281	
Normal Flora of the Mouth & Upper Respiratory Tract 282	
Normal Flora of the Intestinal Tract 282	
Normal Flora of the Urethra 283	
Normal Flora of the Vagina 283	
Normal Flora of the Eye (Conjunctiva) 284	
25. Medical Mycology	285
Structures of Fungi 285	
Superficial Mycoses 287	
Other Superficial Mycoses 290	
Subcutaneous Mycoses 290	
<i>1. Sporothrix schenckii</i> 290	
<i>2. Chromomycosis</i> 291	
<i>3. Mycetoma</i> 292	
Systemic Mycoses 292	
<i>1. Coccidioides immitis</i> 292	
<i>2. Histoplasma capsulatum</i> 294	
<i>3. Blastomyces dermatitidis</i> 295	
<i>4. Paracoccidioides brasiliensis</i> <i>(Blastomyces brasiliensis)</i> 296	
<i>Opportunistic Mycoses</i> 297	
<i>1. Candida & Related Yeasts</i> 297	
<i>2. Cryptococcus neoformans</i> 299	
<i>3. Aspergillosis</i> 300	
<i>4. Zygomycosis (Mucormycosis, Phycomycosis)</i> 300	
Actinomycetes 301	
<i>1. Actinomycosis</i> 301	
<i>2. Nocardiosis</i> 302	
Hypersensitivity to Fungi 303	
Mycotoxins 303	
26. Principles of Diagnostic Medical Microbiology	305
Communication Between Physician & Laboratory 305	
Specimens 305	
Selection of Laboratory Investigations 306	
The Demonstration of an Infectious Agent 306	
Anaerobic Infections 312	
Serologic Tests & the Demonstration of Specific Antibody 313	
Skin Tests 315	
Nonspecific Clinical Laboratory Tests 317	
Laboratory Aids in the Selection of Antimicrobial Therapy 318	
Gram & Acid-Fast Staining Methods 321	
27. General Properties of Viruses	322
(A detailed Table of Contents of this chapter is presented on p 322.)	
28. Isolation of Viruses From Clinical Specimens	357
Considerations in the Diagnosis of Viral Diseases 357	
Direct Examination of Clinical Material 358	
Solid-Phase Immunoassays 358	
Virus Isolation Technique 359	
Specimens for Study 359	
Preservation of Viruses 359	
Preparation of Inocula 359	
Cultivation in Cell Culture 361	
Animal Inoculation 362	
Embryonated Eggs 362	
29. Serologic Diagnosis & Immunologic Detection of Virus Infections	363
Neutralization (Nt) Tests 363	
The Neutralization Test in Cell Culture 364	
Neutralization Tests in Eggs 365	
Neutralization Test in Mice 365	
Interpretation of Neutralization Tests 365	
Complement Fixation (CF) Tests 365	
Hemagglutination Inhibition (HI) Test 366	
Passive Hemagglutination Test 366	
Immunofluorescence Test 366	
Immunodiffusion Test 367	
Counterimmunoelectrophoresis Test 367	
Radioimmunoassay 367	
Enzyme-Linked Immunosorbent Assay (ELISA) 368	
Immune Electron Microscopy 368	
Diagnosis of Infectious Mononucleosis 368	
Heterophil Agglutination Test 368	
Mononucleosis Spot Test 369	
Tests for Dermal Hypersensitivity (Skin Tests) 369	

30. Arthropod-Borne (Arbo) Viral Diseases **374**

- Togavirus Encephalitis (SLE, WEE, EEE) 376
Venezuelan Equine Encephalitis 379
Bunyavirus Encephalitis (California Encephalitis) 380
West Nile Fever 380
Yellow Fever 380
Dengue (Breakbone Fever) 382
- Hemorrhagic Fever 383
Lassa Fever 384
Sandfly Fever (Pappataci Fever, *Phlebotomus* Fever) 384
Colorado Tick Fever (Mountain Fever, Tick Fever) 384
Rift Valley Fever (Enzootic Hepatitis) 385

