

Contents

Preface	vii
Acknowledgements	ix
Principal Notation	xi
1 What is Sewage?	1
1.1 Composition of Sewage	1
1.2 Characterization of Sewage	2
1.3 Strength of Sewage	4
1.4 Why Treat Sewage?	5
1.5 Collection of Sewage	7
1.6 Further Reading	7
2 Essential Microbiology	8
2.1 The Importance of Microbes	8
2.2 Bacteria	9
2.3 Viruses	17
2.4 Algae	17
2.5 Protozoa	17
2.6 Intestinal Parasites	20
2.7 References and Further Reading	20
3 Principles of Sewage Treatment	21
3.1 Wastewater Management	21
3.2 Sewage Treatment	22
3.3 Biological Oxidation	24
3.4 Surface Water Pollution	27
3.5 References and Further Reading	33
4 BOD Removal Kinetics	34
4.1 First Order Kinetics	34
4.2 Hydraulic Flow Regimes	37
4.3 Limitations of First Order Kinetics	39
4.4 References	41
4.5 Worked Examples	41

5 Preliminary Treatment	44
5.1 Purpose	44
5.2 Screening	44
5.3 Grit Removal	46
5.4 Comminution	49
5.5 References and Further Reading	52
 6 Conventional Treatment	 53
6.1 Introduction	53
6.2 Sedimentation	54
6.3 Biofiltration	56
6.4 Activated Sludge	60
6.5 Sludge Treatment	65
6.6 Problems in Hot Climates	66
6.7 Design Criteria	67
6.8 References	68
 7 Waste Stabilization Ponds	 69
7.1 Introduction	69
7.2 Facultative Ponds	70
7.3 Maturation Ponds	74
7.4 Anaerobic Pretreatment Ponds	74
7.5 High-Rate Ponds	75
7.6 Advantages of Ponds	75
7.7 Typical Pond Layouts	78
7.8 Design Preliminaries	80
7.9 Design of Facultative Ponds	81
7.10 Design of Maturation Ponds	84
7.11 Design of Anaerobic Ponds	85
7.12 Facilities Design	86
7.13 References and Further Reading	90
7.14 Design Examples	91
 8 Aerated Lagoons	 94
8.1 Operation	94
8.2 Design	95
8.3 Aerator Performance	97
8.4 Construction	98
8.5 Effluent Treatment	99
8.6 References and Further Reading	100
8.7 Design Example	100
 9 Oxidation Ditches	 103
9.1 Operation	103
9.2 Design	105

9.3 Construction	107
9.4 Carousel Ditches	107
9.5 References	108
9.6 Design Example	108
10 High-Rate Biofiltration	109
10.1 Process Description	109
10.2 Partial Treatment of Strong Wastes	110
10.3 Design	112
10.4 References and Further Reading	113
10.5 Design Example	114
11 Tertiary Treatment	115
11.1 Purpose	115
11.2 Removal of Suspended Solids	115
11.3 Removal of Faecal Bacteria	118
11.4 References	119
12 Septic Tanks	120
12.1 Operation and Use	120
12.2 Design	120
12.3 Disposal of Tank Effluent	122
12.4 Aqua-prives	124
12.5 References and Further Reading	125
12.6 Design Example	125
13 Effluent Re-use	127
13.1 Re-use and Reclamation	127
13.2 Aquaculture	127
13.3 Agricultural Re-use	129
13.4 Municipal Re-use	134
13.5 Industrial Re-use	135
13.6 References and Further Reading	135
14 Collection and Treatment of Nightsoil	137
14.1 Economic Considerations	137
14.2 Traditional Methods	137
14.3 Modern Methods	138
14.4 References	141
14.5 Design Example	141
Appendix 1 Measurement of BOD, COD and FC	142
Appendix 2 Analysis of BOD Data	154
Appendix 3 Elements of Sanitary Sewer Design	157
Appendix 4 Procedures for Facultative Pond Design	161
Index	167
