UNIT I	INTRODUCTION TO PHYSIOLOGY: THE CELL AND GENERAL PHYSIOLOGY	1
CHAPTER 1	Functional Organization of the Human Body and Control of the "Internal Environment"	2
	Cells as the Living Units of the Body.....	2
	The Extracellular Fluid—The Internal Environment	2
	"Homeostatic" Mechanisms of the Major Functional Systems	3
	Homeostasis	3
	The Extracellular Fluid Transport System—The Circulatory System	3
	Origin of Nutrients in the Extracellular Fluid	4
	Removal of Metabolic End Products.....	4
	Regulation of Body Functions	4
	Reproduction	5
	The Control Systems of the Body	5
	Examples of Control Mechanisms	5
	Characteristics of Control Systems.....	6
	Summary—Automaticity of the Body	8
CHAPTER 2	The Cell and Its Function	9
	Organization of the Cell.....	9
	Physical Structure of the Cell	10
	The Membranous Structures of the Cell	11
	The Cytoplasm and Its Organelles.....	12
	The Nucleus	15
	Comparison of the Animal Cell With Precellular Forms of Life..	16
	Functional Systems of the Cell	16
	Ingestion by the Cell—Endocytosis.....	16
	Digestion of Foreign Substances in the Cell—Function of the Lysosomes	17
	Synthesis and Formation of Cellular Structures by the Endoplasmic Reticulum and the Golgi Apparatus	18
	Extraction of Energy from Nutrients—Function of the Mitochondria	19
	Ameboid Locomotion of Cells	21
	Cilia and Ciliary Movements	22

CHAPTER 3	Genetic Control of Protein Synthesis, Cell Function, and Cell Reproduction	24
	<i>The Genes</i>	24
	<i>The Genetic Code</i>	24
	RNA—The Process of Transcription	25
	<i>Messenger RNA—The “Codons”</i>	27
	<i>Transfer RNA—The “Anticodons”</i>	27
	<i>Ribosomal RNA</i>	28
	<i>Formation of Proteins on the Ribosomes—The Process of “Translation”</i>	28
	Synthesis of Other Substances in the Cell	29
	Control of Genetic Function and Biochemical Activity in Cells	30
	<i>Genetic Regulation</i>	30
	<i>Control of Enzyme Activity</i>	31
	Cell Reproduction	31
	<i>Replication of the DNA, The Initial Step in Cell Reproduction</i>	32
	<i>The Chromosomes and Their Replication</i>	33
	<i>Mitosis</i>	33
	<i>Control of Cell Growth and Reproduction</i>	33
	Cell Differentiation	34
	Cancer	34
<hr/>		
UNIT II	MEMBRANE PHYSIOLOGY, NERVE, AND MUSCLE	37
CHAPTER 4	Transport of Ions and Molecules Through the Cell Membrane	38
	Diffusion	38
	<i>Diffusion Through the Cell Membrane</i>	39
	<i>Factors That Affect Net Rate of Diffusion</i>	43
	<i>Osmosis Across Selectively Permeable Membranes—Net Diffusion of Water</i>	44
	Active Transport	46
	<i>Active Transport Through Cellular Sheets</i>	49
CHAPTER 5	Membrane Potentials and Action Potentials	51
	Basic Physics of Membrane Potentials	51
	<i>Membrane Potentials Caused by Diffusion</i>	51
	<i>Measuring the Membrane Potential</i>	52
	<i>The Cell Membrane as an Electrical Capacitor</i>	53
	The Resting Membrane Potential of Nerves	53
	<i>Origin of the Normal Resting Membrane Potential</i>	54
	The Nerve Action Potential	55
	<i>The Voltage-Gated Sodium and Potassium Channels</i>	55
	<i>Summary of the Events That Cause the Action Potential</i> ..	57
	<i>Roles of Other Ions During the Action Potential</i>	58
	<i>Initiation of the Action Potential</i>	59
	Propagation of the Action Potential	59

Re-establishing Sodium and Potassium Ionic Gradients After Action Potentials—Importance of Energy Metabolism.....	60
Plateau in Some Action Potentials	60
Rhythmicity of Certain Excitable Tissues—Repetitive Discharge	61
Special Aspects of Signal Transmission in Nerve Trunks	62
<i>Velocity of Conduction in Nerve Fibers</i>	63
Excitation—The Process of Eliciting the Action Potential	63
<i>Inhibition of Excitability—“Stabilizers” and Local Anesthetics</i>	64
Recording Membrane Potentials and Action Potentials	64
CHAPTER 6 Contraction of Skeletal Muscle	67
Physiologic Anatomy of Skeletal Muscle.....	67
<i>The Skeletal Muscle Fiber</i>	67
The General Mechanism of Muscle Contraction	68
Molecular Mechanism of Muscle Contraction	69
<i>Molecular Characteristics of the Contractile Filaments</i> ...	70
<i>Degree of Actin and Myosin Filament Overlap—Effect on Tension Developed by the Contracting Muscle</i>	72
<i>Relation of Velocity of Contraction to Load</i>	73
Energetics of Muscle Contraction	74
Characteristics of Whole Muscle Contraction.....	74
<i>Mechanics of Skeletal Muscle Contraction</i>	76
<i>Remolding of Muscle to Match Function</i>	77
<i>Rigor Mortis</i>	78
CHAPTER 7 Excitation of Skeletal Muscle Contraction: Neuromuscular Transmission and Excitation-Contraction Coupling	80
Transmission of Impulses From Nerves to Skeletal Muscle Fibers: The Neuromuscular Junction.....	80
The Muscle Action Potential.....	84
Excitation-Contraction Coupling.....	84
<i>Release of Calcium Ions by the Sarcoplasmic Reticulum</i>	84
CHAPTER 8 Contraction and Excitation of Smooth Muscle	87
Contraction of Smooth Muscle	87
<i>Types of Smooth Muscle</i>	87
<i>The Contractile Process in Smooth Muscle</i>	87
<i>Regulation of Contraction by Calcium Ions</i>	90
Neural and Hormonal Control of Smooth Muscle Contraction..	90
<i>Neuromuscular Junctions of Smooth Muscle</i>	91
<i>Membrane Potentials and Action Potentials in Smooth Muscle</i>	91
<i>Smooth Muscle Contraction Without Action Potentials—Effect of Local Tissue Factors and Hormones</i>	93
<i>Source of Calcium Ions That Cause Contractions Both Through the Cell Membrane and From the Sarcoplasmic Reticulum</i>	94

UNIT III	THE HEART	97
CHAPTER 9	Heart Muscle; The Heart as a Pump	98
	Physiology of Cardiac Muscle	98
	<i>Physiologic Anatomy of Cardiac Muscle</i>	98
	<i>Action Potentials in Cardiac Muscle</i>	98
	<i>Contraction of Cardiac Muscle</i>	100
	The Cardiac Cycle	101
	<i>Systole and Diastole</i>	101
	<i>Relationship of the Electrocardiogram to the Cardiac</i> <i>Cycle</i>	101
	<i>Function of the Ventricles as Pumps</i>	102
	<i>Function of the Valves</i>	103
	<i>The Aortic Pressure Curve</i>	104
	<i>Relationship of the Heart Sounds to Heart Pumping</i>	104
	<i>Work Output of the Heart</i>	104
	<i>The Chemical Energy for Cardiac Contraction: Oxygen</i> <i>Utilization by the Heart</i>	105
	Regulation of Heart Pumping	106
	<i>Intrinsic Regulation of Heart Pumping — The Frank-Starling</i> <i>Mechanism</i>	106
	<i>Control of the Heart by the Sympathetic and Parasympa-</i> <i>thetic Nerves</i>	107
	<i>Effect of Heart Rate on Function of the Heart as a Pump</i> ..	108
	<i>Assessment of Cardiac Contractility</i>	108
	<i>Effect of Potassium and Calcium Ions on Heart Function</i> ..	109
	<i>Effect of Temperature on the Heart</i>	109
CHAPTER 10	Rhythmic Excitation of the Heart	111
	The Specialized Excitatory and Conductive System of the Heart	111
	<i>The Sinus Node</i>	111
	<i>Internodal Pathways and Transmission of the Cardiac</i> <i>Impulse Through the Atria</i>	113
	<i>The A-V Node and Delay in Impulse Conduction</i>	113
	<i>Transmission in the Purkinje System</i>	113
	<i>Transmission of the Cardiac Impulse in the Ventricular</i> <i>Muscle</i>	114
	<i>Summary of the Spread of the Cardiac Impulse Through the</i> <i>Heart</i>	114
	Control of Excitation and Conduction in the Heart	115
	<i>The Sinus Node as the Pacemaker of the Heart</i>	115
	<i>Role of the Purkinje System in Causing Synchronous</i> <i>Contraction of the Ventricular Muscle</i>	115
	<i>Control of Heart Rhythmicity and Conduction by the</i> <i>Sympathetic and Parasympathetic Nerves</i>	116
CHAPTER 11	The Normal Electrocardiogram	118
	Characteristics of the Normal Electrocardiogram	118
	<i>Depolarization Waves Versus Repolarization Waves</i>	118
	<i>Relationship of Atrial and Ventricular Contraction to the</i> <i>Waves of the Electrocardiogram</i>	119
	<i>Voltage and Time Calibration of the Electrocardiogram</i> ...	119

Methods for Recording Electrocardiograms.....	120
<i>The Pen Recorder</i>	120
Flow of Current Around the Heart During the Cardiac Cycle ...	120
<i>Recording Electrical Potentials From a Partially Depolarized Mass of Syncytial Cardiac Muscle</i>	120
<i>Flow of Electrical Currents Around the Heart in the Chest</i>	120
Electrocardiographic Leads.....	121
<i>The Three Bipolar Limb Leads</i>	121
<i>Chest Leads (Precordial Leads)</i>	122
<i>Augmented Unipolar Limb Leads</i>	123
CHAPTER 12 <i>Electrocardiographic Interpretation of Cardiac Muscle and Coronary Muscle and Coronary Abnormalities: Vectorial Analysis</i>	124
Principles of Vectorial Analysis of Electrocardiograms	124
<i>Use of Vectors to Represent Electrical Potentials</i>	124
<i>Denoting the Direction of a Vector in Terms of Degrees</i> ...	124
<i>"Axis" of Each of the Bipolar and Unipolar Limb Leads</i> ..	124
<i>Vectorial Analysis of Potentials Recorded in Different Leads</i>	125
Vectorial Analysis of the Normal Electrocardiogram.....	126
<i>Vectors Occurring During Depolarization of the Ventricles — The QRS Complex</i>	126
<i>The Electrocardiogram During Repolarization — The T Wave</i>	127
<i>Depolarization of the Atria — The P Wave</i>	128
<i>The Vectorcardiogram</i>	128
The Mean Electrical Axis of the Ventricular QRS	129
<i>Determining the Electrical Axis From Standard Lead Electrocardiograms</i>	129
<i>Abnormal Ventricular Conditions That Cause Axis Deviation</i>	129
Conditions That Cause Abnormal Voltages of the QRS Complex	131
<i>Increased Voltage in the Standard Bipolar Limb Leads</i> ...	131
<i>Decreased Voltage of the Electrocardiogram</i>	131
Prolonged and Bizarre Patterns of the QRS Complex	132
<i>Prolonged QRS Complex as a Result of Cardiac Hypertrophy or Dilatation</i>	132
<i>Prolonged QRS Complex Resulting From Purkinje System Blocks</i>	132
<i>Conditions Causing Bizarre QRS Complexes</i>	132
Current of Injury.....	132
<i>Effect of Current of Injury on the QRS Complex</i>	132
<i>The J Point — The Zero Reference Potential for Analyzing Current of Injury</i>	133
<i>Coronary Ischemia as a Cause of Current of Injury</i>	134
Abnormalities in the T Wave.....	136
<i>Effect of Slow Conduction of the Depolarization Wave on the T Wave</i>	136

