Preface.....	vii
--------------	-----

PART I. SOURCE OF POTENTIAL; BIOELECTRICS OF THE MYOCARDIAL CELL

1. The transmembrane potential, <i>Charles E. Kossmann</i>	1
2. Ionic basis of the transmembrane potential, <i>Stanley A. Briller</i> ...	8
3. Experimental modification of the transmembrane potential; relation to myocardial mechanics; alternation of the action po- tential, <i>Morris Kleinfeld</i>	18

PART II. CONDUCTING MEDIUM; ELECTRIC FIELD OF THE HEART; LEADS

4. Transformation of the monophasic action potential to the multi- phasic record; axial current and membrane current, <i>Charles E.</i> <i>Kossmann</i>	38
5. Heart vector, lead vector, image space, lead field; vector electro- cardiography, <i>Charles E. Kossmann</i>	42
6. Vectorcardiographic leads and reference frames; differential and universal vectorcardiography, <i>Charles E. Kossmann</i>	59
7. Dipole theory in the analysis of the electrocardiogram and the vectorcardiogram, <i>Stanley A. Briller</i>	70
8. Status of leads other than the "standard" leads, <i>Adolph R.</i> <i>Berger</i>	85

PART III. SPREAD OF EXCITATION AND OF RECOVERY, NORMAL AND ABNORMAL

9. Endocardial, myocardial, and epicardial leads in man; current concepts of the spread of excitation and recovery in the ventricular wall, <i>Charles E. Kossmann</i>	103
10. Intraventricular conduction, <i>J. Marion Bryant</i>	117
11. The U wave, <i>Charles E. Kossmann</i>	183
12. Electrocardiographic effects of myocardial injury; electric images, <i>Charles E. Kossmann</i>	189
13. Principles of electrocardiographic interpretation in congenital heart disease, <i>Joseph V. Brumlik</i>	203
14. Present status of the electrocardiogram in myocardial hyper- trophy, <i>Charles E. Kossmann</i>	233

PART IV. RHYTHMS

15. Excitability of cardiac muscle and the action of antiarrhythmic agents, *Morris Kleinfeld*..... 237
16. The sinoatrial node, the atrioventricular node, and atrial dysrhythmias, *Joseph V. Brumlik*..... 252

PART V

17. Summary and conclusions, *Charles E. Kossmann*..... 270
- Index..... 274
