

CONTENTS

ILLUSTRATED STRUCTURAL HIGHLIGHTS OF THE NERVOUS SYSTEM

General Architecture and Physiology	Plate 1
The Brain and Spinal Nerves	Plate 2
The Autonomic Nerves	Plate 3
Organs of Special Sense	Plate 4

PART I MEMBRANE BIOPHYSICS, NERVE, AND MUSCLE

CHAPTER 1

TRANSPORT OF IONS THROUGH CELL MEMBRANES	2
Diffusion	2
Kinetics of Diffusion—The Concentration Difference.....	3
Diffusion Through the Cell Membrane.....	3
Active Transport.....	9
Basic Mechanism of Active Transport.....	9
Active Transport of Sodium and Potassium.....	10
Active Transport of Other Ions	11

CHAPTER 2

MEMBRANE POTENTIALS, ACTION POTENTIALS, EXCITATION, AND RHYTHMICITY	13
Basic Physics of Membrane Potentials.....	13
Membrane Potentials Caused by Active Transport—The “Electrogenic Pump”.....	13
Membrane Potentials Caused by Diffusion	14
Calculation of the Membrane Potential When the Membrane is Permeable to Several Different Ions	15

Origin of the Nerve Cell Membrane Potential	15
The Action Potential	18
Relationship of the Action Potential to the Potassium and Sodium Nernst Potentials.....	20
Some Experimental Methods that Have Been Used to Study the Action Potential.....	21
Propagation of the Action Potential.....	21
“Recharging” the Fiber Membrane—Importance of Energy Metabolism.....	22
The Spike Potential and the After-Potentials.....	23
Plateau in the Action Potential	23
Rhythmicity of Certain Excitable Tissues—Repetitive Discharge	24
Special Aspects of Impulse Transmission in Nerves	25
Velocity of Conduction in Nerve Fibers.....	26
Excitation—The Process of Eliciting the Action Potential.....	26
Factors that Increase Membrane Excitability	28
Inhibition of Excitability—“Stabilizers” and Local Anesthetics	28
Recording Membrane Potentials and Action Potentials	28

CHAPTER 3		Contraction of Smooth Muscle.....	49
CONTRACTION OF SKELETAL MUSCLE.....	31	Types of Smooth Muscle.....	50
Physiologic Anatomy of Skeletal Muscle	31	The Contractile Process in Smooth Muscle.....	50
The Skeletal Muscle Fiber.....	31	Membrane Potentials and Action Potentials in Smooth Muscle	51
Molecular Mechanism of Muscle Contraction	33	Excitation-Contraction Coupling—Role of Calcium Ions in Smooth Muscle.....	53
Molecular Characteristics of the Contractile Filaments	34	Neuromuscular Junctions of Smooth Muscle.....	54
Relationship Between Actin and Myosin Filament Overlap and Tension Developed by the Contracting Muscle	36	Smooth Muscle Contraction Without Action Potentials—Effect of Local Tissue Factors and Hormones	55
Relation of Velocity of Contraction to Load	37	Mechanical Characteristics of Smooth Muscle Contraction	55
Initiation of Muscle Contraction:			
Excitation-Contraction Coupling	38		
The Muscle Action Potential	38		
Spread of the Action Potential to the Interior of the Muscle Fiber by Way of the Transverse Tubule System	38		
Release of Calcium Ions by the Cisternae of the Sarcoplasmic Reticulum	39		
The Source of Energy for Muscle Contraction	40		
Characteristics of a Single Muscle Twitch... ..	41		
Mechanics of Skeletal Muscle			
Contraction	42		
The Motor Unit	42		
Summation of Muscle Contraction ..	42		
Skeletal Muscle Tone	43		
Muscle Fatigue	44		
The Lever Systems of the Body.....	44		
Special Features and Abnormalities of Skeletal Muscle Function.....	44		
Muscle Hypertrophy.....	44		
Muscle Atrophy.....	45		
Rigor Mortis	45		
Familial Periodic Paralysis.....	45		
The Electromyogram	45		
CHAPTER 4		CHAPTER 5	
NEUROMUSCULAR TRANSMISSION: FUNCTION OF SMOOTH MUSCLE.....	47	THE HEART: ITS RHYTHMICAL EXCITATION AND NERVOUS CONTROL.....	58
Transmission of Impulses From Nerves to Skeletal Muscle Fibers: The Neuromuscular Junction	47	Physiology of Cardiac Muscle.....	58
Myasthenia Gravis	49	Physiologic Anatomy of Cardiac Muscle	58
		Action Potentials in Cardiac Muscle	59
		Contraction of Cardiac Muscle.....	60
		The Special Excitatory and Conductive System of the Heart.....	61
		The Sino-Atrial Node	61
		Internodal Pathways and Transmission of the Cardiac Impulse through the Atria	62
		The Atrioventricular (A-V) Node and the Purkinje System	62
		Transmission in the Purkinje System	63
		Control of Excitation and Conduction in the Heart.....	64
		The S-A Node as the Pacemaker of the Heart.....	64
		Role of the Purkinje System in Causing Synchronous Contraction of the Ventricular Muscle.....	64
		Control of Heart Rhythmicity and Conduction by the Autonomic Nerves	65
		Control of Heart Pumping by the Nerves	65