	<i>Prolonged Depolarization in Portions of the Ventricular Muscle as a Cause of Abnormalities in the T Wave</i>	136
CHAPTER 13	<i>Cardiac Arrhythmias and Their Electrocardiographic Interpretation</i>	138
	Abnormal Sinus Rhythms	138
	<i>Tachycardia</i>	138
	<i>Bradycardia</i>	138
	<i>Sinus Arrhythmia</i>	139
	Abnormal Rhythms Resulting From Impulse Conduction Block	139
	<i>Sinoatrial Block</i>	139
	<i>Antioventricular Block</i>	139
	<i>Incomplete Intraventricular Block—Electrical Alternans</i>	140
	Premature Contractions	140
	<i>Premature Atrial Contractions</i>	141
	<i>A-V Nodal or A-V Bundle Premature Contractions</i>	141
	<i>Premature Ventricular Contractions</i>	141
	Paroxysmal Tachycardia	142
	<i>Atrial Paroxysmal Tachycardia</i>	142
	<i>Ventricular Paroxysmal Tachycardia</i>	142
	Ventricular Fibrillation	143
	<i>The Phenomenon of “Re-Entry”—Circus Movements as the Basis for Ventricular Fibrillation</i>	143
	Atrial Fibrillation	145
	<i>Atrial Flutter</i>	146
	Cardiac Arrest	146
<hr/>		
UNIT IV	<i>THE CIRCULATION</i>	149
CHAPTER 14	<i>Overview of the Circulation, and Medical Physics of Pressure, Flow, and Resistance</i>	150
	Physical Characteristics of the Circulation	150
	The Basic Theory of Circulatory Function	152
	Interrelationships Among Pressure, Flow, and Resistance	152
	<i>Blood Flow</i>	153
	<i>Blood Pressure</i>	154
	<i>Resistance to Blood Flow</i>	155
	<i>Effects of Pressure on Vascular Resistance and Tissue Blood Flow</i>	157
CHAPTER 15	<i>Vascular Distensibility and Functions of the Arterial and Venous Systems</i>	159
	Vascular Distensibility	159
	<i>Vascular Compliance (or Capacitance)</i>	159
	<i>Volume-Pressure Curves of the Arterial and Venous Circulations</i>	160
	<i>Delayed Compliance (Stress-Relaxation of Vessels)</i>	160
	The Arterial Pressure Pulsations	160
	<i>The Radial Pulse</i>	161
	<i>Transmission of Pressure Pulses to the Peripheral Arteries</i>	162

	<i>Clinical Methods for Measuring Systolic and Diastolic Pressures</i>	163
	The Veins and Their Functions	164
	<i>Venous Pressures — Right Atrial Pressure (Central Venous Pressure) and Peripheral Pressures</i>	164
	<i>Blood Reservoir Function of the Veins</i>	167
CHAPTER 16	<i>The Microcirculation and the Lymphatic System: Capillary Fluid Exchange, Interstitial Fluid, and Lymph Flow</i>	170
	<i>Structure of the Microcirculation and Capillary System</i> ...	170
	Flow of Blood in the Capillaries—Vasomotion	171
	<i>Average Function of the Capillary System</i>	172
	Exchange of Nutrients and Other Substances Between the Blood and Interstitial Fluid	172
	<i>Diffusion through the Capillary Membrane</i>	172
	The Interstitium and the Interstitial Fluid	173
	Distribution of Fluid Volume Between the Plasma and the Interstitial Fluid	174
	<i>Capillary Pressure</i>	174
	<i>Interstitial Fluid Pressure</i>	175
	<i>Plasma Colloid Osmotic Pressure</i>	177
	<i>Interstitial Fluid Colloid Osmotic Pressure</i>	178
	<i>Exchange of Fluid Volume Through the Capillary Membrane</i>	178
	<i>The Starling Equilibrium for Capillary Exchange</i>	179
	The Lymphatic System.....	180
	<i>The Lymph Channels of the Body</i>	180
	<i>Formation of Lymph</i>	180
	<i>Rate of Lymph Flow</i>	181
	<i>Role of the Lymphatic System in Controlling Interstitial Fluid Protein Concentration, Interstitial Fluid Volume, and Interstitial Fluid Pressure</i>	183
CHAPTER 17	<i>Local Control of Blood Flow by the Tissues, and Humoral Regulation</i>	185
	Local Control of Blood Flow in Response to Tissue Need	185
	<i>Mechanisms of Blood Flow Control</i>	185
	<i>Long-Term Blood Flow Regulation</i>	189
	<i>Development of Collateral Circulation—A Phenomenon of Long-Term Local Blood Flow Regulation</i>	191
	Humoral Regulation of the Circulation	191
CHAPTER 18	<i>Nervous Regulation of the Circulation, and Rapid Control of Arterial Pressure</i>	194
	Nervous Regulation of the Circulation	194
	<i>The Autonomic Nervous System</i>	194
	Role of the Nervous System for Rapid Control of Arterial Pressure.....	197
	<i>Increase in Arterial Pressure During Muscle Exercise and Other Types of Stress</i>	198
	<i>The Reflex Mechanisms for Maintaining Normal Arterial Pressure</i>	198

	<i>The Central Nervous System Ischemic Response—Control of Arterial Pressure by the Vasomotor Center in Response to Diminished Brain Blood Flow</i>	201
	Special Features of Nervous Control of Arterial Pressure	202
	<i>Role of the Skeletal Nerves and Skeletal Muscles in Increasing Cardiac Output and Arterial Pressure</i>	202
	<i>Respiratory Waves in the Arterial Pressure</i>	203
	<i>Arterial Pressure “Vasomotor” Waves—Oscillation of the Pressure Reflex Control Systems</i>	203
CHAPTER 19	<i>Dominant Role of the Kidneys in Long-Term Regulation of Arterial Pressure and in Hypertension: The Integrated System for Pressure Control</i>	205
	The Renal-Body Fluid System for Arterial Pressure Control	205
	<i>Hypertension (High Blood Pressure) Caused by Excessive Extracellular Fluid Volume</i>	209
	The Renin-Angiotensin System: Its Role in Pressure Control and in Hypertension	211
	<i>Types of Hypertension in Which Angiotensin Is Involved: Hypertension Caused by Secretion of Renin by a Renin-Secreting Tumor or by Infusion of Angiotensin II</i>	214
	<i>Other Types of Hypertension Caused by Combinations of Volume-Loading and Vasoconstriction</i>	216
	<i>Essential Hypertension</i>	217
	Summary of the Integrated, Multifaceted System for Arterial Pressure Regulation	218
CHAPTER 20	<i>Cardiac Output, Venous Return, and Their Regulation</i>	221
	<i>Normal Values for Cardiac Output at Rest and During Activity</i>	221
	Control of Cardiac Output by Venous Return—Role of the Frank-Starling Mechanism of the Heart	221
	<i>The Heart Has Limits for the Cardiac Output It Can Achieve—The Plateau Level of the Cardiac Output Curve</i>	223
	<i>What Is the Role of the Nervous System in Controlling Cardiac Output?</i>	224
	Pathologically High and Pathologically Low Cardiac Outputs... ..	224
	A More Quantitative Analysis of Cardiac Output Regulation	225
	<i>Cardiac Output Used in the Quantitative Analysis</i>	226
	<i>Venous Return Curves</i>	226
	<i>Analysis of Cardiac Output and Right Atrial Pressure, Using Cardiac Output and Venous Return Curves</i>	229
	Methods for Measuring Cardiac Output.....	231
	<i>The Indicator Dilution Method</i>	232
CHAPTER 21	<i>Muscle Blood Flow and Cardiac Output During Exercise; the Coronary Circulation; and Ischemic Heart Disease</i>	234
	Blood Flow in Skeletal Muscles and Its Regulation in Exercise	234
	<i>Rate of Blood Flow Through the Muscles</i>	234
	<i>Control of Blood Flow Through the Skeletal Muscles</i>	234
	<i>Circulatory Readjustments During Exercise</i>	235

The Coronary Circulation	237
<i>Physiologic Anatomy of the Coronary Blood Supply</i>	237
<i>Normal Coronary Blood Flow</i>	238
<i>Control of Coronary Blood Flow</i>	239
<i>Special Features of Cardiac Muscle Metabolism</i>	240
<i>Ischemic Heart Disease</i>	240
<i>Causes of Death Following Acute Coronary Occlusion</i>	241
<i>The Stages of Recovery From Acute Myocardial</i>	
<i>Infarction</i>	242
<i>Function of the Heart Following Recovery From Myocardial</i>	
<i>Infarction</i>	243
<i>Pain in Coronary Disease</i>	243
<i>Surgical Treatment of Coronary Disease</i>	244
CHAPTER 22 Cardiac Failure	245
Dynamics of the Circulation in Cardiac Failure	245
<i>Acute Affects of Moderate Cardiac Failure</i>	245
<i>The Chronic Stage of Failure</i>	245
<i>Summary of the Changes That Occur Following Acute Car-</i>	
<i>diac Failure — “Compensated Heart Failure”</i>	246
<i>Dynamics of Severe Cardiac Failure — Decompensated</i>	
<i>Heart Failure</i>	247
Unilateral Left Heart Failure	248
“High Output Cardiac Failure” — A Condition of Overloading	
The Heart	248
Low Output Cardiac Failure — “Cardiogenic Shock”	248
Edema in Patients With Cardiac Failure	249
Heart Failure in Severe Hypertension and in Valvular and Con-	
genital Heart Disease	250
Deterioration of the Heart in Chronic Failure — A Vicious	
Circle	250
Cardiac Reserve	251
Appendix	251
<i>A Quantitative Graphical Method for Analysis of Cardiac</i>	
<i>Failure</i>	251
CHAPTER 23 Heart Sounds; Dynamics of Valvular and Congenital Heart	
Defects	255
The Heart Sounds	255
<i>Normal Heart Sounds</i>	255
<i>Areas for Auscultation of Normal Heart Sounds</i>	256
<i>Valvular Lesions</i>	257
Heart Murmurs Caused by Valvular Lesions	257
Abnormal Circulatory Dynamics in Valvular Heart Disease	258
<i>Dynamics of the Circulation in Aortic Stenosis and Aortic</i>	
<i>Regurgitation</i>	258
<i>Dynamics of Mitral Stenosis and Mitral Regurgitation</i>	258
<i>Circulatory Dynamics During Exercise in Patients With</i>	
<i>Valvular Lesions</i>	259
Abnormal Circulatory Dynamics in Congenital Heart Defects ..	259
Use of Extracorporeal Circulation During Cardiac Surgery	261
Hypertrophy of the Heart in Valvular and Congenital Heart	
Disease	261

