

TABLE OF CONTENTS

Chapter	1	The Microbial World	1
Chapter	2	Bacterial Cytology	5
		Optical Methods 5	
		Cell Structure 6	
		Staining 13	
		Morphological Changes During Growth 15	
Chapter	3	Bacterial Metabolism	16
		Part I - General 16	
		Part II - Catabolic Reactions Involved in Chemosynthesis 20	
		Part III - Chemosynthetic Organisms 28	
		Part IV - Storage and Utilization of Energy 33	
		Part V - Photosynthesis 37	
		Part VI - Nutrition 40	
		Part VII - Cycles of Elements in Nature 43	
Chapter	4	Bacterial Variation	47
		The Physical Basis of Heredity and Variation 47	
		The Relation of Genotype to Phenotype 48	
		The Origin of New Genotypes in Bacteria 48	
		Mutation 49	
		Transmission of Genetic Material 51	
		Selection 54	
		Adaptation 55	
Chapter	5	Cultivation of Bacteria	56
		Environmental Factors Affecting Growth 56	
		Cultivation Methods 57	
Chapter	6	The Major Groups of Bacteria	62
		Principles of Classification 62	
		Taxonomically Useful Properties 65	
		Descriptions of the Major Groups of Bacteria 68	
Chapter	7	The Microbiology of Special Environments	75
Chapter	8	Antibacterial Agents	82
		General Principles 82	
		Some Useful Antibacterial Agents 85	
Chapter	9	Chemotherapy	89
		Selective Toxicity 89	
		Drug Resistance 90	
		Drug Dependence 91	
		Antimicrobial Activity in Vitro 91	
		Antimicrobial Activity in Vivo 92	
		Clinical Use of Antibiotics 94	
		Combined Antibiotic Action 95	
		Antimicrobial Drugs for Local (Topical) Application 96	
		Antimicrobial Drugs for Systemic Administration 97	
Chapter	10	Host-Parasite Relationships.	105
		Infection 105	
		Attributes of Microorganisms Which Enable Them to Cause Disease 106	

Chapter 10	Host-Parasite Relationships (Cont'd.)	
	Attributes of the Host Which Determine Resistance to Microorganisms	107
	Some Mechanisms of Nonspecific Host Resistance	107
	Resistance and Immunity	109
	Allergy and Hypersensitivity	111
	Immediate or Anaphylactic Type of Hypersensitivity Reactions	112
	Delayed or Tuberculin Type of Hypersensitivity Reactions	116
	Allergy to Drugs and Simple Chemicals	118
	Chronic Hypersensitivity Diseases	119
Chapter 11	Antigens and Antibodies	121
	Antigens	121
	Antibodies	122
	Serological Reactions	125
Chapter 12	Pyogenic Cocci	132
	The Staphylococci	132
	The Streptococci	135
	The Pneumococci	142
	The Neisseriae	144
Chapter 13	Gram-Positive Bacilli	149
	Aerobic Sporeforming Bacilli	149
	Anthrax	149
	Anaerobic Sporeforming Bacilli	151
	The Clostridia	151
Chapter 14	Corynebacteria	156
Chapter 15	Mycobacteria	160
	<i>M. tuberculosis</i>	160
	<i>M. leprae</i>	165
Chapter 16	Enteric Gram-Negative Microorganisms	166
	Coliform Bacteria	166
	The Proteus Group	169
	<i>Pseudomonas aeruginosa</i>	169
	The Salmonellae	169
	The Shigellae	173
	Vibrios	175
Chapter 17	Small Gram-Negative Bacilli	178
	The Brucellae	178
	The Pasteurellae	180
	The Hemophilic Bacteria	185
Chapter 18	Miscellaneous Pathogenic Microorganisms	190
Chapter 19	Spirochetes and Other Spiral Microorganisms	194
	<i>Treponema pallidum</i> and Syphilis	194
	Diseases Related to Syphilis	197
	<i>Borrelia recurrentis</i> and Relapsing Fever	198
	Leptospirae and the Leptospiroses	200
	Miscellaneous Spiral Organisms	202
Chapter 20	Medical Mycology	203
	Structures of Fungi	203
	The Actinomycetes and Actinomycosis	205
	Superficial Mycoses, Dermatophytoses	208
	Deep Mycoses	212
Chapter 21	Normal Microbial Flora of the Human Body	224
Chapter 22	Principles of Diagnostic Medical Microbiology	227
	Selection of Laboratory Investigations	228
	Gram and Acid-Fast Staining Methods	229
Chapter 23	Rickettsial Diseases	231
Chapter 24	General Properties of Viruses	238
	Classification	238
	General Properties	240
	Multiplication of Viruses	240
	Evolution of Viruses	241
	Measuring the Sizes of Viruses	241
	Purification and Identification of Virus Particles	243

Chapter 24	General Properties of Viruses (Cont'd.)	
	Reaction to Physical and Chemical Agents	243
	Cultivation of Viruses	244
	Mutation of Viruses	245
Chapter 25	Isolation of Viruses From Clinical Specimens	252
	Complicating Factors in the Diagnosis of Viral Diseases	252
	Methods of Procedure	253
Chapter 26	Serological Diagnosis of Virus Infections	258
	Neutralization Tests	258
	Complement Fixation Tests	262
	Hemagglutination-Inhibition Tests	264
	Sheep Cell Agglutination	265
	Tests for Dermal Hypersensitivity (Skin Tests)	267
Chapter 27	Arthropod-Borne (Arbor) Viral Diseases	270
	Arbor Virus Encephalitides	270
	West Nile Fever	275
	Yellow Fever	275
	Dengue Fever	278
	Sandfly Fever	281
	Colorado Tick Fever	282
Chapter 28	Enterovirus Group	283
	Poliomyelitis	283
	Coxsackie Group	288
	ECHO Virus Group	292
Chapter 29	Other Viral Diseases of the Nervous System	295
	Rabies	295
	Encephalitis Lethargica	298
	Aseptic Meningitis	299
	Lymphocytic Choriomeningitis	299
Chapter 30	Exanthematous Viral Diseases	300
	Smallpox and Related Virus Infections	300
	The Varicella-Zoster Group	306
	Varicella, Zoster	306
	Measles	308
	Rubella	311
	Exanthem Subitum	312
	Herpes Simplex	312
	B Virus Infection	315
Chapter 31	Viral Diseases of the Respiratory Tract and Parotid Glands	316
	Influenza	316
	The Common Cold	322
	Adenovirus Group	323
	Newly Discovered Respiratory Virus Infections	327
	Mumps	328
Chapter 32	Viral Diseases of the Liver	331
	Infectious Hepatitis	331
	Serum Hepatitis	331
Chapter 33	Psittacosis-Lymphogranuloma Group	335
	Psittacosis	335
	Lymphogranuloma Venereum	337
	Trachoma and Inclusion Conjunctivitis	339
Chapter 34	Miscellaneous Viral Infections of Man	341
Chapter 35	Bacteriophage	346
	Life Cycles of Phage and Host	346
	Methods of Study	347
	Properties of Phage	348
	Phage Reproduction	349
	Phage Genetics	351
	Lysogeny	352
	Phage as Therapeutic Agent	354
Index		355
