

Contents

1. Introduction	I
General Remarks	I
Diagnostic Criteria	2
Position and Shape of Organs	2
Size and Weight	2
Organ Color	3
Surfaces and Cavities	8
Consistency	8
Odor	9
Artifacts	9
Summary	9
Autopsy Protocol and Diagnosis	II
General Remarks Concerning Autopsy	13
Organ Systems	
2. Heart and Pericardium	17
Technic of Dissection	17
Malformations	19
Hypertrophy and Dilatation	23
Myocardial Infarction	27
Coronary Angiography	31
Endocarditis	35
Rheumatic Endocarditis, Valve Defects	37
Myocarditis	40
Pericarditis	43
3. Blood Vessels	45
Arteriosclerosis	45
Arterial Occlusive Diseases, Thromboangiitis Obliterans, Arteritis	50
Thrombosis	53
4. Upper Respiratory Tract, Lungs, Pleura	56
Technic of Dissection	56
Laryngeal Edema, Diseases of the Trachea	59
Tracheitis and Tumors of the Larynx	61
Atelectasis, Bronchitis, Bronchiectasis, Malformations	63
Pulmonary Emphysema	67
Lung Embolism, Lung Infarction	73
Hemorrhage, Pulmonary Edema	75

Congestion of the Lung, Pneumonia	77
Tuberculosis of the Lung	83
Silicosis, Anthracosis, Lung Tumors	91
Pleura	99
5. Gastrointestinal Tract	100
Technic of Dissection	100
Tongue	101
Tonsils, Salivary Glands	103
Esophagus	105
Stomach	109
Gastric and Duodenal Ulcer	113
Tumors of the Stomach	117
Intestine	121
Ulcerative Colitis	131
Intestinal Tumors	137
6. Liver	139
Dissection, Malformations, Postmortem Changes	139
Metabolic Changes	141
Portal Vein Thrombosis, Periarteritis, Eclampsia, Endophlebitis	147
Liver Atrophy and Necrosis	149
Cirrhosis of the Liver	151
Hepatitis	155
Special Types of Cirrhosis and Fibroses	157
Liver Abscesses	159
Parasites, Specific Inflammations	161
Tumors	163
7. Gallbladder–Bile Ducts	167
Malformations, Cholecystitis	167
Cholelithiasis	169
Tumors	171
8. Pancreas	173
Malformations, Fatty Infiltration, Inflammation	173
Acute Hemorrhagic Necrosis of the Pancreas	175
Tumors	177
Diabetes Mellitus	179
9. Spleen, Lymph Nodes, Blood	181
Splenomegaly	181
Amyloidosis	183
Follicle Necrosis, Tuberculosis	185
Hodgkin's Disease	187

Tumors of Lymph Nodes	189
Leukemia	193
10. Cartilage, Bone and Soft Tissues	195
Chondrodystrophy, Rickets, Osteogenesis Imperfecta	195
Bone Necrosis, Fracture, Pseudarthrosis	199
Inflammations of Bone	201
Tumors of Cartilage and Bone	205
Spine	213
Joints	219
Connective and Fat Tissue	219
Collagen Diseases	221
11. Skin and Mammary Gland	225
Keratoacanthoma, Seborrheic and Solar Keratosis	225
Skin Tumors	227
Breast	229
12. Endocrine Organs	231
Pituitary Gland	231
Hyperfunction of the Pituitary Gland	232
Hypofunction of the Pituitary Gland	232
Pineal Gland, Thymus	233
Thyroid Gland	235
Malignant Tumors of the Thyroid	239
Parathyroid Glands	239
Functional Disturbances of the Thyroid	240
Functional Disturbances of the Parathyroid Glands	241
Adrenal Glands	243
Functional Changes of the Adrenal Cortex	245
Other Adrenal Tumors	247
13. Kidneys and Urinary System	249
Congenital Malformations	249
Vascular Diseases of the Kidney	251
Noninflammatory Kidney Diseases (so-called Nephroses)	259
Glomerulonephritis (GN)	263
Uremia	266
Focal Glomerulonephritis	269
Pyelonephritis	269
Interstitial Nephritis	271
Anuria	271
Papillary Necrosis, Tuberculosis, Hydronephrosis	273
Diseases of the Urinary Tract	275

Urolithiasis	277
Tumors of the Kidney	279
Urinary Bladder	281
14. Male Sex Organs	285
Prostate Gland	285
Testis	287
15. Female Sex Organs	291
Uterus	291
Hyperplasias of the Uterus	293
Uterine Tumors	295
Tubes and Ovaries	297
Ovarian Tumors	299
16. Pregnancy. Fetal and Neonatal Pathology	300
Pregnancy	304
Fetal and Neonatal Pathology	304
17. Nervous System	309
Edema of the Brain, CO Poisoning, Thrombosis	309
Hemorrhages	311
Cerebral Hemorrhages	313
Circulatory Disorders	315
Cerebral Infarctions	317
Hydrocephalus	319
Demyelinating Diseases, Atrophy	321
Inflammatory Diseases	323
Tumors	327
Metastases	331
18. Malformations	332
Definition	332
Double Malformations	335
Single Malformations	337
Selected References	342
Index	349