CHAPTER 24	Circulatory Shock and Physiology of Its Treatment	263
	The Physiological Causes of Shock	263
	Shock Caused by Hypovolemia—Hemorrhagic Shock	264
	<i>Relationship of Bleeding Volume to Cardiac Output and</i>	
	<i>Arterial Pressure</i>	264
	<i>Nonprogressive and Progressive Hemorrhagic Shock</i>	264
	<i>Irreversible Shock</i>	267
	<i>Hypovolemic Shock Caused by Plasma Loss</i>	268
	<i>Hypovolemic Shock Caused by Trauma</i>	268
	Neurogenic Shock—Increased Vascular Capacity	268
	Anaphylactic Shock	269
	Septic Shock	269
	Effects of Shock on the Body	270
	Physiology of Treatment in Shock	270
	<i>Replacement Therapy</i>	270
	<i>Treatment of Shock With Sympathomimetic Drugs</i>	270
	<i>Other Therapy</i>	271
	Circulatory Arrest	271
<hr/>		
UNIT V	THE KIDNEYS AND BODY FLUIDS	273
CHAPTER 25	The Body Fluid Compartments: Extracellular and Intracellular Fluids; Interstitial Fluid and Edema	274
	<i>Total Body Water</i>	274
	<i>Intake Versus Output of Water</i>	274
	Body Fluid Compartments	275
	<i>The Intracellular Fluid Compartment</i>	275
	<i>The Extracellular Fluid Compartment</i>	275
	<i>Blood Volume</i>	275
	<i>Measurement of Body Fluid Volumes</i>	276
	Constituents of Extracellular and Intracellular Fluids	276
	Osmotic Equilibria and Fluid Shifts Between the Extracellular and Intracellular Fluids	278
	<i>Basic Principles of Osmosis and Osmotic Pressure</i>	278
	<i>Osmolality of the Body Fluids</i>	279
	<i>Maintenance of Osmotic Equilibrium Between Extracellular and Intracellular Fluids</i>	279
	Changes in the Volumes and Osmolalities of the Extracellular and Intracellular Fluid Compartments in Abnormal States ...	280
	<i>Calculation of Fluid Shifts Between the Extracellular and Intracellular Fluid Compartments</i>	280
	<i>Glucose and Other Solutions Administered for Nutritive Purposes</i>	281
	Edema	281
	<i>Extracellular Fluid Edema</i>	281
	Fluids in the Potential Spaces of the Body	284
CHAPTER 26	Formation of Urine by the Kidney: I. Renal Blood Flow, Glomerular Filtration, and Their Control	286
	<i>Physiologic Anatomy of the Kidney</i>	286
	<i>Basic Theory of Nephron Function</i>	287

Renal Blood Flow and Pressures	288
<i>Blood Flow Through the Kidneys</i>	288
<i>Pressures in the Renal Circulation</i>	288
<i>"Intrarenal Pressure" and Renal Interstitial Fluid</i>	
<i>Pressure</i>	289
<i>Function of the Peritubular Capillaries</i>	289
Glomerular Filtration and the Glomerular Filtrate	290
<i>The Glomerular Filtration Rate</i>	291
Control of the Glomerular Filtration Rate and Renal Blood	
Flow	293
<i>Autoregulation of the Glomerular Filtration Rate</i>	293
<i>Autoregulation of Renal Blood Flow</i>	294
<i>Effect of Arterial Pressure on Urinary Output—The</i>	
<i>Phenomenon of "Pressure Diuresis"</i>	295
<i>Effect of Sympathetic Stimulation on Renal Blood Flow and</i>	
<i>the Glomerular Filtration Rate</i>	295
Reabsorption of Fluid by the Peritubular Capillaries	295
CHAPTER 27 <i>Formation of Urine by the Kidney: II. Processing of the</i>	
<i>Filtrate in the Tubules</i>	298
<i>Reabsorption and Secretion in the Tubules</i>	298
<i>Active Transport Through the Tubular Membrane</i>	298
<i>Passive Absorption of Water: Osmosis Through the Tubular</i>	
<i>Epithelium</i>	300
<i>Passive Absorption of Chloride Ions, Urea, and Other</i>	
<i>Solutes by the Process of Diffusion</i>	300
<i>Absorptive Capabilities of Different Tubule Segments</i>	301
<i>Reabsorption of Water in Different Segments of the</i>	
<i>Tubules</i>	302
Effect of "Tubular Load" and "Tubular Transport Maximum" on	
Urine Constituents	305
The Concept of "Plasma Clearance"—Its Use in Assessing	
Renal Function	306
<i>Insulin Clearance as a Measure of Glomerular Filtration</i>	
<i>Rate</i>	306
<i>Para-Aminohippuric Acid Clearance as a Measure of</i>	
<i>Plasma Flow Through the Kidneys</i>	307
<i>Calculating the Filtration Fraction From Plasma</i>	
<i>Clearances</i>	307
CHAPTER 28 <i>Renal and Associated Mechanisms for Controlling</i>	
<i>Extracellular Fluid Osmolality and Sodium Concentration</i> ...	308
The Mechanism for Excreting Excess Water: Excretion of a	
Dilute Urine	308
The Mechanism for Excreting Excess Solutes: The Countercur-	
rent Mechanism for Excreting a Concentrated Urine	309
<i>Osmolar Clearance; Free Water Clearance</i>	312
Control of Extracellular Fluid Osmolality and Sodium	
Concentration	312
<i>The Osmoreceptor-Antidiuretic Hormone Feedback</i>	
<i>Control System</i>	313
<i>Thirst and Its Role in Controlling Extracellular Fluid</i>	
<i>Osmolality and Sodium Concentration</i>	315

	<i>Combined Roles of the Antidiuretic and Thirst Mechanisms for Control of Extracellular Fluid Osmolality and Sodium Concentration</i>	316
	Sodium Excretion and Its Control by Aldosterone	317
	<i>Control of Sodium Intake by the Salt Appetite Mechanism</i>	318
CHAPTER 29	<i>Renal Regulation of Blood Volume and Extracellular Fluid Volume; Excretion and Regulation of Urea, Potassium, and Other Substances</i>	320
	Control of Blood Volume	320
	<i>Effects of Nervous and Hormonal Factors on the Control of Blood Volume</i>	322
	Control of Extracellular Fluid Volume	323
	Urea Excretion	324
	Potassium Excretion	325
	<i>Control of Potassium Excretion and Potassium Concentration in the Extracellular Fluid</i>	326
	Control of the Extracellular Concentrations of Other Ions.....	328
CHAPTER 30	<i>Regulation of Acid-Base Balance</i>	330
	<i>Defense Against Changes in Hydrogen Ion Concentration</i>	331
	Function of Acid-Base Buffers	331
	<i>The Bicarbonate Buffer System</i>	331
	<i>The Buffer Systems of the Body Fluids</i>	333
	<i>The Isohydric Principle</i>	334
	Respiratory Regulation of Acid-Base Balance.....	334
	Renal Control of Hydrogen Ion Concentration	335
	<i>Tubular Secretion of Hydrogen Ions</i>	336
	<i>Renal Correction of Acidosis—Increase of Bicarbonate Ions in the Extracellular Fluid</i>	337
	<i>Renal Correction of Alkalosis—Decrease of Bicarbonate Ions in the Extracellular Fluid</i>	338
	<i>Combination of Excess Hydrogen Ions With Tubular Buffers and Transport Into the Urine</i>	338
	<i>Rapidity of Acid-Base Regulation by the Kidneys</i>	339
	<i>Renal Regulation of Plasma Chloride Concentration—The Chloride-to-Bicarbonate Ratio</i>	340
	Clinical Abnormalities of Acid-Base Balance	340
	<i>Respiratory Acidosis and Alkalosis</i>	340
	<i>Metabolic Acidosis and Alkalosis</i>	340
	<i>Effects of Acidosis and Alkalosis on the Body</i>	341
	<i>Respiratory Compensation of Metabolic Acidosis or Alkalosis</i>	341
	<i>Renal Compensation of Respiratory Acidosis or Alkalosis</i>	342
	<i>Physiology of Treatment in Acidosis or Alkalosis</i>	342
	<i>Clinical Measurements and Analysis of Acid-Base Abnormalities</i>	342

CHAPTER 31	Renal Disease, Diuresis, and Micturition	344
	Renal Disease	344
	<i>Acute Renal Failure</i>	344
	<i>Chronic Renal Failure — Decrease in Number of Functional Nephrons</i>	345
	<i>Hypertensive Kidney Disease</i>	348
	<i>The Nephrotic Syndrome — Increased Glomerular Permeability</i>	349
	<i>Specific Tubular Disorders</i>	349
	Renal Function Tests	350
	Diuretics and Mechanisms of Their Actions	350
	Micturition	351
	<i>Physiologic Anatomy and Nervous Connections of the Bladder</i>	351
	<i>Transport of Urine Through the Ureters</i>	352
	<i>Tone of the Bladder Wall, and the Cystometrogram During Bladder Filling</i>	352
	<i>The Micturition Reflex</i>	353
	<i>Abnormalities of Micturition</i>	353
<hr/>		
UNIT VI	BLOOD CELLS, IMMUNITY, AND BLOOD CLOTTING	355
CHAPTER 32	Red Blood Cells, Anemia, and Polycythemia	356
	The Red Blood Cells (Erythrocytes).....	356
	<i>Production of Red Blood Cells</i>	356
	<i>Formation of Hemoglobin</i>	360
	<i>Iron Metabolism</i>	361
	Destruction of Red Blood Cells	362
	The Anemias	362
	Effects of Anemia on the Circulatory System	363
	Polycythemia	363
	<i>Effect of Polycythemia on the Circulatory System</i>	363
CHAPTER 33	Resistance of the Body to Infection: I. Leukocytes, Granulocytes, the Monocyte-Macrophage System, and Inflammation	365
	The Leukocytes (White Blood Cells)	365
	<i>General Characteristics of Leukocytes</i>	365
	<i>Genesis of the Leukocytes</i>	366
	<i>Life Span of the White Blood Cells</i>	366
	Defensive Properties of Neutrophils and Monocyte-Macrophages	366
	<i>Phagocytosis</i>	367
	The Monocyte-Macrophage System and the Reticuloendothelial System	368
	Inflammation and Function of Neutrophils and Macrophages... ..	369
	<i>The Process of Inflammation</i>	369
	<i>The Macrophage and Neutrophil Response to Inflammation</i>	369
	The Eosinophils	371
	The Basophils	371

