## Session 1 Laboratory Management and Quality Control

*Chairman Dr W. M. Hunter*

- |     |  |    |
|-----|--|----|
| 1.1 | Laboratory management and quality control                  | 3  |
|     | <i>J. Seth</i>   |    |
| 1.2 | Discussion   | 14 |
|     | Development and operation of a regional immunoassay scheme | 16 |
|     | <i>R. Edwards &amp; P. I. Pull</i>                         |    |

## Session 2 Standards

*Chairman Dr C. C. Hall*

- |     |  |    |
|-----|--|----|
| 2.1 | 1982 update on standardization and standards   | 27 |
|     | <i>D. R. Bangham</i>   |    |
| 2.2 | Working standards  | 45 |
|     | <i>W. M. Hunter</i>  |    |
| 2.3 | Calibration of standards for immunoassay, including an appendix on spectrophotometric standardization of solutions of thyroxine and triiodothyronine | 48 |
|     | <i>P. G. Malan, J. G. Simpson, R. A. J. Stevens, J. F. Grove-White &amp; A. S. Whitworth</i>   |    |
| 2.4 | Prolactin: standards and serum heterogeneity   | 58 |
|     | <i>P. G. Whittaker, T. Wilcox &amp; T. Lind</i>  |    |
| 2.5 | Discussion   | 59 |
|     | The effect of restandardisation of the Amerlex T <sub>4</sub> kit on results in the UK EQAS for the thyroid-related hormones                         | 63 |
|     | <i>F. Logue &amp; J. G. Ratcliffe</i>  |    |

## Session 3 Assay Design

*Chairman Professor W. R. Butt*

- |     |   |    |
|-----|---|----|
| 3.1 | Optimisation of RIA: some simple guidelines | 69 |
|     | <i>W. M. Hunter</i>                         |    |

3.2	The precision profile: its use in assay design, assessment and quality control <i>R. P. Ekins &amp; P. R. Edwards</i>	76
3.3	Modification of a radioimmunoassay for human serum erythropoietin to provide increased sensitivity and investigate non-specific serum responses <i>P. M. Cotes, C. E. Canning &amp; R. E. Gaines Das</i>	106
3.4	Development of testosterone assays for routine use <i>M. J. Wheeler &amp; F. Luther</i>	113
3.5	Discussion The use of precision profiles for assay optimisation <i>R. M. Sutherland &amp; R. S. Chapman</i>	117 128
<b>Session 4 Separation Systems</b>		
<i>Chairman Professor J. G. Ratcliffe</i>		
4.1	Requirements for separation methods in immunoassay <i>J. G. Ratcliffe</i>	135
4.2	The development and use of PEG assisted second antibody as a separation technique in RIA <i>R. Edwards</i>	139
4.3	Magnetic particle radioimmunoassay <i>G. C. Forrest &amp; S. J. Rattle</i>	147
4.4	Immunoassays employing magnetisable, solid-phase, antisteroid sera <i>G. F. Read, D. Riad-Fahmy &amp; J. Dias</i>	163
4.5	The sucrose layering separation: a non-centrifugation system <i>J. F. Wright &amp; W. M. Hunter</i>	170
4.6	Application of 1,1'-carbonyldiimidazole as a rapid practical method for the production of solid-phase immunoassay reagents <i>R. S. Chapman, R. M. Sutherland &amp; J. G. Ratcliffe</i>	178
4.7	Discussion A comparison of three separation methods for cortisol RIA <i>G. J. Beckett, S. M. Gray &amp; J. Seth</i> Initial development of a non-separation fluoroimmunoassay for progesterone <i>B. L. Allman, F. Short &amp; V. H. T. James</i>	191 201 204
<b>Session 5 Automation</b>		
<i>Chairman Dr G. C. Forrest</i>		
5.1	A general review of automated RIA <i>G. C. Forrest</i>	211

