<b>1 Viruses – a unique kind of infectious agent</b>	<b>1</b>
<i>Erik Lycke and Erling Norrby</i>	
<b>2 The morphology of virus particles. Classification of viruses</b>	<b>4</b>
<i>Erling Norrby</i>	
Infectious nucleic acid	4
Principal aspects of virus particle structure	4
Live or dead materia?	5
Structural proteins – symmetry arrangements	5
The virus envelope	8
Classification of viruses	9
Introduction to different families of animal viruses	12
<b>3 The biochemistry of virus particles</b>	<b>17</b>
<i>Ulf Pettersson</i>	
Virus-DNA	17
Virus-RNA	20
Virus proteins	23
Additional components in virions	27
<b>4 Viral gene products; their immunological properties and biological activities</b>	<b>28</b>
<i>Erling Norrby</i>	
Viral antigens	28
Haemagglutination	32
Cell fusion and haemolysis	35
Enzymatic activities of viral gene products	36
<b>5 Cultivation of viruses</b>	<b>38</b>
<i>Göran Wadell</i>	
Identification and propagation of viruses in tissue and cell cultures	38
Identification and propagation of viruses in embryonated hen's eggs	42
Identification and cultivation of viruses in experimental animals	43

<b>6 General views on virus replication</b>	<b>45</b>
<i>Erling Norrby</i>	
Morphological methods for analysis of virus replication	45
Molecular methods for characterization of virus replication	46
Quantitative determination of virus infectivity	46
Quantitative determination of other biological properties of viral products	48
The different phases of virus replication	48
<b>7 Attachment of viruses to cell receptors and penetration of viruses into cells</b>	<b>51</b>
<i>Lennart Philipson</i>	
Virus and receptors	52
Penetration	53
<b>8 Replication, transcription and translation of RNA viruses</b>	<b>57</b>
<i>Lennart Philipson</i>	
Classes of RNA viruses	57
Reoviruses	59
Picornaviruses	60
Togaviruses	63
Rhabdoviruses and paramyxoviruses	64
Orthomyxoviruses	66
Retroviruses	68
<b>9 Replication, transcription and translation of DNA viruses</b>	<b>72</b>
<i>Ulf Pettersson</i>	
Parvoviruses	72
Papovaviruses	74
Adenoviruses	76
Herpesviruses	79
Poxviruses	81
<b>10 The morphogenesis of virions</b>	<b>84</b>
<i>Erling Norrby</i>	
The maturation and release of non-enveloped viruses	84
The morphogenesis of enveloped viruses	84
<b>11 Virus-induced changes of cell structures and functions</b>	<b>93</b>
<i>Erik Lycke and Erling Norrby</i>	
Cytopathic changes	93
Inclusions in virus-infected cells	97
The effect of integration of viral antigens in cellular membranes	98
Effects of viruses on functions of highly specialized cells	98
Chromosomal changes	100
Virus-induced cell transformation	100
Interferon	104

<b>12 Virus genetics</b>	<b>105</b>
<i>Lennart Philipson</i>	
Mutations	105
Recombination	108
Phenotypic mixing and complementation	109
<b>13 General aspects of pathogenesis of virus infections</b>	<b>112</b>
<i>Erik Lycke</i>	
Modes of transmission of virus diseases	114
The importance of cellular and viral receptor functions	116
The spread of virus infections within the body	117
The importance of barrier systems in limiting the spread of the infection	119
Influence of immune reactions on the pathogenesis	120
Influence of constitution, age, sex and genetic background	122
<b>14 Pathogenesis of acute virus infections</b>	<b>125</b>
<i>Erik Lycke</i>	
Respiratory infections	125
Infections of visceral organs	126
Infections of the skin and mucous membranes	128
Infections of the nervous system	131
<b>15 The pathogenesis of congenital infections</b>	<b>135</b>
<i>Marianne Forsgren</i>	
Different ways by which a virus may cause fetal damage	136
Spread of virus in congenital infections	137
Direct effects of fetal infections	138
Indirect fetal-damaging effects in connection with infections of pregnant women	142
<b>16 The pathogenesis of persistent infections</b>	<b>144</b>
<i>Erling Norrby</i>	
Chronic subclinical infections with immune pathological reactions	146
Latent infections	148
Slow virus infections caused by conventional viruses	151
<b>17 Slow infections caused by non-immunogenic infectious agents</b>	<b>155</b>
<i>Erling Norrby</i>	
Different forms of infectious encephalopathy	155
Biological and physical-chemical properties of atypical infectious agents	159
How do atypical infectious agents spread?	160
<b>18 Viruses and tumours</b>	<b>163</b>
<i>Eva-Maria Fenyö and Britta Wahren</i>	
Tumour viruses in animals	167
Human tumour viruses	174
Human tumour virus candidates	175