	Leukopenia.....	371
	The Leukemias.....	372
	<i>Effects of Leukemia on the Body</i>	372
CHAPTER 34	<i>Resistance of the Body to Infection: II. Immunity and Allergy</i>	374
	Innate Immunity	374
	Acquired Immunity	374
	<i>Two Basic Types of Acquired Immunity</i>	374
	<i>Antigens</i>	374
	<i>Role of Lymphocytes in Acquired Immunity</i>	375
	<i>Preprocessing of the T and B Lymphocytes</i>	376
	<i>Specificity of T Lymphocytes and Antibodies—Role of Lymphocyte Clones</i>	376
	<i>Origin of the Many Clones of Lymphocytes</i>	376
	<i>Specific Attributes of the B Lymphocyte System—Humoral Immunity and the Antibodies</i>	377
	<i>Special Attributes of the T Lymphocyte System—Activated T Cells and “Cell-Mediated Immunity”</i> ...	379
	<i>The Many Types of T Cells and Their Functions</i>	380
	<i>Tolerance of the Acquired Immunity System to One’s Own Tissues—Role of Preprocessing in the Thymus and Bone Marrow</i>	381
	<i>Vaccination</i>	382
	<i>Passive Immunity</i>	382
	Allergy	382
	<i>An Allergy That Occurs in Normal People: Delayed-Reaction Allergy</i>	382
	<i>Allergies in the “Allergic” Person</i>	382
CHAPTER 35	<i>Blood Groups; Transfusion; Tissue and Organ Transplantation</i>	385
	Antigenicity and Immune Reactions of Blood	385
	O-A-B Blood Groups	385
	<i>The A and B Antigens—Agglutinogens</i>	385
	<i>The Agglutinins</i>	386
	<i>The Agglutination Process in Transfusion Reactions</i>	386
	<i>Blood Typing</i>	386
	The Rh Blood Types	387
	<i>The Rh Immune Response</i>	387
	<i>Transfusion Reactions Resulting From Mismatched Blood Types</i>	388
	Transplantation of Tissues and Organs.....	388
	<i>Attempts to Overcome the Immune Reaction in Transplanted Tissue</i>	388
CHAPTER 36	<i>Hemostasis and Blood Coagulation</i>	390
	Events in Hemostasis	390
	<i>Vascular Constriction</i>	390
	<i>Formation of the Platelet Plug</i>	390
	<i>Blood Coagulation in the Ruptured Vessel</i>	391
	<i>Fibrous Organization or Dissolution of the Blood Clot</i>	391

Mechanism of Blood Coagulation	391
<i>Conversion of Prothrombin to Thrombin</i>	392
<i>Conversion of Fibrinogen to Fibrin—Formation of the Clot</i>	392
<i>Initiation of Coagulation: Formation of Prothrombin Activator Complex</i>	393
<i>The Vicious Circle of Clot Formation</i>	392
<i>Activator Complex</i>	393
<i>Prevention of Blood Clotting in the Normal Vascular System—The Intravascular Anticoagulants</i>	395
<i>Lysis of Blood Clots—Plasmin</i>	396
Conditions That Cause Excessive Bleeding in Human Beings .	396
<i>Decreased Prothrombin, Factor VII, Factor IX, and Factor X Caused by Vitamin K Deficiency</i>	396
<i>Hemophilia</i>	397
<i>Thrombocytopenia</i>	397
Thromboembolic Conditions in the Human Being	397
<i>Femoral Thrombosis and Massive Pulmonary Embolism</i> ..	397
<i>Disseminated Intravascular Coagulation</i>	398
Anticoagulants for Clinical Use	398
<i>Heparin as an Intravenous Anticoagulant</i>	398
<i>Coumarins as Anticoagulants</i>	398
<i>Prevention of Blood Coagulation Outside the Body</i>	398
Blood Coagulation Tests	399
<i>Bleeding Time</i>	399
<i>Clotting Time</i>	399
<i>Prothrombin Time</i>	399

UNIT VII	RESPIRATION	401
CHAPTER 37	Pulmonary Ventilation	402
	Mechanics of Pulmonary Ventilation	402
	<i>The Muscles That Cause Lung Expansion and Contraction</i>	402
	<i>Movement of Air In and Out of the Lungs—And the Pressures That Cause It</i>	402
	<i>Effect of the Thoracic Cage on Lung Expansibility</i>	405
	<i>The “Work” of Breathing</i>	406
	The Pulmonary Volumes and Capacities	407
	<i>Recording Changes in Pulmonary Volume— Spirometry</i>	407
	<i>The Pulmonary “Volumes”</i>	407
	<i>The Pulmonary “Capacities”</i>	407
	<i>Abbreviations and Symbols Used in Pulmonary Function Studies</i>	408
	<i>Determination of Functional Residual Capacity—The Helium Dilution Method</i>	408
	The Minute Respiratory Volume—Respiratory Rate Times	
	Tidal Volume	409
	Alveolar Ventilation	409
	<i>Rate of Alveolar Ventilation</i>	410

Functions of the Respiratory Passageways	410
<i>The Trachea, Bronchi, and Bronchioles</i>	410
<i>Respiratory Functions of the Nose</i>	412
<i>Vocalization</i>	412
CHAPTER 38 Pulmonary Circulation; Pulmonary Edema; Pleural Fluid	414
<i>Physiologic Anatomy of the Pulmonary Circulatory System</i>	414
Pressures in the Pulmonary System.....	414
The Blood Volume of the Lungs.....	415
Blood Flow Through the Lungs and Its Distribution.....	415
<i>Effect of Hydrostatic Pressure Gradients in the Lungs on Regional Pulmonary Blood Flow</i>	416
<i>Effect of Increased Cardiac Output on the Pulmonary Circulation During Heavy Exercise</i>	417
<i>Function of the Pulmonary Circulation When the Left Atrial Pressure Rises as a Result of Left Heart Failure</i>	418
Pulmonary Capillary Dynamics	418
<i>Capillary Exchange of Fluid in the Lungs, and Pulmonary Interstitial Fluid Dynamics</i>	418
<i>Pulmonary Edema</i>	419
<i>The Fluids in the Pleural Cavity</i>	420
CHAPTER 39 Physical Principles of Gaseous Exchange; Diffusion of Oxygen and Carbon Dioxide Through the Respiratory Membrane	422
<i>Physics of Diffusion and Gas Pressures</i>	422
<i>The Molecular Basis of Gaseous Diffusion</i>	422
<i>Gas Pressures in a Mixture of Gases—Partial Pressures of Individual Gases</i>	422
<i>Pressures of Gases in Water and Tissues</i>	423
<i>The Vapor Pressure of Water</i>	423
<i>Diffusion of Gases Through Fluids—The Pressure Difference for Diffusion</i>	423
<i>Diffusion of Gases Through Tissues</i>	424
Composition of Alveolar Air—Its Relation to Atmospheric Air.....	424
<i>Rate at Which Alveolar Air Is Renewed by Atmospheric Air</i>	425
<i>Oxygen Concentration and Partial Pressure in the Alveoli</i>	425
<i>CO₂ Concentration and Partial Pressure in the Alveoli</i>	426
<i>Expired Air</i>	426
Diffusion of Gases Through the Respiratory Membrane	426
<i>Factors That Affect the Rate of Gas Diffusion Through the Respiratory Membrane</i>	427
<i>Diffusing Capacity of the Respiratory Membrane</i>	429
Effect of the Ventilation-Perfusion Ratio on Alveolar Gas Concentration	430

CHAPTER 40	<i>Transport of Oxygen and Carbon Dioxide in the Blood and Body Fluids</i>	433
	Pressures of Oxygen and Carbon Dioxide in the Lungs, Blood, and Tissues	433
	<i>Uptake of Oxygen by the Pulmonary Blood</i>	433
	<i>Transport of Oxygen in the Arterial Blood</i>	434
	<i>Diffusion of Oxygen From the Capillaries to the Interstitial Fluid</i>	434
	<i>Diffusion of Oxygen From the Capillaries to the Cells</i>	435
	<i>Diffusion of Carbon Dioxide From the Cells to the Tissue Capillaries, and From the Pulmonary Capillaries to the Alveoli</i>	435
	Transport of Oxygen in the Blood	436
	<i>The Reversible Combination of Oxygen With Hemoglobin</i>	436
	<i>The Effect of Hemoglobin to "Buffer" the Tissue Oxygen PO_2</i>	437
	Shift of the Oxygen-Hemoglobin Dissociation Curve and Its Significance.....	438
	Metabolic Use of Oxygen by The Cells	438
	Transport of Oxygen in the Dissolved State	439
	Combination of Hemoglobin With Carbon Monoxide — Displacement of Oxygen.....	439
	Transport of Carbon Dioxide in the Blood	440
	<i>Chemical Forms in Which Carbon Dioxide Is Transported</i>	440
	<i>The Carbon Dioxide Dissociation Curve</i>	441
	<i>Effect of the Oxygen-Hemoglobin Reaction on Carbon Dioxide Transport — The Haldane Effect</i>	441
	<i>Change in Blood Acidity During Carbon Dioxide Transport</i>	442
	The Respiratory Exchange Ratio	442
CHAPTER 41	<i>Regulation of Respiration</i>	444
	The Respiratory Center.....	444
	<i>Control of Overall Respiratory Center Activity</i>	446
	Chemical Control of Respiration	446
	<i>Direct Chemical Control of Respiratory Center Activity by Carbon Dioxide and Hydrogen Ions</i>	446
	The Peripheral Chemoreceptor System for Control of Respiratory Activity — Role of Oxygen in Respiratory Control.....	448
	<i>Quantitative Effect of Low Arterial PO_2 on Alveolar Ventilation</i>	449
	<i>Composite Effects on PCO_2, pH, and PO_2 on Alveolar Ventilation</i>	450
	Regulation of Respiration During Exercise	450
	Other Factors That Affect Respiration	452
	<i>Periodic Breathing</i>	452