PART II

THE CENTRAL NERVOUS SYSTEM

CHAPTER 6		Transmission of Spatial Patterns through Successive Neuronal Pools.....	89
ORGANIZATION OF THE NERVOUS SYSTEM; BASIC FUNCTIONS OF SYNAPSES.....		Prolongation of a Signal by a Neuronal Pool—"After-Discharge".....	91
General Design of the Nervous System.....	68	Continuous Signal Output from Neuronal Pools.....	93
The Sensory Division—Sensory Receptors.....	68	Rhythmic Signal Output.....	93
The Motor Division—The Effectors...	68	Instability and Stability of Neuronal Circuits.....	94
Processing of Information.....	69	Inhibitory Circuits as a Mechanism for Stabilizing Nervous System Function.....	94
Storage of Information—Memory.....	70	Synaptic Fatigue as a Means for Stabilizing the Nervous System (Decremental Conduction).....	94
The Three Major Levels of Nervous System Function.....	70	CHAPTER 8	
The Spinal Cord Level.....	70	SENSORY RECEPTORS AND THEIR BASIC MECHANISMS OF ACTION.....	96
The Lower Brain Level.....	71	Types of Sensory Receptors and the Sensory Stimuli They Detect.....	96
The Higher Brain or Cortical Level.....	71	Differential Sensitivity of Receptors.....	96
Comparison of the Nervous System with an Electronic Computer.....	72	Transduction of Sensory Stimuli into Nerve Impulses.....	98
Function of Central Nervous System Synapses.....	72	Local Currents at Nerve Endings—Receptor Potentials and Generator Potentials.....	98
Physiologic Anatomy of the Synapse.....	73	Adaptation of Receptors.....	100
Chemical and Physiological Natures of the Transmitter Substances.....	74	Psychic Interpretation of Stimulus Strength.....	101
Electrical Events During Neuronal Excitation.....	76	Judgment of Stimulus Strength.....	102
Electrical Events in Neuronal Inhibition.....	78	Physiological Classification of Nerve Fibers.....	103
Summation of Postsynaptic Potentials.....	79	CHAPTER 9	
Special Functions of Dendrites in Exciting Neurons.....	80	SOMATIC SENSATIONS: I. THE MECHANORECEPTIVE SENSATIONS.....	105
Relation of State of Excitation of the Neuron to the Rate of Firing.....	81	Classification of Somatic Senses.....	105
Some Special Characteristics of Synaptic Transmission.....	83	Detection and Transmission of Tactile Sensations.....	105
CHAPTER 7		Detection of Vibration.....	107
NEURONAL MECHANISMS AND CIRCUITS FOR PROCESSING INFORMATION.....	85	The Subconscious "Muscle Sense"...	107
Information, Signals, and Impulses.....	85	Tickling and Itch.....	107
Transmission of Signals in Nerve Tracts.....	85	The Dual System for Transmission of Mechanoreceptive Somatic Sensory Signals into the Central Nervous System.....	107
Signal Strength.....	85	Function of the Spinal Cord Neurons in Transmitting Sensory Signals.....	109
Spatial Orientation of Signals in Fiber Tracts.....	86		
Transmission and Processing of Signals in Neuronal Pools.....	87		
Relaying of Signals through Neuronal Pools.....	87		

