

FOREWORD

The 1970 edition of our Van Waters & Rogers Educator's Catalog is distributed to over 20,000 science teachers and administrators in elementary, secondary and junior colleges for the most part in states west of the Mississippi River. It is in this area that we can be of greatest service to the science teacher with our warehouse facilities, prompt delivery, and salesmen to demonstrate and install the items we sell.

However, we invite any interested school district not presently on our mailing list to request this catalog for mail order purposes. Please direct your request to VW&R, Catalog Dept., P.O. Box 3200, San Francisco, Calif. 94119.

ABOUT THIS CATALOG

VW&R has published this special catalog of science materials for all educational levels, elementary through junior college, annually for the past 14 years. It is a compilation of the most commonly used laboratory apparatus in the school science department, selected from our 1100 page general lab supply catalog. We believe it offers several advantages to the science teacher, administrator, science consultant, school business manager or anyone involved in school science procurement. (1) It provides a condensed buyers fact file to help make Product selection easier and specific. (2) It is the most current price guide available each year for budget purposes. We hope it will prove useful to you.

ORDERING INFORMATION

PRICES:

Prices shown were current at the time this catalog was compiled. Where changes have occurred, prices prevailing at time of receipt of order will be in effect.

QUOTATIONS:

Current prices will be furnished on phone or mail request. Many items are available at lower cost if purchased in quantity. We solicit your inquiries.

TERMS:

All prices include packing for domestic shipment unless otherwise shown and are F.O.B. shipping point. Normal terms of payment are net 10th. prox., with approved credit.

FINANCING:

We offer liberal leasing and programmed purchasing plans tailored to meet your specific needs. We solicit your inquiry.

SHIPPING:

Unless otherwise specified, we will use our best judgment in routing shipment, taking into consideration nature of the material, distance, size, weight and delivery requirements.

BREAKAGE and SHORTAGE:

Please request prompt inspection by carrier (when other than our own truck) in case of concealed or visible damage. Our packing lists enable you to check contents of each shipment or delivery. Please let us know promptly of any discrepancies. Satisfactory adjustment will be made.

RETURNED GOODS:

To assure prompt handling, please contact us before making returns for replacement, repair or adjustment.

One Source Service means that we do not consider any sale as complete until the purchaser is thoroughly satisfied.
