

# CONTENTS

<b>Preface .....</b>	<b>vii</b>		
<b>Introduction .....</b>	<b>ix</b>		
<b>CHAPTER 1</b>			
<b>Cells, Tissues, and Microscopes .....</b>			
<b>Methods of Study .....</b>			
Preparation of Material .....	2		
Major Microscopic Tools .....	6		
<b>Organization of Cells .....</b>			
Nucleic Acids .....	12		
Amino Acids and Proteins .....	14		
Lipids .....	15		
Carbohydrates .....	16		
<b>Structural and Functional Organization of Cells .....</b>			
The Membranes of Cells .....	17		
The Nucleus .....	17		
Cytoplasmic Organelles .....	24		
Cell Form and Size .....	31		
Cellular Life and Death .....	63		
<b>CHAPTER 2</b>			
<b>Studies of Living Cells, Cell Culture, Cell Differentiation, and Cell Division .....</b>			
<b>Cell, Tissue, and Organ Culture .....</b>			
Morphology of the Living Cell .....	63		
<b>Experimental Manipulation of Living Cells .....</b>			
Vital and Supravital Staining .....	68		
Micromanipulation and Microdissection .....	68		
Cinematography .....	70		
<b>Activities of Living Cells .....</b>			
Intracellular Movements .....	71		
Cellular Locomotion .....	71		
Phagocytosis and Pinocytosis .....	72		
<b>Observation of Living Cells in Situ</b>			
<b>Cytological Analysis in Cell Culture .....</b>			
Determination of Karyotype .....	75		
Cloning .....	75		
Cellular Aggregation .....	76		
Heterokaryons .....	77		
<b>Other Uses of Cell and Tissue Culture .....</b>			
Observations on Organized Tissue in Culture .....	77		
<b>Cellular Differentiation .....</b>			
The Operon .....	78		
Cell-Cell Interactions .....	80		
<b>Cell Division .....</b>			
DNA Replication .....	82		
Mitosis .....	84		
General Considerations of Mitosis .....	86		
Meiosis .....	96		
<b>CHAPTER 3</b>			
<b>General Features of Vertebrate Development .....</b>			
<b>Early Morphogenesis .....</b>			
Gastrulation .....	98		
Differentiation and Histogenesis .....	99		
Neurulation .....	102		
Neural Crest .....	103		
Somites and the Embryonic Axis .....	105		
Somatic and Splanchnic Mesoderm .....	105		
Body Folds and Formation of the Primitive Gut .....	107		
<b>Relationship of Histology and Embryology .....</b>			
Mesoderm .....	108		
Relationship of Histology and Embryology .....	111		
<b>CHAPTER 4</b>			
<b>Epithelium .....</b>			
<b>Classification .....</b>			
Special Cytological Characteristics .....	113		
Intercellular Attachment .....	114		
Modifications at the Free Surface .....	117		
Basal Modifications and Developmental Stabilization .....	119		
Vascular Supply to Epithelia .....	133		
<b>Simple Epithelia .....</b>			
Simple Squamous Epithelium .....	138		
Simple Columnar Epithelium .....	140		
<b>Pseudostratified Epithelium .....</b>			
<b>Stratified Epithelia .....</b>			
Stratified Squamous Epithelium .....	140		
Stratified Columnar and Stratified Cuboidal Epithelium .....	141		
Stratified Columnar .....	143		
Stratified Cuboidal .....	143		
Stratified Columnar .....	143		
Stratified Cuboidal .....	145		