Transmission in the Dorsal-Lemniscal System	109	Thermal Sensations.....	131
Anatomy of the Dorsal-Lemniscal System	109	Thermal Receptors and their Excitation	131
The Somesthetic Cortex	111	Transmission of Thermal Signals in the Nervous System.....	132
Somatic Association Areas	113		
Characteristics of Transmission in the Dorsal-Lemniscal System.....	113	CHAPTER 11	
The Position Sense.....	115	MOTOR FUNCTIONS OF THE SPINAL CORD AND THE CORD REFLEXES	134
Transmission in the Anterolateral Spinothalamic System	116	Organization of the Spinal Cord for Motor Functions	134
Anatomy of the Anterolateral Spinothalamic Pathway	116	Role of the Muscle Spindle in Motor Control.....	136
Some Special Aspects of Sensory Function.....	117	Receptor Function of the Muscle Spindle	136
		The Stretch Reflex (also called Muscle Spindle Reflex or Myotatic Reflex)	137
CHAPTER 10		Role of the Muscle Spindle in Voluntary Motor Activity	139
SOMATIC SENSATIONS: II. PAIN, VISCERAL PAIN, HEADACHE, AND THERMAL SENSATIONS.....	119	Clinical Applications of the Stretch Reflex.....	140
Qualities of Pain.....	119	The Tendon Reflex.....	141
Methods for Measuring the Perception of Pain	119	The Flexor Reflex (the Withdrawal Reflex).....	142
The Pain Receptors and Their Stimulation	120	The Crossed Extensor Reflex	143
Rate of Tissue Damage as the Cause of Pain	121	Reciprocal Inhibition and Reciprocal Innervation	144
Transmission of Pain Signals into the Central Nervous System.....	122	Fatigue of Reflexes; Rebound.....	144
The Reaction to Pain and Its Control Within the Nervous System.....	123	The Reflexes of Posture and Locomotion....	144
A Pain Control ("Analgesic") System in the Brain and Spinal Cord.....	123	The Postural and Locomotive Reflexes of the Cord	144
Referred Pain	125	The Scratch Reflex.....	145
Referred Pain Caused by Reflex Muscular Spasm	125	The Spinal Cord Reflexes that Cause Muscle Spasm	146
Visceral Pain	125	The Autonomic Reflexes in the Spinal Cord.....	146
Causes of True Visceral Pain	125	Spinal Cord Transection and Spinal Shock.....	146
"Parietal" Pain Caused by Visceral Damage	126		
Localization of Visceral Pain—The "Visceral" and the "Parietal" Transmission Pathways	126	CHAPTER 12	
Visceral Pain from Various Organs.....	127	MOTOR FUNCTIONS OF THE BRAIN STEM AND BASAL GANGLIA—RETICULAR FORMATION, VESTIBULAR APPARATUS, EQUILIBRIUM, AND BRAIN STEM REFLEXES	148
Some Clinical Abnormalities of Pain and Other Sensations.....	128	The Reticular Formation, and Support of the Body Against Gravity	148
Hyperalgesia	128	Excitatory Function of the Reticular Formation	149
The Thalamic Syndrome.....	128	Support of the Body Against Gravity	149
Herpes Zoster	129	Vestibular Sensations and the Maintenance of Equilibrium	149
Tic Douloureux	129	The Vestibular Apparatus	149
The Brown-Sequard Syndrome	129		
Headache.....	129		
Headache of Intracranial Origin	129		
Extracranial Types of Headache	130		

