		Instructions to the Reader Before Starting		
		Preface	xiii xv	
		A Note on Programmed Instruction	xvii	
				·····
SECTIO	ON 1. ELE	EMENTARY PHYSICAL CHEMISTRY		
Elmomo e e		Introduction to Section 1	1	
Frames		Definitions of acid and base	1	
	7–16	Strong and weak acids and their conjugate bases	2	
	17-21	Relationship of hydrogen ion concentration to pH	5	
	22-28	Definition of a buffer pair	6	
	29–33	Buffering of strong acid or base	7	
	34	Review frame	8	
	35-42	Principles governing chemical equilibriums	9	
	43-47		11	
	48-49	The Henderson-Hasselbalch equation	12	
	50	Summary	13	
SECTIO	N 2 THE	PLASMA BICARBONATE BUFFER SYSTEM		
OLCIIO	11 &. IIIE	Preview frame for Section 2		
Frames	1–9		15	
	10-15	Properties of carbonic acid; hydration reaction Partial pressure of a gas	15	
	16-25	Relationships between gaseous and dissolved CO ₂	17	
	26	Summary CO_2	19	
	27–34		21	
	21-04	Quantitative aspects of plasma bicarbonate system	22	
	35-37	Normal values for arterial plasma	24	
	38-42	Exercises in using Henderson-Hasselbalch	25	
		equation	20	
	43	Summary	26	
	44-48	Components of the open system	27	
	49-56	Attributes of the open system to strong acid	29	
	57-61	Quantitative responses of open system to strong	32	
		acid		
	62–64	Attributes of open system to strong base	34	
	65–70	Quantitative responses of open and closed	36	
		systems to strong base		
	71	Summary of quantitative responses	37	
	72	Summary	38	
SECTION	A 3 MHC	DLE BLOOD BUFFER SYSTEMS		
Frames	1–8			
1 10011100	9	Types and classification of buffers in whole blood	39	
	10	Response of blood buffers to strong acid or base	41	
	11-15	Summary Overtitative relationships of the state of the st	42	
	11-10	Quantitative relationships of blood buffers to strong acid or base	42	
	16-21	Blood buffer base		
	22-25	Blood base excess	44	
	26-32	Normal buffer base	47	
	33	Summary	48	
	34-47		50	
		Relationships between pH and ratios of two classes of blood buffers	50	
	48	Summary	54	
	49-54	The interaction reaction and its relationships	54	
	55–58	Buffer reactions to gain of bicarbonate	56	
	59–63	Buffer reactions to loss of bicarbonate	57	
	6 4	Summary	59	

	65-66	Review frames	59	
	67-69	The "abnormal" open system	60	
	70-77	Buffer reactions to gain of CO ₂	61	
	78-82	Buffer reactions to loss of CO ₂	63	
	83	Summary	64	
		The six general types of acid-base disturbances	66	
	84–87	Systems of characterizing blood acid-base status	67	
	88–96		69	
	97	Summary	UB	
SECTIO	N 4. THE	RESPIRATORY COMPONENT OF ACID-BASE EQUILI	BRIUM	
		Introduction to Section 4	71	
Frames	1–3	Oxyhemoglobin and reduced hemoglobin	72	
	4–13	Buffering and oxygen-carrying properties of	73	
		hemoglobin		
	14	Summary	75	
	15-19	Reactions of hemoglobin in blood in tissues and	76	
	10 10	lungs		
	20–27	Tissue production of CO ₂ and the hydration	77	
	20-21	reaction; carbonic anhydrase		
	28-37	Buffering of CO ₂ by blood in the tissues	79	
		The chloride shift	82	
	38-41		84	
	42-46	Reaction sequence in the blood and in the lungs		
	47	Summary	85	
	48–56	Relationships between PCO ₂ and rates of CO ₂	85	
		production and alveolar ventilation		
	57-59	Significance of PCO ₂ in terms of rates of CO ₂	88	
		production and alveolar ventilation		
	60-69	Balance of CO ₂ and its relationship to PCO ₂	90	
	70	Summary	93	
	71-72	Effect of primary changes in alveolar ventilation	93	
		on blood acid-base status		
	73-75	Secondary changes in alveolar ventilation	94	
		produced by primary changes in metabolic		
		component		
	76	Summary	95	
SECTIO	N 5. THE	METABOLIC COMPONENT OF ACID-BASE EQUILIB	RIUM	
		Introduction to Section 5	97	
Ti	1 10	The body water and its major subdivisions	98	
Frames		Buffers of the extracellular fluid	101	
	11-14		102	
	15	Summary	103	
	16–20	Production of strong acids from normal	103	
		metabolism	104	
	21-26	Acidification of the urine	104 ✓	
