

Table of Contents

Preface	vii
I Introduction	1
II Gases and Solutions	12
III Electrolytic Dissociation and the Mass Law	26
IV Acids, Bases, and Buffers	38
V Osmotic Pressure	107
VI The Colloidal State and Membrane Phenomena	119
VII Lipids	164
VIII Carbohydrates or the Saccharides. Introduction	218
IX Monosaccharides or Simple Sugars	232
X Compound Sugars	283
XI Proteins	313
XII Nucleoproteins and Nucleic Acids	388
XIII Composition of Tissues	405
XIV Enzymes	440
XV Digestion of Food	484
XVI Absorption from the Intestine	514
XVII Detoxication in the Body	524
XVIII Blood and Other Body Fluids	536
XIX Chemistry of Respiration, Acid-Base Balance, and Electrolyte and Water Balance	608
XX Energy Metabolism	676
XXI The Vitamins	692
XXII Biological Oxidation and Reduction	815
XXIII Introduction to Intermediary Metabolism	871
XXIV Organic Phosphates in Metabolism— Chemical Energetics	886
XXV Lipid Metabolism	903
XXVI Carbohydrate Metabolism	955
XXVII Protein Metabolism	1050
XXVIII Nutritional Aspects of Proteins and Amino Acids	1142

XXIX	Nutritional Aspects of the Lipids and the Carbohydrates	1168
XXX	The Metabolism of the Inorganic Elements	1179
XXXI	Foods	1210
XXXII	Urine Formation and Composition	1217
XXXIII	The Hormones	1254
XXXIV	Antimetabolic Agents	1291
	Index	1307
