Preface	ix
Contributors and Active Participants	xi
1 Hormones derived from vitamin D : Their regulation and function	1
<i>H. F. DeLuca</i>	
2 Intestinal absorption of calcium and phosphorus in adult man in health and disease	21
<i>S. W. Stanbury</i>	
3 Human parathyroid hormone : Immunochemical studies and determination of circulating hormone in patients with primary hyperparathyroidism and renal insufficiency	39
<i>F. M. Dietrich, U. Binswanger, W. Hunziker and J. A. Fischer</i>	
4 Parathyroid hormone in hereditary diseases of mineral metabolism	52
<i>A. Fanconi and J. A. Fischer</i>	
5 Parathyroid function in infants and children	63
<i>Barbara E. Clayton, Angela Fairney, D. Flynn and Doreen Jackson</i>	
6 Use of 1,25-dihydroxycholecalciferol ($1,25(\text{OH})_2\text{D}_3$) in the treatment of hypoparathyroidism and pseudohypoparathyroidism	76
<i>H. P. Kind, A. Prader, and H. F. DeLuca</i>	
7 Calcitonin : Recent advances in genetic and physiological aspects	81
<i>I. MacIntyre, P. B. Greenberg, C. J. Hillyard, O. Ljungberg and J. F. Dymling</i>	
8 Aspects of growth and bone structure in hypophosphataemic rickets	93
<i>R. Steendijk</i>	

vi	<i>Inborn Errors of Calcium and Bone Metabolism</i>	
9	Pseudovitamin D deficiency (vitamin D dependency) <i>A. Prader, H. P. Kind and H. F. DeLuca</i>	115
10	Metabolic forms of rickets (and osteomalacia) <i>C. E. Dent</i>	124
11	X-linked hypophosphataemia and autosomal recessive vitamin D dependency : Models for the resolution of vitamin D refractory rickets <i>C. R. Scriver, F. H. Glorieux, Theresa M. Reade and Harriet S. Tenenhouse</i>	150
12	1 α -hydroxyvitamin D : A comparative study in children <i>S. Balsan, M. Garabedian, R. Sorgniard, M. F. Holick and H. F. DeLuca</i>	179
13	Tubular Fanconi Syndromes with bone involvement <i>J. Brodehl</i>	191
14	Diseases of bone in search of an inborn error <i>C. O. Carter</i>	214
15	Idiopathic juvenile osteoporosis <i>D. P. Brenton and C. E. Dent</i>	222
16	Metabolic effects of a diphosphonate in the treatment of ectopic calcification in children <i>N. R. Belton, W. S. Uttley, H. Sheppard and J. Syme</i>	239
17	Cartilage chemistry in bone dysplasias with neonatal presentation <i>C. A. Pennock and A. C. Sewell</i>	249
18	Calcium and vitamin D metabolism during anticonvulsant therapy <i>T. C. B. Stamp</i>	256
19	α -Amino adipic aciduria, a new inborn error of lysine metabolism <i>T. Gerritsen and M. H. Fischer</i>	267
20	α -Keto adipic aciduria—a new inborn defect of lysine degradation <i>H. J. Bremer, S. K. Wadman, Hildegard Przyrembel, U. Wendel and Ingrid Lombeck</i>	271
21	Phenylketonuria variants <i>C. Toothill, J. M. H. Buckler and B. Winokur</i>	286
22	Phenylalanine hydroxylase determinations in patients with phenylketonuria and hyperphenylalaninaemia <i>K. Bartholomé</i>	291

23	A patient with a permanent chemical phenylketonuria and a normal phenylalanine tolerance <i>S. K. Wadman and M. Th. Grimberg</i>	297
24	Use of a semi-synthetic amino acid, 3-methoxyphenyl-L-alanine to measure amino acid absorption <i>J. W. T. Seakins and R. S. Ersser</i>	304
25	Animal models for histidinaemia <i>L. A. Tyfield and J. B. Holton</i>	307
26	Galactokinase deficiency in an Italian infant <i>F. Vecchio, F. Carnevale and G. Di Bitonto</i>	317
27	Homocystinuria : Cyst(e)ine levels in the plasma <i>I. B. Sardharwalla, B. Fowler and G. M. Komrower</i>	325
	General Discussion	328
	Index	369
