

# Table of Contents

<b>Chapter 1</b>	<b>The Microbial World</b> . . . . .	<b>1</b>
<b>Chapter 2</b>	<b>Bacterial Cytology</b> . . . . .	<b>6</b>
	Optical Methods 6	
	Eucaryotic Cell Structure 7	
	Procaryotic Cell Structure 10	
	Staining 20	
	Morphologic Changes During Growth 22	
<b>Chapter 3</b>	<b>The Major Groups of Bacteria</b> . . . . .	<b>23</b>
	Principles of Classification 23	
	Descriptions of the Major Groups of Bacteria 26	
<b>Chapter 4</b>	<b>Microbial Genetics</b> . . . . .	<b>35</b>
	The Physical Basis of Heredity 35	
	The Procaryotic Chromosome 35	
	Mutation 38	
	Intercellular Transfer and Genetic Recombination in Bacteria 44	
	Genes of Structure and Genes of Regulation 48	
	Genetics of Drug Resistance 49	
<b>Chapter 5</b>	<b>Microbial Metabolism</b> . . . . .	<b>52</b>
	General Principles of Intermediary Metabolism 52	
	Catabolic Reactions Involved in Chemosynthesis 55	
	Storage and Utilization of Energy 59	
	The Role of Metabolism in Biosynthesis and Growth 63	
	Specialized Aspects of Microbial Metabolism 65	
	The Reoxidation of NAD-H <sub>2</sub> in Fermentations 71	
<b>Chapter 6</b>	<b>Cultivation of Microorganisms</b> . . . . .	<b>75</b>
	Nutrition 75	
	Environmental Factors Affecting Growth 76	
	Cultivation Methods 77	
<b>Chapter 7</b>	<b>The Growth and Death of Microorganisms</b> . . . . .	<b>80</b>
	Definition and Measurement of Growth 80	
	Exponential Growth 80	
	The Growth Curve 81	
	The Maintenance of Cells in Exponential Phase 82	
	Synchronous Growth 83	
	Growth Parameters 83	
	Definition and Measurement of Death 84	
	Antimicrobial Agents 85	
<b>Chapter 8</b>	<b>The Microbiology of Special Environments</b> . . . . .	<b>90</b>
	Water 90	
	Milk 92	
	Food 93	
	Air 96	
	Soil 97	
<b>Chapter 9</b>	<b>Bacteriophage</b> . . . . .	<b>102</b>
	Life Cycles of Phage and Host 102	
	Methods of Study 103	
	Properties of Phage 103	
	Phage Reproduction 105	
	Phage Genetics 106	
	Lysogeny 109	

<b>Chapter 10 Antimicrobial Chemotherapy</b> . . . . .	112
Selective Toxicity	112
Mechanism of Action of Antimicrobial Drugs	112
Drug Resistance	114
Drug Dependence	116
Antimicrobial Activity in Vitro	116
Antimicrobial Activity in Vivo	117
Drug-Parasite Relationships	117
Host-Parasite Relationships	118
Clinical Use of Antibiotics	119
Combined Antibiotic Action	120
Chemoprophylaxis	120
Antimicrobial Drugs for Local (Topical) Application	121
Antimicrobial Drugs for Systemic Administration	121
Antiviral and Antirickettsial Agents	133
<b>Chapter 11 Host-Parasite Relationships</b> . . . . .	135
Infection	135
Attributes of Microorganisms Which Enable Them to Cause Disease	135
Attributes of the Host Which Determine Resistance to Microorganisms	137
Some Mechanisms of Nonspecific Host Resistance	137
Resistance and Immunity	139
Natural Immunity	140
Acquired Immunity	141
<b>Chapter 12 Antigens and Antibodies</b> . . . . .	142
Antigens	142
Antibodies	143
Structure of Antibody Globulin	144
Serologic Reactions	147
Precipitation Reactions	148
Agglutination Reactions	149
Toxin-Antitoxin Reactions	150
Bacterial and Lytic Reactions	151
Complement Fixation Reactions	152
Absorption Reactions	153
Inhibition Reactions	153
Immunofluorescence	154
Other Types of Serologic Reactions	154
<b>Chapter 13 Allergy and Hypersensitivity</b> . . . . .	156
Immunologic Tolerance	156
Immediate Versus Delayed Type of Allergic Reaction	157
Reactions of the "Immediate" Type	157
Anaphylaxis	157
Serum Sickness	160
Arthus Reaction	161
"Spontaneous" Clinical Allergy (Atopy)	161
Reactions of the "Delayed" Type	162
Tuberculin Hypersensitivity	162
Other Delayed Type Hypersensitivity Reactions	163
Allergy to Drugs and Simple Chemicals	164
Role of Lipids, Waxes, and Adjuvants in the Development of Delayed Hypersensitivity	164
"Autoimmune," "Autoallergic," or "Hypersensitivity" Diseases	165
Tissue Grafts	167
<b>Chapter 14 Pyogenic Cocci</b> . . . . .	168
The Staphylococci	168
The Streptococci	172
The Pneumococci	178
The Neisseriae	180