Function of the Utricle and the Saccule in the Maintenance of Static Equilibrium.....	151	The Sensory Engram for Motor Control.....	176
The Semicircular Canals and Their Detection of Angular Acceleration and Angular Velocity.....	152	Establishment of Rapid Motor Patterns.....	176
Vestibular Postural Reflexes.....	153	Initiation of Voluntary Motor Activity.....	177
Vestibular Mechanism for Stabilizing the Eyes and for Nystagmus.....	153		
Clinical Tests for Integrity of Vestibular Function.....	154	CHAPTER 14	
Other Factors Concerned with Equilibrium.....	154	ACTIVATION OF THE BRAIN—THE RETICULAR ACTIVATING SYSTEM; THE GENERALIZED THALAMOCORTICAL SYSTEM; BRAIN WAVES; EPILEPSY; WAKEFULNESS AND SLEEP.....	179
Functions of the Reticular Formation and Specific Brain Stem Nuclei in Controlling Subconscious, Stereotyped Movements.....	155	Function of the Reticular Activating System in Wakefulness.....	179
Motor Functions of the Basal Ganglia.....	156	The Arousal Reaction—Activation of the Reticular Activating System by Sensory Signals.....	180
Functions of the Different Basal Ganglia.....	156	Stimulation of the Reticular Activating System by the Cerebral Cortex.....	181
Clinical Syndromes Resulting from Damage to the Basal Ganglia.....	157	The Generalized Thalamocortical System.....	181
		Attention.....	182
CHAPTER 13		Possible "Searching" and "Programming" Functions of the Brain's Activating System.....	183
CORTICAL AND CEREBELLAR CONTROL OF MOTOR FUNCTIONS.....	160	Effect of Barbiturate Anesthesia on the Reticular Activating System.....	183
Physiologic Anatomy of the Motor Areas of the Cortex and Their Pathways to the Cord.....	160	Brain Waves.....	183
The Primary Motor Cortex of the Human Being.....	162	Origin of the Different Types of Brain Waves.....	184
Complex Movements Elicited by Stimulating the Cortex Anterior to the Motor Cortex—The Concept of a Motor Association Area.....	164	Effect of Varying Degrees of Cerebral Activity on the Basic Rhythm of the Electroencephalogram.....	185
Effects of Lesions in the Primary Motor and Motor Association Cortex.....	164	Clinical Use of the Electroencephalogram.....	185
The Supplemental Motor Area.....	165	Epilepsy.....	185
Stimulation of the Spinal Motoneurons by Motor Signals from the Brain.....	165	Grand Mal Epilepsy.....	186
The Cerebellum and Its Motor Functions ..	166	Petit Mal Epilepsy.....	186
The Input System to the Cerebellum.....	167	Focal Epilepsy.....	187
Output Signals from the Cerebellum.....	168	Sleep and Wakefulness.....	187
The Neuronal Circuit of the Cerebellum.....	169	Slow Wave Sleep.....	187
Function of the Cerebellum in Controlling Movements.....	170	Paradoxical Sleep (Rem Sleep).....	188
Function of the Cerebellum with the Spinal Cord and Lower Brain Stem to Control Postural and Equilibrium Movements.....	170	Basic Theories of Sleep and Wakefulness.....	188
Clinical Abnormalities of the Cerebellum.....	174	Physiological Effects of Sleep.....	190
Sensory Feedback Control of Motor Functions.....	175		
		CHAPTER 15	
		THE CEREBRAL CORTEX AND INTELLECTUAL FUNCTIONS OF THE BRAIN.....	192
		Physiologic Anatomy of the Cerebral Cortex.....	192
		Functions of Certain Specific Cortical Areas.....	193
		Specific Functions of the Primary Sensory Areas.....	193

The Sensory Association Areas 194
 Interpretative Function of the
 Posterior Superior Temporal
 Lobe—The General Interpreta-
 tive Area (or Wernicke's Area) 195
 The Prefrontal Areas 197
 Thoughts, Consciousness, and
 Memory 198
 Memory and Types of Memory 198
 Physiological Basis of Memory 199
 Analytical Operations of the Brain 202
 Function of the Brain in Communication ... 203
 Function of the Corpus Callosum and
 Anterior Commissure to Transfer
 Thoughts, Memories, and Other Infor-
 mation to the Opposite Hemisphere 205

CHAPTER 16

**BEHAVIORAL FUNCTIONS OF THE
 BRAIN: THE LIMBIC SYSTEM, ROLE
 OF THE HYPOTHALAMUS, AND
 CONTROL OF VEGETATIVE FUNC-
 TIONS OF THE BODY 207**

Functional Anatomy of the Limbic
 System; its Relation to the
 Hypothalamus 207
 The Hypothalamus, the Major Output
 Pathway of the Limbic System 208
 Vegetative Control Functions of
 the Hypothalamus 209
 Behavioral Functions of the Hypo-
 thalamus and Associated
 Limbic Structures 210
 Specific Functions of Other Parts of
 the Limbic System 213
 Functions of the Amygdala 213
 Functions of the Hippocampus 213
 Function of the Limbic Cortex 214
 Function of Specific Chemical Trans-
 mitter Systems for Behavior Control 215
 Psychosomatic Effects of the Be-
 havioral System 215

