PART 1

PRINCIPLES OF ANTIMICROBIAL THERAPY

1. Determinants of Bacterial Response to Antimicrobial Agents 3
2. Choice of an Antibiotic 16
3. Antibiotic Therapy in Office Practice 45
4. Antibiotic Therapy for Severe Bacterial Infections in Hospitalized Patients 61

PART 2

DRUGS EMPLOYED IN THE TREATMENT OF BACTERIAL INFECTION

5. The Inhibitors of Cell Wall Synthesis, I 85
Mechanism of Action of the Penicillins, the Cephalosporins, Vancomycin, Bacitracin, and Cycloserine
6. The Inhibitors of Cell Wall Synthesis, II 113
Pharmacology and Untoward Effects of the Penicillins, the Cephalosporins, Vancomycin, and Bacitracin
7. Bactericidal Inhibitors of Protein Synthesis 153
The Aminoglycosides
8. Bacteriostatic Inhibitors of Protein Synthesis 184
Chloramphenicol, Erythromycin, Lincomycin, Clindamycin, Spectinomycin, and the Tetracyclines
9. The Antimetabolites 229
The Sulfonamides and Trimethoprim (Trimethoprim-sulfamethoxazole)
10. Antibiotics that Affect Membrane Permeability 252
Polymyxin B, Colistin, and Gramicidin A
11. The Urinary Tract Antiseptics 262
Nalidixic Acid, Oxolinic Acid, and Cinoxacin; Nitrofurantoin; Methenamine

12. Drugs that Act on Mycobacteria 277
*Isoniazid, Rifampin, Ethambutol, and Streptomycin; The Minor
Antituberculosis Drugs; Drugs Effective Against Leprosy*

PART 3

DRUGS EMPLOYED IN THE TREATMENT OF FUNGAL INFECTION

13. Antifungal Drugs 317
*The Polyene Antibiotics, Flucytosine, Imidazoles, Iodide,
Hydroxystilbamidine, Griseofulvin, and Topical Agents*

PART 4

DRUGS EMPLOYED IN THE TREATMENT OF PARASITIC DISEASE

14. Chemotherapy of Malaria 355
15. Chemotherapy of Protozoal Diseases 385
16. Chemotherapy of Helminthic Diseases 414

PART 5

DRUGS EMPLOYED IN THE TREATMENT OF VIRAL INFECTION

17. Chemotherapy of Viral Infections 449
