Preface	v
---------	---

GENERAL CONSIDERATIONS IN IMMUNOTOXICOLOGY

1. Definition and historical background	3
2. Aims and scope	3
3. The immune system	4
4. Health consequences of the immunotoxicity of chemicals	5
1. Decreased resistance to infection	6
2. Increased incidence of cancer	6
3. Other health consequences	7
1. Auto-immune disorders	7
2. Hypersensitivity reactions	8
3. Alteration of drug metabolism	8
5. Approaches to immunotoxicity assessment	9
1. Exposure protocol	9
2. Selection of test models	10
3. The tiered approach	12
References	14

IMMUNOTOXICITY OF PHARMACEUTICAL DRUGS

Chapter 1

Immunotoxicity of antimicrobial agents

1. Introduction	19
2. Antibiotics	19
1. Penicillins	20
2. Cephalosporins	31
3. Aminoglycosides	48
4. Tetracyclines	58
5. Polypeptides	68
6. Rifamycins	69
7. Sulfonamides	75
8. Chloramphenicol and its derivatives	82
9. Macrolides	84

Contents

10. Lincosamines	88
11. Quinolones	90
12. Antileprosy agents	94
13. Miscellaneous derivatives	96
3. Antifungal agents	101
4. Antiviral agents	107

Chapter 2

Immunotoxicity of antiparasitic agents

1. Introduction	112
2. Imidazole derivatives	112
3. Antimalarials	120
4. Miscellaneous compounds	125

Chapter 3

Immunotoxicity of drugs acting on the nervous system

1. Introduction	129
2. Psychotropic drugs	130
1. Major tranquilizers	130
2. Lithium	139
3. Tricyclic antidepressants	141
4. Monoamine oxidase inhibitors	144
5. Benzodiazepines	144
6. Miscellaneous derivatives	147
3. Drugs for Parkinson's disease	148
4. Antiepileptic drugs	149
1. Carbamazepine	149
2. Ethosuccinimide	150
3. Mesantoin	150
4. Pheneturide	151
5. Phenobarbital	151
6. Phenytoin	151
7. Primidone	154
8. Trimethadione	154
9. Valproate	155
5. Anesthetic drugs	155
1. Introduction	155
2. Narcotic analgesics	155
3. Anesthetic gases	157
4. Intravenous anesthetics	160
5. Local anesthetics	162

Chapter 4

Immunotoxicity of drugs acting on the cardiovascular system

1. Digitalis heterosides	166
2. Antihypertensive agents	167
1. Introduction	167
2. Beta-adrenergic blocking agents	168
3. Diuretics	173
4. Centrally-acting antihypertensive drugs	174
5. Peripherally-acting antihypertensive agents	175
6. Angiotensin-I converting enzyme inhibitors	179
7. Miscellaneous antihypertensive drugs	179
3. Anti-anginal drugs	181
1. Calcium antagonists	181
2. Miscellaneous anti-anginal drugs	184
4. Antiarrhythmic drugs	185

Chapter 5

Immunotoxicity of drugs acting on the gastrointestinal tract

1. Histamine H ₂ -receptor antagonists	189
2. Miscellaneous compounds	193

Chapter 6

Immunotoxicity of hormones and hormone antagonists

1. Introduction	195
2. Antithyroid drugs	195
3. Antidiabetics	197
4. Sex hormones	197
1. Introduction	197
2. Androgens	197
3. Estrogens	199
4. Progesterone and progestagens	206
5. Oral contraceptives	209
6. Antiestrogens	209

Chapter 7

Immunotoxicity of drugs acting on the respiratory tract

1. Bronchodilating agents	210
2. Antiallergic drugs	211

Contents

Chapter 8

Immunotoxicity of drugs acting on blood clotting and fibrinolysis

1. Introduction	214
2. Anticoagulants	214
1. Heparin	214
2. Oral anticoagulants	215
3. Drugs acting on fibrinolysis	217
4. Blood expanders	217
5. Inhibitors of platelet aggregation	217

Chapter 9

Immunotoxicity of anti-inflammatory drugs

1. Introduction	220
2. Non-steroidal anti-inflammatory drugs	220
1. Introduction	220
2. Salicylates	220
3. Anilide derivatives	223
4. Pyrazolone derivatives	224
5. Indomethacin	226
6. Fenamate derivatives	229
7. Propionate derivatives	229
3. Corticosteroids	230
4. Antirheumatismal drugs	231
1. Introduction	231
2. Gold salts	231
3. Penicillamine	231
4. Miscellaneous compounds	232
5. Drugs used in the treatment of gout	232

Chapter 10

Immunotoxicity of immunodepressive and immunoenhancing drugs

1. Introduction	234
2. Immunodepressive drugs	234
1. Anticancer drugs	235
2. Cyclosporine	235
3. Immunomodulating agents	235

Chapter 11

Immunotoxicity of vitamins and miscellaneous drugs

1. Vitamins	237
-------------	-----

Contents

2. Lipids	237
3. Ginseng	237
References	238

IMMUNOTOXICITY OF CHEMICALS

Chapter 1

Immunotoxicity of heavy metals

1. Introduction	297
2. Aluminium	297
3. Arsenic	298
4. Beryllium	299
5. Cadmium	299
6. Chromium	305
7. Cobalt	306
8. Copper	307
9. Germanium	308
10. Gold	308
11. Iron	308
12. Lead	309
13. Magnesium	315
14. Manganese	315
15. Mercury	317
16. Nickel	320
17. Selenium	323
18. Tin	324
19. Vanadium	333
20. Zinc	335

Chapter 2

Immunotoxicity of pesticides

1. Introduction	337
2. Insecticides	337
1. Organochlorine insecticides	337
2. Organophosphate insecticides	344
3. Carbamate insecticides	349
4. Pyrethroid insecticides	350
5. Miscellaneous	351
3. Herbicides	352
4. Plant growth regulators	355
5. Fungicides	357

Contents

Chapter 3

Immunotoxicity of industrial chemicals

1. Introduction	364
2. Aliphatic hydrocarbons and derivatives	364
1. Simple aliphatic hydrocarbons	364
2. Nitrogen derivatives	365
3. Haloalkanes	366
4. Amide derivatives	371
3. Aromatic hydrocarbons and derivatives	373
1. Monocyclic aromatic hydrocarbons	373
2. Polycyclic hydrocarbons	375
3. Biphenyls	379
4. Isocyanates	385
4. Alcohols, phenols and derivatives	387
1. Alcohols	387
2. Phenols	388
3. Dioxin	390
5. Miscellaneous compounds	395

Chapter 4

Immunotoxicity of airborne pollutants

1. Introduction	398
2. Dust particles	398
1. Asbestos	398
2. Silica	399
3. Volcanic ash	400
4. Diesel engine emissions	400
3. Gaseous air pollutants	400
1. Nitrogen dioxide	400
2. Ozone	401
3. Sulfuric acid	401

Chapter 5

Immunotoxicity of addictive chemicals

1. Introduction	402
2. Cocaine	403
3. Narcotics	403
4. Marijuana	404
5. Ethanol and alcoholism	407
6. Cigarette smoking	409

Contents

Chapter 6

Immunotoxicity of food and food contaminants

1. Introduction	411
2. Food additives	411
3. Food contaminants	414
References	417
Index	441