	27–33	Formation of titratable acid and ammonia	107	
	34	Summary	110	
	35-41	Response of kidney to a large load of acid	110	
	42-44	Response of kidney to loss of bicarbonate	112	
	45	Summary	113	
	46-53	Response of kidney to gain of bicarbonate;	114	
		alkalinization of the urine		
	5 4-6 0	Gain of strong base: mechanism and renal	116	
		response		
	61	Summary	118	
	62-67	Definition of metabolic H ⁺ balance	118	
	68-74	Response of metabolic H ⁺ balance to load of acid	121	
	75-81	Components of input of metabolic H ⁺ balance	123	
	82-86	Components of input of metabolic H ⁺ balance	125	
			126	
	87	Summary Congress processes affecting metabolic Ht balance	127	
	88-91	General processes affecting metabolic H ⁺ balance	129	
	92–96	Mechanisms of gain of acid	TEG	

	07 400	Machaniama of sain of hisanbanata	101
		Mechanisms of gain of bicarbonate Mechanisms of loss of bicarbonate	131 132
			133
	105-107	Review frames	134
			135
	110 111–116	Summary Secondary responses of the kidney to primary	135
	111110	changes in PCO ₂	133
	117	Summary	138
,			
CECTION	ת בייים	MINOLOGY OF ACID-BASE DISTURBANCES	
SECTIO	N O. IEMI		100
-		Introduction to Section 6	139
Frames	1-5	Definitions of acidosis and alkalosis	139
	6-9	Changes in blood produced by disturbances	142
	1015	Definitions of metabolic acidosis and alkalosis	142
	16–20	Definitions of respiratory acidosis and alkalosis	143
	21–23	Examples of usage	145
	24	Summary of definitions of metabolic and respiratory acidosis and alkalosis	146
	25	Summary	146
	26–33	Definition of compensation	147
	20–33 34–36	Definition of correction	150
	37	Summary	150
	38-41	Definition of degrees of compensation according	151
	3 0 4 1	to blood pH	131
	42-47	Definition of degrees of compensation according	152
	42-41	to physiologic potential	102
	48	Summary	154
	49–61	Definition and terminology of mixed disturbances	155
	62	Summary	158
	63–67	Terminology for changes in blood acid base	159
	00 01	status	100
	68	Summary	160
	68	Summary	160
CECTION			160
SECTION		ABOLIC ACIDOSIS	
SECTION		ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10	161
	N 7. MET.	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7	161 161
SECTION Frames	N 7. MET.	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis	161 161 161
	N 7. MET. 1–18 19	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary	161 161 161 168
	1–18 19 20–25	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis	161 161 161 168 169
	1–18 19 20–25 26–32	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis	161 161 161 168 169 171
	1–18 19 20–25 26–32 33–34	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis	161 161 161 168 169 171
	1–18 19 20–25 26–32 33–34 35	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary	161 161 161 168 169 171 174
	1-18 19 20-25 26-32 33-34 35 36-42	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation	161 161 161 168 169 171 174 175
	1-18 19 20-25 26-32 33-34 35 36-42 43-46	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits	161 161 161 168 169 171 174 175
	1-18 19 20-25 26-32 33-34 35 36-42	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic	161 161 161 168 169 171 174 175
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis	161 161 161 168 169 171 174 175 175 178
	1-18 19 20-25 26-32 33-34 35 36-42 43-46	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic	161 161 161 168 169 171 174 175
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis	161 161 161 168 169 171 174 175 175 178 179
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary	161 161 161 168 169 171 174 175 175 178 179
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis	161 161 161 168 169 171 174 175 175 178 179
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation	161 161 161 168 169 171 174 175 175 178 179 183
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis	161 161 161 168 169 171 174 175 175 178 179
