

CONTENTS

INTRODUCTION	xvii
--------------------	------

ABBREVIATIONS AND SYMBOLS	xix
---------------------------------	-----

I. FOOD COMPOSITION AND ENERGY VALUES

1. Composition of Milk	1
Part I. General Constituents: Various Mammals	1
Part II. Chemical Constituents of Colostrum: Man and Cattle	4
Part III. Physical Properties and Chemical Constituents of Mature Milk: Man, Cattle, and Goat	5
Part IV. Amino Acid Content of Milk Proteins: Cattle	9
2. Composition of Foods, Raw and Processed: Animal Origin	9
Part I. General Constituents and Energy Values	9
Part II. Minerals	15
Part III. Vitamins	20
3. Composition of Foods, Raw and Processed: Plant Origin	25
Part I. General Constituents and Energy Values	25
Part II. Minerals	33
Part III. Vitamins	40
4. Fatty Acid Composition of Foods and Feeds: Animal and Plant Origin	47
Part I. Saturated Fatty Acids	47
Part II. Monoethenoic, Dienoic, and Trienoic Unsaturated Fatty Acids	49
Part III. Tetraenoic, Pentaenoic, and Hexaenoic Unsaturated Fatty Acids	52
5. Amino Acid Composition of Foods: Animal and Plant Origin	53
Part I. Essential Amino Acids	53
Part II. Nonessential Amino Acids	56
6. Nutritive Value Per Pound: Classes of Foods	59
7. Nutrient Stability	60
8. Common Non-nutritive Components of Food	66
9. Composition of Feeds: Animal Origin	79
Part I. General Constituents and Energy Values	79
Part II. Essential Minerals	80
Part III. Vitamins	81
Part IV. Amino Acids	81
10. Composition of Feeds: Plant Origin	82
Part I. General Constituents and Energy Values	82
Part II. Essential Minerals and Carotene	85
Part III. Vitamins	88
Part IV. Amino Acids	89
11. Drinking Water	90
Part I. Comparison of Standards	90
Part II. Chemicals in Interstate Carrier Water Supplies	91
12. Composition of Natural Waters	93
Part I. Amount of Dissolved Solids	93
Part II. Percent of Total Solids	93

II. ANIMAL NUTRITION

13. Nutritional Standards: Man	95
Part I. United States: Children and Adults	95
Part II. Canada and United Kingdom: Children and Adults	96
Part III. Other Countries and FAO: Adults	97

14. Nutrient Requirements: Domestic Animals	98
Part I. General Requirements	98
Part II. Minerals	103
Part III. Vitamins	109
15. Amino Acid Requirements: Vertebrates	114
16. Factors Affecting Nutrient Requirements and Availability: Man	116
Part I. Factors Influencing Requirements	116
Part II. Factors Influencing Biological Availability	119
17. Special Food Mixtures: Man	121
Part I. United States	121
Part II. Latin America, Africa, Asia, and Worldwide	125
18. Colony and Purified Diets: Domestic and Laboratory Animals	127
19. Zoo Diets: Wild Animals	134
Part I. New York Zoological Park	134
Part II. San Diego Zoological Garden	143
Part III. Philadelphia Zoological Garden	145
Part IV. Lincoln Park Zoological Gardens of Chicago	147
20. Nutrient Requirements and Utilization: Insects	148
Part I. Minerals	148
Part II. Vitamins	149
Part III. Sugars	151
Part IV. Carbohydrates Other Than Sugars	154
Part V. Proteins	156
Part VI. Amino Acids	157
Part VII. Fatty Acids and Sterols	158
Part VIII. Miscellaneous Organic Compounds	162
21. Synthetic Diets: Insects	163
22. Culture Media: Protozoa	167
Part I. Parasitic Amoebae	167
Part II. Ciliata	170
Part III. Trichomonadidae	173
Part IV. Trypanosomatidae	175
Part V. Phytomastigina	177
23. Culture Media: Animal Tissues	180
Part I. Balanced Salt Solutions	180
Part II. Constituents of Synthetic Media	181
Part III. Original Use of Synthetic Media	186

