

Content

Preface	iii
Opening Address	iv
Executive committee and organizing committee	v
 Section 1. Prize Lectures	
Otsuka Prize Lecture : Controversies in the management of differentiated adenocarcinoma of the thyroid <i>I.B. Hales</i>	1
Mallinckrodt Prize Lecture : Role of thyrotropin-receptor antibodies in primary hypothyroidism <i>J. Konishi</i>	10
 Section 2. Symposium : Iodine and thyroid disease	
The neural deficits attending iodine deficiency in man <i>J.B. Stanbury</i>	20
The prevention and control of iodine deficiency disorders in Asia <i>B.S. Hetzel</i>	27
Effects of iodide supplement in thyroid diseases <i>S. Nagataki</i>	31
 Section 3. Regulation of thyroid hormone secretion	
Pituitary-thyroid function in chronic renal failure assessed by a highly sensitive thyrotropin assay <i>M.J. Hardy, S.S. Ragbeer, and L. Nascimento</i>	38
Evidence for neuroendocrine factors in the pathogenesis of the sick euthyroid state <i>S. Boyages, G. Ma, G.F. Maberly, and C.J. Eastman</i>	43
An inhibitor of extrathyroidal conversion of thyroxine (T ₄) to 3, 5, 3'-triiodo-L-thyronine (T ₃) in the plasma of patients with nonthyroidal illnesses <i>R. Otsuka, M. Nanno, Y. Suzuki, N. Isozaki, N. Kikuchi, H. Kurahachi, and T. Yoshimi</i>	48
Effects of low dose T ₃ administration on elderly subjects <i>T. Mori, D. Inoue, S. Kosugi, M. Miyamoto, K. Nishino, H. Sugawa, T. Akamizu, T. Yokota, H. Nakamura, and H. Imura</i>	53
Study on serum free and total triiodothyronine and pituitary thyrotrophin response to thyrotrophin releasing hormone during L-Triiodothyronine and L-Thyroxine therapies in patients with primary hypothyroidism <i>H. Fukazawa, T. Sakurada, K. Yoshida, K. Kaise, T. Nomura, Y. Itagaki, M. Yamamoto, S. Saito, and K. Yoshinaga</i>	58

The effects of TRH during short term hypothyroidism : Studies on patients treated for thyroid cancer	63
<i>I. Hales, A. Weissberger, B. Luttrell, P. Ward, and S. Watters</i>	

Section 4. Thyroid Binding Protein

Re-evaluation of rat serum thyroxine-binding proteins	68
<i>M. Nanno, R. Ohtsuka, Y. Suzuki, N. Isozaki, S. Hamada, and T. Yoshimi</i>	
Assessment of inhibitors of T ₄ and T ₃ binding : Effects of serum dilution on apparent in vitro inhibitor potency	73
<i>J.R. Stockigt, C-F. Lim, K.N. Wynne, and D.J. Topliss</i>	
The effect of free fatty acids on serum free thyroid hormones in patients with hyperthyroidism	81
<i>T. Nomura, T. Sakurada, K. Yoshida, K. Kaise, N. Kaise, Y. Itagaki, M. Yamamoto, S. Saito, and K. Yoshinaga</i>	
On the artifact in measuring free thyroxine values in normal pregnant women	86
<i>S. Sakata, T. Komaki, N. Kojima, M. Matsuda, S. Shiraki, N. Kumasaki, H. Iwata, and K. Miura</i>	
Diagnosis of dysalbuminemic hyperthyroxinemia and characterization of the variant albumin	91
<i>J. Takamatsu, K. Miki, S. Sakane, T. Mozai, and S. Refetoff</i>	

