

CONTENTS

Introduction, 1

Section one

General aspects of pharmacology

- Drug-receptor interactions, 7
- Pharmacokinetics, 14
- Drug metabolism, enzyme induction, and pharmacogenetics, 27
- Drug safety and effectiveness, 42

Section two

Drugs acting on the nervous system and its receptors

- General aspects of neuropharmacology, 55
- Cholinergic (cholinomimetic) drugs, 76
- Adrenergic (sympathomimetic) drugs, 89
- Atropine group of cholinergic blocking drugs, 115
- Ganglionic blocking agents, 129
- Neuromuscular blocking agents, 134
- Adrenergic blocking agents, 143
- Drugs affecting catecholamine binding and release, 151
- Antihypertensive drugs, 158
- Histamine, 177
- Antihistaminic drugs, 189

Contents

Serotonin and antiserotonins, 198

Kinins and prostaglandins, 207

Section three

Psychotropic drugs

Antipsychotic and antianxiety drugs, 217

Antidepressant and psychotomimetic drugs, 233

Section four

Central nervous system stimulants of the convulsant type

Antiepileptics

Hypnotic drugs, 243

Central nervous system stimulants of the convulsant type, 269

Antiepileptic drugs, 274

Narcotic analgesic drugs, 281

Contemporary drug abuse, 297

GREGORY G. DIMIJIAN

Nonnarcotic analgesics and anti-inflammatory drugs, 331

Section five

Anesthetics

Pharmacology of general anesthesia, 347

Pharmacology of local anesthesia, 367

Section six

Pharmacology of drugs used in the treatment of cardiovascular disease

Digitalis, 379

Antiarrhythmic drugs, 395

Antianginal drugs, 408

Anticoagulant drugs, 415

Diuretic drugs, 426

Pharmacologic approaches to atherosclerosis, 445

Section seven

- 1000 Introduction to pharmacology of the respiratory and gastrointestinal tracts, 445
- 1001 Drug effects on the respiratory tract, 451
- 1002 Drug effects on the gastrointestinal tract, 460

Section eight

- 1003 General hormonal control of the endocrine system, 470
- 1004 Insulin, glucagon, and oral hypoglycemic agents, 471
- 1005 Adrenal steroids, 481
- 1006 Thyroid hormones and antithyroid drugs, 494
- 1007 Parathyroid extract and vitamin D, 503
- 1008 Posterior pituitary hormones—vasopressin and oxytocin, 510
- 1009 Anterior pituitary gonadotropins and sex hormones, 515
- 1010 Pharmacologic approaches to gout, 533
- 1011 Antianemic drugs, 538
- 1012 Vitamins, 549

Section nine

- 1013 Introduction to chemotherapy, 550
- 1014 Introduction to chemotherapy; mechanisms of antibiotic action, 561
- 1015 Sulfonamides, 568
- 1016 Antibiotic drugs, 581
- 1017 Drugs used in treatment of tuberculosis, 616
- 1018 Drugs used in treatment of leprosy, 623
- 1019 Antiseptics and disinfectants, 625
- 1020 Drugs used in treatment of amebiasis, 630
- 1021 Anthelmintic drugs, 635
- 1022 Antimalarial drugs, 645
- 1023 Drugs used in chemotherapy of neoplastic disease, 654

Contents

Section ten

Principles of immunopharmacology, 667

Section eleven

Poisons and antidotes, 677

Section twelve

Drug interactions, 691

Section thirteen

Prescription writing and drug compendia, 703

Drug blood levels, 711

Comparison of selected effects of commonly abused drugs, 717

Half-lives of drugs in normal subjects, 722