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis Summary	161 161 161 168 169 171 174 175 175 178 179 183 186 186 188 190 192
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis	161 161 161 168 169 171 174 175 175 178 179 183 186 186 186 188
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis Summary Mixed respiratory alkalosis and metabolic acidosis	161 161 161 168 169 171 174 175 175 178 179 183 186 186 188 190 192
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78 79 80-83	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis Summary Mixed respiratory alkalosis and metabolic	161 161 161 168 169 171 174 175 175 178 179 183 186 186 188 190 192
	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78 79 80-83 84-90	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis Summary Mixed respiratory alkalosis and metabolic acidosis "Overcompensated" metabolic acidosis	161 161 161 168 169 171 174 175 175 178 179 183 186 186 188 190 192 192
Frames	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78 79 80-83 84-90 91	Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis Summary Mixed respiratory alkalosis and metabolic acidosis "Overcompensated" metabolic acidosis Summary	161 161 161 168 169 171 174 175 175 178 179 183 186 186 188 190 192 192
Frames	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78 79 80-83 84-90 91	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis Summary Mixed respiratory alkalosis and metabolic acidosis "Overcompensated" metabolic acidosis Summary ABOLIC ALKALOSIS	161 161 161 168 169 171 174 175 175 178 179 183 186 186 188 190 192 192 192
Frames	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78 79 80-83 84-90 91	Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis Summary Mixed respiratory alkalosis and metabolic acidosis "Overcompensated" metabolic acidosis Summary ABOLIC ALKALOSIS Introduction to Section 8	161 161 161 168 169 171 174 175 175 178 179 183 186 186 188 190 192 192 194 196
Frames	1-18 19 20-25 26-32 33-34 35 36-42 43-46 47-54 55-60 61 62-67 68-73 74-78 79 80-83 84-90 91	ABOLIC ACIDOSIS Introduction to Sections 7, 8, 9, 10 Preview frame for Section 7 Causes of metabolic acidosis Summary Buffer mechanisms in metabolic acidosis Respiratory compensation in metabolic acidosis Acute and sustained metabolic acidosis Summary Degrees of compensation Definition of 95% confidence limits 95% confidence limits for sustained metabolic acidosis Acid-base displacement pathway in metabolic acidosis Summary Criteria for diagnosis of metabolic acidosis Quantitative assessment of compensation Mixed respiratory and metabolic acidosis Summary Mixed respiratory alkalosis and metabolic acidosis "Overcompensated" metabolic acidosis Summary ABOLIC ALKALOSIS	161 161 161 168 169 171 174 175 175 178 179 183 186 186 188 190 192 192 192

	1822	Buffer mechanisms in metabolic alkalosis	202	
	23-29	Respiratory compensation in metabolic alkalosis	203	
	30-35	Acute and sustained metabolic alkalosis	206	
	36	Summary	208	
	37–43	95% confidence limits for sustained metabolic alkalosis	208	
	44-47	Acid-base displacement pathway in metabolic alkalosis	211	
	48	Summary	212	
	49 –51	Less-than-maximally compensated alkalosis	213	
	52–55	Mixed respiratory and metabolic alkalosis	214	
	5 6 –59	"Overcompensated" metabolic alkalosis	215	
	60–63	Mixed respiratory acidosis and metabolic alkalosis	217	
	64	Summary	218	
SECTIO	N 9. RES	PIRATORY ACIDOSIS		
		Introduction to Section 9	219	
Frames	1-4	Causes of respiratory acidosis	219	
	511	Review of buffer and compensation mechanisms	221	
	12-14	Acute respiratory acidosis	224	
	15-18	The in vitro response to gain of CO ₂	224	
	19-32	The in vivo response to gain of CO,	226	
	33	Summary	231	
	34-39	Acid-base changes in acute respiratory acidosis	231	
