

Contents

Chapter 1

THE HISTORICAL DEVELOPMENT OF MICROBIOLOGY	1
Microscopy	1
Spontaneous Generation	3
Fermentation and Biochemical Physiology	4
Infectious Disease	5
Viruses.....	7
Immunity	8
Chemotherapy.....	9
Microbial Genetics.....	10
Reconsideration.....	11

Chapter 2

THE PHYSICAL AND CHEMICAL STRUCTURE OF MICROORGANISMS.....	13
Microscopy	14
The Morphology of Bacteria	16
The Bacterial Cell.....	16
The Structure of Bacterial Cells	19
External Structures	19
Staining Reactions.....	23
The Cell Wall and Plasma Membrane	25
Internal Structures.....	30
Intracellular Localization of Enzymes.....	37
Colonial Morphology of Bacteria.....	38
The Morphology of Rickettsiae and Viruses.....	40
The Morphology of Rickettsiae	40
The Psittacosis–Lymphogranuloma Venereum Organisms.....	41
The Morphology of Viruses	42
The Bacterial Viruses (Bacteriophages)	45
Animal Viruses.....	47
The Insect Viruses.....	50
Plant Viruses.....	51
The Comparative Morphology of Microorganisms	54

Chapter 3

THE GROWTH OF MICROORGANISMS	57
The Growth of Bacteria.....	57
The Growth of Bacterial Populations.....	58
The Replication of Viruses.....	62
The Replication of Bacteriophage.....	63
The Replication of Animal Viruses.....	69
Multiple Infections and Interference.....	76
The Comparative Physiology of Growth.....	78

Chapter 4

BACTERIAL METABOLISM	81
<i>By M. J. Wolin, Ph.D.</i>	
Energy.....	82
Metabolic Reactions.....	92
Carbohydrate Breakdown.....	92
Central Hexose Pathways.....	95
Pentose Pathways.....	99
Product Formation.....	99
Regulation.....	112
The Carbon Cycle.....	114
Nitrogen and Sulfur Cycles.....	119
Biosynthesis of Molecules.....	120
Synthesis of Small Molecules.....	120
Synthesis of Macromolecules.....	133
Nutrition of Bacteria.....	138
Growth Factors.....	138
The Inorganic Elements.....	143

Chapter 5

PHYSICAL AGENTS, BACTERICIDAL SUBSTANCES (DISINFECTANTS), AND CHEMOTHERAPEUTIC DRUGS	145
<i>By M. J. Wolin, Ph.D.</i>	
Physical Agents.....	146
Disinfectants.....	150
The Chemotherapeutic Drugs.....	158
Inhibitors of Folic Acid Synthesis.....	159
Inhibitors of Peptidoglycan Synthesis.....	162
Inhibitors of Protein Synthesis.....	166
Inhibitors of Nucleic Acid Function.....	171
Antibiotics That Cause Membrane Damage.....	172
Others with Unknown Modes of Action.....	172
The Application of Chemotherapeutic Agents.....	174

Chapter 6

GENETIC MECHANISMS IN BACTERIA	180
<i>By Edward M. Johnson, Ph.D., and Louis S. Baron, Ph.D.</i>	

The Nature of Bacterial Variation.....	181
Mutation.....	181
Effects of Gene Mutation on the Phenotype.....	182
The Molecular Basis of Mutation.....	184
The Induction of Mutation.....	186
Genetic Regulation.....	187
The Nature of Gene Transfer in Bacteria.....	190
Transformation.....	190
Conjugation.....	193
The Transfer of the Bacterial Chromosome.....	195
The Intergeneric Transfer of <i>E. coli</i> K-12 Genes.....	199
F-Promoted Gene Transfer in Bacteria Other than K-12.....	201
Extrachromosomal Genetic Elements.....	203
Transduction.....	207
Generalized Transduction.....	208
Specialized Transduction.....	209

Chapter 7

THE TAXONOMY OF MICROORGANISMS.....	217
Numerical Taxonomy.....	220
Classification of Bacteria.....	221
Classification of Viruses.....	222

