

CONTENTS

SECTION I. HEREDITY AND DISEASE

Chapter 1.	Heritability of Disease	3
2.	Chromosomal Basis of Heredity	7
3.	Autosomal Chromosomal Anomalies	27
4.	Sex Chromosomal Anomalies	53
5.	Genetic Basis of Heredity	73
6.	Biochemical Genetics	93
7.	Autosomal Dominant Diseases	107
8.	Autosomal Recessive Diseases	141
9.	Sex-Linked (X-Linked) Diseases	183
10.	Normal Variation	197
11.	The Frequencies of Genes in Populations	201
12.	The Genetics of Development and Maldevelopment	211
13.	Multifactorial Inheritance	221
14.	Malformations and Diseases Determined by Multifactorial Inheritance	233
15.	Disorders and Syndromes of Undetermined Etiology	247

SECTION II. SPECIAL TOPICS

16. Antenatal Diagnosis of Genetic Diseases	261
17. Genetic Analysis by Family and Twin Studies	267
18. Teratology	275
19. Dermatoglyphics	287
20. Immunogenetics and Immunologic Disorders	301
21. Blood Groups and Serum Proteins	313
22. Somatic Cell Genetics	321
23. Genetics and Cancer	325
24. Cardiovascular Disease	331
25. Genetics of Behavior	347
26. Genetic Counseling	351

SECTION III. SYNDROMES AND MALFORMATIONS

27. Syndromology	359
28. Tables of Selected Syndromes and Disorders	363

APPENDIX A. Analysis of Chromosomes	371
---	-----

APPENDIX B. Symbols Commonly Used in Genetic Pedigrees	377
--	-----

APPENDIX C. General Sources of Information on Medical Genetics	379
Index	381
