Foreword	xi
Preface	xiii

PART I BASICS OF TRANSILLUMINATION

1. History of Transillumination	
<i>R. C. Banagale, M.D.</i>	3
Application and Clinical Experience, 3. Transillumination of the Chest, 7. Transillumination of the Abdomen and Pelvis, 8. Transillumination of the Extremities, 9. Other Applications of Transillumination, 10. Conclusion, 11.	
2. Principles of Transillumination	
<i>J. O. Uy, M.D., Ph.D.</i>	15
The Nature of Light, 15.	
3. Equipment and Principles of Measurement	
<i>S. M. Donn, M.D., and B. J. Duchinsky, M.S.</i>	23
Conventional Transillumination, 23. Quantitative Transillumination, 29.	

PART II CLINICAL TRANSILLUMINATION

S. M. Donn, M.D., and L. R. Kuhns, M.D.

- | | |
|---|-----------|
| 4. General Techniques of Transillumination | 39 |
| Comparison With Other Diagnostic Imaging Techniques, 40. | |
| 5. Transillumination of the Head and Neck | 45 |
| The Head, 45. Transillumination of the Neck, 62. | |
| 6. Chest | 67 |
| Technique, 67. | |
| 7. Transillumination of the Abdomen | 77 |
| Abdominal and Pelvic Structures, 78. Transillumination
of the Spine, 88. | |
| 8. Extremities and Vessels | 91 |
| Vascular Applications, 91. Extremity Lesions, 94. | |

COLOR PLATES

PART III APPENDICES

- | | |
|--|------------|
| A. Some Physical Aspects of Light | 103 |
| Properties of Light, 103. Measurement of Light, 104. | |
| B. Bibliography | 105 |
| Index | 111 |