III. PLANT NUTRITION

24. Nutrient Requirements: Bacteria	189
Part I. Vitamins and Other Essential Compounds	189
Part II. Amino Acids	191
25. Nutrient Requirements and Utilization: Fungi	193
Part I. Vitamins	193
Part II. Sugars	202
26. Nutrient Utilization: Yeasts	206
Part I. Fermentation of Sugars	206
Part II. Assimilation of Carbohydrates	207
Part III. Assimilation of Other Carbon Compounds	208
27. Nutrient Requirements and Utilization: Algae	210
Part I. Vitamins, Sugars, and Alcohols	210
Part II. Fatty Acids and Other Organic Acids	217
Part III. Amino Acids	222
Part IV. Other Nitrogenous Substances	225
28. Water Requirements: Higher Plants	229
Part I. Transpiration Formulas	229
Part II. Physical Constant ϵ (Dimensionless) and Temperature in $^{\circ}\text{C}$	230

29. Culture Media: Plants	230
Part I. Bacteria	230
Part II. Fungi	232
Part III. Algae	233
Part IV. Higher Plants	234
30. Culture Media: Plant Tissues	235
Part I. Balanced Salt Solutions	235
Part II. Tissue Culture Media	235

IV. DIGESTION AND ABSORPTION

31. Composition of Saliva	237
Part I. Man	237
Part II. Ruminants	241
Part III. Mammals Other Than Man and Ruminants	244
32. Composition of Esophageal Secretions: Dog	245
33. Properties of the Crop: Birds	246
34. Composition of Gastric Juice: Vertebrates	247
Part I. Man	247
Part II. Dog	249
Part III. Vertebrates Other Than Man and Dog	251
35. Composition of Bile: Vertebrates	253
Part I. Man	253
Part II. Vertebrates Other Than Man	256
36. Composition of Pancreatic Secretion: Mammals	259
Part I. Man	259
Part II. Mammals Other Than Man	260
37. Composition of Gastrointestinal Secretions: Vertebrates	261
38. Composition of Contents of Germfree Gastrointestinal Tract: Vertebrates	266
Part I. Stomach and Intestine	266
Part II. Cecum, Colon, and Rectum	267
39. Gastric Secretion Tests: Man	270
40. Liver Function Tests: Man	273
41. Antimetabolites	274
42. Properties of Proteolytic Enzymes and Their Precursors	279
Part I. Physical	279
Part II. Kinetic	280
43. Composition of Digestive Enzymes and Their Precursors	281
Part I. Elements	281
Part II. Essential Amino Acids	282
Part III. Nonessential Amino Acids	283
44. Catalytic Action of Digestive Enzymes	283
45. Digestive Enzymes: Vertebrate Tissues and Secretions	285
46. Pathways of Lipid Digestion: Man and Laboratory Mammals [<i>diagram</i>]	289
47. Pathways of Carbohydrate Digestion: Man and Laboratory Mammals [<i>diagram</i>]	290
48. Pathways of Protein Digestion: Man and Laboratory Mammals [<i>diagram</i>]	291
49. Apparent Digestibility and Absorbability of Nutrients: Vertebrates	291
50. Membrane Transport of Nutrients	295
Part I. Classification of Transport Processes	295
Part II. Rate of Transport Across the Small Intestine: Vertebrates	296
Part III. Sources of Information for Transport Across Other Membranes	303

V. NUTRIENT FUNCTION, DEFICIENCY, AND EXCESS

51. Function, Deficiency, and Excess of Chemical Elements: Animals	307
52. Function, Deficiency, and Excess of Essential Vitamins: Vertebrates	311
53. Correlation of Weight Gain to Feed Consumed: Vertebrates	317
54. Function, Deficiency, and Excess of Chemical Elements: Higher Plants	317