Section 5. Thyroglobulin

Correlation between serum thyroglobulin concentrations and serum TSH levels in normal subjects	96
<i>S. Harakawa, S. Morita, K. Ashizawa, Y. Nagayama, T. Kiriya, N. Yokoyama, S. Ohtakara, H. Nanba, I. Morimoto, S. Okamoto, M. Izumi, and S. Nagataki</i>	
Two kinds of thyroglobulin are present on the thyroid cell surface probably one secreted into colloid, the other into the circulation	101
<i>S. Ohtakara, I. Ahn, Y. Nagayama, T. Kiriya, I. Morimoto, S. Okamoto, N. Ishikawa, K. Eguchi, K. Ito, M. Izumi, and S. Nagataki</i>	
A case of congenital goiter with impaired thyroglobulin synthesis	106
<i>T. Ieiri, T. Emoto, H. Kuroda, O. Tarutani, and S. Shimoda</i>	
The direct measurement of thyroglobulin-antithyroglobulin autoantibody immune complex in the serum	111
<i>M. Izumi, N. Sritongkul, I. Kubo, S. Ohtakara, K. Ashizawa, S. Harakawa, Y. Nagayama, N. Yokoyama, H. Nanba, T. Kiriya, I. Morimoto, S. Okamoto, and S. Nagataki</i>	
The concentration of serum thyroglobulin (Tg) in anti-Tg-autoantibody positive patients with Graves' disease	116
<i>N. Sritongkul, M. Izumi, I. Kubo, S. Ohtakara, K. Ashizawa, S. Harakawa, Y. Nagayama, N. Yokoyama, H. Nanba, T. Kiriya, I. Morimoto, S. Okamoto, and S. Nagataki</i>	

Section 6. Thyroid hormone action

Thyroid hormone stimulates alkaline phosphatase activity in mouse osteoblast-like cells (MC3T3-E1) as well as in the conditioned medium	121
<i>K. Kasono, K. Sato, Y. Fujii, D.C. Han, T. Tsushima, and K. Shizume</i>	
Thyroid function and tubulin contents in developing rat brains	126
<i>T. Takahashi</i>	
Monodeiodinase activity in cerebral cortex and liver in developing human fetus	131
<i>M.L. Khurana, D. Prabakaran, M.M. Godbole, M.G. Karmakar, and M.M.S. Ahuja</i>	

Biphasic effects of T ₃ in vitro on hormone sensitive adenylate cyclase-cAMP system in normal rat hepatocytes <i>K. Inoue, H. Uchimura, Y. Fukue, K. Matsuda, T. Mitsuhashi, K. Kubota, and F. Takaku</i>	136
Biological effects of reverse T ₃ (rT ₃) : rT ₃ inhibits ontogenetic development of iodothyronine-5-deiodinase(I-5'-D) in the liver of neonatal mice <i>D.C. Han, K. Sato, Y. Fujii, T. Tsushima, and K. Shizume</i>	141
Active and inactive forms of T ₃ -binding protein in rat kidney cytosol (I) : role of NADPH in activation of T ₃ binding <i>T. Miyamoto, M. Kobayashi, Y. Nishii, K. Yamauchi, A. Sakurai, and K. Hashizume</i>	146
Active and inactive forms of T ₃ -binding protein in rat kidney cytosol (II) : cooperative action of Ca ²⁺ on NADPH activation <i>Y. Nishii, T. Miyamoto, M. Kobayashi, K. Yamauchi, A. Sakurai, and K. Hashizume</i>	151
Active and inactive forms of T ₃ -binding protein in rat kidney cytosol(III) : regulation of nuclear T ₃ binding by cytosolic T ₃ -binding protein <i>K. Yamauchi, M. Kobayashi, T. Miyamoto, Y. Nishii, A. Sakurai, and K. Hashizume</i>	156

Section 7. Thyroid growth factors

Effects of calcium ionophore and phorbol ester on the proliferation of FRTL5 <i>I. Akiguchi, K. Eguchi, Y. Kawabe, T. Otsubo, S. Miyake, N. Ishikawa, K. Ito, M. Izumi, and S. Nagataki</i>	161
Effects of Ca ²⁺ , calmodulin, and protein kinase C on proliferation of human thyrocytes <i>Y. Kawabe, K. Eguchi, I. Akiguchi, T. Otsubo, C. Shimomura, Y. Ueki, H. Nakao, H. Tezuka, M. Matsunaga, T. Fukuda, N. Ishikawa, K. Ito, and S. Nagataki</i>	166
Effects of erythrosine and rose bengal B on thyroid tumorigenesis in thyroidectomized rats treated with N-bis(2-hydroxypropyl) nitrosamine <i>Y. Hiasa, M. Ohshima, Y. Kitahori, N. Konishi, T. Shimoyama, and Y. Sakaguchi</i>	171
The Inhibitory effect of iodide on TSH-stimulated (³ H) thymidine uptake by cultured rat thyroid cells (FRTL) <i>F. Akasu, K. Takazawa, T. Endo, and T. Onaya</i>	178

