

Table of Contents

Preface	iii
Authors	vii

Part One

1. LABORATORY MANAGEMENT	3
------------------------------------	---

Introduction 3/ Scope of Management 6/ Management Strategy 11/
Personnel Management 22/ Sample Handling and Test Perform-
ance 37/ Materials Management 49/ Equipment Management 56/
Facility Management 77/ Safety and Health 81/ Legal and Ethical
Considerations in Laboratory Management 93/ Governmental Reg-
ulation of Laboratories 110/ References 122

2. LABORATORY EVALUATION AND CERTIFICATION	127
--	-----

Introduction 127/ Licensure of Laboratories 129/ Accreditation of
Laboratories 131/ Equivalence of Programs 133/ Qualifications of
Laboratory Personnel 133/ Quality Assurance of Reagents, In-
struments, and Kits 143/ Interlaboratory Surveys (Proficiency
Testing) 148/ References 169

3. LABORATORY FACILITIES AND SERVICES	173
---	-----

Functional Program 173/ Determining Optimal Space 177/ Labora-
tory Triage Center 184/ Location of the Laboratory 188/ The Labo-
ratory Environment 189/ Personnel Safety 202/ Conclusion 206/
References 207

4. MEASUREMENT EVALUATION	209
-------------------------------------	-----

Basic Statistical Concepts 209/ Quality Control 252/ The Control
Chart 252/ References 272

5. DATA TRANSMISSION	273
--------------------------------	-----

Scope of Data Transmission 273/ Principles of Data Transmission
277/ Subject Record 278/ The Request 280/ Sample Collection 282/

Subject-Oriented, Test-Oriented Interface 283/ Analysis 288/ Reporting of Results 291/ Laboratory Records 293/ Conclusions 293/ References 294

Part Two

6. AMBIENT AIR TESTING 297
Sampling 300/ Measurement Methods 306/ Calibration 314/ Data Recording, Processing, and Reporting 320/ Relating Data to Effects, Standards, and Source Reductions 329/ Interpretation and Use of Air Quality Data 338/ Internal Quality Assurance 345/ External Quality Assurance 360/ Glossary 367/ References 377
7. ANATOMIC PATHOLOGY 381
Introduction 381/ Technical Standards 382/ Interpretive Standards 390/ Future Needs 407/ References 409
8. BLOOD BANKING 411
Introduction 411/ Donor Bleeding 412/ Specimen Collection 415/ Blood Typing 416/ Antihuman Globulin Tests 420/ Antibody Screening Methods 423/ Compatibility Tests 429/ Hepatitis (HB_sAg) Tests 431/ Special Immunohematology Applications 434/ Preparation and Use of Components 438/ Management Aspects of Blood Banking 443/ References 447
9. CLINICAL CHEMISTRY 451
Introduction 451/ Quality of the Specimen 452/ Method Selection 458/ Interlaboratory Comparisons 466/ Instruments and Automation 470/ Determination of Enzyme Activity in Serum 482/ Blood pH and Blood Gas Analyses 486/ The Emergency Laboratory 490/ Pediatric Microchemistry 491/ Electrophoresis and Chromatography 495/ Vitamins and Trace Elements 498/ Urine Studies 504/ References 505
10. CYTOLOGY 509
Introduction 509/ Laboratory Facilities and Equipment 511/ Record Keeping and Reporting 513/ Specimen Handling 519/ Diagnostic Evaluation of Slides 532/ Evaluation of Screening Accuracy 535/ Qualifications of Personnel 540/ Continuing Education 542/ Cytology Automation 543/ References 544
11. ANALYTICAL FOOD CHEMISTRY 545
Introduction 545/ Sampling 549/ Sample Handling in the Laboratory 560/ Preparation of the Laboratory 566/ Preparation of Sample

	581/ Analysis of the Sample 585/ Interpretation of the Analysis 623/ References 642
12. FOOD MICROBIOLOGY	647
	Scope of Activity in Food Microbiology 647/ Factors Affecting De- sign and Operation 650/ Analyst Performance 668/ Records 684/ References 686
13. HEMATOLOGY	687
	Essentials of Quality Assurance 687/ Sample Collection and Prepa- ration 694/ Hematology Reference Materials 697/ Hematology In- struments 699/ Statistics and Data Reporting 709/ Calibration of Instruments 718/ Blood Cell Identification 722/ Coagulation Pro- cedures 726/ Review of Quality Assurance Data 738/ Conclusions and Unresolved Problems 740/ References 741
14. IMMUNOLOGY	745
	Introduction 745/ Immunoprecipitation Techniques 746/ Immuno- microscopy 749/ Serum Protein Components and Leukocyte Func- tions 758/ Radioimmunoassay 764/ Histocompatibility Testing 776/ Cellular Immunology 779/ Proficiency Testing 781/ References 784
15. INDUSTRIAL HYGIENE	787
	Introduction 787/ Sources of Error 789/ Sampling 789/ Field Meas- urements and Field Equipment 801/ Receipt of Samples and Labo- ratory Chain of Custody 811/ Selection of Analytical Method and Analyst 822/ Quality Control Charting 827/ Reagent Controls 842/ Instrument Calibration and Maintenance 848/ Training 853/ Inter- laboratory Quality Control 853/ Rejection of Analytical Results 860/ Recordkeeping and Documentation of Procedures 864/ Imple- menting a Quality Assurance Program 865/ Summary 867/ Refer- ences 867
16. CLINICAL MICROBIOLOGY	871
	Quality Assurance in Clinical Microbiology 871/ Bacteriology 884/ Antimicrobial Susceptibility Tests and Assays 926/ Anaerobic Bac- teriology 936/ Mycobacteriology 946/ Mycology 956/ Parasitology 967/ Immunology of Bacterial, Fungal, and Parasitic Diseases 972/ Mycoplasma 984/ Clinical Microscopy 993/ References 1000
17. RADIOCHEMISTRY	1007
	Introduction 1007/ Laboratory Design and Operation 1009/ Per- formance Measurements 1015/ Future Needs 1029/ References 1030

18. CLINICAL TOXICOLOGY	1033
Introduction <i>1033</i> / Medical Toxicology Laboratories <i>1035</i> / Referral Toxicology Laboratories <i>1047</i> / References <i>1095</i>	
19. VIROLOGY	1097
Specimen Collection and Handling <i>1097</i> / Direct Examination for Virus or Viral Antigen <i>1107</i> / Virus Isolation and Identification <i>1111</i> / Serologic Diagnosis <i>1125</i> / Methods <i>1130</i> / Internal Quality Control <i>1134</i> / Conclusion <i>1141</i> / References <i>1143</i>	
20. WATER AND WASTEWATER ANALYSIS	1145
Introduction <i>1145</i> / Chemical and Physical Analyses <i>1146</i> / Micro- biological Analyses <i>1175</i> / Biological Analyses <i>1182</i> / References <i>1187</i>	
Index	1189