55. Correlation Between Soil pH and Chemical Element Availability: Tabular	320
Part I. Element Deficiency	320
Part II. Element Excess	321
56. Correlation Between Soil pH and Chemical Element Availability: Graphic	323
57. Optimum Soil pH for Growth: Spermatophytes	323
58. Control of Transpiration with Foliar Sprays of Inhibitors of Stomatal Movement: Higher Plants	326

VI. ANIMAL ENERGY EXCHANGE

59. Body Temperatures	327
Part I. Mammals	327
Part II. Birds	334
60. Energy Metabolism at Various Weights: Man	344
Part I. Basal: Infants and Children	344
Part II. Resting: Adults	344
61. Basal Energy Metabolism at Various Ages: Man	345
62. Basal and Resting Energy Metabolism at Various Ages: Farm and Laboratory Animals	346
63. Energy Metabolism	349
Part I. Mammals	349
Part II. Birds	351
64. Factors Affecting Energy Exchange	352
Part I. Age, Work, Feed Intake, and Gravity	352
Part II. Altitude	353
Part III. Environmental Temperature	354
Part IV. Circadian Cycle	355
65. Energy Cost of Work: Man	355
66. Oxygen Consumption: Animals	362
Part I. Mammals and Birds	362
Part II. Lower Chordates and Other Metazoa	363
Part III. Roundworms, Flatworms, and Protozoa	369
67. Correlation of Oxygen Consumption with Body Size: Invertebrates	372
68. Metabolic Rates: Soil Organisms	378
69. Oxygen Uptake of Organs in Situ: Mammals	379
Part I. Heart	379
Part II. Other Organs	380
70. Oxygen Consumption: Animal Tissues	385
71. Oxygen Consumption: Fetal Tissues	397
72. Oxygen Consumption: Invertebrate Tissues	406

VII. METABOLIC PATHWAYS

73. Pathways of Mineral Metabolism: Laboratory Mammals <i>[diagram]</i>	418
74. Pathways of Lipid Metabolism <i>[diagram]</i>	423
75. Pathways of Carbohydrate Metabolism <i>[diagram]</i>	424
76. Pathways of Amino Acid Metabolism	426
77. Pathways of Nucleoprotein Catabolism <i>[diagram]</i>	428
78. Metabolic Interrelationships: Lipids, Carbohydrates, and Proteins <i>[diagram]</i>	430
79. Tricarboxylic Acid Cycle <i>[diagram]</i>	432
80. Cytochrome System <i>[diagram]</i>	433
81. Pathways of Energy Metabolism in Muscle <i>[diagram]</i>	434
82. Pathways of Photosynthesis: Carbon Dioxide Reduction Cycle <i>[diagram]</i>	435
83. Pathways of Sucrose Synthesis: Intermediates <i>[diagram]</i>	436
84. Pathways of Chlorophyll Biosynthesis <i>[diagram]</i>	437
85. Pathways of Biosynthesis: Water-soluble Vitamins <i>[diagrams]</i>	439
Part I. Thiamine	439
Part II. Riboflavin	439
Part III. Biotin	440
Part IV. Nicotinic Acid	440

Part V. Pantothenic Acid	441
Part VI. Folic Acid	442
Part VII. Inositol	443
Part VIII. Choline	443
Part IX. Vitamin B ₁₂	444
Part X. Ascorbic Acid	445
86. Pathways of Biosynthesis: Fat-soluble Vitamins [<i>diagrams</i>]	446
Part I. Carotene	446
Part II. Vitamin A	447
Part III. Vitamin D	448
Part IV. Vitamin K	449
Part V. Essential Fatty Acids	450
87. Protein Biosynthesis [<i>diagrams</i>]	451
Part I. Pathways	451
Part II. RNA Codons	452
88. Pathways of Polynucleotide Biosynthesis [<i>diagrams</i>]	452
Part I. Purines	452
Part II. Pyrimidines	454
89. Pathways of Cholesterol Biosynthesis [<i>diagram</i>]	455
90. Pathways of Steroid Hormone Biosynthesis [<i>diagrams</i>]	456
91. Hormones Affecting Metabolism	459
92. Metabolic Errors of Genetic Origin: Man	465
Part I. Metabolites in Plasma and Urine	465
Part II. Diseases Caused by Inborn Errors	467
93. Biocides	468
Part I. Antibiotics	468
Part II. Insecticides	471
Part III. Nematocides	474
Part IV. Fungicides	475
Part V. Herbicides	477