Section 8. Genetic aspects of Thyroid disease

Major gene linked to HLA controls susceptibility to Japanese thyrotoxic periodic paralysis <i>H. Tamai, S. Matsubayashi, S. Fukata, K. Nagai, K. Mori, Y. Hirota, K. Kuma, L.F. Kumagai, and S. Nagataki</i>	183
HLA and Graves' disease in Korean <i>B.Y. Cho, B.D. Rhee, D.S. Lee, M.S. Lee, H.K. Lee, C.S. Koh, H.K. Min, and M. Lee</i>	188
Evidence for genetic heterogeneity of a family with autoimmune thyroiditis and thrombocytopenia <i>T. Kawai, K. Katoh, T. Igarashi, K. Tani, K. Okuda, and T. Ohkubo</i>	193
The immunopathogenesis of malignant lymphoma of the thyroid <i>S. Matsubayashi, H. Tamai, K. Nagai, K. Mori, F. Matsuzuka, T. Katsuki, S. Nagataki, and K. Kuma</i>	198
Inhibition of thyrotropin in Pendred's syndrome <i>S. Tuchinda, S. Damrongpisutikul, and P. Katanyoo</i>	201
Goitrous hypothyroidism in Pendred's syndrome : Response to potassium iodide <i>J.R. Stockigt, F. Long, H.H. Newnham, and D.J. Topliss</i>	206

Section 9. Neonatal screening and maternal fetal physiology

Screening of congenital hypothyroidism in Japan <i>M. Irie, H. Nakajima, H. Inomata, O. Namba, and H. Naruse</i>	211
Development of new enzyme immunoassays for measuring free thyroid hormones in serum and dried blood samples on filter paper without influences of thyroxine binding globulin or albumin <i>K. Miyai, M. Ito, N. Hata, N. Amino, and Y. Endo</i>	216
Functional significance of high incidence of neonatal chemical hypothyroidism in iodine deficient environments <i>N. Kochupillai, A. Mithal, C.S. Pandav, N. Gupta, M.M. Godbole, M. Mehta, and M.M.S. Ahuja</i>	221
Determination of free thyroid hormone levels during pregnancy and the post-partum period by various methods <i>V. Sridama, S. Limpongsanurak, S. Sritippayawan, and S. Ampornsittikool</i>	226
Thyroid metabolism of neonates and developing infants <i>S. Aziz</i>	231
Correlation between function of the pituitary thyroid gland and metabolism of catecholamines in the fetus at delivery <i>S. Fukuda, K. Yamamoto, A. Yasuda, H. Nagata, Y. Araki, K. Yoshino, T. Shibukawa, K. Takahashi, and M. Kitao</i>	236

Section 10. Autoimmune thyroid diseases

A. Cellular interaction

Studies on the tissue T cell subsets in spontaneous lymphocytic thyroiditis in BB/W rats <i>Y. Hara, Y. Kawakami, M. Yanagisawa, K. Satoh, M. Urabe, Y. Sakatsume, S. Kawazu, J. Ishii, and K. Komeda</i>	239
Dysfunction of suppressor T cells in thyroid glands from patients with Graves' disease <i>Y. Ueki, K. Eguchi, T. Fukuda, T. Otsubo, Y. Kawabe, C. Shimomura, M. Matsunaga, H. Tezuka, N. Ishikawa, K. Ito, and S. Nagataki</i>	244
Cellular interactions among thyrocytes, T cells and monocytes within thyroid glands from patients with Graves' disease <i>T. Otsubo, K. Eguchi, Y. Kawabe, C. Shimomura, Y. Ueki, H. Nakao, T. Fukuda, M. Matsunaga, H. Tezuka, N. Ishikawa, K. Ito, and S. Nagataki</i>	249
Synergy in antigen presentation by monocytes and thyroid epithelial cells from patients with Graves' disease <i>K. Eguchi, T. Otsubo, Y. Kawabe, C. Shimomura, Y. Ueki, H. Nakao, H. Tezuka, M. Matsunaga, T. Fukuda, N. Ishikawa, K. Ito, and S. Nagataki</i>	254
The effects of cytokines, antithyroidal drugs and glucocorticoids on phagocytosis by thyroid cells <i>M. Matsunaga, K. Eguchi, T. Fukuda, H. Tezuka, Y. Ueki, Y. Kawabe, C. Shimomura, T. Otsubo, N. Ishikawa, K. Ito, and S. Nagataki</i>	259
Surface glycoprotein of FRTL cell : Its role in phagocytotic activity of latex beads <i>K. Takazawa, T. Endo, and T. Onaya</i>	264