5.2	Automated immunoanalysis by radioimmunoassay <i>K. D. Bagshawe</i>	221
5.3	A fully automated continuous flow system for immunoassays <i>D. J. Goldie, P. M. West, A. A. A. Ismail, A. C. Poole &amp; M. J. Thomas</i>	226
5.4	A novel liquid phase separation for automated immunoassay <i>G. J. R. Barnard, C. M. Matson, D. W. Makawiti, M. J. Kilpatrick &amp; W. P. Collins</i>	231
5.5	Discussion	242
<b>Session 6 Equipment</b>		
<i>Chairman Dr J. Seth</i>		
6.1	Discussion	253
	Preliminary evaluation of the Hamilton Microlab 2000 <i>E. H. D. Cameron &amp; J. G. Simpson</i>	254
<b>Session 7 Labelling of Protein Antigens</b>		
<i>Chairman Dr W. M. Hunter</i>		
7.1	The preparation and assessment of labelled antigen: outline of requirements <i>W. M. Hunter</i>	263
7.2	Some observations on the preparation, purification and storage of radioiodinated protein hormones <i>N. S. Brown, S. R. Abbott &amp; J. E. T. Corrie</i>	267
7.3	Radioiodination of proteins by three procedures: solid phase lactoperoxidase, chloramine-T and iodogen <i>R. Edwards, M. Lalloz &amp; P. I. Pull</i>	277
7.4	Comparison of iodination methods <i>W. R. Butt, S. S. Lynch, P. Reay, W. Robinson &amp; J. Sage</i>	286
7.5	Preparation of tracer LH and FSH for multi-centre use <i>K. M. Ferguson, M. M. Hayes &amp; S. L. Jeffcoate</i>	289
7.6	Centralized production of radio-iodinated proteins: the provision of $^{125}\text{I}$ -alpha-fetoprotein <i>J. L. Young, W. L. Meldrum &amp; K. P. Willey</i>	295
7.7	Immunoaffinity purification using monoclonal antibodies <i>K. Siddle, E. M. Bailyes &amp; J. P. Luzio</i>	301
7.8	Discussion	307
<b>Session 8 Free Hormones</b>		
<i>Chairman Professor W. P. Collins</i>		
•8.1	RIA of free (non-protein bound) hormones in body fluids <i>R. P. Ekins</i>	319

8.2	Discussion	340
	Free thyroxine — principles and practice today	341
	<i>J. W. Tuttlebee</i>	
	Results of a global clinical trial of the Amerlex FT <sub>4</sub> kit with particular reference to FT <sub>4</sub> levels in cases with abnormal TBG	343
	<i>A. S. Whitworth</i>	
<b>Session 9 Steroids</b>		
<i>Chairman</i>	<i>Professor V. H. T. James</i>	
9.1	<sup>125</sup> Iodinated tracers for steroid radiimmunoassay: the problem of bridge recognition	353
	<i>J. E. T. Corrie</i>	
9.2	Enzyme immunoassays for synthetic contraceptive steroids in plasma and saliva	358
	<i>D. Riad-Fahmy, G. F. Read &amp; A. Turkes</i>	
9.3	Chemiluminescence immunoassays for plasma steroids and urinary steroid metabolites	373
	<i>W. P. Collins, G. J. Barnard, J. B. Kim, D. A. Weerasekera, F. Kohen, Z. Eshhar &amp; H. R. Lindner</i>	
9.4	Fluorimmunoassay of steroids	398
	<i>D. Exley</i>	
9.5	Direct (non-extraction) serum assays for steroids	401
	<i>W. A. Ratcliffe</i>	
9.6	The measurement of salivary testosterone	410
	<i>F. J. Tames &amp; A. D. Swift</i>	
9.7	The urinary assay of steroid glucuronides: their value and methodology	414
	<i>P. Samarajeewa, T. S. Baker &amp; W. F. Coulson</i>	
9.8	Discussion	422
	A fluoroimmunoassay for plasma testosterone	425
	<i>B. L. Allman, F. Short &amp; V. H. T. James</i>	
	Salivary testosterone measurements: application to physiological and pathological studies	430
	<i>P. M. Baxendale &amp; V. H. T. James</i>	
	A search for peptide hormones in saliva	436
	<i>G. V. Groom</i>	
<b>Session 10 Antibodies</b>		
<i>Chairman</i>	<i>Professor J. Landon</i>	
10.1	The multisite immunization technique	443
	<i>W. R. Butt, S. S. Lynch, J. Sage &amp; J. Williams</i>	
10.2	Production of primary antisera for radioimmunoassay	447
	<i>A. C. Munro, R. S. Chapman, J. G. Templeton &amp; D. Fatori</i>	