CHAPTER 42	Respiratory Insufficiency—Pathophysiology, Diagnosis, Oxygen Therapy	454
	<i>Some Useful Methods for Studying Respiratory</i>	
	Abnormalities	454
	Study of Blood Gases and pH	454
	Measurement of Maximum Expiratory Flow	455
	Forced Expiratory Vital Capacity and Forced Expiratory	
	Volume	455
	Physiologic Peculiarities of Specific Pulmonary Abnormalities ..	456
	Chronic Pulmonary Emphysema	456
	Pneumonia	456
	Atelectasis	458
	Asthma	458
	Tuberculosis	459
	Hypoxia	459
	Oxygen Therapy in the Different Types of Hypoxia	459
	Hypercapnia	460
	Cyanosis	460
	Dyspnea	460
	Artificial Respiration	461
<hr/>		
UNIT VIII	AVIATION, SPACE, AND DEEP SEA DIVING	
	PHYSIOLOGY	463
CHAPTER 43	Aviation, High Altitude, and Space Physiology	464
	Effects of Low Oxygen Pressure on the Body	464
	Alveolar PO_2 at Different Elevations	464
	Effect of Breathing Pure Oxygen on the Alveolar PO_2 at	
	Different Altitudes	464
	Acute Effects of Hypoxia	465
	Acclimatization to Low PO_2	465
	Natural Acclimatization of Natives Living at High	
	Altitudes	466
	Work Capacity at High Altitudes: The Effect of	
	Acclimatization	466
	Chronic Mountain Sickness	467
	Acute Mountain Sickness and High-Altitude Pulmonary	
	Edema	467
	Effects of Acceleratory Forces on the Body in Aviation and	
	Space Physiology	467
	Centrifugal Acceleratory Forces	467
	Effects of Linear Acceleratory Forces on the Body	468
	“Artificial Climate” in the Sealed Spacecraft	469
	Weightlessness in Space	469
CHAPTER 44	Physiology of Deep Sea Diving and Other Hyperbaric	
	Conditions	471
	Effect of High Partial Pressures of Gases on the Body	471
	Decompression of the Diver After Exposure to High	
	Pressures	473

Scuba Diving (Self-Contained Underwater Breathing Apparatus)	474
Special Physiological Problems in Submarines.....	475
Hyperbaric Oxygen Therapy.....	475

UNIT IX THE NERVOUS SYSTEM: A. GENERAL PRINCIPLES AND SENSORY PHYSIOLOGY 477

CHAPTER 45 Organization of the Nervous System; Basic Functions of Synapses and Transmitter Substances 478

General Design of the Nervous System	478
<i>The Central Nervous System Neuron—The Basic Functional Unit</i>	478
<i>The Sensory Division of the Nervous System—Sensory Receptors</i>	478
<i>The Motor Division—The Effectors</i>	479
<i>Processing of Information—“Integrative” Function of the Nervous System</i>	479
<i>Storage of Information—Memory</i>	480
The Three Major Levels of Central Nervous System Function.....	480
Comparison of the Nervous System With an Electronic Computer	481
The Central Nervous System Synapses	481
<i>Physiologic Anatomy of the Synapse</i>	482
<i>Chemical Substances That Function as Synaptic Transmitters</i>	484
<i>Electrical Events During Neuronal Excitation</i>	486
<i>Electrical Events in Neuronal Inhibition</i>	488
<i>Special Functions of Dendrites in Exciting Neurons</i>	491
<i>Relation of the State of Excitation of the Neuron to the Rate of Firing</i>	491
Some Special Characteristics of Synaptic Transmission.....	493

CHAPTER 46 Sensory Receptors; Neuronal Circuits for Processing Information 495

Types of Sensory Receptors and the Sensory Stimuli They Detect.....	495
<i>Differential Sensitivity of Receptors</i>	495
Transduction of Sensory Stimuli Into Nerve Impulses.....	496
<i>Local Currents at Nerve Endings—Receptor Potentials</i> ..	496
<i>Adaptation of Receptors</i>	498
The Nerve Fibers That Transmit Signals and Their Physiological Classification	499
Transmission of Signals of Different Intensity in Nerve Tracts—Spatial and Temporal Summation.....	500
Transmission and Processing of Signals in Neuronal Pools....	501
<i>Relaying of Signals Through Neuronal Pools</i>	501
<i>Prolongation of a Signal by a Neuronal Pool—“Afterdischarge”</i>	503
<i>Rhythmic Signal Output</i>	504
Instability and Stability of Neuronal Circuits.....	505

CHAPTER 47	Somatic Sensations: I. General Organization; the Tactile and Position Senses	507
	<i>Classification of Somatic Senses</i>	507
	Detection and Transmission of Tactile Sensations	507
	<i>Detection of Vibration</i>	509
	<i>Ticking and Itch</i>	509
	The Two Sensory Pathways for Transmission of Somatic Signals Into the Central Nervous System	509
	Transmission in the Dorsal Column–Lemniscal System	510
	<i>Anatomy of the Dorsal Column–Lemniscal System</i>	510
	<i>The Somatic Sensory Cortex</i>	511
	<i>Somatic Association Areas</i>	513
	<i>Overall Characteristics of Signal Transmission and Analysis in the Dorsal Column–Lemniscal System</i>	513
	<i>Psychic Interpretation of Sensory Stimulus Intensity</i>	515
	<i>Judgment of Stimulus Intensity</i>	515
	<i>The Position Senses</i>	516
	Transmission in the Anterolateral System	517
	<i>Anatomy of the Anterolateral Pathway</i>	517
	Some Special Aspects of Somatic Sensory Function	517
CHAPTER 48	Somatic Sensations: II. Pain, Headache, and Thermal Sensations	520
	The Two Types of Pain and Their Qualities—Fast Pain and Slow Pain	520
	The Pain Receptors and Their Stimulation	520
	<i>Rate of Tissue Damage as a Cause of Pain</i>	521
	The Dual Transmission of Pain Signals Into the Central Nervous System	521
	A Pain Control (“Analgesia”) System in the Brain and Spinal Cord	524
	Referred Pain	525
	Visceral Pain	525
	<i>Causes of True Visceral Pain</i>	526
	<i>Parietal Pain Caused by Visceral Damage</i>	526
	<i>Localization of Visceral Pain—The “Visceral” And the “Parietal” Transmission Pathways</i>	526
	Some Clinical Abnormalities of Pain and Other Somatic Sensations	527
	<i>Hyperalgesia</i>	527
	<i>The Thalamic Syndrome</i>	527
	<i>Herpes Zoster (Shingles)</i>	527
	<i>Tic Douloureux</i>	528
	<i>The Brown-Séguard Syndrome</i>	528
	Headache	528
	<i>Headache of Intracranial Origin</i>	528
	<i>Extracranial Types of Headache</i>	529
	Thermal Sensations	529
	<i>Thermal Receptors and Their Excitation</i>	529
	<i>Transmission of Thermal Signals in the Nervous System</i>	530

UNIT X	THE NERVOUS SYSTEM: B. THE SPECIAL SENSES.....	533
CHAPTER 49	The Eye: I. Optics of Vision	534
	Physical Principles of Optics.....	534
	<i>Refraction of Light</i>	534
	<i>Application of Refractive Principles to Lenses</i>	534
	<i>Focal Length of a Lens</i>	535
	<i>Formation of an Image by a Convex Lens</i>	536
	<i>Measurement of the Refractive Power of a Lens—The</i> <i>Diopter</i>	536
	The Optics of the Eye	536
	<i>The Eye as a Camera</i>	536
	<i>The Mechanism of Accommodation</i>	538
	<i>The Pupillary Aperture</i>	538
	<i>Errors of Refraction</i>	539
	<i>Visual Acuity</i>	541
	<i>Determination of Distance of an Object From the Eye</i> — <i>Depth Perception</i>	542
	Optical Instruments.....	542
	<i>The Ophthalmoscope</i>	542
	The Fluid System of the Eye—The Intraocular Fluid.....	543
	<i>Formation of Aqueous Humor by the Ciliary Body</i>	543
	<i>Outflow of Aqueous Humor From the Eye</i>	543
	<i>Intraocular Pressure</i>	544
CHAPTER 50	The Eye: II. Receptor and Neural Function of the Retina	546
	Anatomy and Function of the Structural Elements of the Retina	546
	Photochemistry of Vision	548
	<i>The Rhodopsin-Retinal Visual Cycle, and Excitation of</i> <i>the Rods</i>	548
	<i>Photochemistry of Color Vision by the Cones</i>	550
	<i>Automatic Regulation of Retinal Sensitivity—Dark and</i> <i>Light Adaptation</i>	551
	Color Vision	552
	<i>The Tricolor Mechanism of Color Detection</i>	552
	<i>Color Blindness</i>	554
	Neural Function of the Retina.....	554
	<i>The Neural Circuitry of the Retina</i>	554
	<i>The Ganglion Cells</i>	556
	<i>Excitation of the Ganglion Cells</i>	557
CHAPTER 51	The Eye: III. Central Neurophysiology of Vision	560
	<i>The Visual Pathways</i>	560
	Organization and Function of the Visual Cortex	561
	Neuronal Patterns of Stimulation During Analysis of the Visual Image	563
	The Fields of Vision; Perimetry	564
	Eye Movements and Their Control	565
	<i>Fixation Movements of the Eyes</i>	566
	<i>Fusion of the Visual Images From the Two Eyes</i>	567

	Autonomic Control of Accommodation and Pupillary Aperture.....	568
	<i>Control of Accommodation (Focusing the Eyes)</i>	568
	<i>Control of the Pupillary Diameter</i>	568
CHAPTER 52	<i>The Sense of Hearing</i>	570
	The Tympanic Membrane and the Ossicular System.....	570
	<i>Conduction of Sound From the Tympanic Membrane to the Cochlea</i>	570
	<i>Transmission of Sound Through Bone</i>	571
	The Cochlea.....	571
	<i>Functional Anatomy of the Cochlea</i>	571
	<i>Transmission of Sound Waves in the Cochlea — The “Traveling Wave”</i>	572
	<i>Function of the Organ of Corti</i>	573
	<i>Determination of Sound Frequency — The “Place” Principle</i>	575
	<i>Determination of Loudness</i>	575
	Central Auditory Mechanisms.....	576
	<i>The Auditory Pathway</i>	576
	<i>Function of the Cerebral Cortex in Hearing</i>	577
	<i>Discrimination of the Direction From Which Sound Emanates</i>	578
	<i>Centrifugal Signals From the Central Nervous System to Lower Auditory Centers</i>	578
	Hearing Abnormalities.....	579
	<i>Types of Deafness</i>	579
CHAPTER 53	<i>The Chemical Senses — Taste and Smell</i>	581
	The Sense of Taste.....	581
	<i>The Primary Sensations of Taste</i>	581
	<i>The Taste Bud and Its Function</i>	582
	<i>Transmission of Taste Signals Into the Central Nervous System</i>	583
	<i>Taste Preference and Control of the Diet</i>	583
	The Sense of Smell.....	584
	<i>The Olfactory Membrane</i>	584
	<i>Stimulation of the Olfactory Cells</i>	584
	<i>Transmission of Smell Signals Into the Central Nervous System</i>	586
UNIT XI	<i>THE NERVOUS SYSTEM: C. MOTOR AND INTEGRATIVE NEUROPHYSIOLOGY</i>	589
CHAPTER 54	<i>Motor Functions of the Spinal Cord; the Cord Reflexes</i>	590
	<i>Organization of the Spinal Cord for Motor Functions</i>	590
	The Muscle Receptors — Muscle Spindles and Golgi Tendon Organs — and Their Roles in Muscle Control.....	591
	<i>Receptor Function of the Muscle Spindle</i>	592
	<i>The Muscle Stretch Reflex (Also Called Myotatic Reflex)</i>	593