<b>19 Mechanisms of defence against virus infections</b>	<b>178</b>
<i>Örjan Strannegård</i>	
Non-specific immunity	178
Humoral immunity	180
Cell-mediated immunity	183
Immunopathological effects of virus infections	184
Virus infections in connection with malignant diseases and immune suppression	187
Immunological defence against congenital virus infections	187
<b>20 Laboratory techniques for diagnosis of virus infections</b>	<b>189</b>
<i>Monica Grandien and Arne Svedmyr</i>	
Isolation of viruses	189
Direct identification of virus or viral antigens in samples from patients	193
Analysis of antibody response in patients	195
Evaluation of laboratory results	200
<b>21 The epidemiology of virus diseases</b>	<b>202</b>
<i>Margareta Böttiger and Erling Norrby</i>	
Methods of surveillance of the epidemiological occurrence of infectious diseases	202
The dissemination mechanisms of virus infections	204
Epidemiological patterns of virus infections	206
Examples of the epidemiology of some virus diseases	206
<b>22 Inactivation of viral infectivity and disinfection</b>	<b>212</b>
<i>Erik Lycke</i>	
<b>23 Immune prophylaxis</b>	<b>216</b>
<i>Erling Norrby</i>	
Passive immunization	216
Active immunization	218
<b>24 Antiviral drugs</b>	<b>230</b>
<i>Örjan Strannegård and Bo Öberg</i>	
Mechanisms of action of antiviral drugs	230
Antiviral drugs used for clinical chemotherapy	232
Antiviral drugs with a potential clinical usefulness	235
Interferon	236
<b>25 Picornaviruses</b>	<b>242</b>
<i>Gerolf von Zeipel</i>	
Properties of picornaviruses	243
Enteroviruses	243
Rhinoviruses	248

<b>26 Togaviruses</b>	<b>251</b>
<i>Marianne Forsgren and Gerolf von Zeipel</i>	
Alphaviruses	253
Flaviviruses	253
Rubellavirus (Rubivirus)	256
<b>27 Orthomyxoviruses (influenza viruses)</b>	<b>262</b>
<i>Svante Hermodsson</i>	
Properties of the virus	262
Clinical features	264
Pathogenesis	265
Epidemiology	268
Laboratory diagnosis	269
Prophylaxis	270
<b>28 Paramyxoviruses</b>	<b>272</b>
<i>Svante Hermodsson</i>	
Parainfluenza virus	273
Mumps virus	276
Measles virus	279
Respiratory syncytial (RS) virus	282
<b>29 Adenoviruses</b>	<b>286</b>
<i>Göran Wadell</i>	
Properties of the virus	287
Clinical features	289
Epidemiology	291
Prophylaxis	292
<b>30 Hepatitis viruses</b>	<b>293</b>
<i>Erik Nordenfelt</i>	
Properties of the virus	293
Clinical features	295
Pathogenesis	297
Immunity	298
Laboratory diagnosis	298
Epidemiology	300
Prophylaxis	302
<b>31 Herpesviruses</b>	<b>304</b>
<i>Erik Lycke</i>	
Properties of the virus	304
Latency and transformation	306
Herpes simplex virus (HSV) infections	308
Varicella zoster virus (VZV) infections	314
Cytomegalovirus (CMV) infections	316
Epstein-Barr virus (EBV) infections	318

<b>32 Poxviruses</b>	<b>323</b>
Åke Espmark	
Classification	323
Properties of the virus	324
Variola (smallpox)	325
Smallpox vaccine (vaccinia virus)	325
The WHO smallpox eradication programme	326
Clinical features of variola	326
Laboratory diagnosis	327
Other medically important poxviruses	328
<b>33 Other viruses</b>	<b>331</b>
Åke Espmark and Monica Grandien	
Reoviruses	331
Retroviruses	331
Bunyaviruses	332
Arenaviruses	334
Coronaviruses	335
Rhabdoviruses (rabies virus)	336
Marburg/Ebola virus	338
Parvoviruses	339
Papovaviruses	339
<b>34 Viral syndromes</b>	<b>341</b>
Erik Lycke	
Respiratory tract infections	341
Infections of the pharynx	343
Infections with exanthemas	344
Hepatitis	345
Gastrointestinal infections	345
Urogenital infections	346
Infections of the nervous system	347
Infections of the sensory organs	349
Neonatal infections	350
<b>Appendix. Chlamydia</b>	<b>353</b>
Erik Lycke and Per-Anders Mårdh	
Microbiology of chlamydiae	353
<i>Chlamydia psittaci</i> infections	354
<i>Chlamydia trachomatis</i> infections	354
Laboratory diagnosis	356
Susceptibility of chlamydiae to antibiotics	360
