

CONTENTS

NOTE TO THE INSTRUCTOR	iv	TOPIC	
NOTE TO THE STUDENT	v	20 Hormonal Control of Plant Development	229
TOPIC		21 Animal Development	240
1 The Structure of Cells	1	22 Evolution	259
2 The Behavior of Living Cells	19	23 Nonvascular Plants	267
3 Enzyme Activity	28	24 The Move to Land – Vascular Plants	281
4 Autotrophic Nutrition	38	25 Protozoa, Coelenterata, and Platyhelminthes	292
5 Heterotrophic Nutrition	52	26 Arthropoda, Annelida, and Mollusca	307
6 Gas Exchange in Animals	69	27 Echinodermata	315
7 Gas Exchange and Transport in Plants	83	28 Adaptation	321
8 Transport in Animals	98	29 Ecological Field Investigations	323
9 Heartbeat and Blood Flow	109	30 Microbial Ecology (by Steven C. Carlin)	337
10 The Regulation of Body Fluids	116	APPENDIX	
11 Active Transport	127	1 Drawing	352
12 Vertebrate Coordination	133	2 Classification	353
13 Effectors	143	3 The Closed Manometer System	362
14 Behavior	160	4 Option to Topic 3 – Measurement of Enzyme Activity by Sampling	364
15 Chemoreception and Behavior in the Blowfly	167	5 Pithing of a Frog	367
16 Cellular Reproduction	177	6 Use of Oil-Immersion Objectives	368
17 Genetics and the Analysis of Data	186	7 Microbiological Technique (by Steven C. Carlin)	369
18 Fungal Reproduction and Genetics	202		
19 Angiosperm Development	215
