Preface to the Second Edition	xi
Preface to the First Edition	xiii
Acknowledgments	xv
INTRODUCTION—General Consideration of Pain	3
1. Pain-Sensitive Structures within the Cranial Cavity	53
2. Headache Associated with Changes in Intracranial Pressure	96
3. Headache and Brain Tumor	126
4. Headache from Distention of Cerebral and Pial Arteries	151
5. The Cerebral Circulation and the Headache of Subarachnoid Hemorrhage	186
6. The Extracranial Blood Vessels as Pain-Sensitive Structures	212
7. Inflammation of Cranial Arteries as a Source of Headache and Other Pain	216
8. Headache in the Migraine Syndrome, Part 1	227
9. Headache in the Migraine Syndrome, Part 2	302
10. The Incidence and Familial Occurrence of the Migraine Syndrome	386
11. The Relation of Life Situations, Personality Features, and Reactions to the Migraine Syndrome	399
12. Modification of Intensity and Frequency of Headache in the Migraine Syndrome	432
13. Vascular Accidents with Migraine Headache	467
14. Headache Associated with Arterial Hypertension	476
15. 'Cephalalgias,' and 'Atypical Neuralgias' of the Face and Head	498
16. The Teeth as Sources of Headache and Other Pain	518
17. The Nasal, Paranasal, and Aural Structures as Sources of Headache and Other Pain	532
18. The Eyes as a Source of Headache and Other Pains	561
19. Muscles of the Head and Neck as Sources of Headache and Other Pain	582
20. Chronic Post-Traumatic Headache	617
21. Typical or Major Neuralgias ('Tic Douloureux,' Trigeminal and Glossopharyngeal Tic), Post-Infectious Neuritides, and 'Intractable Pain'	638
22. The Surgical Treatment of Headache and Atypical Facial Neuralgia	661
23. Summary. Clinical Differentiation	670
Bibliography	711
Index	761