Chapter 8

THE PATHOGENIC MICROORGANISMS AND DISEASE.....	225
The Specific Microbial Etiology of Infectious Disease.....	226
Microbial Virulence.....	229
Microbial Toxins.....	232
Exotoxins.....	233
Endotoxins.....	235
Other Toxic Substances.....	236
Capsules.....	241
Miscellaneous Factors.....	242
Toxicity of Host Origin.....	242
Resistance.....	244

Chapter 9

THE EPIDEMIOLOGY OF INFECTIOUS DISEASE.....	261
Epidemiological Types of Infectious Disease.....	263
The Microbial Population.....	266
The Host Population.....	266
The Interaction of Host and Parasite Populations.....	268
Experimental Epidemiology.....	271
Epidemiological Data and Their Interpretation.....	273
The Control of Infectious Disease.....	274

Chapter 10

THE MICROBIOLOGY OF WATER AND SEWAGE.....	278
Water.....	278
Sewage.....	287

Chapter 11

THE MICROBIOLOGY OF MILK AND FOOD	290
Milk	290
Food Poisoning and Foodborne Infection	296
Food Poisons of Bacterial Origin	297
Foodborne Bacterial Infections	299
Foodborne Parasitic Infections	301
Control of Foodborne Disease	301

Chapter 12

ANTIGENS, ANTIBODIES, AND COMPLEMENT: THEIR NATURE AND INTERACTION	303
---	------------

By Natalie E. Cremer, Ph.D.

Antigens	304
Antigenicity of Molecules and Their Specificity	306
Cellular Antigens	310
Antibodies	314
Antigen-Antibody Reactions	319
Precipitation Reactions	322
Agglutination Reaction	327
Immunofluorescent Staining	330
Neutralization Reactions	331
Complement and the Lytic Reaction	335
Phagocytosis	341

Chapter 13

ANTIBODY FORMATION AND THE IMMUNE RESPONSE	348
---	------------

By Natalie E. Cremer, Ph.D.

The Immune Response	348
Cells in the Immune Response	348
Lymphoid Organs Involved in the Immune Response	351
Characteristics of Antibody Formation	353
Antibody Induction and Production	355
Immunosuppression	359
Ontogeny	369
Mechanism for Production of Antibody Diversity (Theories of Antibody Formation)	370

Chapter 14

IMMUNITY AND HYPERSENSITIVITY	375
--	------------

By Natalie E. Cremer, Ph.D.

Immunity	375
Acquired Immunity	376
Hypersensitivity	380
Immediate Hypersensitivity	382
Types of Immediate Hypersensitivity Reactions	383
Delayed Hypersensitivity	388

In Vitro Correlates of Delayed Hypersensitivity Reactions..... 390
 Pharmacologically Active Agents Released by Lymphocytes..... 391
 Delayed Hypersensitivity Reactions..... 393
 Auto-immunity..... 396
 Tumor Immunity..... 397

Chapter 15

THE STAPHYLOCOCCI..... 405
 Other Micrococci..... 416

Chapter 16

THE STREPTOCOCCI..... 420
 Streptococcal Infection of the Skin and Subcutaneous Tissues..... 433
 Streptococcal Infection of the Upper Respiratory Tract..... 434
 Scarlet Fever..... 435
 Rheumatic Fever..... 437
 Acute Glomerulonephritis..... 438
 Subacute Bacterial Endocarditis..... 439
 Puerperal Fever..... 440

Chapter 17

THE PNEUMOCOCCI..... 443

Chapter 18

THE GRAM-NEGATIVE PATHOGENIC COCCI (NEISSERIA): THE GONOCOCCUS AND THE MENINGOCOCCUS..... 453
 The Gonococcus..... 453
 The Meningococcus..... 460
 Other Gram-Negative Diplococci..... 466

Chapter 19

THE ENTERIC BACILLI: THE COLIFORM BACTERIA, KLEBSIELLA (FRIEDLÄNDER'S BACILLUS), AND PROTEUS..... 470
 Classification of Enteric Bacilli..... 471
 The Coliform Bacilli..... 474
 Physiological Differentiation of Coliform Bacilli..... 476
 The Immunological Relationships of the Coliform Bacilli..... 477
 Friedländer's Bacillus (*Klebsiella pneumoniae*)..... 479
 The Paracolon Bacilli..... 481
 Proteus..... 482