VIII. PLANT METABOLISM

94. Nitrogen Fixation	485
Part I. Symbiotic Associations	485
Part II. Free-living, Nitrogen-fixing Microorganisms	486
95. Carbon Fixation and Solar Energy Budget	487
Part I. Carbon Balance Computed as Carbon Dioxide	487
Part II. Carbon Dioxide Exchange Processes	487
Part III. Net Photosynthesis and Energy Utilization	488
96. Light Intensity and Rate of Photosynthesis	489
97. Photochemical Control Mechanisms of Higher Plants	491
98. Respiration Rates: Bacteria	492
99. Respiration Rates: Slime Molds and Fungi	493
100. Respiration Rates: Lichens, Algae, and Bryophytes	499
101. Respiration Rates: Vascular Plants	503

IX. METABOLIC END PRODUCTS

102. Excretion Products in Feces: Man	515
103. Excretion Products in Sebum	517
Part I. Man	517
Part II. Vertebrates Other Than Man	518
104. Excretion Products in Sweat: Man	519
105. Excretion Products in Urine: Vertebrates	521
Part I. Man	521
Part II. Mammals Other Than Man	528
Part III. Chicken	532

106. Urine Electrolyte Excretion Rate: Vertebrates	533
Part I. Terrestrial Mammals	533
Part II. Aquatic and Semiaquatic Vertebrates	535
107. Renal Tubular Reabsorption of Electrolytes: Man and Dog	536
108. Various Protein Diets and Nitrogenous Constituents of Urine: Man	538
Part I. Average-Protein Diet	538
Part II. High- and Low-Protein Diets	539
Part III. Protein-free Diet	540
109. Nonprotein Nitrogen in Urine	540
Part I. Mammals	540
Part II. Birds, Reptiles, and Amphibians	541
Part III. Fishes and Ascidians	544
Part IV. Invertebrates	545
110. Water Turnover: Tabular	547
Part I. Terrestrial Vertebrates	547
Part II. Aquatic Animals	550
111. Water Turnover: Graphic	551
Part I. Mammals	551
Part II. Birds	552
Part III. Reptiles	553
Part IV. Amphibians	554
112. Water Excretion: Aquatic Animals	557
Part I. Mammals, Reptiles, and Amphibians	557
Part II. Fishes	558
Part III. Invertebrates	560
113. Renal Function Tests: Vertebrates	562
Part I. Man	562
Part II. Vertebrates Other Than Man	567
114. Gnotobiotic End Products	572
Part I. Composition of Cecal Contents and Feces: Dutch Rabbit	572
Part II. Calcium and Phosphorus Intake and Excretion: Dutch Rabbit	573
Part III. Composition of Urine and Feces: Rat	573
115. Bacterial and Fungal Metabolic Products Useful to Man	574
Part I. Antibiotics	574
Part II. Industrial Fermentation Products	577
Part III. Foods and Beverages	580
116. Products of Fungal Metabolism	582
117. Trace Elements Affecting Production of Bacterial and Fungal Metabolic Products	594

APPENDIXES

Appendix I. Scientific Names and Corresponding Common Names	597
Part I. Animals	597
Part II. Plants	610
Appendix II. Common Names and Corresponding Scientific Names	613
Part I. Animals	613
Part II. Plants	626