CHAPTER 17

**THE AUTONOMIC NERVOUS
 SYSTEM; THE ADRENAL MEDULLA 218**

General Organization of the Autonomic
 Nervous System 218

Physiologic Anatomy of the
 Sympathetic Nervous System 218
 Physiologic Anatomy of the Para-
 sympathetic Nervous System 219
 Basic Characteristics of Sympathetic and
 Parasympathetic Function 220
 Cholinergic and Adrenergic
 Fibers—Secretion of Acetyl-
 choline or Norepinephrine by
 the Postganglionic Neurons 220
 Receptor Substances of the
 Effector Organs 221
 Excitatory and Inhibitory Actions
 of Sympathetic and Para-
 sympathetic Stimulation 222
 Effects of Sympathetic and Para-
 sympathetic Stimulation on
 Specific Organs 222
 Function of the Adrenal Medullae ... 224
 Relationship of Stimulus Rate to
 Degree of Sympathetic and
 Parasympathetic Effect 225
 Sympathetic and Parasympa-
 thetic "Tone" 225
 Denervation Supersensitivity of
 Sympathetic and Parasympa-
 thetic Organs Following
 Denervation 226
 The Autonomic Reflexes 226
 Mass Discharge of the Sympa-
 thetic System Versus Discrete
 Characteristics of Para-
 sympathetic Reflexes 227
 "Alarm" or "Stress" Function of
 the Sympathetic Nervous
 System 227
 Medullary, Pontine, and Mesen-
 cephalic Control of the
 Autonomic Nervous System 227
 Pharmacology of the Autonomic
 Nervous System 228
 Drugs That Act on Adrenergic
 Effector Organs—The Sympa-
 thomimetic Drugs 228
 Drugs that Act on Cholinergic
 Effector Organs 228
 Drugs that Stimulate the Post-
 ganglionic Neurons— "Nico-
 tinic Drugs" 229

**PART III
 THE SPECIAL SENSES**

CHAPTER 18

THE EYE: I. OPTICS OF VISION 231

Physical Principles of Optics 231

Refraction of Light 232
 Application of Refractive
 Principles to Lenses 232

Focal Length of the Convex Lens..... 233
 Formation of an Image by a Convex Lens 234
 Measurement of the Refractive Power of a Lens—The Diopter 235
The Optics of the Eye..... 235
 The Eye as a Camera 235
 The Mechanism of Accommodation 236
 The Pupillary Aperture..... 237
 "Normal" Aberrations of Vision..... 238
 Errors of Refraction 238
 Size of the Image on the Retina and Visual Acuity 240
 Determination of Distance of an Object from the Eye—Depth Perception 241
Optical Instruments..... 242
 The Ophthalmoscope 242
 The Retinoscope 242

CHAPTER 19

THE EYE: II. RECEPTOR FUNCTIONS OF THE RETINA 244
 Anatomy and Function of the Structural Elements of the Retina..... 244
 Photochemistry of Vision 247
 The Rhodopsin-Retinal Visual Cycle, and Excitation of the Rods 247
 Photochemistry of Color Vision by the Cones 249
 Automatic Regulation of Retinal Sensitivity—Dark and Light Adaptation..... 250
 Fusion of Flickering Lights by the Retina 251
Color Vision..... 252
 The Tri-Color Theory of Color Perception 252
 Color Blindness 254

CHAPTER 20

THE EYE: III. NEUROPHYSIOLOGY OF VISION..... 256
 The Visual Pathway 256
Neural Function of the Retina..... 256
 Neural Organization of the Retina 256
 Stimulation of the Rods and Cones—The Receptor Potential 257
 Stimulation of the Bipolar and Horizontal Cells..... 257
 Excitation of the Ganglion Cells..... 258
 Different Types of Signals Transmitted by the Ganglion Cells through the Optic Nerve 258

Function of the Lateral Geniculate Body..... 260
 Anatomical Organization of the Lateral Geniculate Nuclei..... 260
Function of the Primary Visual Cortex..... 261
 Detection of Lines and Borders by the Primary Visual Cortex 261
 Perception of Luminosity 262
 Effect of Removing the Primary Visual Cortex 262
 Transmission of Visual Information into Other Regions of the Cerebral Cortex..... 263
The Fields of Vision; Perimetry 263
Eye Movements and Their Control 264
 Conjugate Movement of the Eyes..... 265
 Fixation Movements of the Eyes 265
 Fusion of the Visual Images 267
Autonomic Control of Accommodation and Pupillary Aperture..... 268
 Control of Accommodation 268
 Control of the Pupillary Aperture..... 268