Transitional Epithelium . . . . .	145	Intramembranous Bone Formation . . . . .	216
Glandular Epithelia . . . . .	149	Intracartilaginous (Endochondral) Bone Formation . . . . .	217
General Structure and Function of Secretory Cells . . . . .	149	Development of Short Bones . . . . .	226
Classification of Glands . . . . .	150	Remodeling of Bone . . . . .	226
Exocrine Glands . . . . .	154	Healing of Fractures . . . . .	226
Simple Tubular Glands . . . . .	154	The Periosteum and Endosteum . . . . .	226
Simple Tubuloalveolar Glands . . . . .	154	Marrow . . . . .	227
Simple Alveolar Glands . . . . .	154	Blood Vessels and Nerves . . . . .	227
Compound Tubular Glands . . . . .	154	Joints (Articulations) . . . . .	230
Compound Tubuloalveolar Glands . . . . .	154		
Compound Alveolar Glands . . . . .	155		
Architecture of Compound Glands . . . . .	155		
Endocrine Glands . . . . .	155	CHAPTER 7	
Other Patterns of Epithelial Organization . . . . .	155	<b>Blood and Lymph</b> . . . . .	232
Epithelial Repair . . . . .	157	Blood Plasma . . . . .	233
Membranes . . . . .	158	Red Blood Cells (Erythrocytes) . . . . .	234
Serous Membranes . . . . .	158	White Blood Cells (Leukocytes) . . . . .	237
Mucous Membranes . . . . .	158	Nongranular Leukocytes (Agranulocytes) . . . . .	238
	158	Granular Leukocytes (Granulocytes) . . . . .	243
	158	Blood Platelets . . . . .	249
	158	Lymph . . . . .	251
	158	Disposal of Blood Cells . . . . .	251
CHAPTER 5			
<b>The Connective Tissues</b> . . . . .	160	CHAPTER 8	
Embryonal Connective Tissues . . . . .	160	<b>Muscle</b> . . . . .	253
The Connective Tissue Compartment . . . . .	161	Smooth Muscle . . . . .	253
Adult Connective Tissue . . . . .	162	Skeletal Muscle . . . . .	261
Loose Connective Tissue . . . . .	162	Fibers . . . . .	263
Dense Connective Tissue . . . . .	180	Myofibrils and Sarcomeres . . . . .	264
Reticular Connective Tissue . . . . .	180	The Sarcoplasm . . . . .	278
Adipose Tissue (Fat) . . . . .	183	Changes During Contraction . . . . .	283
Pigmented Connective Tissue . . . . .	188	Connective Tissue . . . . .	284
Blood and Nerve Supply of Connective Tissue . . . . .	188	Muscle-Tendon Attachment . . . . .	284
The Macrophage System . . . . .	190	Blood Vessels . . . . .	286
	190	Nerves . . . . .	286
	190	Regeneration . . . . .	286
	190	Cardiac Muscle . . . . .	286
	190	Fibers . . . . .	288
	190	Intercalated Discs . . . . .	293
	190	Connective Tissue of Cardiac Muscle . . . . .	296
	194	Blood Vessels and Nerves of Cardiac Muscle . . . . .	296
Cartilage . . . . .	194	Muscle . . . . .	296
Hyaline Cartilage . . . . .	194	Conduction System . . . . .	296
Elastic Cartilage . . . . .	194	Regeneration of Cardiac Muscle . . . . .	296
Fibrous Cartilage . . . . .	200		
Bone (Osseous Tissue) . . . . .	202	CHAPTER 9	
Gross Organization of Bone Tissue . . . . .	202	<b>Organization of Neural Tissue</b> . . . . .	299
Organic and Inorganic Components of Bone . . . . .	203	Basic Organization . . . . .	302
Cell Types in Osteogenesis . . . . .	204	The Spinal Cord and Its Nerves . . . . .	305
Microscopic Structure . . . . .	205	The Autonomic Nervous System . . . . .	306
Nonlamellar (Woven) Bone . . . . .	209	Sympathetic Division . . . . .	308
Development and Growth of Bone . . . . .	210	Parasympathetic Division . . . . .	308