	<i>Role of the Muscle Spindle in Voluntary Motor Activity ...</i>	594
	<i>Clinical Applications of the Stretch Reflex</i>	595
	<i>The Golgi Tendon Reflex</i>	596
	<i>Function of the Muscle Spindles and Golgi Tendon Organs in Conjunction With Motor Control From Higher Levels of the Brain</i>	597
	The Flexor Reflex (The Withdrawal Reflexes).....	597
	The Crossed Extensor Reflex	598
	Reciprocal Inhibition and Reciprocal Innervation	598
	The Reflexes of Posture and Locomotion	599
	<i>The Postural and Locomotive Reflexes of the Cord</i>	599
	The Scratch Reflex.....	600
	The Spinal Cord Reflexes That Cause Muscle Spasm	600
	The Autonomic Reflexes in the Spinal Cord	600
	Spinal Cord Transection and Spinal Shock	601
CHAPTER 55	<i>Cortical and Brain Stem Control of Motor Function</i>	602
	The Motor Cortex and the Corticospinal Tract.....	602
	<i>Some Specialized Areas of Motor Control Found in the Human Motor Cortex</i>	604
	<i>Transmission of Signals From the Motor Cortex to the Muscles.....</i>	604
	<i>Incoming Fiber Pathways to the Motor Cortex.....</i>	605
	<i>The Red Nucleus Serves as an Alternate Pathway for Transmitting Cortical Signals to the Spinal Cord</i>	606
	<i>The Extrapyramidal System</i>	606
	<i>Excitation of the Spinal Cord by the Primary Motor Cortex and the Red Nucleus</i>	607
	Role of the Brain Stem in Controlling Motor Function.....	608
	<i>Support of the Body Against Gravity—Roles of the Reticular and Vestibular Nuclei.....</i>	609
	Vestibular Sensations and the Maintenance of Equilibrium.	610
	<i>The Vestibular Apparatus</i>	610
	<i>Function of the Utricle and Sacculle in the Maintenance of Static Equilibrium</i>	612
	<i>Detection of Head Rotation by the Semicircular Ducts....</i>	612
	<i>Vestibular Postural Reflexes.....</i>	613
	<i>Vestibular Mechanism for Stabilizing the Eyes</i>	614
	<i>Other Factors Concerned With Equilibrium</i>	614
	Functions of Specific Brain Stem Nuclei in Controlling Subconscious, Stereotyped Movements	615
CHAPTER 56	<i>The Cerebellum, The Basal Ganglia, and Overall Motor Control</i>	617
	The Cerebellum and Its Motor Functions	617
	<i>The Anatomical Functional Areas of the Cerebellum</i>	617
	<i>The Neuronal Circuit of the Cerebellum</i>	620
	<i>Overall Function of the Cerebellum in Controlling Movements</i>	623
	<i>Function of the Cerebellum With the Spinal Cord and Brain Stem to Control Postural and Equilibrium Movements</i>	623

<i>Function of the Cerebellum in Voluntary Muscle Control</i> . . .	623
<i>Clinical Abnormalities of the Cerebellum</i>	625
The Basal Ganglia—Their Motor Functions	626
<i>Functions of Specific Neurotransmitters in the Basal Ganglial System</i>	629
<i>Clinical Syndromes Resulting From Damage to the Basal Ganglia</i>	630
Integration of All Parts of the Total Motor Control System	631
<i>What Drives Us to Action?</i>	

CHAPTER 57	<i>The Cerebral Cortex; Intellectual Functions of the Brain and Learning and Memory</i>	634
	<i>Physiologic Anatomy of the Cerebral Cortex</i>	634
	Functions of Specific Cortical Areas	635
	<i>The Association Areas</i>	636
	<i>Interpretative Function of the Posterior Superior Temporal Lobe—Wernicke's Area (a General Interpretative Area)</i>	638
	<i>Functions of the Parieto-Occipitotemporal Cortex in the Nondominant Hemisphere</i>	639
	<i>The Higher Intellectual Functions of the Prefrontal Association Area</i>	639
	Function of the Brain in Communication	640
	Function of the Corpus Callosum and Anterior Commissure to Transfer Thoughts, Memories, Training, and Other Information to the Opposite Hemisphere	642
	Thoughts, Consciousness, and Memory	643
	<i>Memory—Roles of Synaptic Facilitation and Synaptic Inhibition</i>	643
	<i>Immediate Memory</i>	643
	<i>Short-Term Memory</i>	644
	<i>Long-Term Memory</i>	645
	<i>Consolidation of Memory</i>	645

CHAPTER 58	<i>Behavioral and Motivational Mechanisms of the Brain— The Limbic System and the Hypothalamus</i>	648
	Activating-Driving Systems of the Brain	648
	<i>Control of Cerebral Activity by Continuous Excitatory Signals From the Brain Stem</i>	648
	<i>Neurohormonal Control of Brain Activity</i>	649
	The Limbic System	651
	Functional Anatomy of the Limbic System: Its Relation Also to the Hypothalamus	651
	The Hypothalamus, A Major Output Pathway of the Limbic System	651
	<i>Vegetative and Endocrine Control Functions of the Hypothalamus</i>	652
	<i>Behavioral Functions of the Hypothalamus and Associated Limbic Structures</i>	654
	<i>The Reward and Punishment Function of the Limbic System</i>	654
	<i>Rage</i>	656

Specific Functions of Other Parts of the Limbic System	656
<i>Functions of the Amygdala</i>	656
<i>Functions of the Hippocampus</i>	657
<i>Function of the Limbic Cortex</i>	657
CHAPTER 59 States of Brain Activity—Sleep; Brain Waves; Epilepsy; Psychoses	659
Sleep.....	659
<i>Slow Wave Sleep</i>	659
<i>REM Sleep (Paradoxical Sleep, Desynchronized Sleep)</i> ..	659
<i>Basic Theories of Sleep</i>	660
<i>Physiological Effects of Sleep</i>	661
Brain Waves.....	661
<i>Origin in the Brain of the Brain Waves</i>	662
<i>Effect of Varying Degrees of Cerebral Activity on the Basic Frequency of the Electroencephalogram</i>	663
<i>Electroencephalographic Changes in the Different Stages of Wakefulness and Sleep</i>	663
Epilepsy	663
<i>Grand Mal Epilepsy</i>	663
<i>Petit Mal Epilepsy</i>	664
<i>Focal Epilepsy</i>	664
Psychotic Behavior and Dementia—Roles of Specific Neurotransmitter Systems	665
CHAPTER 60 The Autonomic Nervous System; The Adrenal Medulla	667
General Organization of the Autonomic Nervous System	667
<i>Physiologic Anatomy of the Sympathetic Nervous System</i>	667
<i>Physiologic Anatomy of the Parasympathetic Nervous System</i>	668
Basic Characteristics of Sympathetic and Parasympathetic Function	669
<i>Cholinergic and Adrenergic Fibers—Secretion of Acetylcholine or Norepinephrine</i>	669
<i>Receptors of the Effector Organs</i>	670
<i>Excitatory and Inhibitory Actions of Sympathetic and Parasympathetic Stimulation</i>	671
<i>Effects of Sympathetic and Parasympathetic Stimulation on Specific Organs</i>	672
<i>Function of the Adrenal Medullae</i>	673
<i>Relationship of Stimulus Rate to Degree of Sympathetic and Parasympathetic Effect</i>	674
<i>Sympathetic and Parasympathetic “Tone”</i>	674
<i>Denervation Supersensitivity of Sympathetic and Parasympathetic Organs Following Denervation</i>	675
The Autonomic Reflexes	675
Stimulation of Discrete Organs in Some Instances and Mass Stimulation in Other Instances by the Sympathetic and Parasympathetic Systems	676
<i>“Alarm” or “Stress” Response of the Sympathetic Nervous System</i>	676

	<i>Medullary, Pontine, and Mesencephalic Control of the Autonomic Nervous System</i>	676
	Pharmacology of the Autonomic Nervous System	677
	<i>Drugs That Act on Adrenergic Effector Organs — The Sympathomimetic Drugs</i>	677
	<i>Drugs That Act on Cholinergic Effector Organs</i>	677
	<i>Drugs That Stimulate or Block Sympathetic and Parasympathetic Postganglionic Neurons</i>	678
CHAPTER 61	<i>Cerebral Blood Flow, the Cerebrospinal Fluid, and Brain Metabolism</i>	679
	Cerebral Blood Flow	679
	<i>Normal Rate of Cerebral Blood Flow</i>	679
	<i>Regulation of Cerebral Blood Flow</i>	679
	<i>The Cerebral Microcirculation</i>	681
	The Cerebrospinal Fluid System	681
	<i>Cushioning Function of the Cerebrospinal Fluid</i>	681
	<i>Formation, Flow, and Absorption of Cerebrospinal Fluid</i> ..	681
	<i>Cerebrospinal Fluid Pressure</i>	682
	<i>Obstruction to the Flow of Cerebrospinal Fluid</i>	684
	<i>The Blood–Cerebrospinal Fluid and Blood-Brain Barriers</i>	683
	<i>Brain Edema</i>	684
	Brain Metabolism	684
UNIT XII	<i>GASTROINTESTINAL PHYSIOLOGY</i>	687
CHAPTER 62	<i>General Principles of Gastrointestinal Function — Motility, Nervous Control, and Blood Circulation</i>	688
	General Principles of Gastrointestinal Motility.....	688
	<i>Characteristics of the Gastrointestinal Wall</i>	688
	Neural Control of Gastrointestinal Function.....	690
	<i>Hormonal Control of Gastrointestinal Motility</i>	693
	Functional Types of Movements in the Gastrointestinal Tract..	693
	Gastrointestinal Blood Flow	695
CHAPTER 63	<i>Transport and Mixing of Food in the Alimentary Tract</i>	698
	Ingestion of Food	698
	<i>Mastication (Chewing)</i>	698
	<i>Swallowing (Deglutition)</i>	698
	Motor Functions of the Stomach	700
	<i>Storage Function of the Stomach</i>	701
	<i>Mixing and Propulsion of Food in the Stomach — The Basic Electrical Rhythm of the Stomach</i>	701
	<i>Emptying of the Stomach</i>	702
	<i>Regulation of Stomach Emptying</i>	702
	Movements of the Small Intestine	703
	<i>Mixing Contractions (Segmentation Contractions)</i>	704
	<i>Propulsive Movements</i>	704
	<i>Function of the Ileocecal Valve</i>	705