B. Immune function

Depressed natural killer activity in hyperthyroidism <i>P. Wang, S. Luo, B. Huang, J. Lin, and M. Huang</i>	269
--	-----

Natural killer and natural killer-like cell activity of peripheral blood and thyroid infiltrating mononuclear cells from patients with Graves' disease <i>H. Tezuka, K. Eguchi, T. Fukuda, T. Otsubo, Y. Kawabe, Y. Ueki, M. Matsunaga, C. Shimomura, H. Nakao, N. Ishikawa, K. Ito, and S. Nagataki</i>	274
In vitro production of thyroglobulin specific helper factor in humans <i>K. Sato, Y. Hara, Y. Kawakami, Y. Sakatsume, T. Tanikawa, J. Ishii, and L.J. DeGroot</i>	279
Correlation between anti-thyroid hormone and anti-thyroglobulin antibodies in three cases of Hashimoto's thyroiditis <i>T. Komaki, S. Sakata, S. Nakamura, M. Matsuda, N. Kojima, and K. Miura</i>	284
Analysis of peripheral blood mononuclear cell subsets in patients with Graves' disease : alteration with methimazole therapy <i>K. Kushima, Y. Ban, H. Hara, H. Nagakura, M. Kaihara, N. Ishikawa, and K. Ito</i>	289
Increase of peripheral natural killer (NK) cells at postpartum destructive thyrotoxicosis in autoimmune thyroid disease <i>N. Amino, M. Aozasa, H. Tamaki, J. Tachi, M. Mori, Y. Iwatani, O. Tanizawa, and K. Miyai</i>	294
C. TSH receptor autoantibody	
Autoantibodies to soluble TSH receptors by ELISA method <i>S. Damrongpisutikul, S. Tuchinda, and P. Matangkasombat</i>	300
Comparison of thyroid stimulating activities detected by cyclic AMP production and those by radioiodine uptake in FRTL-5 cells in immunoglobulins from patients with hyperthyroid and euthyroid Graves' diseases <i>K. Kasagi, J. Konishi, Y. Iida, K. Arai, Y. Tokuda, K. Endo, and K. Torizuka</i>	305
Anti-TSH antibodies in patients with Graves' disease and primary nongoitrous myxedema <i>B.Y. Cho, H.K. Lee, C-S. Koh, H.K. Min, and M. Lee</i>	310
Blocking type antibody (B-IgG) from a patient with primary myxedema inhibits Graves'IgG (G-IgG)-or TSH-induced thyroglobulin (Tg) release in human thyroid monolayer cells <i>Y. Fukue, H. Uchimura, K. Kubota, T. Mitsuhashi, K. Inoue, S. Okano, Y. Kanaji, and F. Takaku</i>	317
Heterogeneity of Graves' IgG is mainly due to multiple antibodies with a single function <i>K. Ashizawa, S. Morita, N. Yokoyama, Y. Nagayama, F. Kakezono, T. Kiriyaama, H. Nanba, I. Morimoto, S. Okamoto, M. Izumi, and S. Nagataki</i>	322
Studies on thyrotropin receptor antibodies in patients with euthyroid Graves' diseases <i>J. Konishi, K. Kasagi, Y. Iida, K. Arai, Y. Tokuda, K. Endo, and K. Torizuka</i>	327
A correlation between the concentration of serum T ₄ and the values of TSH binding inhibiting antibody (TBIAb) during the clinical course of a patient with Hashitoxicosis <i>N. Yokoyama, Y. Nagayama, T. Kiriyaama, S. Morita, K. Ashizawa, S. Ohtakara, I. Morimoto, H. Nanba, S. Okamoto, M. Izumi, and S. Nagataki</i>	333
Comparison of effects of high and low dosage regimens of antithyroid drugs on the changes of TSH receptor antibodies in Graves' hyperthyroidism <i>C-S. Koh, B.Y. Cho, D.H. Moon, H.K. Lee, H.K. Min, and M. Lee</i>	338
Thyrotrophin(TSH) receptor antibodies in patients with relapsed hyperthyroidism <i>P.P.B. Yeo, T.C. Aw, A.C. Thai, W.Y. Ng, L. Chan, W.T.L. Tan, K.F. Lui, and J.S. Cheah</i>	343