31. Picornavirus Family (Enterovirus & Rhinovirus Groups) **386**

- Enterovirus Group 386
Poliomyelitis 386
Coxsackieviruses 390
Echoviruses 393
- Other Enterovirus Types 394
Rhinovirus Group 394
Foot-and-Mouth Disease (Aphthovirus of Cattle) 395

32. Hepatitis Virus **397****33. Rabies & Other Viral Diseases of the Nervous System; Slow Viruses** **410**

- Rabies 410
Aseptic Meningitis 414
Lymphocytic Choriomeningitis 414
Encephalitis Lethargica (von Economo's Disease) 415
Epidemic Neuromyasthenia (Benign Myalgic Encephalitis) 415
- Encephalomyocarditis Virus Infection (Mengo Fever) 415
Slow Virus Diseases: Chronic Viral Diseases of the Central Nervous System & Other Progressive Degenerative Disorders 415

34. Orthomyxovirus (Influenza) & Coronavirus Families **419**

- Orthomyxoviruses 419
Influenza 419
- Coronaviruses 425

35. Paramyxovirus Family & Rubella Virus **427**

- Mumps (Epidemic Parotitis) 427
Parainfluenza Virus Infections 430
Newcastle Disease Conjunctivitis 430
Measles (Rubeola) 430
Respiratory Syncytial (RS) Virus 433
- Rubella (German Measles) 433
1. Postnatal Rubella 433
2. Congenital Rubella Syndrome 434
3. Control of Rubella 435

36. Poxvirus Family **437**

- Vaccinia, Variola, & Related Poxviruses That Can Infect Humans 437
Cowpox 442
- Monkeypox 442
Yaba Monkey Virus 442
Molluscum Contagiosum 442

37. Adenovirus Family **444****38. Herpesvirus Family** **449**

- Herpes Simplex (Human Herpesvirus 1 & 2) (Herpes Labialis, Herpes Genitalis, & Many Other Syndromes) 449
Varicella-Zoster Virus (Human Herpesvirus 3) 453
Varicella (Chickenpox) & Zoster (Herpes Zoster, Shingles, Zona) 453
Cytomegalovirus (Human Herpesvirus 5) (Cytomegalic Inclusion Disease) 455
- EB Herpesvirus (Human Herpesvirus 4) (Infectious Mononucleosis, Burkitt's Lymphoma, Nasopharyngeal Carcinoma) 456
B Virus (Herpesvirus of Old World Monkeys) 458
Marmoset Herpesvirus (Herpesvirus of New World Monkeys) 458

39. Reoviruses, Rotaviruses, & Other Human Viral Infections 460

- Reoviruses 460
Orbiviruses 460
Rotaviruses (Infantile Gastroenteritis) 461
Epidemic Gastroenteritis Virus 462
Crohn's Disease, Ulcerative Colitis, & Other Chronic Diseases of the Gastrointestinal Tract 463
Warts (Verrucae, Human Papovavirus) 463
- Exanthem Subitum (Roseola Infantum) 464
Fifth Disease (Erythema Infectiosum) 464
African Hemorrhagic Fever (Marburg & Ebola Viruses) 464
Cat-Scratch Fever (Benign Lymphoreticulosis) 465
Guillain-Barré Syndrome (Inflammatory Polyradiculopathy) 465
Diabetes Mellitus 465

40. Oncogenic Viruses 467

(A detailed Table of Contents of this chapter is presented on p 467.)

41. Medical Parasitology 497

Donald Heyneman

- Classification 497
Giardia lamblia 499
Trichomonas 499
Other Intestinal Flagellates 500
The Hemoflagellates 501
1. *Leishmania* 501
2. *Trypanosoma* 503
Entamoeba histolytica 506
Other Intestinal Amebas 508
Free-Living Amebas 510
- The Plasmodia 510
Isospora 513
Sarcocystis lindemanni 514
Toxoplasma gondii 515
Babesia microti 516
Balantidium coli 516
Pneumocystis carinii 517
Helminths: Ova in Feces & Microfilariae in Blood & Tissues 517
Illustrations 522-532

Index 533