	Movements of the Colon	705
	<i>Defecation</i>	706
	Other Autonomic Reflexes Affecting Bowel Activity	707
CHAPTER 64	Secretory Functions of the Alimentary Tract	709
	General Principles of Alimentary Tract Secretion	709
	<i>Anatomical Types of Glands</i>	709
	<i>Basic Mechanisms of Stimulation of the Alimentary Tract</i>	
	<i>Glands</i>	709
	<i>Basic Mechanism of Secretion by Glandular Cells</i>	710
	<i>Lubricating and Protective Properties of Mucus and Its</i>	
	<i>Importance in the Gastrointestinal Tract</i>	711
	Secretion of Saliva	711
	Esophageal Secretion	713
	Gastric Secretion	713
	<i>Characteristics of the Gastric Secretions</i>	713
	<i>Regulation of Gastric Secretion by Nervous and</i>	
	<i>Hormonal Mechanisms</i>	715
	<i>Chemical Composition of Gastrin and Other</i>	
	<i>Gastrointestinal Hormones</i>	717
	Pancreatic Secretion	718
	<i>Regulation of Pancreatic Secretion</i>	719
	Secretion of Bile and Functions of the Biliary Tree	720
	<i>The Bile Salts and Their Function</i>	722
	<i>Secretion of Cholesterol; Gallstone Formation</i>	723
	Secretions of the Small Intestine	723
	<i>Secretion of the Intestinal Digestive Juices — The Crypts</i>	
	<i>of Lieberkühn</i>	723
	<i>Regulation of Small Intestinal Secretion</i>	724
	Secretions of the Large Intestine	724
CHAPTER 65	Digestion and Absorption in the Gastrointestinal Tract	726
	Digestion of the Various Foods	726
	<i>Digestion of Carbohydrates</i>	726
	<i>Digestion of Proteins</i>	727
	<i>Digestion of Fats</i>	728
	Basic Principles of Gastrointestinal Absorption	729
	<i>Anatomical Basis of Absorption</i>	729
	<i>Basic Mechanisms of Absorption</i>	731
	Absorption in the Small Intestine	731
	<i>Absorption of Water</i>	731
	<i>Absorption of Ions</i>	731
	<i>Absorption of Nutrients</i>	733
	Absorption in the Large Intestine; Formation of the Feces	734
CHAPTER 66	Physiology of Gastrointestinal Disorders	736
	Disorders of Swallowing and of the Esophagus	736
	Disorders of the Stomach	736
	<i>Peptic Ulcer</i>	737
	Disorders of the Small Intestine	738

	Disorders of the Large Intestine	739
	<i>Constipation</i>	739
	<i>Diarrhea</i>	739
	<i>Paralysis of Defecation in Spinal Cord Injuries</i>	740
	General Disorders of the Gastrointestinal Tract.....	740
	<i>Vomiting</i>	740
	<i>Nausea</i>	741
	<i>Gastrointestinal Obstruction</i>	741
	<i>Gases in the Gastrointestinal Tract and Flatus</i>	742
<hr/>		
UNIT XIII	METABOLISM AND TEMPERATURE REGULATION.....	743
CHAPTER 67	<i>Metabolism of Carbohydrates and Formation of Adenosine Triphosphate</i>.....	744
	<i>Release of Energy From Foods and the Concept of "Free Energy"</i>	744
	<i>Role of Adenosine Triphosphate in Metabolism</i>	744
	Central Role of Glucose in Carbohydrate Metabolism	745
	Transport of Glucose Through the Cell Membrane	745
	<i>Phosphorylation of Glucose</i>	746
	Storage of Glycogen in Liver and Muscle	746
	<i>Glycogenesis</i>	746
	<i>Removal of Stored Glycogen — Glycogenolysis</i>	746
	Release of Energy From the Glucose Molecule by the	
	Glycolytic Pathway	747
	<i>Glycolysis and the Formation of Pyruvic Acid</i>	747
	<i>Conversion of Pyruvic Acid to Acetylcoenzyme A</i>	748
	<i>The Citric Acid Cycle</i>	748
	<i>Formation of ATP by Oxidative Phosphorylation</i>	749
	<i>Summary of ATP Formation During the Breakdown of Glucose</i>	750
	<i>Effect of ATP and ADP Concentrations in the Cell to Control the Rate of Glycolysis</i>	750
	<i>Anaerobic Release of Energy — "Anaerobic Glycolysis"</i>	751
	Release of Energy From Glucose by the Pentose Phosphate Pathway.....	751
	<i>Glucose Conversion to Glycogen or Fat</i>	752
	Formation of Carbohydrates From Proteins and Fats — "Gluconeogenesis"	752
	Blood Glucose	752
CHAPTER 68	<i>Lipid Metabolism</i>	754
	Transport of Lipids in the Body Fluids	754
	<i>Transport of Fatty Acids in the Blood in Combination With Albumin — "Free Fatty Acid"</i>	755
	<i>The Lipoproteins — Their Special Function in Transporting Cholesterol and Phospholipids</i>	755
	The Fat Deposits.....	755
	<i>Adipose Tissue</i>	755
	<i>The Liver Lipids</i>	756

Use of Triglycerides for Energy, and Formation of Adenosine Triphosphate (ATP).....	756
<i>Formation of Acetoacetic Acid in the Liver and Its Transport in the Blood</i>	757
<i>Synthesis of Triglycerides From Carbohydrates</i>	758
<i>Synthesis of Triglycerides From Proteins</i>	759
Regulation of Energy Release From Triglycerides	759
<i>Obesity</i>	760
Phospholipids and Cholesterol	760
<i>Phospholipids</i>	760
<i>Cholesterol</i>	760
<i>Cellular Structural Functions of Phospholipids and Cholesterol—Especially for Membranes</i>	761
Atherosclerosis.....	761
CHAPTER 69 Protein Metabolism	765
Basic Properties	765
<i>The Amino Acids</i>	765
Transport and Storage of Amino Acids	765
<i>The Blood Amino Acids</i>	765
<i>Storage of Amino Acids as Proteins in the Cells</i>	767
Metabolic Roles of the Plasma Proteins	767
<i>Essential and Nonessential Amino Acids</i>	768
<i>Use of Proteins for Energy</i>	768
<i>Obligatory Degradation of Proteins</i>	769
Hormonal Regulation of Protein Metabolism	769
CHAPTER 70 The Liver as an Organ	771
<i>Physiologic Anatomy of the Liver</i>	771
Function of the Hepatic Vascular System.....	771
Metabolic Functions of the Liver.....	772
<i>Carbohydrate Metabolism</i>	773
<i>Fat Metabolism</i>	773
<i>Protein Metabolism</i>	773
<i>Miscellaneous Metabolic Functions of the Liver</i>	773
Excretion of Bilirubin in the Bile—Use of This as a Clinical Diagnostic Tool	774
CHAPTER 71 Dietary Balances; Regulation of Feeding; Obesity and Starvation; Vitamins and Minerals	777
Dietary Balances	777
<i>Energy Available in Foods</i>	777
Regulation of Food Intake	779
<i>Neural Centers for Regulation of Food Intake</i>	779
<i>Factors That Regulate Food Intake</i>	779
Obesity.....	780
<i>Treatment of Obesity</i>	781
Inanition	782
Starvation	782

Vitamins	782
<i>Vitamin A</i>	782
<i>Thiamine (Vitamin B₁)</i>	783
<i>Niacin</i>	783
<i>Riboflavin (Vitamin B₂)</i>	784
<i>Vitamin B₁₂</i>	784
<i>Folic Acid (Pteroylglutamic Acid)</i>	784
<i>Pyridoxine (Vitamin B₆)</i>	785
<i>Pantothenic Acid</i>	785
<i>Ascorbic Acid (Vitamin C)</i>	785
<i>Vitamin D</i>	786
<i>Vitamin E</i>	786
<i>Vitamin K</i>	786
Mineral Metabolism	786
CHAPTER 72 Energetics and Metabolic Rate	789
Importance of Adenosine Triphosphate in Metabolism	789
<i>Phosphocreatine as a Storage Depot for Energy and for</i> <i>Buffering the Concentration of ATP</i>	790
<i>Anaerobic Versus Aerobic Energy</i>	790
<i>Summary of Energy Utilization by the Cells</i>	791
Control of Energy Release in the Cell	791
The Metabolic Rate	792
<i>Measurement of the Metabolic Rate</i>	792
<i>Factors That Affect the Metabolic Rate</i>	793
<i>The Basal Metabolic Rate</i>	795
CHAPTER 73 Body Temperature, Temperature Regulation, and Fever	797
<i>Normal Body Temperatures</i>	797
Body Temperature Is Controlled by Balancing Heat Production Against Heat Loss	797
<i>Heat Production</i>	797
<i>Heat Loss</i>	797
Regulation of Body Temperature—Role of the Hypothalamus	801
<i>Neuronal Effector Mechanisms that Decrease or Increase</i> <i>Body Temperature</i>	802
<i>The Concept of a “Set-Point” for Temperature Control</i> ...	804
<i>Behavioral Control of Body Temperature</i>	805
<i>Local Skin Temperature Reflexes</i>	805
Abnormalities of Body Temperature Regulation	805
<i>Fever</i>	805
<i>Exposure of the Body to Extreme Cold</i>	807
UNIT XIV ENDOCRINOLOGY AND REPRODUCTION	809
CHAPTER 74 Introduction to Endocrinology	810
<i>Nature of a Hormone</i>	810
<i>An Overview of the Important Endocrine Glands and Their</i> <i>Hormones</i>	810
<i>Chemistry of the Hormones</i>	811
<i>Storage and Secretion of Hormones</i>	812
<i>Hormone Receptors and Their Activation</i>	813

	Mechanisms of Hormonal Action	813
	<i>Second Messenger Mechanisms for Mediating</i>	
	<i>Intracellular Hormonal Functions</i>	814
	Measurement of Hormone Concentrations in the Blood	816
CHAPTER 75	<i>The Pituitary Hormones and Their Control by the Hypothalamus</i>	819
	The Pituitary Gland and Its Relation to the Hypothalamus	819
	<i>Cell Types in the Anterior Pituitary Gland</i>	819
	Control of Pituitary Secretion by the Hypothalamus	820
	<i>The Hypothalamic-Hypophysial Portal System</i>	820
	Physiological Functions of Growth Hormone	822
	<i>Effect on Growth of Growth Hormone</i>	822
	<i>Metabolic Effects of Growth Hormone</i>	822
	<i>Stimulation of Cartilage and Bone Growth</i>	824
	<i>Growth Hormone Exerts Much of Its Effects Through Intermediate Substances Called Somatomedins</i>	824
	<i>Regulation of Growth Hormone Secretion</i>	824
	<i>Abnormalities of Growth Hormone Secretion</i>	826
	The Posterior Pituitary Gland and Its Relation to the Hypothalamus	827
	<i>Chemical Nature of Antidiuretic Hormone (Vasopressin) and Oxytocin</i>	828
	<i>Physiological Functions of Antidiuretic Hormone (Vasopressin)</i>	828
	<i>Oxytocic Hormone</i>	829
CHAPTER 76	<i>The Thyroid Metabolic Hormones</i>	831
	Formation and Secretion of the Thyroid Hormones	831
	<i>Iodine Requirements for Formation of Thyroxine</i>	831
	<i>The Iodine Pump (Iodide Trapping)</i>	831
	<i>Thyroglobulin and Chemistry of Thyroxine and Triiodothyronine Formation</i>	831
	<i>Release of Thyroxine and Triiodothyronine From the Thyroid Gland</i>	833
	<i>Transport of Thyroxine and Triiodothyronine to the Tissues</i>	833
	Functions of the Thyroid Hormones in the Tissues	834
	<i>Effect of Thyroid Hormones in Increasing the Transcription of Large Numbers of Genes</i>	834
	<i>Effects of Thyroid Hormone on Specific Bodily Mechanisms</i>	835
	Regulation of Thyroid Hormone Secretion	836
	<i>Antithyroid Substances</i>	838
	Diseases of the Thyroid	838
	<i>Hyperthyroidism</i>	838
	<i>Hypothyroidism</i>	839
CHAPTER 77	<i>The Adrenocortical Hormones</i>	842
	Chemistry of Adrenocortical Secretion	842
	Functions of the Mineralocorticoids—Aldosterone	843
	<i>Renal and Circulatory Effects of Aldosterone</i>	844