<b>Chapter 15 Gram-Positive Bacilli . . . . .</b>	<b>184</b>
Aerobic Sporeforming Bacilli 184	
Anthrax 184	
Anaerobic Sporeforming Bacilli 186	
The Clostridia 186	
<b>Chapter 16 Corynebacteria . . . . .</b>	<b>191</b>
<b>Chapter 17 Mycobacteria . . . . .</b>	<b>195</b>
M. Tuberculosis 195	
Other Mycobacteria 201	
M. Leprae 202	
<b>Chapter 18 Enteric Gram-Negative Microorganisms . . . . .</b>	<b>203</b>
Endotoxins of Gram-Negative Bacteria 203	
Coliform Bacteria 204	
The Proteus Group 207	
Pseudomonas Aeruginosa 207	
The Salmonellae 208	
The Shigellae 211	
Vibrios 213	
<b>Chapter 19 Small Gram-Negative Bacilli . . . . .</b>	<b>216</b>
The Brucellae 216	
The Pasteurellae 218	
The Hemophilic Bacteria 222	
Hemophilus Influenzae 222	
Bordetella (Hemophilus) Pertussis 224	
Other Organisms of the Hemophilus Group 225	
<b>Chapter 20 Miscellaneous Pathogenic Microorganisms . . . . .</b>	<b>227</b>
Mycoplasmas (PPLO) and L Forms 227	
Streptobacillus Moniliformis 230	
Listeria Monocytogenes 230	
Erysipelothrix Insidiosa (Rhusiopathiae) 230	
Mimeae 231	
Bartonella Bacilliformis 231	
Bacteroides 231	
Pseudomonas (Actinobacillus) Mallei and Pseudomonas	
Pseudomallei 232	
Aeromonas Hydrophila 232	
<b>Chapter 21 Spirochetes and Other Spiral Microorganisms . . . . .</b>	<b>233</b>
Treponema Pallidum 233	
Diseases Related to Syphilis 236	
Other Spirochetal Diseases 236	
Borrelia Recurrentis 236	
Leptospirae 238	
Spirillum Minus 240	
Spirochetes of the Normal Mouth and Mucous Membranes 240	
Fusospirochetal Disease 240	
<b>Chapter 22 Medical Mycology . . . . .</b>	<b>241</b>
Structures of Fungi 241	
The Actinomycetes 243	
Nocardia Asteroides and Related Species 244	
Superficial Mycoses 245	
Deep Mycoses 249	
Candida Albicans 249	
Cryptococcus Neoformans 250	
Blastomyces Dermatitidis 251	
Blastomyces Brasiliensis 253	
Histoplasma Capsulatum 253	
Coccidioides Immitis 255	
Geotrichum Candidum 256	

<b>Chapter 22 Medical Mycology (Cont'd.)</b>	
<i>Sporotrichum Schenckii</i>	257
Chromoblastomycosis	258
Maduromycosis	258
Mucormycosis and Aspergillosis	259
Hypersensitivity to Fungi	259
Mycotoxins	259
<b>Chapter 23 Normal Microbial Flora of the Human Body</b>	260
Role of the Resident Flora	260
Normal Flora of the Skin	260
Normal Flora of the Mouth and Upper Respiratory Tract	261
Normal Flora of the Intestinal Tract	261
Normal Flora of the Vagina	262
Normal Flora of the Eye (Conjunctiva)	262
<b>Chapter 24 Principles of Diagnostic Medical Microbiology</b>	263
Communication Between Physician and Laboratory	263
Specimens	263
Selection of Laboratory Investigations	264
The Demonstration of an Infectious Agent	264
Serologic Tests; The Demonstration of Specific Antibody	272
Skin Tests	274
Nonspecific Clinical Laboratory Tests	276
Laboratory Aids in the Selection of Antimicrobial Therapy	277
Gram and Acid-Fast Staining Methods	280
<b>Chapter 25 Rickettsial Diseases</b>	281
<b>Chapter 26 Agents of Psittacosis-LGV-Trachoma Group (<i>Bedsoniae</i>, <i>Chlamydiae</i>)</b>	287
Psittacosis	290
Lymphogranuloma Venereum (LGV)	291
Trachoma and Inclusion Conjunctivitis (TRIC Agents)	293
Other Agents of the Group	295
<b>Chapter 27 General Properties of Viruses</b>	296
Classification	296
General Properties	299
Evolution of Viruses	299
Biophysical Properties of Virus	299
Measuring the Sizes of Viruses	303
Purification of Virus Particles	304
Identification of a Particle as a Virus	305
Reaction to Physical and Chemical Agents	305
Cultivation of Viruses	306
Virus Hemagglutination	307
Replication of Viruses	307
In Vitro Synthesis of Infectious Viral DNA	310
Viral Genetics and Viral Interactions	310
Experimental Chemoprophylaxis of Virus Infections	312
Interference Phenomenon and Interferon	315
Pathogenesis of Virus Diseases	317
Inclusion Body Formation	319
Chromosome Damage	319
Latent Virus Infections	319
Natural History (Ecology) and Modes of Transmission of Viruses and Rickettsiae	321
<b>Chapter 28 Isolation of Viruses From Clinical Specimens</b>	327
Complicating Factors in the Diagnosis of Viral Diseases	327
Direct Examination of Clinical Material	328
Virus Isolation Technic	329
Specimens for Study	329
Preservation of Viruses	329