<b>CHAPTER 10</b>		
<b>Neural Tissue . . . . .</b>		<b>383</b>
<b>The Neuron . . . . .</b>		
Classification of Neurons by Shape . . . . .	311	383
The Nerve Cell Body . . . . .	311	385
Nucleus of the Nerve Cell . . . . .	313	
Cytoplasm of the Nerve Cell Body . . . . .	314	
Dendrites . . . . .	314	
Axons . . . . .	314	
Axoplasmic Transport . . . . .	315	
<b>Axon Terminals, Synapses, Receptors, and Neurotransmitters . . . . .</b>		<b>387</b>
<b>Neuroglia . . . . .</b>		
Astrocytes . . . . .	319	
Oligodendrocytes . . . . .	319	
Microglia . . . . .	322	
Ependyma . . . . .	323	
Peripheral Glia . . . . .	331	
PNS Myelination . . . . .	332	
CNS Myelination . . . . .	332	
<b>The Peripheral Nerves . . . . .</b>		
Epineurium . . . . .	336	
Perineurium . . . . .	336	
Endoneurium . . . . .	338	
<b>The Ganglia . . . . .</b>		
Cranial and Spinal Ganglia . . . . .	340	
The Autonomic (Sympathetic and Parasympathetic) Ganglia . . . . .	342	
<b>Degeneration and Regeneration of Nerve Fibers . . . . .</b>		
<b>Nerve Terminations . . . . .</b>		
Terminations of Somatic Efferent Fibers . . . . .	348	
Terminations of Visceral Efferent Fibers . . . . .	351	
Terminations of Afferent Fibers . . . . .	352	
<b>CHAPTER 11</b>		
<b>The Spinal Cord, Cerebellar Cortex, and Cerebral Cortex . . . . .</b>		
<b>Investments of the Brain and Cord and the Fluid Spaces . . . . .</b>		
The Cerebrospinal Fluid . . . . .	352	
Choroid Plexuses . . . . .	352	
The Arachnoid Villi . . . . .	352	
The Fluid Compartments and the Blood-Brain Barrier . . . . .	352	
<b>The Spinal Cord . . . . .</b>		
Gray Matter . . . . .	361	
White Matter . . . . .	361	
<b>The Cerebellar Cortex . . . . .</b>		
General Structure . . . . .	362	
Function . . . . .	362	
<b>CHAPTER 12</b>		
<b>The Circulatory Systems . . . . .</b>		<b>387</b>
<b>The Blood Vascular System . . . . .</b>		
Capillaries . . . . .	365	
Arteries . . . . .	365	
Veins . . . . .	365	
Portal Vessels . . . . .	365	
Arteriovenous Anastomoses . . . . .	365	
Blood Vessels, Lymphatics, and Nerves of the Blood Vessels . . . . .	365	
The Heart . . . . .	365	
<b>The Lymph Vascular System . . . . .</b>		
<b>Development of the Circulatory System . . . . .</b>		
Blood Vessels and Heart . . . . .	365	
Lymphatics . . . . .	365	
<b>CHAPTER 13</b>		
<b>Development of Blood Cells (Hemopoiesis) . . . . .</b>		<b>425</b>
<b>Blood Development in Bone</b>		
Marrow . . . . .	374	
The Granulocyte Series . . . . .	374	
General Considerations of Granulocytopoiesis . . . . .	374	
The Erythrocyte Series . . . . .	374	
General Considerations of Erythropoiesis . . . . .	374	
Megakaryocytes and Platelet Formation . . . . .	374	
<b>Development of Lymphoid Elements</b>		
Lymphocytes . . . . .	374	
Monocytes . . . . .	374	
<b>Embryonic Development of Blood Cells . . . . .</b>		
Cortex and Medulla . . . . .	374	
Lymphatic Vessels and Sinuses . . . . .	374	
Blood Vessels . . . . .	374	
Nerves . . . . .	374	
Functions . . . . .	374	
Development . . . . .	374	
<b>Hemolymph Nodes</b>		
	383	449

<b>The Tonsils</b>	<b>450</b>	The Tongue	<b>509</b>
The Palatine Tonsils	<b>450</b>	The Teeth	<b>512</b>
The Lingual Tonsils	<b>451</b>	Salivary Glands	<b>526</b>
The Pharyngeal Tonsils	<b>451</b>	The Pharynx	<b>526</b>
Blood Vessels of Tonsils	<b>451</b>	Plan of the Esophagus, Stomach, and Intestines	<b>526</b>
Lymphatic Vessels	<b>451</b>	The Esophagus	<b>528</b>
Nerves	<b>452</b>	The Stomach	<b>532</b>
Functions	<b>452</b>	The Small Intestine	<b>542</b>
Development	<b>452</b>	The Large Intestine	<b>565</b>
<b>The Thymus</b>	<b>453</b>	The Peritoneum	<b>570</b>
Blood Vessels	<b>456</b>	Blood Vessels of the Stomach and Intestines	<b>571</b>
Lymphatics	<b>456</b>	Lymphatics of the Stomach and Intestines	<b>572</b>
Nerves	<b>456</b>	Nerves of the Stomach and Intestines	<b>573</b>
Functions	<b>456</b>	<b>Extrinsic Digestive Glands</b>	<b>573</b>
Development	<b>457</b>	The Salivary Glands	<b>573</b>
<b>The Spleen</b>	<b>457</b>	The Pancreas	<b>582</b>
Blood Vessels	<b>458</b>	The Liver	<b>590</b>
Union of Arteries and Veins	<b>465</b>	The Gall Bladder	<b>611</b>
The Splenic Pulp	<b>467</b>	The Bile Ducts	<b>611</b>
Lymphatics	<b>468</b>	<b>Development of the Digestive System</b>	<b>616</b>
Nerves	<b>468</b>		
Functions	<b>468</b>		
Development	<b>469</b>		
<b>Summary of the "Immune System"</b>	<b>470</b>		