	<i>Effects of Aldosterone on Sweat Glands, Salivary Glands, and Intestinal Absorption</i>	845
	<i>Cellular Mechanism of Aldosterone Action</i>	845
	<i>Regulation of Aldosterone Secretion</i>	845
	Functions of the Glucocorticoids	846
	<i>Effects of Cortisol on Carbohydrate Metabolism</i>	846
	<i>Effects of Cortisol on Protein Metabolism</i>	847
	<i>Effects of Cortisol on Fat Metabolism</i>	847
	<i>Other Effects of Cortisol</i>	848
	<i>Regulation of Cortisol Secretion—Adrenocorticotropic Hormone</i>	850
	The Adrenal Androgens	851
	Abnormalities of Adrenocortical Secretion	852
	<i>Hypoadrenalism—Addison’s Disease</i>	852
	<i>Hyperadrenalism—Cushing’s Syndrome</i>	852
	<i>Primary Aldosteronism</i>	853
	<i>Adrenogenital Syndrome</i>	853
CHAPTER 78	<i>Insulin, Glucagon, and Diabetes Mellitus</i>	855
	Insulin and its Metabolic Effects	855
	<i>Effect of Insulin on Carbohydrate Metabolism</i>	857
	<i>Effect of Insulin on Fat Metabolism</i>	858
	<i>Effect of Insulin on Protein Metabolism and Growth</i>	860
	<i>Control of Insulin Secretion</i>	860
	<i>Other Factors That Stimulate Insulin Secretion</i>	861
	<i>Role of Insulin (and Other Hormones) in “Switching” Between Carbohydrate and Lipid Metabolism</i>	861
	Glucagon and its Functions	862
	<i>Effects on Glucose Metabolism</i>	862
	<i>Regulation of Glucagon Secretion</i>	863
	Somatostatin—Its Effect on Inhibition of Glucagon and Insulin Secretion	863
	Summary of Blood Glucose Regulation	863
	Diabetes Mellitus	864
	<i>Pathological Physiology of Diabetes Mellitus</i>	864
	<i>Physiology of Diagnosis</i>	865
	<i>Treatment of Diabetes</i>	866
	Hyperinsulinism	866
CHAPTER 79	<i>Parathyroid Hormone, Calcitonin, Calcium and Phosphate Metabolism, Vitamin D, Bone, and Teeth</i>	868
	Calcium and Phosphate in the Extracellular Fluid and Plasma—Function of Vitamin D	868
	<i>Absorption and Excretion of Calcium and Phosphate</i>	868
	<i>Vitamin D and Its Role in Calcium and Phosphate Absorption</i>	869
	<i>The Calcium in the Plasma and Interstitial Fluid</i>	870
	<i>The Inorganic Phosphate in the Extracellular Fluids</i>	871
	<i>Effects of Altered Calcium and Phosphate Concentrations in the Body Fluids</i>	871
	Bone and Its Relationships to Extracellular Calcium and Phosphates	872

<i>Precipitation and Absorption of Calcium and Phosphate in Bone—Equilibrium With the Extracellular Fluid</i>	872
<i>Exchangeable Calcium</i>	873
<i>Deposition and Absorption of Bone—Remodeling of Bone</i>	873
Parathyroid Hormone	874
<i>Effect on Parathyroid Hormone on Calcium and Phosphate Concentrations in the Extracellular Fluid</i>	875
<i>Control of Parathyroid Secretion by the Calcium Ion Concentration</i>	877
Calcitonin	877
Overall Control of Calcium Ion Concentration	878
Physiology of Parathyroid and Bone Diseases	879
<i>Hypoparathyroidism</i>	879
<i>Hyperparathyroidism</i>	880
<i>Rickets</i>	880
<i>Osteoporosis</i>	881
Physiology of the Teeth	881
<i>Function of the Different Parts of the Teeth</i>	881
<i>Dentition</i>	883
<i>Mineral Exchange in Teeth</i>	883
<i>Dental Abnormalities</i>	883
CHAPTER 80 Reproductive and Hormonal Functions of the Male	885
Spermatogenesis	885
<i>The Steps of Spermatogenesis</i>	885
<i>Function of the Seminal Vesicles</i>	888
<i>Function of the Prostate Gland</i>	888
<i>Semen</i>	888
<i>Abnormal Spermatogenesis and Male Fertility</i>	889
The Male Sexual Act	890
<i>Neuronal Stimulus for Performance of the Male Sexual Act</i>	890
<i>Stages of the Male Sexual Act</i>	890
Testosterone and Other Male Sex Hormones	891
<i>Secretion, Metabolism, and Chemistry of the Male Sex Hormone</i>	891
<i>Functions of Testosterone</i>	892
<i>Basic Intracellular Mechanism of Action of Testosterone</i>	894
<i>Control of Male Sexual Functions by Hormones From the Hypothalamus and Anterior Pituitary Gland</i>	894
Abnormalities of Male Sexual Function	896
<i>The Prostate Gland and Its Abnormalities</i>	896
<i>Hypogonadism in the Male</i>	896
<i>Testicular Tumors and Hypergonadism in the Male</i>	896
The Pineal Gland—Its Function in Controlling Seasonal Fertility	897
CHAPTER 81 Female Physiology Before Pregnancy and the Female Hormones	899
Physiologic Anatomy of the Female Sexual Organs	899
The Female Hormonal System	899

The Monthly Ovarian Cycle and Function of the Gonadotropic Hormones	899
<i>The Gonadotropic Hormones and Their Effects on the Ovaries</i>	900
<i>Ovarian Follicle Growth—The “Follicular” Phase of the Ovarian Cycle</i>	901
<i>The Corpus Luteum—The “Luteal” Phase of the Ovarian Cycle</i>	903
<i>Summary</i>	903
Functions of the Ovarian Hormones—Estradiol and Progesterone.....	903
<i>Chemistry of the Sex Hormones</i>	904
<i>Functions of the Estrogens—Their Effects on the Primary and Secondary Female Sex Characteristics</i> ...	905
<i>Functions of Progesterone</i>	906
<i>The Endometrial Cycle and Menstruation</i>	907
Regulation of the Female Monthly Rhythm—Interplay Between the Ovarian and Hypothalamic-Pituitary Hormones	908
<i>Feedback Oscillation of the Hypothalamic-Pituitary-Ovarian System</i>	909
<i>Puberty and Menarche</i>	910
<i>The Menopause</i>	910
Abnormalities of Secretion by the Ovaries	911
The Female Sexual Act.....	911
Female Fertility.....	912
CHAPTER 82 Pregnancy and Lactation	915
<i>Maturation of the Ovum</i>	915
<i>Transport, Fertilization, and Implantation of the Developing Ovum</i>	915
Early Intrauterine Nutrition of the Embryo	916
Function of the Placenta	917
<i>Developmental and Physiologic Anatomy of the Placenta</i>	917
Hormonal Factors in Pregnancy	919
<i>Human Chorionic Gonadotropin and Its Effect in Causing Persistence of the Corpus Luteum and in Preventing Menstruation</i>	919
<i>Secretion of Estrogens by the Placenta</i>	920
<i>Secretion of Progesterone by the Placenta</i>	920
<i>Human Chorionic Somatomammotropin</i>	920
<i>Other Hormonal Factors in Pregnancy</i>	921
Response of the Mother’s Body to Pregnancy	921
<i>Preeclampsia and Eclampsia</i>	923
Parturition.....	923
<i>Increased Uterine Excitability Near Term</i>	923
<i>Onset of Labor—A Positive Feedback Theory for Its Initiation</i>	924
<i>Abdominal Muscle Contractions During Labor</i>	924
<i>Mechanics of Parturition</i>	924
<i>Separation and Delivery of the Placenta</i>	925

	<i>Labor Pains</i>	925
	<i>Involution of the Uterus</i>	925
	Lactation	925
	<i>Development of the Breasts</i>	925
	<i>Initiation of Lactation — Function of Prolactin</i>	926
	<i>The Ejection or “Let Down” Process in Milk Secretion</i> — <i>Functions of Oxytocin</i>	927
	<i>Milk Composition and the Metabolic Drain on the Mother</i> <i>Caused by Lactation</i>	927
CHAPTER 83	<i>Fetal and Neonatal Physiology</i>	929
	Growth and Functional Development of the Fetus	929
	<i>Development of the Organ Systems</i>	929
	Adjustments of the Infant to Extrauterine Life	931
	<i>Onset of Breathing</i>	931
	<i>Circulatory Readjustments at Birth</i>	932
	<i>Nutrition of the Newborn Infant</i>	933
	Special Functional Problems in the Neonatal Infant	933
	Special Problems of Prematurity	936
	<i>Immature Development of the Premature Infant</i>	936
	<i>Instability of the Control Systems in the Premature</i> <i>Infant</i>	936
	<i>Danger of Blindness Caused by Oxygen Therapy in the</i> <i>Premature Infant</i>	936
	Growth and Development of the Child	936
	<i>Behavioral Growth</i>	936
UNIT XV	<i>SPORTS PHYSIOLOGY</i>	939
CHAPTER 84	<i>Sports Physiology</i>	940
	The Muscles in Exercise	940
	<i>Strength, Power, and Endurance of Muscles</i>	940
	<i>The Muscle Metabolic Systems in Exercise</i>	941
	<i>Nutrients Used During Muscle Activity</i>	943
	<i>Effect of Athletic Training on Muscles and Muscle</i> <i>Performance</i>	944
	Respiration in Exercise	945
	The Cardiovascular System in Exercise	947
	Body Heat in Exercise	948
	Body Fluids and Salt in Exercise	949
	Drugs and Athletes	949
	<i>INDEX</i>	951