	40–44	95% confidence limits for acute respiratory acidosis	234	
	45–47	Use of confidence limits to evaluate data in acute respiratory acidosis	236	
	48	Summary	237	
	49-55	Sustained respiratory acidosis	237	
	56–60	95% confidence limits for sustained respiratory acidosis	241	
	61–67	Acid-base displacement pathway in respiratory acidosis	242	
	68	Summary	246	
	69–73	Less-than-maximally compensated and mixed respiratory and metabolic acidosis	246	
	74-79	"Overcompensated" respiratory acidosis	249	
	80–88	Mixed metabolic alkalosis and respiratory acidosis	251	
	89	Summary	254	
SECTION	N 10. RE	SPIRATORY ALKALOSIS		
		Introduction to Section 10	257	
Frames	1-4	Causes of respiratory alkalosis	257	
	5–7	Review of buffer and compensatory mechanisms	259	
	8–11	Time course of buffer and compensatory mechanisms	260	
	12-18	Acute respiratory alkalosis	261	
	19–22	95% confidence limits in acute respiratory	264	
	23–24	alkalosis Use of confidence limits to evaluate data in acute	265	
	25	respiratory alkalosis	•	
	26–29	Summary Sustained respiratory alkalosis	266	
	30–36	95% confidence limits in sustained respiratory alkalosis	267 269	
	37-42	Acid-base displacement pathway in respiratory alkalosis	271	
	43	Summary	274	
	44–48	Less-than-maximally compensated and mixed metabolic and respiratory alkalosis	274	

	49–51	Mixed respiratory alkalosis and metabolic	277	
	**	acidosis	255	
	52–57	"Overcompensated" respiratory alkalosis	277	
	58	Summary	280	
	Epilogue:	A note on the therapy of acid-base disorders	281	
Panels	1	Diagram of the closed and open systems	27	<u> </u>
	2	Response of the open system to buffering of strong acid (H^+) or base (OH^-)	29	
	3	Quantitative response of closed and open systems to addition of 10 mEq/L of strong acid	32	
	4	Quantitative response of closed and open systems to 1.0 mEq/L of strong base	35	
	5	Approximate contribution of individual buffers to total buffering in whole blood	40	
	6	Relationships between acid-base status, hemoglobin concentration, and blood buffer base	48	
	7	Summary of buffer reactions in blood	65	
	8	Diagram of lungs, tissues, and kidneys linked by the circulatory system	71	
	9	Structural formulas of the functional parts of hemoglobin molecule	73	
	10	Changes occurring following abrupt changes in alveolar ventilation	90	
	11	Principal fluid compartments of the body	97	
	12	Strong acid products of metabolism	103	
	13	Renal response to large load of exogenous acid	110 and 120	
	14	Balance of metabolic H ⁺ and factors that affect it	128	
	15	Metabolic end products of organic acids and their salts	130	
	16	Nomenclature to describe deviations in various parameters of blood acid-base	159	
	17	Causes of metabolic acidosis	164	
	18	Changes in respiratory and metabolic components during metabolic acidosis	172	
	19	95% confidence limits for maximally compensated sustained metabolic acidosis	181	
	20	Acid-base displacement pathway in metabolic acidosis	183	
	21	Causes of metabolic alkalosis	199	
	22	Changes in respiratory and metabolic component during metabolic alkalosis	204	
	23	95% confidence limits for maximally compensated sustained metabolic alkalosis	208	
	24	Causes of respiratory acidosis	219	
	25	Changes in the metabolic component in response to an abrupt rise in PCO ₂	222	
	26	Buffer reactions to addition of CO ₂ in vitro and in vivo	227	
	27	95% confidence limits for acute respiratory acidosis	233	
	28	95% confidence limits for maximally compensated sustained respiratory acidosis	240	
	29	Acid-base displacement pathway in respiratory acidosis	243	
	30	Causes of respiratory alkalosis	257	
	31	Changes in the metabolic component in response	260	
	32	to an abrupt fall in PCO ₂ 95% confidence limits for acute respiratory	263	
	33	alkalosis 95% confidence limits for maximally	268	
	QQ	compensated sustained respiratory alkalosis	200