**CHAPTER 15****The Integument**

<b>The Skin</b>	<b>472</b>	<b>CHAPTER 17</b>	
The Epidermis	<b>472</b>	<b>The Respiratory System</b>	<b>619</b>
The Dermis or Corium	<b>473</b>	<b>The Nasal Cavity and</b>	
<b>Glands of the Skin</b>	<b>484</b>	Nasopharynx	<b>619</b>
Sweat Glands	<b>485</b>	Nasal Cavity	<b>619</b>
Sebaceous Glands	<b>485</b>	Nasopharynx	<b>623</b>
<b>The Hair</b>	<b>488</b>	<b>The Larynx</b>	<b>623</b>
Structure of the Hair	<b>488</b>	<b>The Trachea and Chief Bronchi</b>	<b>625</b>
Hair Follicle	<b>492</b>	<b>The Lungs</b>	<b>628</b>
Muscles and Glands of the Hair	<b>492</b>	Plan of the Lungs	<b>628</b>
Follicle	<b>495</b>	Changes in the Lungs during	
Replacement of Hairs	<b>496</b>	Ventilation	<b>633</b>
<b>The Nails</b>	<b>499</b>	Structure of the Lungs	<b>634</b>
<b>Blood Vessels, Lymphatics, and</b>	<b>501</b>	Inspired Particulate Matter	<b>640</b>
Nerves of the Skin	<b>502</b>	Endocrine (Neuroendocrine) Cells	<b>641</b>
Blood Vessels	<b>502</b>	The Pleura	<b>641</b>
Lymphatics	<b>503</b>	The Blood and Lymph Circulation of	
Nerves	<b>503</b>	the Lungs	<b>641</b>
<b>Development of the Skin and Its</b>	<b>503</b>	<b>Development of the Respiratory</b>	
Appendages	<b>503</b>	System	<b>643</b>

**CHAPTER 16****The Digestive System**

<b>General Features of the Alimentary</b>		<b>CHAPTER 18</b>	
Canal	<b>506</b>	<b>The Urinary System</b>	<b>645</b>
The Mouth	<b>507</b>	<b>The Kidney</b>	<b>645</b>

The Uriniferous Tubules	<b>647</b>
The Nephron	<b>647</b>
Blood Vessels	<b>665</b>

