

Contents

Contributors **vii**

- 1. Donuts and Holes: Molecules and Muscle Relaxants 1**
Frank G. Standaert
- 2. The Physiology of Neuromuscular Transmission 19**
Nicholas N. Durant
- 3. Is There Feedback Control of Transmitter Release at the Neuromuscular Junction? 39**
W.C. Bowman, I.G. Marshall, and A.J. Gibb
- 4. Monitoring of Neuromuscular Function 53**
Hassan H. Ali
- 5. Succinylcholine: Its Past, Present, and Future 69**
Chingmuh Lee
- 6. Atracurium 87**
James P. Payne
- 7. Vecuronium 103**
Ronald D. Miller
- 8. The Cardiovascular and Autonomic Effects of Neuromuscular Blocking Agents 117**
Ralph P.F. Scott and John J. Savarese

9. Choice of Muscle Relaxants in Patients With Heart Disease **143**
Robert K. Stoelting
10. Neuromuscular Blockade in the Patient With Neuromuscular Disorders **157**
Henry Rosenberg
11. Muscle Relaxants in Renal Failure Patients **171**
Colin A. Shanks
12. Pharmacokinetic and Pharmacodynamic Factors That Govern the Clinical Use of Muscle Relaxants **179**
Pim J. Hennis and Donald R. Stanski
13. Muscle Relaxant Antagonists **197**
Roy Cronnelly
14. Muscle Relaxants in Children **215**
Barbara W. Brandom and D. Ryan Cook
15. Interaction of Other Drugs With Muscle Relaxants **233**
Jørgen Viby-Mogensen
16. Neuromuscular Relaxants: Complications **257**
David R. Bevan and Francois Donati
17. Controversies in Muscle Relaxants **271**
Won W. Choi, Samir D. Gergis, and Martin D. Sokoll
18. Pharmacology and Possible Clinical Applications of 4-Aminopyridine **285**
Sandor Agoston, Dieter Langrehr, and Douglas E.F. Newton
- Index* **295**