CHAPTER 21

THE SENSE OF HEARING 271
The Tympanic Membrane and the Ossicular System 271
 Transmission of Sound from the Tympanic Membrane to the Cochlea 271
 Transmission of Sound through Bone 272
The Cochlea..... 272
 Functional Anatomy of the Cochlea 272
 Transmission of Sound Waves in the Cochlea—The "Traveling Wave" 274
 Function of the Organ of Corti..... 275
 Determination of Pitch—The "Place" Principle..... 276
 Determination of Loudness..... 277
Central Auditory Mechanisms 278
 The Auditory Pathway..... 278
 Function of the Cerebral Cortex in Hearing..... 279
 Discrimination of Direction from which Sound Emanates 280
 Centrifugal Conduction of Impulses from the Central Nervous System..... 281
Hearing Abnormalities..... 281
 Types of Deafness 281

CHAPTER 22

THE CHEMICAL SENSES—TASTE AND SMELL..... 283
The Sense of Taste..... 283
 The Primary Sensations of Taste 283

The Taste Bud and Its Function	284	The Sense of Smell	287
Transmission of Taste Signals into the Central Nervous System	285	The Olfactory Membrane	287
Special Attributes of the Taste Sense	286	Stimulation of the Olfactory Cells.....	287
		Transmission of Smell Signals Into the Central Nervous System ...	289

PART IV NERVOUS CONTROL OF BODY FUNCTIONS

CHAPTER 23

NERVOUS REGULATION OF THE CIRCULATION AND OF RESPIRATION	291
Nervous Regulation of the Circulation	291
Autonomic Control of the Circulation.....	291
“Patterns” of Circulatory Re- sponses Elicited by Different Central Nervous System Centers ...	294
Reflex Control of Arterial Pressure ...	295
Regulation of Respiration.....	298
The Respiratory Center	298
Chemical Control of Respiration	299
Direct Chemical Control of Respiratory Center Activity by Carbon Dioxide and Hydrogen Ions.....	300
The Peripheral Chemoreceptor System for Control of Respiratory Activity— Role of Oxygen in Respiratory Control	302
Regulation of Respiration During Exercise.....	303

CHAPTER 24

REGULATION OF THE GASTRO- INTESTINAL TRACT, FOOD INTAKE, AND BODY TEMPERATURE.....	307
The Intrinsic Nerves of the Gastro- intestinal Tract	307
Ingestion of Food.....	308
Nervous Control of Food Move- ment Through the Stomach, Small Intestine, and Colon	311
Defecation.....	311
Autonomic Control of Gastro- intestinal Secretion	312
Regulation of Food Intake	314
Neural Centers for Regulation of Food Intake	314
Factors that Regulate Food Intake.....	315
Obesity.....	316

Regulation of Body Temperature—The “Hypothalamic Thermostat”.....	317
Neuronal Effector Mechanisms to Increase or Decrease Body Temperature.....	318
The Feedback Gain for Body Temperature Control	319
Behavioral Control of Body Temperature.....	320
Fever.....	320

CHAPTER 25

HYPOTHALAMIC AND PITUITARY CONTROL OF HORMONES AND OF REPRODUCTION.....	322
The Pituitary Gland and Its Relation- ship to the Hypothalamus	322
Control of Pituitary Secretion by the Hypothalamus.....	323
The Anterior Pituitary Gland and Its Regulation by Hypothalamic Releas- ing Factors.....	324
Cell Types of the Anterior Pituitary	324
The Hypothalamic-Hypophysial Portal System	324
Physiological Functions of the Anterior Pituitary Hormones	325
Growth Hormone	325
Thyroid-Stimulating Hormone and Its Control of Thyroid Gland Secretion.....	325
Adrenocorticotropin and Its Control of the Adrenocortical Hormones	326
Prolactin and Its Control of Milk Secretion	326
Control of Male Sexual Functions by the Gonadotropic Hormones— FSH and LH.....	326
Regulation of Pituitary Secretion of LH and FSH by the Hypothalamus.....	327

Puberty and Regulation of Its Onset	328	Puberty and Menarche.....	330
Regulation of the Female Monthly Rhythm—Interplay Between the Ovarian and Hypothalamic- Pituitary Hormones	328	The Menopause	330
Feedback Oscillation of the Hypothalamic-Pituitary- Ovarian System	329	The Male Sexual Act.....	330
		Neuronal Stimulus for Performance of the Male Sexual Act	330
		Stages of the Male Sexual Act.....	331
		The Female Sexual Act.....	332
		SUBJECT INDEX	335
