

# Contents

1. A Perspective on Educational Measurement	1
<i>The Nature of Measurement</i> • 1	
<i>Tests, Measurements, and Evaluation</i> • 3	
<i>Uses of Educational Measurements</i> • 4	
<i>The Characteristics of a Quality Instrument</i> • 7	
<i>Suggested Readings</i> • 10	
2. The Specification of Learning Outcomes	11
<i>Types of Objectives</i> • 12	
<i>Sources of Educational Objectives</i> • 14	
<i>The Taxonomy of Educational Objectives</i> • 15	
<i>Considerations in Stating Specific Educational Objectives</i> • 21	
<i>Suggested Readings</i> • 25	
3. Planning for the Development, Administration and Scoring of the Measuring Instrument	26
<i>Developing a Table of Specifications</i> • 26	
<i>Selecting Appropriate Measurement Procedures</i> • 29	
<i>Test Administration</i> • 40	

	<i>Test Scoring</i> • 42	
	<i>Suggested Readings</i> • 45	
4.	Constructing Short-Answer Test Items	47
	<i>Preliminary Considerations</i> • 48	
	<i>General Guidelines for Item Writing</i> • 50	
	<i>Writing Supply Items</i> • 53	
	<i>Writing Constant Alternative Selection Items</i> • 56	
	<i>Writing Changing Alternative Selection Items</i> • 63	
	<i>Writing Matching Exercises</i> • 72	
	<i>Suggested Readings</i> • 76	
5.	Constructing and Scoring Essay Tests	79
	<i>Special Problem Areas</i> • 79	
	<i>General Types of Essay Items</i> • 81	
	<i>Specific Types of Essay Questions</i> • 83	
	<i>Scoring Essay Tests</i> • 86	
	<i>Suggested Readings</i> • 90	
6.	Describing Test Performances	92
	<i>Why Study Statistics?</i> • 92	
	<i>Tabulating Data and Frequency Distributions</i> • 93	
	<i>Relative Position — Percentile Ranks</i> • 94	
	<i>The Total Distribution — Percentiles</i> • 99	
	<i>Average or Typical Performance</i> • 101	
	<i>The Variability of Performances</i> • 104	
	<i>Relative Position — Standard Scores</i> • 108	
	<i>Describing Relationships</i> • 112	
	<i>Suggested Readings</i> • 119	
7.	Analyzing Test Characteristics: Validity and Reliability	121
	<i>The Concept of Errors in Measurement</i> • 121	
	<i>Defining and Assessing Validity</i> • 123	
	<i>Defining and Assessing Reliability</i> • 129	
	<i>Factors Influencing Reliability and Validity</i> • 140	
	<i>Suggested Readings</i> • 143	

8. Analyzing Item Characteristics	145
<i>Preparing Data for Item Analysis</i> • 146	
<i>Using Information about Item Difficulty</i> • 149	
<i>Using Information about Item Discrimination</i> • 152	
<i>Examining Distractor Effectiveness</i> • 154	
<i>Effects of Item Analysis on Reliability and Validity</i> • 155	
<i>Limitations of Item Analyses</i> • 156	
<i>Suggested Readings</i> • 157	
9. Evaluating Learning Outcomes with Standardized Achievement Tests	158
<i>Uses of Standardized Achievement Tests</i> • 158	
<i>A Comparison of Instructor-Made and Standardized Tests</i> • 160	
<i>Types of Standardized Achievement Tests</i> • 162	
<i>Locating Information about Tests</i> • 169	
<i>Selecting an Achievement Test</i> • 171	
<i>Some Misuses and Misconceptions of Standardized Achievement     Tests</i> • 176	
<i>Suggested Readings</i> • 179	
10. Assigning Marks	181
<i>Purposes of Marks</i> • 182	
<i>Decision Points in Establishing Marking Systems</i> • 184	
<i>Combining and Weighting Data</i> • 188	
<i>Three Representative Marking Models</i> • 191	
<i>On the Philosophy of Marking</i> • 197	
<i>Suggested Readings</i> • 198