Lymphatics . . . . .	671	Endometrium . . . . .	746
Nerves . . . . .	671	The Cervix . . . . .	751
Regional Function of the Renal Corpuscle, Nephron, and Collecting Ducts . . . . .	671	Blood Vessels . . . . .	751
<b>The Renal Pelvis and Ureter . . . . .</b>	<b>677</b>	Lymphatics . . . . .	752
<b>The Urinary Bladder . . . . .</b>	<b>677</b>	Nerves . . . . .	752
<b>The Urethra . . . . .</b>	<b>681</b>	Fertilization, Cleavage, and Transport . . . . .	753
<b>Development of the Urinary System . . . . .</b>	<b>683</b>	<b>Implantation and Placentation . . . . .</b>	754
<b>CHAPTER 19</b>		<b>The Vagina . . . . .</b>	766
<b>The Male Reproductive System . . . . .</b>	<b>687</b>	<b>The External Genitalia . . . . .</b>	769
<b>The Testis . . . . .</b>	<b>689</b>	<b>The Mammary Glands . . . . .</b>	769
The Seminiferous Tubule . . . . .	689	Ducts . . . . .	769
Meiosis . . . . .	698	Nipple and Areola . . . . .	771
Spermiogenesis . . . . .	699	Glandular Epithelium . . . . .	771
The Mature Spermatozoa . . . . .	699	The Inactive Mammary Gland . . . . .	771
Cycle of the Seminiferous Epithelium . . . . .	701	The Mammary Gland during Lactation . . . . .	771
Tunica Albuginea . . . . .	702	The Mammary Gland of the Male . . . . .	774
Interstitial Cells (Leydig Cells) . . . . .	704	Blood Vessels . . . . .	774
Vasculature, Lymphatics, and Innervation of the Testis . . . . .	705	Lymphatics . . . . .	774
<b>The Genital Ducts . . . . .</b>	<b>706</b>	Nerves . . . . .	774
Straight Tubules and Rete Testis . . . . .	706	<b>Development of the Female Reproductive System . . . . .</b>	775
Ductuli Efferentes . . . . .	707	Development of Mammary Glands . . . . .	775
Epididymis . . . . .	707	<b>CHAPTER 21</b>	
Ductus Deferens . . . . .	709	<b>The Endocrine Glands . . . . .</b>	777
<b>Accessory Genital Glands . . . . .</b>	<b>712</b>	<b>The Pituitary . . . . .</b>	778
The Seminal Vesicles . . . . .	712	Organization and Origin . . . . .	778
The Prostate Gland . . . . .	713	Blood and Nerve Supply . . . . .	781
The Bulbourethral Glands . . . . .	715	Microscopic Structure and Function . . . . .	783
<b>The Penis . . . . .</b>	<b>716</b>	<b>The Thyroid Gland . . . . .</b>	794
Blood Vessels . . . . .	718	Structure and Origin . . . . .	794
Lymphatics . . . . .	718	Blood Vessels . . . . .	801
Nerves . . . . .	718	Nerves . . . . .	801
<b>Semen . . . . .</b>	<b>719</b>	Function . . . . .	801
<b>Development of the Male Reproductive System . . . . .</b>	<b>723</b>	<b>The Parathyroid Glands . . . . .</b>	801
<b>CHAPTER 20</b>		Structure and Origin . . . . .	801
<b>The Female Reproductive System . . . . .</b>	<b>723</b>	Blood Vessels and Nerves . . . . .	804
<b>The Ovary . . . . .</b>	<b>723</b>	Function . . . . .	804
Ovarian Follicles . . . . .	723	<b>The Adrenal Glands . . . . .</b>	805
Ovulation . . . . .	733	Structure and Origin . . . . .	805
Blood Vessels . . . . .	742	Cortex . . . . .	807
Lymphatics . . . . .	742	Medulla . . . . .	812
Nerves . . . . .	742	Blood Supply . . . . .	815
<b>The Oviducts . . . . .</b>	<b>742</b>	Nerves . . . . .	816
<b>The Uterus . . . . .</b>	<b>742</b>	Postnatal Involution of Human Adrenal Glands . . . . .	816
Myometrium . . . . .	746	<b>The Paraganglia . . . . .</b>	816
<b>CHAPTER 22</b>		<b>The Pineal Body . . . . .</b>	816
<b>The Organs of Special Senses . . . . .</b>	<b>822</b>	<b>CHAPTER 22</b>	
<b>The Eye . . . . .</b>	<b>822</b>	<b>The Organs of Special Senses . . . . .</b>	822

Ocular Development . . . . .	822	The Ear . . . . .	865
Timus Fornix . . . . .	827	Otic Development . . . . .	866
Uvea (Uvea) . . . . .	830	The External Ear . . . . .	867
The Retina . . . . .	841	The Middle Ear . . . . .	867
The Optic Nerve . . . . .	856	The Internal Ear . . . . .	869
The Lens . . . . .	857	Physiology of the Auditory Mechanism . . . . .	881
The Zonula Ciliaris . . . . .	861	The Organ of Smell . . . . .	883
The Vitreous Body . . . . .	861	The Organ of Taste . . . . .	887
The Eyelids . . . . .	862	Index . . . . .	891
The Lacrimal Glands . . . . .	865
