

Table of Contents

1. INTRODUCTION	3
---------------------------	---

PART I

GENERAL NEUROPHYSIOLOGY

2. THE BASES OF EXCITATION	7
Structure of the Cell Membrane	7
The Resting State	9
The Nernst Equation	12
Passive Membrane Polarization	15
The Active State	17
3. THE NERVE	20
Threshold	21
Conduction Velocity	21
The Local Circuit Theory of Propagation	22
Saltatory Conduction in Myelinated Fibers	22
Recording the Action Potential from the Surface of a Nerve Fiber	24
The All-or-None Law	25
Accommodation	25
Strength-Duration Curves	25
Multifiber Preparations	26
Refractory Period	27
Compound Action Potentials in Different Nerves	27
4. SYNAPTIC TRANSMISSION	31
Unidirectional and Bidirectional Transmission	31
Synaptic Delay	32
Excitation	32
Inhibition	40
5. MUSCLE	46
Excitation of Muscles	46

xiv CONTENTS

Mechanisms of Muscular Contraction	47
Excitation-Contraction Coupling	49
Mechanical Properties of Muscle	50
Effects of Single and Repeated Stimulation of Muscle	51
The Active State	52
The Length-Tension Curve	53
The Force-Velocity Curve	54
Summary of Muscle Contraction	54
Heat Production in Muscles	54
Electric Activity of Muscle	55
Other Types of Skeletal Muscles	56

PART II
SENSORY SYSTEMS

6. SENSORY RECEPTORS AND PRIMARY AFFERENT FIBERS	61
Classification of Receptors and Primary Afferent Fibers	61
Receptive Field	63
General Properties of Receptors	64
Effects of Stimulus Intensity	64
Adaptation	65
Mechanisms of Impulse Initiation in Sensory Receptors	65
Mechanism of Rhythmic Discharge	68
The Off Effect	70
Summary	70
7. CUTANEOUS AND JOINT RECEPTORS	71
Cutaneous Sensations in Man	71
Mechanoreceptors in Hairy Skin	74
Mechanoreceptors in Glabrous Skin	81
Temperature Receptors	81
Nociceptors	83
General Comments on Cutaneous Sensations	86
Joint Receptors	87
8. SOMESTHETIC MECHANISMS OF THE CENTRAL NERVOUS SYSTEM	90
The Thalamus	91
The Somesthetic System	94
Effects of Lesions of the Somesthetic Pathways	107
Counterirritation and the Gate Theory of Pain	109

CONTENTS **xv**

9.	THE AUDITORY SYSTEM	112
	Functional Anatomy of the Auditory System	114
	Auditory Mechanisms	117
	Auditory Pathways	119
	Deafness	125
10.	THE VISUAL SYSTEM	127
	Functional Anatomy of the Eye	127
	The Visual Image	130
	The Visual Sensation	132
	Photochemistry of Vision	134
	Electric Activity of the Eye	135
	Visual Pathways	138
11.	CHEMORECEPTORS	144
	External Chemoreceptors	144
	Internal Chemoreceptors	152

PART III

MOTOR SYSTEMS: CONTROL *of* MOVEMENT *and* POSTURE

12.	INTRODUCTION TO THE MOTOR SYSTEMS	163
13.	MUSCLE RECEPTORS	167
	The Muscle Spindle	167
	The Golgi Tendon Organ	176
14.	SENSORY-MOTOR INTEGRATION AT THE SEGMENTAL LEVEL	180
	General Properties of Spinal Cord Organization	180
	Information-Processing in the Spinal Cord	184
	Properties of the Skeletomotor Neuron Pool	186
15.	THE SPINAL REFLEXES	194
	Exteroceptive Reflexes	195
	Proprioceptive Reflexes	199
	Spinal Shock and the Spinal Animal	210
16.	MOTOR UNIT ORGANIZATION: PHASIC VS. TONIC MUSCLES	213
	Group-1a Input to Skeletomotor Neuron Pools	213
	Phasic vs. Tonic Muscles	214
	Muscle Fiber Types	216
	Post-tetanic Potentiation of Motor Unit Activity	218
	Functional Interpretation of Muscle Innervation	219

xvi CONTENTS

Motor Unit Recruitment during Muscle Contraction	220
Regulation of Tonic Motor Unit Activity	221
Recurrent Facilitation of Phasic Motor Units	222
17. FUSIMOTOR FUNCTION IN MOTOR CONTROL	224
Compensatory Mechanism	225
Alpha-Gamma Coactivation	225
Reflex Stability in the Myotatic Loop	227
Tension Feedback from the Periphery	231
18. BRAIN-STEM MOTOR MECHANISMS	233
Motor Functions of the Brain-Stem Reticular Formation	233
Body-Orienting Reflexes	238
Brain-Stem Transections	246
19. THE CEREBELLUM	249
Cerebellar Pathways	252
Somatotopic Organization	256
Cellular Organization within the Cerebellar Cortex	258
Information-Processing in the Cerebellar Cortex	260
Effects of Cerebellar Ablations	267
20. THE MOTOR AREAS OF THE CEREBRAL CORTEX	271
Variations of Structure and Function	271
Information-Processing in the Cerebral Cortex	276
Principal Motor Areas of the Cerebral Cortex	277
Pyramidal vs. Extrapyramidal Motor Systems	282
Functional Organization of the Motor Cortex and Pyramidal Motor System	284
Cerebral Motor Control: Muscles vs. Movements	293
Functional Design of Corticospinal Motor Control	294
Effects of Lesions of the Motor Cortex and the Pyramidal System	297
21. THE BASAL GANGLIA	302
Functional Organization of the Basal Ganglia and Associated Neural Structures	303
Clinical Disorders of the Basal Ganglia	305

PART IV

THE CONTROL *of* VISCERA, BLOOD VESSELS *and* GLANDS

22. THE AUTONOMIC NERVOUS SYSTEM	315
Peripheral Autonomic Mechanisms	315

CONTENTS xvii

Functions of Autonomic Systems	321
Central Autonomic Mechanisms	323
23. THE HYPOTHALAMUS AND THE LIMBIC SYSTEM	326
The Hypothalamus	326
The Limbic System	336

PART V

NEUROBIOLOGIC RHYTHMS

24. SLEEP, WAKEFULNESS AND THE EEG	343
Early Studies on Sleep	343
The Electroencephalogram	344
The Ascending Reticular Activating System	347
Sleep Zones: EEG Synchronizing Regions of the Brain	352
Thalamocortical Mechanisms of Sleep	356
Paradoxical Sleep	360
Neurochemical Considerations in the Sleep-Wake Cycle	364
Disorders of Sleep and Consciousness	367

PART VI

REGENERATIVE *and* SUPPORTIVE PROPERTIES *of the*
NERVOUS SYSTEM

25. DENERVATION AND TROPHIC PHENOMENA	375
Hypersensitivity of Denervated Structures	375
Properties of Denervated Skeletal Muscle	376
Fetal Muscle	379
Effects of Disuse	379
Reinnervation	380
Trophic Factors	381
Nerve Tropism	381
26. SUPPORTIVE ELEMENTS OF THE CENTRAL NERVOUS SYSTEM	383
The Neuroglia	383
The Meninges and the Cerebrospinal Fluid	386
The Cerebral Circulation	392
INDEX	401
