

# Contents

## UNIT ONE

### INTRODUCTION

- 1 Some laboratory rules and quality control, 3
- 2 Safety in the clinical laboratory, 19

## UNIT TWO

### HEMATOLOGY

- 3 Collection and preparation of the specimen, 27
- 4 Laboratory investigation of hemoglobin, 37
- 5 Staining methods of blood and bone marrow preparations including cytochemistry, 111
- 6 Morphology of blood and bone marrow cells, 123
- 7 Numeric evaluation of formed elements of blood, 178
- 8 Laboratory investigation of red cell disorders, 207
- 9 Laboratory investigation of white cell disorders, 235
- 10 Examination of bone marrow, 266
- 11 Laboratory investigation of hemostasis, 275
- 12 Laboratory investigation of platelets, 319
- 13 Laboratory investigation of hemorrhagic diseases and hypercoagulability, 336

## UNIT THREE

### IMMUNOHEMATOLOGY

- 14 Blood group systems, 353
- 15 General methods in blood banking, 378
- 16 Special test procedures, 404
- 17 Antigens and antibodies, 411
- 18 Immune diseases and the blood bank, 416
- 19 Transfusion reactions, 432

## UNIT FOUR

### CLINICAL CHEMISTRY

- 20 Laboratory principles and instrumentation, 441
- 21 Carbohydrates and nitrogen compounds, 472
- 22 Inorganic elements and blood gases, 506
- 23 Liver function, lipids, and other miscellaneous tests, 535
- 24 Enzymology, 566
- 25 Hormone analysis, 608
- 26 Toxicology and therapeutic drug monitoring, 630
- 27 Urinalysis, 674
- 28 Semen analysis and infertility investigations, pregnancy tests, and placental hormones, 736
- 29 Examination of biologic fluids, sputum, and pus, 750
- 30 Gastric, duodenal, and pancreatic juice analysis, 780
- 31 Stool analysis, 790

**UNIT FIVE**

**MICROBIOLOGY**

- 32** Bacteriology, virology, and rickettsial diseases, 803
- 33** Mycology, 911
- 34** Parasitology, 948

**UNIT SIX**

**SEROLOGY AND IMMUNOLOGY**

- 35** Clinical serology, 1025
- 36** Clinical immunology, 1064

**Appendix** Normal values, 1121

**COLOR PLATES**

- 1** Blood cells, 129
- 2** Red blood cell maturation, 145
- 3** Peripheral blood, bone marrow, and urinary sediment in some anemias, 148
- 4** Leukocytes, 149
- 5** Leukocytes, 153
- 6** Leukocytes, 164
- 7** Monocytes, 168
- 8** Peripheral blood smear in pernicious anemia, 214
- 9** Peripheral blood smear in pernicious anemia responding to treatment, 214
- 10** Giant metamyelocyte and megaloblasts in bone marrow smear in pernicious anemia, 215
- 11** Multiple myeloma, 257
- 12** Crystalline and amorphous sediment in acid urine, 720
- 13** High-power field showing crystalline and amorphous sediment in alkaline urine, 720
- 14** Peripheral blood, bone marrow, and urinary sediment in some anemias, 721
- 15** Tubercle bacilli in sputum, 811
- 16** Gonococci in cervical smear showing well-preserved pus cells and characteristic clear spaces around organisms, 842
- 17** Malarial parasites—thin smears, 981
- 18** Malarial parasites—thick smears, 984
- 19** Ova of intestinal parasites, 988
