

Contents

Chapter 1 MATTER AND ENERGY

1-1	Matter: Concepts of mass, weight, and density	1
1-2	Energy	3
1-3	Forms of energy	3
1-4	Transformations of energy	6
1-5	Some characteristics of light	7

Chapter 2 THE STRUCTURE OF MATTER

2-1	Introduction	12
2-2	Elements, compounds, and mixtures	12
2-3	Dispersion systems	13
2-4	The states of matter	15
2-5	The atomic nucleus	16
2-6	The electrons	17
2-7	Energy levels and orbitals	19
2-8	Supplying energy to an atom: electron transitions	22
2-9	The identification of atoms	25
2-10	Physical and chemical changes in matter	28

Chapter 3 THE FORMATION OF MOLECULES

3-1	The chemical bond	29
3-2	Bond angles and the geometry of molecules	33
3-3	The polarity of molecules	35
3-4	Ions and radicals	37
3-5	Valence: writing molecular formulas	39
3-6	Variable valence	41
3-7	Oxidation and reduction	41
3-8	High-energy bonds: ATP	42

Chapter 4 THE COURSE AND MECHANISM OF CHEMICAL REACTIONS

Chemical Reactions and Equations

4-1	Introduction	45
4-2	Patterns of chemical reactions	45
4-3	Reversible and irreversible reactions	47
4-4	Balancing equations and reaction pathways	49
4-5	The collision theory and energy of activation	50

Chapter 5 THE COURSE AND MECHANISM OF CHEMICAL REACTIONS

Energy and Equilibrium

5-1	Introduction	53
5-2	Energy exchange and chemical reactions	53
5-3	Rates of reaction	58
5-4	Factors influencing the rates of chemical reactions	60
5-5	Chemical equilibrium	62
5-6	Entropy and free energy	67

Chapter 6 ACIDS, BASES, AND NEUTRALIZATION

6-1	Introduction	72
6-2	What are acids and bases?	72
6-3	Water and the strength of acids and bases	74
6-4	Molar and normal solutions	79
6-5	Salts and acid-base neutralization	83
6-6	The pH scale	84
6-7	Buffer systems	86

Chapter 7 THE CHEMICAL COMPOSITION OF LIVING MATTER

7-1	Inorganic substances in living matter	90
7-2	Organic substances in living matter	93
7-3	The determination of structural formulas	101
7-4	The formulas of organic chemistry	102
7-5	Some fundamental organic groups	106

Chapter 8 SOME FUNDAMENTAL ORGANIC SUBSTANCES IN LIVING MATERIAL: CARBOHYDRATES AND LIPIDS

8-1	Introduction	109
8-2	Types of carbohydrates	109
8-3	Chemical characteristics of carbohydrates	113
8-4	The formation of disaccharides and polysaccharides	115
8-5	Carbohydrates as fuels	117
8-6	General characteristics of lipids	118
8-7	Carbohydrates and fats: construction and destruction	122

Chapter 9 PROTEINS

9-1	Introduction	125
9-2	Amino acids and the primary structure of proteins	125
9-3	Other factors determining specific shape of protein molecules	129
9-4	The buffering action of proteins and amino acids	134
9-5	How is protein structure determined?	138
9-6	Summary	138

Chapter 10 ENZYMES

10-1	The nature of catalysts	139
10-2	Characteristics of enzymes	139
10-3	Theories of enzyme activity	142
10-4	Enzymes and energy	146
10-5	Conditions necessary for enzyme activity	148

Chapter 11 NUCLEIC ACIDS

11-1	Introduction: types of nucleic acid	150
11-2	The chemical composition of nucleic acids	150
11-3	The structure of DNA	154
11-4	The replication of DNA	158
11-5	The structure of RNA	159
11-6	Nucleic acids and protein synthesis	161
11-7	The genetic code	165
