

CONTENTS

<i>List of Participants</i>	ix
<i>Preface</i>	xv
<i>Acknowledgments</i>	xvii

HOST FACTORS

1. Congenital and Genetic Diseases John J. Mulvihill	3
2. Familial Susceptibility David E. Anderson	39
3. Immune Deficiency Diseases John H. Kersey and Beatrice D. Spector	55
4. Acquired Diseases A. C. Templeton	69
5. Precancerous Lesions Leopold G. Koss	85
6. Multiple Primary Neoplasms Bruce S. Schoenberg	103
7. Overview: Host Factors Robert W. Miller	121

ENVIRONMENTAL FACTORS

8. Tobacco E. Cuyler Hammond	131
9. Alcohol Kenneth J. Rothman	139
10. Radiation Seymour Jablon	151
11. Occupation Philip Cole and Marlene B. Goldman	167

ENVIRONMENTAL FACTORS (cont'd)

12.	Drugs	185
	Robert Hoover and Joseph F. Fraumeni, Jr.	
13.	Diet	201
	John W. Berg	
14.	Air Pollution	225
	Malcolm C. Pike, Robert J. Gordon, Brian E. Henderson, Herman R. Menck and Jennie SooHoo	
15.	Viruses and Other Microbes	241
	Clark W. Heath, Jr., Glyn G. Caldwell and Paul C. Feorino	
16.	Sexual Factors and Pregnancy	267
	Brian E. Henderson, Veeba R. Gerkins and Malcolm C. Pike	
17.	Overview: Environmental Factors	285
	Brian MacMahon	

DEMOGRAPHIC LEADS TO HIGH-RISK GROUPS

18.	International Variation in High-Risk Populations	293
	Calum S. Muir	
19.	Demographic Patterns of Cancer Incidence in the United States	307
	Sidney J. Cutler and John L. Young, Jr.	
20.	Geographic Patterns of Cancer Mortality in the United States	343
	Robert Hoover, Thomas J. Mason, Frank W. McKay and Joseph F. Fraumeni, Jr.	
21.	Migrant Studies	361
	William Haenszel	
22.	Overview: Geographic Opportunities and Demographic Leads	373
	J. N. P. Davies	

IMPLICATIONS OF HIGH-RISK GROUPS

23. Cancer Etiology and Prevention 385
John Higginson
24. Cancer Detection Programs 399
David Schottenfeld
25. Education of the Public 415
John Wakefield
26. Overview: Preventive Oncology 435
Michael B. Shimkin

FURTHER DELINEATION OF HIGH-RISK GROUPS

27. Sources, Resources, and Tsouris 451
Marvin A. Schneiderman
28. Multiple Risk Factors in Environmental Cancer 467
Irving J. Selikoff and E. Cuyler Hammond
29. Interdisciplinary and Experimental Approaches: Metabolic
Epidemiology 485
Ernst L. Wynder, Dietrich Hoffmann, Po Chan and
Bandaru Reddy
30. Overview: Toward the Understanding and Control of Cancer 503
Alfred G. Knudson, Jr.

FUTURE PROSPECTS

31. Opportunities for Cancer Control 515
Lester Breslow
32. Opportunities for Cancer Etiology 521
A. B. Miller

- SUBJECT INDEX 527