D. Organ specific autoantibody

Clinical significance of pituitary cell antibodies(PCA) in autoimmune thyroid disease

I. Kobayashi, A. Ishii, S. Okada, H. Shimizu, K. Ohshima, M. Mori, Y. Shimomura, S. Kobayashi, M. Sugiura, and A. Hashimoto 349

Heterogeneous changes in thyroid stimulating(TSI) and thyrotropin binding inhibiting(TBII) activities in immunoglobulins G of untreated patients with Graves' disease demonstrated by porcine thyroid TSH receptor adsorption or desorption

H. Uchimura, Y. Kawakami, Y. Fukue, K. Matsuda, T. Mitsuhashi, K. Kubota, Y. Manabe, K. Ito, and F. Takaku 353

Circulating monocyte(macrophage)-specific antibodies in patients with autoimmune thyroid diseases

K. Zeki, T. Fujihira, F. Shirakawa, K. Watanabe, K. Yahata, H. Suzuki, and S. Eto 358

Insulin autoimmune syndrome in Graves' disease

H.D. Lin, H.D. Chen, P.Y. Chang, and K.N. Ching 363

Section 11. Iodine deficiency diseases

Endemic goitre in plateau state, Nigeria

U.P. Isichei, S.C. Das, A.I. Banwo, I. Morimoto, and S. Nagataki 368

Prevention and control of iodine deficiency disorders in Yugoslavia

Z. Skrabalo, and K. Seidl 373

A strategy of progressive IDD control in Vietnam

B. Swennen, D. Due, J. Dricot, P. Bourdoux, L. My, and C. Thilly 382

Goiter in Tehran and suburbs

F. Azizi, M. Kimiagar, L. Navai, M. Nafarabadi, and H. Mostafavi 388

Change of cerebroside in the cerebrum of mice treated with methylthiouracil

X. Bian, T. Ma, X. Chen, and J. Liu 392

An animal model of endemic cretinism induced by long-term iodine deficiency in the mouse

Z. Chen, L. Dueng, X. Chu, G. Bai, X. Hu, W. Zhao, B. Hou, C. Zhang, and T. Ma 397

Etiology of neurological and myxedematous cretinism in Vietnam and Zaire

D. Due, C. Thilly, J. Vanderpas, L. My, P. Bourdoux, B. Swennen, G.R. Delong, and A.M. Ermans 402

Intellectual deficits persist in an iodine deficient population in China given iodized salt and oil prophylaxis

G. Maberly, S. Boyages, M. Li, C. Eastman, J. Morris, J. Jupp, J. Collins, Q. Qian, P. Zhang, C. Qu., and D. Liu. et al. 407

The influence of different degrees of environmental iodine deficiency on the development of children