Chapter 20

THE ENTERIC BACILLI: THE SALMONELLA GROUP..... 487
 Salmonella Infections..... 495

Salmonella Gastroenteritis	496
Typhoid and Paratyphoid Fevers	497
Typhoid Fever	498
Alcaligenes faecalis.....	503

Chapter 21

THE ENTERIC BACILLI: THE DYSENTERY BACILLI.....	506
Shigella dysenteriae (Group A)	507
Shigella flexneri (Group B).....	509
Shigella boydii (Group C).....	511
Shigella sonnei (Group D).....	511
Bacillary Dysentery	512

Chapter 22

THE CHOLERA VIBRIO AND RELATED FORMS	520
Vibrio cholerae.....	520
Other Vibrios.....	533

Chapter 23

BRUCELLA: UNDULANT FEVER; CONTAGIOUS ABORTION OF CATTLE	537
<i>By Bob A. Freeman, Ph.D.</i>	

Chapter 24

PASTEURILLA AND ACTINOBACILLUS: HEMORRHAGIC SEPTICEMIA; PLAGUE; TULAREMIA; ACTINOBACILLOSIS	548
<i>By Bob A. Freeman, Ph.D.</i>	
Pasteurella	548
Pasteurella pestis—The Plague Bacillus	550
Pasteurella pseudotuberculosis	557
Pasteurella tularensis	558
Actinobacillus.....	561

Chapter 25

THE HEMOPHILIC AND RELATED BACTERIA: HEMOPHILUS AND BORDETELLA.....	565
<i>By Bob A. Freeman, Ph.D.</i>	
Hemophilus influenzae (Pfeiffer's Bacillus).....	565
Bordetella pertussis (Hemophilus pertussis)	569
The Koch-Weeks Bacillus (Hemophilus aegyptius).....	573
The Morax-Axenfeld Diplobacillus (Hemophilus duplex).....	574
Ducrey's Bacillus (Hemophilus ducreyi).....	574
Bordetella bronchiseptica	575

Chapter 26

PSEUDOMONAS; LACTOBACILLUS; LISTERIA; ERYSIPELOTHRIX; BACTEROIDES; STREPTOBACILLUS; BARTONELLA; MYCOPLASMA; DONOVANIA 578

Pseudomonas	578
Pseudomonas aeruginosa (pyocyanea)	578
Pseudomonas mallei (The Glanders Bacillus).....	580
Pseudomonas pseudomallei (Whitmore's Bacillus).....	582
Lactobacillus and Related Bacteria.....	583
Lactobacillus	583
Related Bacteria	587
Listeria monocytogenes.....	587
Erysipelothrix rhusiopathiae.....	590
Non-Spore-Forming Anaerobic Bacilli (Bacteroides).....	592
Streptobacillus moniliformis (Rat-Bite Fever, Haverhill Fever)	595
Bartonella and Related Microorganisms	596
Bartonella bacilliformis	596
Related Microorganisms.....	598
Mycoplasma—The Pleuropneumonia-like Organisms (PPLO).....	599
Mycoplasma of Man	602
Donovania granulomatis	603

Chapter 27

BACILLUS—THE SPORE-FORMING AEROBES..... 607

Bacillus anthracis	607
Related Bacilli	613

Chapter 28

CLOSTRIDIUM—THE SPORE-FORMING ANAEROBES..... 616

Clostridium tetani.....	617
Gaseous Gangrene	624
The Vibrio Septique, Clostridium septicum.....	625
Clostridium perfringens (Clostridium welchii).....	626
Clostridium novyi (Clostridium oedematiens).....	630
Clostridium histolyticum	632
Clostridium sporogenes	633
Clostridium chauvoei (Clostridium fesceri).....	634
Clostridium botulinum.....	636

Chapter 29

CORYNEBACTERIUM (THE DIPHTHERIA BACILLUS)..... 642

Corynebacterium diphtheriae	642
The Diphtheroid Bacilli.....	654

Chapter 30

MYCOBACTERIUM..... 657

The Tubercle Bacilli.....	657
---------------------------	-----

Mycobacterium leprae (Hansen's Bacillus).....	672
Mycobacterium leprae murium	676
Other Acid-Fast Bacilli.....	677

Chapter 31

MEDICAL MYCOLOGY: THE PATHOGENIC FUNGI AND THE PATHOGENIC ACTINOMYCETES 682

By John W. Rippon, Ph.D.