10.3	Production of second antibody for radioimmunoassay <i>R. S. Chapman, A. C. Munro, J. G. Templeton &amp; D. Fatori</i>	456
10.4	Production of anti-hapten sera in rabbits <i>J. E. T. Corrie</i>	469
10.5	Changes in specificity during immunization <i>P. G. Whittaker &amp; M. R. A. Morgan</i>	473
10.6	Some factors influencing antiserum specificity <i>W. A. Webb &amp; R. V. Brooks</i>	474
10.7	Discussion	480

## **Session 11 Monoclonal Antibodies for use in RIA**

*Chairman Professor R. P. Ekins*

11.1	The preparation of high affinity monoclonal antibodies to progesterone and their use in radioimmunoassay <i>V. E. Fantl &amp; D. Y. Wang</i>	489
11.2	Monoclonal antibodies for steroid immunoassay <i>A. White</i>	495
11.3	Production of monoclonal antibodies for use in the immunoassay of polypeptides <i>K. Siddle &amp; M. Soos</i>	502
11.4	Monoclonal antibodies suitable for immunoassays <i>V. van Heyningen, D. J. H. Brock &amp; L. Barron</i>	509
11.5	Discussion	517
	PEG-assisted double and triple antibody separation methods for the detection of monoclonal antibodies and their use in radioimmunoassay <i>J. L. Young, W. L. Meldrum, K. P. Willey &amp; W. W. Stewart</i>	517

## **Session 12 Labelled Antibody Assays**

*Chairman Professor C. N. Hales*

12.1	Immunoassays using chemiluminescence labelled antibodies <i>I. Weeks, J. S. Woodhead, A. K. Campbell &amp; F. McCapra</i>	525
12.2	Immunoradiometric assays using monoclonal antibodies <i>W. M. Hunter, J. G. Bennie, P. S. Budd, V. van Heyningen, K. James, R. L. Micklem &amp; A. Scott</i>	531
12.3	The use of monoclonal antibodies in a solid-phase immunoradiometric assay for hepatitis B surface antigen <i>A. H. Goodall</i>	545
12.4	Optimisation of immunoradiometric (labelled antibody) assays <i>T. M. Jackson, N. J. Marshall &amp; R. P. Ekins</i>	557

12.5	Discussion	576
	A two-site immunoradiometric assay for prolactin employing monoclonal antibodies <i>T. G. Gard, C. C. Hall, J. J. Scarisbrick, P. Bundesen &amp; A. Sehon</i>	578
	Immunoradiometric assay for interferon — characterisation of assay inhibition <i>R. E. Hawkins &amp; D. S. Secher</i>	582

### **Session 13 Data Processing**

*Chairman Professor D. J. Finney*

13.1	Software requirements for statistical analysis of immunoassays <i>D. J. Finney</i>	591
13.2	Design and implementation of a software package for analysis of immunoassay data <i>I. G. M. McKenzie &amp; R. C. M. Thompson</i>	608
13.3	Validity tests in the statistical analysis of immunoassay data <i>G. Raab</i>	614
13.4	Robust estimation of variance in radioligand assays <i>M. J. R. Healy &amp; A. C. Kimber</i>	625
13.5	RIA data processing on the HP-41C calculator <i>R. A. Dudley</i>	627
13.6	Calibration and assessment of standards — problems encountered in the comparison of radioimmunoassay dose-response curves <i>R. E. Gaines Das</i>	632
13.7	Mass action model-based microprocessor program for RIA data processing <i>P. R. Edwards &amp; R. P. Ekins</i>	640
13.8	Discussion	653

### **Session 14 External Quality Assessment**

*Chairman Dr E. H. D. Cameron*

14.1	The UK external quality assessment schemes for peptide hormones: objectives and strategy <i>R. R. A. Bacon, W. M. Hunter &amp; I. McKenzie</i>	669
14.2	The use of GC-MS reference values in UK steroid quality assessment schemes <i>G. V. Groom &amp; S. J. Gaskell</i>	680
14.3	The national external quality assessment scheme for testosterone assays <i>M. J. Wheeler &amp; F. Luther</i>	684

14.4	Discussion	689
	Aspects of the UK EQAS for thyroid-related hormones	690
	<i>J. G. Ratcliffe &amp; F. Logue</i>	
	Quality assessment scheme for 17-hydroxyprogesterone	698
	<i>A. M. Wallace &amp; G. H. Beastall</i>
