

TABLE OF CONTENTS

FOREWORD	v
INTRODUCTION	vi
CHAPTER I: ETIOLOGY	
Historical Foundation	1
A. Thrombophlebitis and the Venous System	8
1. Regional (Anatomical) Incidence	8
2. Associated Diseases, Conditions and Situations	9
3. Stasis and Flow in Veins	24
B. Coagulation and Experimental Studies	29
1. Coagulation	29
2. Experimental Studies	41
Summary	45
CHAPTER II: DIAGNOSIS	
A. Clinical and Pathological Correlations	48
1. The Extremities	48
2. Cerebral Veins	54
3. Visceral Veins	55
4. General Considerations	56
5. Pathology	59
B. Laboratory Findings	61
Summary	64
CHAPTER III: TREATMENT	
A. Medical Management	66
1. Anticoagulant Therapy	66
B. Surgical Management	80
Summary	84

CHAPTER IV: NEW HORIZONS

A. Countercurrent Theory of Thrombophlebitis	85
B. Mechanical Impedance Correlates and Their Relation to Coagulation	94
C. Immune Mechanisms in Thrombophlebitis	108
D. Use of Mathematical Techniques in Investigation of Thrombophlebitis	109
FINAL SUMMARY	112
REFERENCES AND NOTES	116
INDEX	169
