

CONTENTS

Chapter 1

INTRODUCTION	1
Classification of Genetic Disorders	3
The Family History	4
Man As An Object of Genetic Research	4

Chapter 2

THE CHROMOSOMAL BASIS OF HEREDITY	7
The Human Chromosomes	8
Mitosis	8
Meiosis	13
Human Gametogenesis	19
Fertilization	21
Chromosome Classification	22
Chromosome Techniques	24
Medical Applications of Chromosome Analysis	28

Chapter 3

THE STRUCTURE AND FUNCTION OF CHROMOSOMES	32
Nucleic Acid Structure	33
DNA	34
The Genetic Code	36
RNA	44
Protein Biosynthesis	46

Chapter 4

PATTERNS OF TRANSMISSION OF SINGLE-GENE TRAITS	53
Genes, Genotypes and Mating Types	55
Autosomal Inheritance	57
X-Linked Inheritance	69
Variation in the Expression of Genes	76

Chapter 5

HUMAN BIOCHEMICAL GENETICS	95
The Hemoglobins	96
Human Biochemical Disorders	112
Pharmacogenetics	132

Chapter 6

CHROMOSOMAL ABERRATIONS	142
Causes of Chromosomal Aberrations	151
Clinical Aspects of Autosomal Disorders	153
Population Cytogenetics	162

Chapter 7

THE SEX CHROMOSOMES AND THEIR DISORDERS	166
Embryology of the Reproductive System	166
The Sex Chromosomes	168
X Inactivation.....	169
Sex Chromosome Abnormalities	174
Disorders of Sexual Development with Normal Chromosomes.....	178

Chapter 8

IMMUNOGENETICS	181
Transplantation.....	184
Immune Deficiency Diseases	194
Autoimmune Disease	195
HLA and Disease	197

Chapter 9

BLOOD GROUPS AND OTHER GENETIC MARKERS	200
Blood Groups	201
Genetic Markers in Serum	221
Red Cell Acid Phosphatase	225

Chapter 10

SOMATIC CELL GENETICS	228
Cell Cultures.....	228
Somatic Cell Hybridization.....	231
Other Applications of Somatic Cell Genetics.....	235

Chapter 11

LINKAGE	240
Family Studies	240
Other Methods of Detecting Linkage	245
The Human Linkage Map.....	246

Chapter 12

MULTIFACTORIAL INHERITANCE	252
Normal Variation	252
Threshold Traits	255
Criteria For Multifactorial Inheritance	258

<i>Chapter 13</i>	
GENETIC ASPECTS OF HUMAN DEVELOPMENT.....	264
Gene Action During Differentiation.....	265
Congenital Malformations.....	267
<i>Chapter 14</i>	
ELEMENTS OF MATHEMATICAL GENETICS.....	274
Probability.....	274
Tests of Genetic Ratios.....	280
The X^2 Test of Significance.....	286
<i>Chapter 15</i>	
POPULATION GENETICS.....	290
Gene Frequencies in Populations: The Hardy-Weinberg Law.....	290
Systems of Mating.....	293
Mutation.....	295
Selection.....	300
Migration.....	306
<i>Chapter 16</i>	
TWINS IN MEDICAL GENETICS.....	309
Monozygotic and Dizygotic Twins.....	309
Frequency of Twin Births and Higher Multiple Births.....	310
Determination of Twin Zygosity.....	312
Limitations of Twin Studies.....	315
Examples of Twin Studies.....	316
Unusual Types of Twins.....	317
<i>Chapter 17</i>	
DERMATOGLYPHICS IN MEDICAL GENETICS.....	320
Embryology.....	321
Classification of Dermal Patterns.....	322
Clinical Applications.....	325
<i>Chapter 18</i>	
OVERVIEW.....	331
Behavior Genetics.....	331
Genetics and Cancer.....	333
Screening for Genetic Disease.....	335
Genetic Counseling.....	337
Treatment of Genetic Disorders.....	343
Prenatal Diagnosis.....	344
Concluding Comments.....	346

GLOSSARY.....	349
REFERENCES	361
ANSWERS TO PROBLEMS	371
INDEX.....	377