C. Qu, D. Liu, D. Wang, Y. Wang, F. Shi, et al. Directors : Q. Qian, T. Lu 412

Iodine crystals, KI and KIO₃ in water, salt, fish sauce and soya sauce

S. Chongchirasiri, S. Pattanachak, N. Tojinda, and R. Pleehachinda 417

Iodised oil prophylaxis and thyroid autoimmunity

A. Mithal, N. Kochupillai, A. Sharma, G.P. Sharma, and M.M.S. Ahuja 422

Synthesis of Iodized oil

T. Jaipetch, C. Pattanachak, S. Chongchirasiri, R. Pleehachinda, and R. Suwanik 426

An iodinator

S. Pattanachak, N. Tojinda, S. Ingbar, and R. Suwanik 431

Section 12. Investigations in thyroid diseases

- Fundamental and clinical evaluation of a highly sensitive immunoradiometric assay for serum TSH
H. Hara, Y. Ban, K. Kushima, H. Nagakura, M. Kaihara, R. Sato, and H. Niitani 436
- Sensitive immunoradiometric assay for serum thyrotrophin in the evaluation of thyroid function
P.P.B. Yeo, A.C. Thai, W.Y. Ng, K.F. Lui, and T.C. Aw 442
- Monoclonal anti-peptide antibodies offer new insights in the measurement of serum calcitonin
P. Motte, M. Ait-Abdellah, P. Gardet, D. Bellet, and C. Bohuon 449
- Newer imaging techniques-a help in diagnosis of thyroid disorders
S.K. Garg, K. Garg, S. Suri, N. Malik, J.D. Wig, and R.J. Dash 454
- Determination of thyroid gland volume by a newly developed ultrasonic technique
K. Miki, J. Takamatsu, S. Sakane, M. Majima, H. Kitaoka, H. Akagi, A. Kobayashi, F. Matsuzuka, K. Kuma, and T. Mozai 459
- Fine needle aspiration biopsy in the cytologic evaluation of thyroid nodules
E.T. de los Santos, L.A. Tudtud, J.A. Quimpo, B.P. Perez, V.P. Banez, R.R. Rayel, M.A. Lapuebla, and L.S. Villadolid 464

Section 13. Therapy of Graves' disease

- Effect of different dosage regimens of propylthiouracil on thyroid hormone levels in thyrotoxic patients
V. Sridama, S. Sritippayawan, and S. Ampornsittikool 471
- Unusual response to thionamide compounds in Tehran
F. Azizi 475
- Studies on the remission of Graves' disease following discontinuation of antithyroid drug therapy : T₃-nonsuppressible and TRAb-negative states
T. Yamaguchi, I. Kobayashi, H. Akiyama, J. Shoda, T. Inukai, K. Ohshima, M. Mori, Y. Shimomura, and S. Kobayashi 479
- Graves' disease complicating pregnancy : results of surgical treatment in 35 pregnancies
T. Mimura, G. Hamana, K. Ishitobi, N. Momotani, K. Ito, and H. Takami 483
- Effect of Lugol's iodine on the vascularity of the toxic goitre
R. Mohan, A.K. Padhey, P.G. Gopinath, M.G. Karmarkar, and M.M. Kapur 487
- Effects of total thyroidectomy, immunosuppressive therapy, on Graves' ophthalmopathy
K. Nagai, H. Tamai, S. Matsubayashi, A. Miyauchi, F. Matsuzuka, K. Kuma, and S. Nagataki 492
- Treatment of Graves' ophthalmopathy with infusion of high dose methylprednisolone
Y. Nagayama, M. Izumi, N. Yokoyama, T. Kiriya, S. Okamoto, I. Morimoto, and S. Nagataki 496

Section 14. Clinical thyroidology

- Thyroid hormone and autonomic nervous system : Decreased variation in R-R intervals on electrocardiogram(ECG) in patients with thyroid dysfunction
T. Inukai, I. Kobayashi, T. Kobayashi, A. Iwashita, A. Ishii, T. Onai, K. Ohshima, M. Mori, Y. Shimomura, and S. Kobayashi 501
- Electrophysiological studies in patients with thyrotoxicosis
K.K. Talwar, V. Gupta, U. Kaul, M.M.S. Ahuja, and M.L. Bhatia 506
- Pituitary response to luteinizing hormone releasing hormone in hypothyroidism
K.M. Prasanna Kumar, M.L. Khurana, A.C. Ammini, M.M. Godbole, and M.M.S. Ahuja 511

Serum sex hormone dynamics before and during antithyroidal drug therapy in hyperthyroid males <i>I. Morimoto, H. Tamai, Y. Hayashi, K. Kuma, S. Inoue, H. Nanba, M. Izumi, and S. Nagataki</i>	516
A case of painless thyroiditis associated with idiopathic thrombocytopenic purpura <i>K. Nagai, S. Sakata, H. Takuno, S. Tanabashi, M. Kametani, and N. Tokimitsu</i>	521
Tuberculosis of the thyroid gland <i>S.K. Garg, K. Garg, and R.J. Dash</i>	526
Response of benign thyroid nodules, defined by fine needle aspirations, to medical therapy and needle aspiration <i>V. Sridama, W. Lueprasitsakul, K. Sangsiri, S. Pattangunkul, D. Atamaprasangsa, and T. Sunthornthepvarakul</i>	531
Total thyroidectomy in the management of differentiated thyroid cancer <i>T.S. Reeve, L. Delbridge, and P. Crummer</i>	536
Clinical pattern of thyroid disorders. A hospital experience in Delhi, India and Benghazi, Libya <i>V. Kumar, and P.G. Gopinathan Nair</i>	540
Minutes of the General Assembly of the Asia and Oceania Thyroid Association <i>J. Konishi</i>	545
Author Index	547
Subject Index	552
