

Contents

Contributors	v
Preface	vii
1. Basic theory of electrophoresis: definitions, terminology and comparison of the basic techniques H. Rilbe	1
2. Electrophoretic methods for molecular characterization of proteins M. Whittaker and C. F. Simpson	27
3. Recent developments in isoelectric focusing J. S. Fawcett	57
4. Analytical isoelectric focusing on cellulose acetate membranes and agarose thin layers J. Ambler	81
5. Ultra-thin-layer isoelectric focusing B. J. Radola	101
6. Gel immunoelectrophoresis J. Kohn	119
7. Analytical isotachopheresis F. M. Everaerts and T. P. E. M. Verheggen	149
8. Preparative isotachopheresis C. F. Simpson and M. Whittaker	197
9. Preparative displacement electrophoresis F. Hampson	215
10. Preparative isoelectric focusing F. Hampson	231
11. Free-flow electrophoresis A. R. Thomson	253
Subject index	275