The Pathogenic Actinomycetes.....	686
Actinomycosis.....	687
Nocardiosis	692
Other Actinomycetous Infections	693
Mycetoma.....	694
The Pathogenic Fungi	698
The Superficial Mycoses.....	701
Pityriasis Versicolor (Tinea Versicolor).....	701
Tinea Nigra	702
Piedra	702
The Cutaneous Infections (Dermatophytoses)	702
The Pathogenic Yeasts.....	711
Candidosis	712
The Subcutaneous Mycoses	716
Chromomycosis	716
Sporotrichosis.....	718
Entomophthoromycosis.....	720
Lobomycosis.....	720
The Systemic Mycoses	721
The Dimorphic Systemic Fungi.....	721
Blastomycosis	723
Coccidioidomycosis.....	725
Rhinosporidiosis	729
Adiospiromycosis	729
Paracoccidioidomycosis	730
Histoplasmosis.....	731
Opportunistic Systemic Mycoses	734
Cryptococcosis.....	734
Aspergillosis.....	736
Mucormycosis.....	738
Miscellaneous Mycoses.....	739
Mycotoxycosis	740
Fungal Allergens	741

Chapter 32

THE SPIROCHETES (SPIROCHAETALES) 746

By Oscar Felsenfeld, M.D.

The Spirochetes of the Relapsing Fevers (Borrelia).....	747
Spirochetes of the Mouth.....	752
Treponema and the Treponematoses.....	753
Treponema pallidum (Syphilis).....	755
Nonvenereal Syphilis.....	759
Treponema pertenue (Yaws)	760
Treponema carateum (Pinta).....	761

Leptospira and Leptospirosis	763
Weil's Disease (Infectious Jaundice)	766
Canine Leptospirosis	767
Swamp Fever	767
Leptospiral Infections of the Far East	768
Saprophytic Leptospira	768
Rat-Bite Fever (<i>Spirillum morsus muris</i>)	768

Chapter 33

MEDICAL PARASITOLOGY

772

By Robert M. Lewert, Sc.D.

The Protozoa	773
The Intestinal Amebae (Sarcodina)	774
Primary Amebic Meningoencephalitis	778
Ciliophora	779
Intestinal Flagellates (Mastigophora)	779
Hemoflagellates (Mastigophora)	780
The Trypanosomes	781
The Leishmanias	785
Sporozoa	787
Intestinal Sporozoans	795
Parasites of Uncertain Affinities	797
The Metazoa	797
Platyhelminthes	797
Trematoda	797
Cestoda	807
Nematoda	813
The Filaria	823

Chapter 34

RICKETTSIA

831

The Typhus Fevers	840
Epidemic Louseborne Typhus Fever	841
Murine Typhus	841
Immunization	843
The Spotted Fevers	844
Related Rickettsial Infections	845
Rickettsialpox	846
Tsutsugamushi Disease (Scrub Typhus, Mite Typhus)	847
Q Fever	848
Trench Fever	849
Laboratory Diagnosis of Rickettsial Disease	849

Chapter 35

THE PSITTACOSIS-LYMPHOGRANULOMA VENEREUM GROUP OF MICROORGANISMS

853

Psittacosis and Ornithosis (<i>Chlamydia psittaci</i>)	858
Lymphogranuloma Venereum (<i>Chlamydia psittaci</i>)	860
Trachoma and Inclusion Conjunctivitis (<i>Chlamydia trachomatis</i>)	862
Trachoma	862
Inclusion Conjunctivitis	864