<b>Chapter 28 Isolation of Viruses From Clinical Specimens (Cont'd.)</b>	
Preparation of Inocula	331
Animal Inoculation	331
Cultivation in Tissue Culture	332
Chick Embryo Technic	333
Examination of Embryos	334
<b>Chapter 29 Serologic Diagnosis of Virus Infections</b>	<b>335</b>
Neutralization Tests	335
Quantitative Neutralization Tests	336
The Neutralization Test in Tissue Culture	338
Neutralization Tests in Eggs	338
Complement Fixation Tests	339
Soluble and Viral Antigens	339
Epidemiologic Interpretation	340
Hemagglutination Inhibition Tests	340
Standards and Titration	340
The Diagnostic Agglutination Inhibition Test	341
Mixed Hemadsorption Test	342
Microflocculation Test	342
Immunofluorescence Test	342
Sheep Cell Agglutination	343
Heterophil Agglutination Test	343
Adsorption Test	343
Antibodies Against Herpes-Type Virus	346
Tests for Dermal Hypersensitivity (Skin Tests)	346
<b>Chapter 30 Arthropod-Borne (Arbo) Viral Diseases</b>	<b>347</b>
Arbovirus Encephalitides	348
California Encephalitis	353
West Nile Fever	354
Yellow Fever	355
Dengue	357
Hemorrhagic Fever	360
Sandfly Fever	360
Colorado Tick Fever	361
Rift Valley Fever	361
<b>Chapter 31 Picornavirus Group (Enterovirus and Rhinovirus Subgroups)</b>	<b>363</b>
Poliomyelitis	363
Coxsackievirus Group	369
Echovirus Group	371
Rhinovirus Group	373
Foot-and-Mouth Disease (Rhinovirus of Cattle)	375
<b>Chapter 32 Hepatitis Viruses</b>	<b>376</b>
Infectious Hepatitis and Serum Hepatitis	376
<b>Chapter 33 Rabies and Certain Other Viral Diseases of the Nervous System; Slow Viruses</b>	<b>380</b>
Rabies	380
Aseptic Meningitis	384
Lymphocytic Choriomeningitis	384
Encephalitis Lethargica	385
Epidemic Neuromyasthenia	385
Mengo Fever	385
Chronic Viral Diseases of the CNS and Other Progressive Degenerative Disorders	386
<b>Chapter 34 Orthomyxovirus Group (Influenza)</b>	<b>387</b>
<b>Chapter 35 Paramyxovirus Group</b>	<b>394</b>
Mumps	394
Measles	396
Rubella	401

<b>Chapter 35 Paramyxovirus Group (Cont'd.)</b>	
Parainfluenza Virus Infections	403
Respiratory Syncytial (RS) Virus	404
Newcastle Disease Conjunctivitis	405
<b>Chapter 36 Poxvirus Group</b>	406
Smallpox and Related Viral Infections of Man	406
Variola Major, Variola Minor, Vaccina	406
Cowpox	414
Yaba Monkey Virus	414
Molluscum Contagiosum	415
<b>Chapter 37 Adenovirus Group</b>	416
<b>Chapter 38 Herpesvirus Group</b>	421
Herpes Simplex	421
Varicella-Zoster Virus	424
Cytomegalovirus	426
A Herpesvirus From Burkitt Lymphoma Cells	428
B Virus	429
Marmoset Herpesvirus	429
<b>Chapter 39 Reovirus and Other Viral Infections of Man</b>	430
Reovirus Group	430
Warts (Human Papovavirus)	431
Infectious Mononucleosis (Glandular Fever)	432
Exanthem Subitum (Roseola Infantum)	432
Epidemic Viral Gastroenteritis	432
Cat Scratch Fever (Benign Lymphoreticulosis)	433
<b>Chapter 40 Oncogenic Viruses</b>	434
Matilda Benyesh-Melnick	
RNA-Containing Tumor Viruses	435
DNA-Containing Tumor Viruses	446
Viruses and Human Cancer	452
<b>Appendix: Medical Parasitology</b>	455
J. Ralph Audy and Frederick L. Dunn	
Classification	456
Giardia Lamblia	456
Trichomonas	457
Other Intestinal Flagellates	458
The Hemoflagellates	458
Entamoeba Histolytica	463
Other Intestinal Amebas	465
The Plasmodia	466
The Isospora	469
Sarcocystis Lindemanni	470
Toxoplasma Gondii	471
Pneumocystis Carinii	472
Balantidium Coli	472
Helminths: Ova in Feces and Microfilariae in Blood and Tissues	473
Illustrations	476
