I BIOLOGICAL ASPECTS OF AGING

1. The biological basis of aging 19 *A. Viidik*

Biological aging processes	19
Genetic determination of aging	21
Aging at the cellular level	25
Aging at the organ level	28
Impairment of coordinating mechanisms	29
Concluding remarks	32

2. Physiology of aging 34 *E. J. Masoro*

Central nervous system	35
Neuromuscular system	39
Cardiovascular system	39
Respiratory system	41
Kidney and body fluids	43
Gastrointestinal system	44
Endocrines	45
Reproduction	48
Body composition, metabolism and temperature regulation	48
Summary	49

3. Aging of the cell 56 *A. Macieira-Coelho*

Introduction	56
The growth potential of cells	58
The cell genome	60
The cell periphery	63
Summary	65

4. Immunity and aging 70 *M. M. B. Kay*

Introduction	70
The immune system	71
Age-related changes in immune function	72
Autoimmunity	74
Application to dentistry	76

5. Aging of bone tissue 83 *W. E. Roberts & M. Gonsalves*

Osseous structure	83
Skeletal adaptation	86
Aging effects	91

6. Age changes in the teeth 94 *I. A. Mjör*

Macroscopic changes	95	Intellectual functions in old age	128
Enamel	95	Personality and adjustment	132
Cementum	96	Concluding remarks	135
Dentin	97		
Pulp	98		
Conclusion	100		
7. Age changes in the oral mucous membranes and periodontium	102	10. The impact of environmental and social forces on aging ..	138
<i>I. C. Mackenzie, P. Holm-Pedersen & T. Karring</i>		<i>H. A. Kiyak</i>	
Clinical and histological changes of epithelium	103	Social roles	139
Epithelial proliferation and renewal	105		
Age changes in the connective tissues of skin and mucosa ..	106	11. Communication in the practitioner-aged patient relationship	149
Age changes in periodontal connective tissues	108	<i>H. A. Kiyak</i>	
Summary	109	Elements of communication ...	149
		Utilization of dental services ...	151
		Oral health status of the elderly	151
		Memory and learning in old age	152
		Sensory changes with aging	155
8. Age changes in salivary glands and salivary secretion	114		
<i>B. J. Baum</i>		III GENERAL MEDICAL ASPECTS ON AGING	
Formation of saliva	115	12. Medical aspects on aging and health of the elderly	165
Salivary function during aging ..	116	<i>A. Svanborg</i>	
Evaluation of gland secretions ..	117		
Salivary secretion in an animal model	119	13. Nutrition in the elderly – implication for oral health care	172
Conclusion	120	<i>B. Steen</i>	
		Energy and nutrient requirements	172
II PSYCHOLOGICAL AND BEHAVIORAL ASPECTS OF AGING		Nutritional state of the elderly ..	174
9. Aging from a psychological perspective	125	Body composition	176
<i>P. Fromholt</i>		Relation of nutrition to oral health	176
Perspectives on aging	125	Psychological, social and public health aspects	177

14. Diseases in the elderly with implications for oral status and dental therapy 179

P. W. Irvine

General aspects	179
Common cardiopulmonary disorders	181
Common nervous system disorders	182
Common rheumatologic disorders	184
Miscellaneous disorders	185

15. Psychiatric disorders in old age 187

C. G. Gottfries

Introduction	187
Functional disorders	187
States of confusion	189
Organic brain syndromes or dementias	190
Conclusion	194

16. Pharmacology and aging . . . 195

J. E. Mølholm Hansen &

J. P. Kampmann

General considerations	195
Drugs in dental praxis	198

17. Essentials of geropsychiatry for the dental profession . . . 205

S. Borson & S. I. Finkel

Prevalence of geropsychiatric disorders	205
Major syndromes: Effects on oral health and dental care	206
Summary	215

IV PATHOLOGY, PREVENTION AND TREATMENT OF ORAL DISEASES IN THE AGING INDIVIDUAL

18. The epidemiology of oral diseases in older adults 221

R. V. Katz & L. H. Meskin

Periodontal disease in older adults	221
Coronal dental caries and tooth mortality in older adults	224
Root caries in older adults	226
Oral cancer in older adults	229
TMJ dysfunction in older adults	232
Denture-related mucosal lesions in older adults	233

19. Pathology and treatment of dental caries in the aging individual 238

O. Fejerskov & B. Nyvad

Introduction	238
The dynamics of caries development	239
Arrested, inactive enamel caries lesions in elderly patients	242
Dentin reactions deep to arrested enamel lesions	243
Fissure caries in elderly patients	244
Root surface caries	246
Clinical considerations and implications	257

20. Pathology and treatment of diseases in the pulp 263

L. Tronstad

The endodontium	263
The endodontium in the elderly patient	266
Therapy	273
Conclusions	274

21. Pathology and treatment of periodontal disease 277	25. Fixed prosthodontics in geriatric dentistry 339
<i>P. Holm-Pedersen</i>	<i>N. P. Lang & H. P. Weber</i>
Gingivitis and periodontitis 277	Cause-related therapy 339
Aging and periodontal disease 280	Subjective chewing comfort 341
Prognosis 283	Limited treatment planning 343
Treatment of periodontal disease 285	Alternative to removable partial dentures 344
Conclusions 287	Feasibility of fixed prosthodontics on reduced but healthy periodontal tissues 346
22. Pathology and treatment of diseases in oral mucous membranes and salivary glands 290	Replacing teeth with acid-etched composit-bonded bridges 347
<i>J. J. Pindborg</i>	Post-therapeutical maintenance 350
Oral mucosa 290	26. Oral implants in aged patients 353
Salivary glands 303	<i>Å. Nordenram & H. Landt</i>
23. Oral and maxillofacial surgery for the geriatric patient 307	Introduction 353
<i>J. F. Piecuch</i>	Surgical and medical aspects 354
The medical evaluation 307	Indications 355
Common medical conditions found in the elderly 309	Contraindications 356
Use of anesthetics in the elderly 313	Implant procedures 356
Surgical procedures 314	Conclusions 360
Conclusion 319	V DENTAL SERVICES IN THE ELDERLY POPULATION
24. Prosthetic considerations in geriatric dentistry 321	27. Demography – impact of an expanding elderly population 365
<i>E. Budtz-Jørgensen</i>	<i>P. C. Matthiessen</i>
Oral status and treatment needs 321	Historical development 365
Diagnosis and treatment planning 322	Future development 372
Guidelines for rehabilitation with removable partial dentures 325	28. Planning dental services for the elderly population in a nation with mainly publicly financed health care delivery system 377
Guidelines for rehabilitation with complete dentures 328	<i>D. Holst & J. Rise</i>
Prognosis: Dental and prosthetic care 336	The planning process 378
Conclusion 338	

The basic dilemma	380
Empirical data	382
Public opinion	383
Future trends	383

29. Dental services in the elderly population. Planning dental services for the elderly population in a nation with a mainly self-financed health care delivery system 386

H. L. Bailit & A. A. Wilson

Introduction	386
Demography and oral health ..	387
Utilization	387
Dental care systems	388
Policy issues	389
Conclusion	391

30. Dental care programs for chronically ill homebound patients, for residents of nursing homes and for patients in geriatric hospitals .. 393

R. L. Ettinger, S. Rafal & D. Potter

Introduction	393
Dental programs	397
Preventive programs	405
Role of the hygienist	407
Role of the consultant dentist ..	408
Oral health program in institutions	408
Summary	409