Chapter 36

THE VIRUSES OF EXANTHEMATOUS DISEASE AND THE TUMOR VIRUSES..... 867

The Pox Group of Viruses 867

 Variola and Vaccinia 870

 Pox Diseases of Lower Animals 874

The Herpesviruses 875

 Herpes Simplex 876

 Herpetic Infections of Lower Animals..... 879

 Pseudorabies 879

 B Virus 879

 Virus III 879

 Varicella and Zoster 880

Cat-Scratch Fever..... 881

Infectious Mononucleosis 882

The Cytomegaloviruses (Salivary Gland Disease Viruses)..... 883

Tumor Viruses 884

 Molluscum Contagiosum 885

 Myxoma and Fibroma Viruses 885

 Infectious Wart Virus 887

 Rabbit Papilloma Virus 887

 Vacuolating Virus 888

 Viral Agents of Mouse Neoplastic Disease..... 888

 Viruses of Avian Neoplastic Disease..... 890

Chapter 37

THE MYXOVIRUS GROUP (INFLUENZA, MUMPS, MEASLES, RUBELLA, RABIES) AND RELATED VIRUSES 895

The Myxoviruses 896

The Influenza Viruses 897

The Influenza-like and Other Respiratory Viruses 904

 Parainfluenza Viruses 904

 Respiratory Syncytial Virus (RS Agent) 906

The Mumps and Related Viruses 907

 Mumps..... 907

 Newcastle Disease Virus 908

The Measles (Rubeola) Virus 910

The Rubella Virus 913

The Rabies Virus..... 916

Chapter 38

THE PICORNAVIRUSES (ENTEROVIRUSES AND RHINOVIRUSES); THE HEPATITIS VIRUSES; THE ADENOVIRUSES..... 926

The Polioviruses 927

 Encephalomyelitis of Mice 934

 Teschen Virus (Porcine Encephalomyelitis)..... 934

The Coxsackie Viruses..... 935

The Enteric Orphan Viruses 937

 ECHO Viruses 938

 Reoviruses 940

 Enteric Orphan Viruses of Lower Animals 941

The Encephalomyocarditis Viruses 941

The Common Cold Viruses.....	942
Foot-and-Mouth Disease	944
Viral Diarrheas.....	945
Viral Hepatitis.....	946
Infectious Hepatitis.....	946
Serum Hepatitis.....	947
Hepatitis of Lower Animals.....	948
The Adenoviruses.....	949
 <i>Chapter 39</i>	
THE ARBOVIRUSES; THE LYMPHOCYTIC CHORIOMENINGITIS VIRUS	956
The Encephalitis and Related Viruses of Group A.....	957
Equine Encephalitis Viruses.....	957
Western Equine Encephalitis	958
Eastern Equine Encephalitis	959
Venezuelan Equine Encephalitis.....	960
Sindbis Virus.....	961
Chikungunya Virus.....	961
Semliki-Mayaro Virus.....	962
Semliki Forest Virus.....	962
Mayaro Virus	962
O'Nyong-Nyong Virus.....	962
The Mosquito-borne Viruses of Group B	962
St. Louis Encephalitis	962
Japanese B Encephalitis	964
Murray Valley Encephalitis.....	965
West Nile Virus.....	966
Dengue	967
Hemorrhagic Fevers.....	969
Ntaya Virus	970
Uganda S Virus.....	970
Zika Virus.....	970
Ilhéus Virus.....	970
Yellow Fever	971
The Tickborne Viruses of Group B.....	974
Russian Spring-Summer Encephalitis	974
Louping Ill	976
Kysanur Forest Disease	976
Powassan Virus.....	977
Colorado Tick Fever	977
The Bunyamwera Group of Viruses	978
Bunyamwera Virus	978
Cache Valley Virus.....	978
Wyeomyia Virus	979
Other Mosquito-borne Viruses.....	979
Sandfly Fever	979
Rift Valley Fever.....	980
Turlock Virus	981
California Virus.....	981
Bwamba Fever Virus.....	981
Interrelationships among Arboviruses.....	982
Lymphocytic Choriomeningitis.....	983
Durand's Disease	984
INDEX.....	989
