Preface/ix

Section I BASIC VIROLOGY

1. The Nature, Isolation, and Measurement of Animal Viruses/3
Wolfgang K. Joklik
2. The Structure, Components, and Classification of Viruses/15
Wolfgang K. Joklik
3. Viruses and Viral Proteins as Antigens/53
Wolfgang K. Joklik
4. The Virus Multiplication Cycle/59
Wolfgang K. Joklik
5. The Effect of Virus Infection on the Host Cell/95
Wolfgang K. Joklik
6. The Genetics of Animal Viruses/103
Wolfgang K. Joklik
7. Antiviral Chemotherapy, Interferon, and Vaccines/117
Wolfgang K. Joklik
8. Tumor Viruses/129
Wolfgang K. Joklik
9. The Bacteriophages/159
Wolfgang K. Joklik

Section II CLINICAL VIROLOGY

10. Host-Virus Interactions/181
Catherine M. Wilfert
11. Diagnostic Virology/187
Catherine M. Wilfert
12. Poxviruses/193
Samuel L. Katz

13. Herpesviruses/199
Cornelia L. Dekker
14. Adenoviruses and Adenovirus-associated Viruses/215
Sandra N. Lehrman
15. Human Papovaviruses/221
Sandra N. Lehrman
16. The Enteroviruses/227
Catherine M. Wilfert and Samuel L. Katz
17. Viruses in Gastrointestinal Tract Infection/235
Catherine M. Wilfert
18. Influenza Viruses/243
David W. Barry
19. Paramyxoviruses/251
Catherine M. Wilfert
20. Measles and Subacute Sclerosing Panencephalitis/263
Samuel L. Katz
21. Rubella (German Measles)/269
Samuel L. Katz
22. Arboviruses/273
Thomas E. Frothingham
23. Rhabdoviruses and Marburg and Ebola Viruses/285
Thomas E. Frothingham
24. Arenaviruses/291
Thomas E. Frothingham
25. The Hepatitis Viruses/297
John D. Hamilton
26. Miscellaneous Viruses: Reoviruses and Rhinoviruses/305
Catherine M. Wilfert
27. Subacute Spongiform Encephalopathies/Unconventional Viruses/309
Catherine M. Wilfert

Index/313
